> operating techniques.
>[stuff deleted]

Packet radio already existed. Somebody (I can't remember his position
or whether he was a ham) in what was then the Department
of Communications here in Canada, with a name like deMercado, had had
some experience with Aloha Net in Hawaii. He decided it was time
for hams to move forward, and so he changed the rules in Canada to
allow packet radio, and introduced the Digital License. That license
carried no code test, but what was said to be a more complicated
theory test, and was VHF only, maybe restricted to certain bands. I
thought there was also a segement or two set aside for packet that
only Digital License holders could use. I remember he came and talked
to one of the local clubs in 1977 or 78, so long ago that the details
are vague.

So it's debatable how much ham radio influenced packet radio. On
the other hand, I don't dismiss the value to some individuals, who
got it going in ham radio and played with it, and used that
experience in the commericial area.

I think the influence of ham radio on technology in recent years has diminished. That's less important than whether it is still affecting the young, getting them interested in electronics and radio at a young age and providing them with a place to play with these things.

But up till a certain point, ham radio was basically synonomous with electronics and or radio. You don't have to go any further than Howard Armstrong, who was a ham first and it could be said his work was nothing more than an extension of ham radio, even if it influenced radio tremendously; regeneration (and regenerative receivers) the superheterodyne receiver, the superregenerative receiver and practical FM. You can't do anything in radio without one or more of those things.

A lot of the oscillator circuits are named after people who happened to be hams.

I thought practical narrow band FM for two way communication came from a ham, something like the guy who started Sonar, but that is based on some remembrance.

Amateur satellites certainly must have helped the field. The first OSCAR went up only a few years after Sputnik and must have cost significantly less. The concept of a piggyback launch came from OSCAR, and certainly others have taken advantage of that. There have in recent years been "OSCAR-type" satellites, ie relativley simple and inexpensive, which have probably been mainly experimental but have either helped provide a training ground for satellite work or helped "third world countries" in some way.

And you can find examples of hams supplying practical experience (gained from the hobby) in some of the important projects of the last century. I can't get to it easily, but I read a book about Benchley Park during World War II where they worked on what the other side was doing, and the author mentions right at the end the importance of hams in the practical experience they brought to the process. I think there was a similar mention in a book about radar development during WWII. People would come out of the universites, and know all the theory, but be lost when it came to practical work, but hams had that down because of building their own equipment. And of course when WWII started up, hams ended up filling various technical roles in the armed services.

I thought the first person to play with radio astronomy was a ham. If it was't someone who followed up was.

The US Army tried moonbounce in the forties or fifties, but they needed big arrays and lots of power. Hams followed, using much simpler equipment. I'm not so certain moonbounce has much practical use for society other than hams, since others can put up satellites while hams are somewhat limited, but the process of advancing the art may be as important as whether the technology actually migrates elsewhere.

A lot of the history has been written. The ARRL had or has some books on the history, including that one about "200 meters and down...". "Empire of the Air" by Tom Lewis (and it was a Ken Burns PBS show some years back) dealt with Armstrong, Sarnoff and DeForest and probably is fairly available. There was a book about Armstrong, I can't find my copy right now, first published in the fifties and then in the sixties by Bantam Paperback, that I've found in used book stores that provides good, though not too technical, coverage of his life.

Since you can now get QST easily on CDROM, it would be worth getting the early years, actually get the whole set if you've got the money, and then you can see the history unfolding as it happened. The other ham magazines may not be as useful, since they came later, and more important they aren't as available so cheaply or conveniently.

Once you have the ham history, then you can start exploring where it fits into the rest of electronic/radio history. Whether it was simply implementing something discovered elsewhere, or had impact on society beyond ham radio.

And you might want to dig up an article by John W. Campbell (yes the legendary editor of Astounding/Analog SF magazine) who was a ham and once upon a time wrote some technical articles for CQ. He once wrote an article about "How to be an Amateur" pointing out some of the benefits hams have to innovate for the simple reason that they aren't bound by corporations. I think it was published in an early issue of 73, and then reprinted once or twice. 1971 comes to mind.

Problems with server etc.

I have had email saying costs, server renewal etc caused trouble

Try mirror site www-dl.qsl.net

Apologies to qsl.net in advance if I am speaking out of turn, but I have had email on this topic so I assume it is public knowledge.

Cheers, Bill G0VDE

Just to pull this thing off topic - were YOU in the A52A log??

Good operation I think. Only 100W TX if I remember correctly and they have
very good ears.

Congratulations and thanks to the A5 team.

Cheers, Bill G0VDE.

Hello,

FY - French Guyana : A french team will be on the Salut Islands (SA020)
between may 27th and June 4th, 2000. They will be on usual Iota frequencies
from 80 to 10m and also on 6m. The activity will be in cw, ssb and sstv. The
callsign has not been issued at this time. QSL to F8BXI via direct or buro.
Further informations on the web site : http://f8bxi.free.fr

The team will be on Royale Island. This one counts also for the french DIFO
award as FY009. More informations on DIFO Award here :

=======
Hi Dave -- Calling frequencies can be found at URL:
http://ac6v.com/pagecall.html

A good way to listen for DX on 6M is to leave the rig on the calling frequency (CW, SSB, or beacons) squelched down lightly. Also our local packet cluster has been a good source of 6M DX activity. Some here in San Diego have recently worked KH6, 3D2, VK, ZL, XE, YV, VR6 and others. But one can listen all day and not hear a thing. Try the 50.110 DX SSB Calling Frequency or 50.090 CW Calling Frequencies

DX times have been variable throughout the day.

1828. Active Beacon Wizard ++ 2.5

Newsgroup: rec.radio.amateur.dx
Date: 2000-05-13 00:00:00 UTC
From: Jim <jim@taborsoft.com>
Message-ID: <shrarq4lje494@corp.supernews.com>
Source record: 20663

Howdy,

ABW ++ displays the currently active NCDXF beacon over a topographic map, along with the solar terminator. Tools for setting the system clock, via the net, are also provided.

ABW ++ will also download and display up to fourteen selected Space Environment Center (SEC) solar reports and forecasts. In addition, ABW ++ provides the comprehensive SEC glossary of solar terrestrial terms. This glossary, along with report explanations, is provided in windows-help-file format and may be of useful when interpreting the propagation reports and forecasts.

In addition, ABW ++ provides a beacon-cw simulation function. This function uses the system sound card to create the international morse code sounds of the NCDXF beacons. This is mainly intended for demo and training purposes.

Screen captures and basic information along with the publicly download able version, are available at:
http://www.taborsoft.com/abw/

13/5/00 2330 UTC

Yesterday's weather hampered efforts to get all stations on air.

Currently there is one 20/15/10 station running and the four remaining
crew members are hurriedly erecting antennae and assembling the
second HF station and the WARC station.

Also expect the AO-10 and 6M stations to be operational today.
==========

The low-band station will be on from tonight using the Battlecreek Special.
==========

The second 20/15/10 station will allow simultaneous SSB and CW QSOs.
==========

Eu please note, your comments re QRM on 3501 have been actioned.
80M CW will now occur on 3.503.
==========

Today is a lovely day on Willis, currently 27C, and a visibility on 30km.
The waters surrounding Willis are crystal clear, with a 60m visibility.
==========

The first amateur was Marconi in the history books but you
might want to check out Braun, Tesla, and a few others.

"Marconi shared his Nobel prize with German physicist Karl Ferdinand Braun, b. June 6,
1850, d.Apr. 20, 1918, in 1909 Nobel Prize for physics with
Guglielmo Marconi for his work in developing the radio.

Braun, who spent his career as a professor of physics at
German universities, increased the range of Marconi's
transmitter, invented the crystal rectifier (a device that
allows current to flow in only one direction, and improves
radio transmission), and later invented the oscilloscope, a
cathode-ray-tube laboratory device that was the forerunner of
today's television and radar tubes."

Source: The New Grolier Multimedia Encyclopedia

Another great innovation that hams brought to the party
was helping people in times of distress - for FREE! Ironic
that a group of people known for "intense thrift" would give away
life saving services at their own costs - sometimes putting their
own lives at great risk too - and expect nothing in return!

Good luck with your thesis - please post it when done so we
can all enjoy it.

73!

Kevin:

More Re: Marconi the amateur.

I have in front of me here a hard cover book "The wireless experimenter's manual", by Elmer E. Bucher, Wireless Press, Inc. 1920, LCCN 20-5750, LC Call Number TK9946.B85. In the back of the book is a tear out page which is an application form to join "The National Amateur Wireless Association", the fee for joining is $2.50. The address for the Association is given as 326 Broadway, Room 301, New York.

The head of this Amateur Association is listed as: Gugliemo Marconi, President
There is a National Advisory Board of Vice Presidents listed, which includes: Prof. Arthur E. Kennely, Harvard, Prof. Alfred N. Goldsmith, College of the City of New York, etc...

The text on the application reads... "Join Now" You should be a member of the organization that is doing real things for the advancement of amateur radio. etc.... I could make a xerox copy of the application form and fax it to you if you wish.

In recent years we have such "amateurs" as...

Phil Karn KA9Q...

who almost single handedly introduced the Internet's TCP/IP protocol suite to the modern personal computer [IBM clones as opposed to the Unix based computers] by the release of his "KA9Q" TCP/IP "stack" as free ware. Many professional programmers had said that the base PC with the 8086 microcomputer and 640 K of memory could never support such a complicated communications stack and that only powerful Unix machines could do that! Well... Phil did it anyway and then...

This KA9Q "stack" was picked up and modified by many commercial interests and led to the exponential growth of TCP/IP on the PC platform, and made a very large contribution to the commercial growth of the Internet.

<wd1v@amsat.org> wrote:
>The first amateur was Marconi

I'd think he fall into the "professional" catagory rather than
the "amateur" catagory. He had visions of $$$ in mind all the
while he was perfecting his apparatus. Note that his equipment
contained nothing original -- he utilized ideas and devices of
the legions of inventors who came before him. (For example, in
Blake's HISTORY OF RADIO TELEGRAPHY AND TELEPHONY, an encyclopeadia
of early wireless circuits, Marconi's apparatus isn't presented
until page 100 -- 99 pages of circuits and their descriptions
come before him.) We can thank him for putting all the pieces
together into a workable system.

4W/W3UR & 4W/N5KO QSL CARDS IN DAYTON

QSL cards for the East Timor DXpeditions--4W/W3UR & 4W/N5KO--will be available

in Dayton at The Daily DX booth (# 520).

QSL cards may be picked up during the following times:

Friday, May 19: 12:00 Noon - 4:00 P.M.
Saturday, May 20: 9:00 A.M. - 11:00 AM and 1:00PM - 4:00 P.M.
Sunday, May 21: 9:00 A.M - 11:00 AM

The 4W/W3UR - First DXpedition to East Timor presentation will be given at the

high
school at 11:30 AM on Saturday.

You don't need to bring your QSL cards with you but you might wish to
check your QSOs in the 4W/W3UR database by checking the on-line logs at
http://www.dailydx.com/4W6DXlog.html (no on-line logs for 4W/N5KO).

This special in-person QSL operation will provide only YOUR OWN PERSONAL
4W/W3UR and 4W/N5KO QSL cards; we cannot issue cards on behalf of your friends

at this time. Also, QSLs at Dayton will be for both US and DX.

Monday 06.20 UTC

The WARC and CW stations are operational.
==========

Also expect the AO-10 and 6M stations to be operational.
==========

The low bands have also been activated.
==========

The second 20/15/10 station will allow simultaneous SSB and CW QSOs.
Status is yet to be confirmed on the second station.
==========

DEPARTURE DATE/DURATION OF OPERATION - Expected to be operational
until Wed 24th May, possibly Thurs 25th May at latest.
==========

Heavy tropical QRM makes copy difficult on some bands at certain times
so please allow for this.

From: "bill.rothwell" <bill.rothwell@nospam.btinternet.com>
Message-ID: <391f9d7e@news.server.worldonline.co.uk>
Source record: 20678

NEWS UPDATE - VK9WI.
====================

Thank you to those who provide valuable feedback with comments on the VK9WI operation.
We would like to make this DXpedition as successful as possible.
Please e-mail your pilots if you have something to contribute.

==========
RTTY - 28.088MHz 2300UTC daily towards USA. Also look for RTTY on 20M & 15M.
This station has only been activated in the last day or so.

==========
The WARC station is operational today.

==========
East Coast USA - The East Coast will receive some more attention.
West Coast stations please be patient, as your window will last longer than the East Coasts.
Signals are considerably stronger from the West Coast too.
==========

Frequency schedules - some of you have commented that the operators are not sticking
to the published schedule.
There is much tropical QRM and operators need to adjust for that.
They will try to stick to the frequency schedule where possible.
==========

160M - Please note that the 160M operator will alternate between 1.821 and 1.827.

80M CW - Operations now on 3.503 at EU request, however it has been pointed out that
US General class licensees cannot operate down that low. This also applies to 20M & 15M.
This is currently being considered.
==========
160M & 80M - Will try be on earlier for South America and East Coast USA.

==========
Country & Number splits - This is necessary due to the huge number of stations all calling at once.
Please be patient with the operators.
==========

QSL Info - Your request at more frequent announcements has been noted and actioned.
QSL direct to VK4APG inclosing USD$2.00 or TWO IRCs to cover return mailing costs etc.
==========

Hi Jim -- I've compiled all the calling frequencies that I could find at URL:
http://ac6v.com/pagecall.html

Covers national calling frequencies, IOTA, QRP, DX, county huniters, PSK31,
etc. No "national calling frequencies" for 20M and 15M that I'm aware of --
but there are some "QRP, IOTA, etc there. Let me know if you find others.

Hello!

I'm very new to Amateur radio, having only recently been assigned my callsign, & not yet with a radio! I was just curious though...For these DXpeditions, such as the one to Willis Island, which authority grants these individuals a temporary callsign for that geographic location? Is it the country that the island in question belongs to, or what? I'm just curious!

Yes, callsigns are always assigned by the government responsible for the territory where the operation takes place. That said, many governments will allow you to request a specific callsign, as long as it's consistent with international treaties. (the Canadian government will not allow you to request KG1SI for an expedition to Sable Island, NS, because the KG1 prefix belongs to the United States. They probably *would* let you request VG1SI, as VG1 *is* a Canadian prefix.)

Many countries have specific prefix patterns for offshore islands. For example, there are no VK9 stations on mainland Australia - the prefixes VK1-VK6 and VK8 are used there. (plus VK7 on Tasmania) VK9 is reserved for Australian offshore islands, and the letter after the 9 indicates which one. VK9NS is on Norfolk Island; VK9WI on Willis; etc..

That might be stretching it. I think MIT's PCIP predated the KA9Q software,
and probably had a larger base of commercial derivatives before CPU speeds
outgrew them.

But look at RFC 1122 for references to the "Karn algorithm" for computing
more accurate round trip time estimates for TCP. I think there is an
ACM SIGCOMM paper referred to in there. I'm pretty sure this came out of
the work with amateur radio TCP/IP (a lot of the really good, fundamental
insights into TCP protocol dynamics in the 1980's came from the experience
of running TCP over the really crappy networks that existed then).

1852. VK9WI News 16/5/00 0606 UTC - bad news....

Newsgroup: rec.radio.amateur.dx
Date: 2000-05-16 00:00:00 UTC
From: "bill.rothwell" <bill.rothwell@nospam.btinternet.com>
Message-ID: <3920e6a2@news.server.worldonline.co.uk>
Source record: 20687

THAT WASN'T IN THE PLAN!

One of the team members has broken his leg, just above the ankle.
This occurred last night whilst trying to get off the catamaran. A large
wave came along, upset his balance and cleaned him up!
==========

An SES chopper is flying out from Cairns to pick him up this morning.
The chopper will have to re-fuel whilst on Willis in order to make the
return journey. The WARC antenna is temporarily coming down this
morning so that space for a landing pad for the chopper can be made.

Needless to say this means there is a 25% reduction in available
manpower. The four remaining members of VK9WI will work hard to
try and satisfy everybody's needs, but unfortunately some operations
may have to cancelled.
==========

STATION STATUS - 20/15/10 - There will be only one 20/15/10 station running
at a time.
ie; no simultaneous SSB & CW operations.

AO-10 - The window to the USA is available today and not
returning until May 26. At this stage the team have to leave on the
24th, and given they are trying to airlift a member out today it seems
doubtful AO-10 will get up today. They will try.

==========

LOGS - We expect to have this facility available in the next 36 hours.
==========

Thank you for your patience. As stated above the close down date is
planned as 24th May.
==========

Again, thank you to those who provide valuable feedback regarding
this operation.

73, from your pilots, Adam VK4CP & Bill G0VDE.

i have a Alinco DX 70t with the edx-2 auto tuner, I am running this in a 1991 Chevrolet Caprice v-8. The problem is ignition noise. Its been a problem with every radio install. My dads car, also a 1991 Caprice has the same problem. Were using resistor plugs. I need suggestions on how to rid the car of this noise, have one filter in line, still doesn't solve problem. noise is about 5-9 and s9 on am.
Has anybody else had these issues with the Caprice & or GM Cars? any help or advice appreciated.

As I remember Phil Karn introduced TCP/IP for amateur radio at one of
long gone Mid-Atlantic Packet Radio Council meetings.... (the one held
in Savage, MD). I can't put a year on it. But at the time the TNC-2 was
rumored but not yet a reality.

It was an amateur radio adaptation of the existing TCP/IP. Just as AX.25
was
an amateur radio utilization of the existing X.25 transfer protocol.

However, I think Phil did a lot of development for TCP/IP in his job
(memory wants to say that he worked for Bell but I may be wrong)

If I root around in the attic I might be able to find the diskette
he gave out that day.

But going on from here....
While packet radio was what we could call a "reverse" development in
amateur radio, meaning something we adapted, it sure did open the door
for commercial development of mobile data services.

I haven't had that experience with ham radios, however I did at one point get nasty ignition noise on the car stereo. I have a '75 Dart (V-8, of course), and what I did, is install
8.8mm Accel Spark Plug Racing wires. They're supposed to keep more of the electrical energy inside their heavier insulation, so you will have better RF suppression (and more juice getting to your plugs!) Hope it helps!

Regarding ignition noise, it is hard to diagnose from a distance, but I'll try to give a pointer or two. I think it is unusual to have much ignition noise from a GM car, but it does happen with all vehicles from time to time.

1. Run all power leads direct to the battery.

2. Check all installation issues (antenna mount, coax for bad connect-ions, etc.

3. Ground the radio via shortest route to frame/body.

4. Make sure that the body has good ground to frame--might even run gnd straps to frame at both ends.

5. Make certain antenna mount is grounded/installed correctly.

6. Ground hood and trunk on both sides near the hinges.

7. Ground muffler(s) with braided straps to frame. (Welds often do not provide a good RF ground.

8. Remove antenna and see if noise is still present with whip off. If it is, it is RADIATED noise.

9. If it is radiated noise, then you have to find what is radiating the noise to the antenna. I once found that ignition noise was following the taillight harness back to the light bulbs and radiating the noise onto the antenna. So remove the light bulbs in the taillights and seeif it stops.

10. I have never seen any inline filter remove ignition noise. So in-stall caps across the alternator (for whine), and across the power leads for electric fuel pump (if any).

11. How long has it been since the plug wires were replaced?

These are just some of the things you can do to stop the noise. It may be something simple, or it may be hard to trace. Chevrolets are usually not very noisy, so I tend to think there is something amiss with the electrical system (plugs, wires, etc), or the rig/antenna is not in-stalled properly.

Good Luck,

Jerry

WA2FSO,
First, lets find out if your getting the noise through
the power lead, or the antenna. To do this, while the car
is running, and your hearing the noise, disconnect the
antenna. If you still hear the noise, it's comming through
the power lead. If the noise disapears, it's comming in
through the antenna.
While plug wires may make a difference, they aren't the
only source of noise by any means. The same methods of
getting rid of noise always apply; shield, by-pass, and a
five gallon bucket of torriods. '91 usually doesn't have
a fuel pump in the tank, but it can have an electric fuel
pump. If so, by pass it with a capacitor. Try grounding
the motor block to the chassis, body panels to the chassis,
the radio/antenna to the chassis. Everything you can think
of to the chassis. The individual body panels, etc, will
make a small difference, but they are all accumulative. The
'total' can make a big difference.
One note on grounding straps. 'Braid' works fine when
it's first applied. Over a period of time, it will deteriorate
and the 'ground' will suffer. I'm not talking about tarnishing,
I mean that the weather/polutants/etc will make it 'rot'
away. Use a metal strap, such as copper flashing used around
chimneys etc. The bigger the better, within reason.
Good luck.......
'Doc
PS - By-passing the power lead, etc, is never a bad idea.

I have a '91 GMC 1500 truck that probably has the same hardware
as your Caprice. I get lots of noise off of the spark plug
wires. I've found that replacing the cap, rotor, plugs and all
the plug wires including the coil wire about every 50,000 miles
helps keep the noise down. It also helps to clean the contacts
on the spark plug wires periodically, especially the end that
goes in the distributor cap and ignition coil because they get
white powdery deposits that will create a spark gap. If your car
is like my truck it has a separate ignition coil. Make sure to
clean both ends of that coil wire. I found that the dealer had
neglected to do so and I got an incredible noise on the radios.
That high energy ignition will force a spark through an awful
lot of crud to keep the engine running and create a lot of RF
noise while doing it.

Dear OM

I have read the postings here advising you of what to do. Its all good advice. Unfortunately I had a Chevrolet Caprice 1987 with the same problem as you and never was able to curb the ignition noise, maybe a couple of db's that was it. My 706's blanker made no difference, in fact it was overwhelmed.

I did all the things the others have advised and then some with no satisfactory results. I even went so far as to buy an ANC-4 noise eliminator and put a sense antenna directly into the engine compartment and tried to phase the noise out but to no avail. Just a waste of $160.

I even questioned the General Motors engineers who show up at Dayton every year in a special booth inside and they did not know what to tell me. Every solution they suggested I had performed with negative results.

I tell you this to help you avoid going through a very frustrating experience. These GM cars pump out 40kv spikes that no kind of suppression, even digital, can cure. Bad design or what, I don't know and no longer care. I would set my sites on getting another vehicle down the road and assure myself it is inherently quiet. As for me, I mobile as a portable on HF. As soon as I start the engine and begin to move I turn the rig off so my blood pressure dosen't begin to boil.

The only vehicle I ever had that I could HF mobile in was a diesel. Do yourself a favor and give up on the Chevy. Sorry to be negative but that is my advice to you.

1868. Where was this DX operating from? CE0Y/LX1NO South America 1

Newsgroup: rec.radio.amateur.dx
Date: 2000-05-17 00:00:00 UTC
From: wa2ise@netcom.com
Message-ID: <8ftcj3htn1@slb2.atl.mindspring.net>
Source record: 20753

I worked the above DX station, but I'm a little confused as to where he was operating from. CExx is Chile, but LXxxx is Luxemburg. How does the format go? I assume he was operating from a country he is visiting, and the host country's "FCC" issued him a callsign. I would guess he is visiting Chile? At least that's what the '78 Handbook says these prefixes are located.

Worked him on 20M around 8:30 PM local time, from California, using a TS440S and a lousy attic dipole-ish antenna.

1869. VK9WI - 17/5/00 - NEWS UPDATE. (Nothing much happened today!!)

Newsgroup: rec.radio.amateur.dx
Date: 2000-05-17 00:00:00 UTC

17/5/00 - SOLDIERING ON!!
==========

A big thank you to those wishing Peter well. He suffered a compound fracture and was operated upon yesterday in a Cairns hospital. Willis Island is approximately 458km East of Cairns, and Cairns is 1,400km North of home, Brisbane.
Peter is actually the QSL manager for the DXpedition, so I'm sure some kind words along with your QSL request and donations will go along way, hi!
==========

Winds have picked up around the Island and one of the operators, who has a minor cut to his leg from another incident aboard the catamaran, is having to spend time aboard the cat. This is necessary so as to insure their only means of return transport doesn't float away in high winds and swell! There wasn't room aboard the cat for the fridge/anchor!!! (sorry, that's an in-joke there!)
==========

Manpower - For most of the time VK9WI is manned by only three operators. Please bear in mind they also like to eat, and get some sleep too. There have been
many, many requests for this and that and the team is attempting to satisfy everybody as best as possible. Having said that you will appreciate that only so much can be done with three ops.

==========
The highest priority is to give a new country to people on at least one band.

==========

RTTY - Requests to look towards EU have been acknowledged. We will advise of times/freqs.

==========

Operating Schedules - An operating schedule should be available in the next 24 hours. The operators have a fairly good idea of propagation by now and plan to get something together, even if it is basic. They would, (and I'm sure you would too) prefer them to spend their limited and valuable time actually on-air.

==========

Logs - The 36 hours isn't up yet!!! Seriously, we are sorting out a few problems here, but rest assured they will be on-line soon.

==========

Photo Gallery - Five pictures were added to the site last night. Click on the "Gallery" link. These were taken by a digital camera only yesterday. Watch out for more pictures of the operation soon.

1870. VK9WI Wednesday Update 17/5/00

Newsgroup: rec.radio.amateur.dx
Date: 2000-05-17 00:00:00 UTC
From: "bill.rothwell" <bill.rothwell@nospam.btinternet.com>
Message-ID: <39228bfc@news.server.worldonline.co.uk>
Source record: 20755

OZ Time - Wednesday Evening Update 1130 UTC

==========
Further to this mornings news...

WARC - The antenna went back up this afternoon. This had to come down to make a clearance for the helicopter to land.
==========

AO-10 - At this stage, because of injuries and limited man-power I don't think we'll have time at all for AO-10. Apologies to all involved.

==========

QRT & Departure - It looks like we'll have to pack up the heavy gear for loading onto the boat for low tide 1600 local Sunday 21 May (that's 0600 UTC), and sail out on the high tide Monday 0100 UTC. Sea conditions are calmer on the lee side of the island at low tide. Because of crew limitations now, packing will be more onerous and time consuming and must be allowed for. We'll try to maintain barefoot/simple aerial till the last minute.
So QRT NOW Monday 22nd.
==========

The New Chef - Food is great! Harry is a superb cook, but don't tell his YL!!! You see, Peter was the chef, until his mishap.
==========

Logs - Logs (as of 0630 UTC today) should appear any tick of the clock. They have been e-mailed to N6RT for processing so as to appear on the VK9WI web site. Please note that RTTY contact aren't include as yet - that log has to be retrieved off another laptop. 6M contacts appear as "SAT" and approximately 200 of the early contacts made are in a hand written log, yet to be computerised.
==========

73 from your pilots, Adam VK4CP & Bill G0VDE.

Yes it works fine for me, just clicked on it in the above message and
was taken right to the Magnecor wires site. It is sp[elled correctly
and the URL is correct.

I noticed I could not access a few sties last night, might have been
net loading.

Find a nice pre-1976 Mercedes diesel for about $1500. Spend a few
thou restoring it. The only electronic noise comes from the cars
driving by you. The "computer" is a lambskin diaphram sensing the
airflow in the venturi at the intake. It never bothers 40
meters....(c;

Mine's a 1973 220D. Finest ham radio car in the world. The HUGE
battery and 85A alternator have no problem pulling the Yaesu FT-900
and souped up TenTec Hercules II running 650W output to a 15' homebrew
monster with 6" Texas Bugcatcher coil and 36" cap hat. Only problem
is the dash lights glow when you use it on 75 meters. Something must
be resonant in the wiring...(c; The MECHANICAL voltage regulator
never gets overrun with RFI at any power level.

It'll stall a Cadillac as it passes you on the interstate....hee hee.

My experence is with my 87 Suburban. The HEI ignition is a killer and my first rig, a DX70, had virtually no noise blanker whether in the mobil or out. So I traded off and put a 706MKII in my Suburban. Ignition noise still a problem until I got the Magnacore wires. Now that helped a bunch. I did all the grounding, etc and cleaning you could imagine. I run the 706 with a Bandhopper screwdriver antenna and use a Ten Tec amp. So far my HF mobil ops are really fun.

Jim,

I have a 24/7 internet connections that I could put it up on.
I don't currently or plan to have a TNC. Seems like more work
than it is worth. I am a software architech and understand
software testing. My QTH is New Hampshire.

Hope I can help.

If you take Bill Kane's advice and give up on the Chevy, consider a Ford
with the 460 engine. I have a '96 F-250 pickup that I can operate HF mobile
in WITHOUT THE NOISE BLANKER. It really is that quiet, believe it or not.
I have been HF mobiling for almost 40 years in all kind of vehicles and have
never seen anything as quiet. YMMV, of course, so take a shortwave receiver
with you when you go car shopping and try to ignore the puzzled looks from
the salesman.

I've not been active for a few years now, but I used to be an avid dxer.
Just wondering...

When did the UK start issuing callsigns with spaces in them? I don't
remember it being that way a few years ago. Doesn't that make it kind
of tedious on cw when you have to include all that extra time for the
space? I mean, it would be bad enough that you'd have to tap out those
three numbers in that GB callsign, but then a space too ?! Sheesh.

Or doesn't anyone use cw anymore? <shrug>

Geez, it seems like a lot of things have changed.

1883. Radio Am Bulletins in Real Audio

Newsgroup: rec.radio.amateur.dx
Date: 2000-05-18 00:00:00 UTC
From: Jeremy Boot <asperges@innotts.co.uk>
Message-ID: <1878iskfo20vn16lkaak3rpa5d6md9op4a@4ax.com>
Source record: 20768
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.antenna,rec.radio.amateur.dx

The GB2RS news bulletin for 21st May 2000 is read to you in Real Audio at:

http://listen.to/gb2rs

There are links to relevant sites as well as to other countries' ham radio news services.

This edition of GB2RS is also transmitted in the Nottingham area on Sundays at 10.30am and Mondays at 10.30pm by G7WFM on 431.075MHz as well as simultaneously at those times over Internet.

The Effect of the RealAudio Bulletins
~~~~~~~~~~~~~~~~~~~~~~~~~~

Although the idea was to provide fellow amateurs with a convenient new service, there have been some surprising extra spin offs:

* The bulletins are now heard much more widely than
before
* You can hear them at any time
* They are useful to those with visual impairment
* They are carried world wide by other Radio Amateur News
Services
* They are heard "live" on Sundays and Mondays on
Internet Gateways

In addition, excerpts of the News are now carried many weeks by US, Canada, Australia and South Africa Amateur Radio Society news services and also by some DX news programmes such as those on HCJB in Ecuador!

The Bulletins are updated weekly.

Message-ID: <39238edd@news.server.worldonline.co.uk>
Source record: 20771

WARC CONCENTRATION TODAY
==========

WARC - With the WARC antenna back up the guys will concentrate on 18 & 24 today. Running 24MHz now (2300 UTC) until approx 0200 UTC. Operation on 18MHz then approx 0200 - 0800 UTC.
==========

6 Meters - Monitoring all the time on 50.110MHz, and calling frequently. If there is an opening they will tell you to QSY 50.115MHz and work you there. Once all station have been worked they will return to 50.110MHz and continue monitoring.
==========

15 CW - Approximately 300 - 400 EU's were worked on 15 CW yesterday. Hopefully this has taken some of the pressure off this band/mode.
==========

Departure - The team will be leaving Willis Island this Monday, 22nd May. See Bulletin
11 for more detail.
==========

80 M - Please note the Battlecreek Special although working great on 160/80/40 does not tune up around 3.799MHz. 80M operation is limited to CW on 3.503MHz.
==========

CW Spots - .025 is too low for some license classes. Depending on how things go Sunday they may try to get higher up the bands so you can have a shot at working them. This will only occur on the last day, as many have been complaining already about the team not sticking to published frequency schedules, and they are trying to stick to those +/- QRM.
==========

Logs - Unfortunately these were meant to be on-line by now. One of the individual CT BINary files that was received back in Brisbane was corrupted in some way. This will be repaired and on the site ASAP. In the meantime we'll have some of the log available. Please don't panic if you've worked them and do not yet appear! You will!
==========

Operating Schedule - A very basic operating schedule has been cobbled together. Please check the schedule page for further details.
==========

Local WX - A pretty ordinary day today on Willis. Rain and very windy.
Temps generally mid 20's (C).
Sounds just like Europe hi hi....

Hello folks!!
Just wanted to let everyone know that there has been major improvements to
the world wide voice & Text chat system for hams!! There is now the
provision for private chat rooms. The idea is that you wait for someone to
arrive in the main chat then go to a private chat with them if you wish. The
audio in the system rivals that of anything currently available and also
supports a text chat on the same screen. Use the system to set up skeds,
check the muf on a freq, meet new hams, have meetings or just plain ragchew.
Go to the url here to directly enter the chat
http://home.earthlink.net/~mitbr/AmateurRadioChat.htm
If no ones there when you arrive simply hang around for awhile while you
surf the net some one will come along!! Spread the word folks .

>space? I mean, it would be bad enough that you'd have to tap out those
>three numbers in that GB callsign, but then a space too ?! Sheesh.

Photos in some of the older literature shows station setups with
callsign plaques/signboards in the photos -- many times there is
a space separating prefix from suffix. Must be some long-forgotten
tradition.

It's a well done great looking award. It added alot to the wall in my shack.
With the great propagation of the last couple of months, the ARRL should be
selling a bunch of these.

"More CW & RTTY everywhere"

CW/RTTY - There will be more CW & RTTY as requested - on all bands.
==========

Logs - During the chaos a few operator errors have appeared in the logs whilst logging. Notes have been kept and logs will be corrected manually once they are home and actually have time to scratch themselves. We hope to present updated logs on-line in the next 24 hours.
==========

10CW - This was hit pretty hard yesterday. We hope those wanting it got it.
==========

Equipment failure - Some switching has failed resulting in only one HF station having a linear. The low band station is still running with linear.
==========

Comments to pilots - Even though you may not receive a personal response, rest assured your messages are being passed on.
==========

1898. VK9WI - 20/5/00 - HORRIBLE WEATHER....Battling through....

Newsgroup: rec.radio.amateur.dx
Date: 2000-05-20 00:00:00 UTC
From: "bill.rothwell" <bill.rothwell@nospam.btinternet.com>
Message-ID: <39262c98@news.server.worldonline.co.uk>
Source record: 20783

FIGHTING THE ELEMENTS....
==========
15,000 QSOs and climbing - (This bulletin released 20/5/00 00:01 UTC - 10:01am Willis time)

==========
WX - The weather at Willis Island has been awful the last few days. Some of the tents were flooded last night & personnel had to sleep in one of the Met Buro sheds. Today, Saturday, the heavy showers have decreased to rain, with 30-35 knot winds. (and the team still have to sail home across 200+ miles of open ocean!!)

==========
6M - Lots of JAs were worked last night with Hong Kong and VK4FNQ too.

==========
Thank you to JA Operators - VK9WI are impressed and would like to say a special thank you to the JAs for their co-operation when asked to standby. You see, JA is very strong on all bands into Willis, and the team are also trying to listen for the weaker stations that may not have as good a path ie; South America, Western EU, & Eastern USA. When the propagation has closed to those weaker areas then JA will get its turn.

==========
Logs - We hope to have up-dated logs available in the Log Search within 24 hours time.

==========
10M - The team have been working 10M this morning and already have around 20 stations from South America in the log from this morning.

==========
Africa - The team will give some attention towards Africa today. If you are AF please look for them on 10M at 0600 UTC. They will be looking for you!

==========
WARC - 18 & 24 will also receive attention in the next 24 hours as the WARC antenna will be coming down during the day tomorrow.

==========
Low Bands - This will also receive attention local tonight. Comments noted about staying on later for Western EU. (Please bear in mind 1900 UTC is 5am in the morning and there is only one low-band operator working at least 13 hours continuously right throughout the night)

==========
Bump Out - The team have to begin bumping out their Sunday afternoon.

Antennas will have to come down and stations, one by one, go QRT. We'll advise on tomorrows bulletin what will be going QRT in what order.

==========
Peter, VK4APG - Thank you for all the get well messages for Peter. He's doing well and flys back from Cairns into Brisbane tonight. At least he'll have plenty of QSLing to attend to while his leg is on the mend!!!

==========

STARTING TO QRT.
(This bulletin released 21/5/00 05:30 UTC - 3:30pm Willis time)

==========
Low-bands - Nick did an all-nighter last night till sunrise AM and then slept till midday. He's been a tower of strength.

==========
6M - We were still working JA's on 6 (also Taiwan/ Singapore/ Guam / Hong Kong/ and the Philippines beacon was L/C) till 1am local, when the eyeballs refused to cooperate further. The 6M station is now QRT.

==========
WARC - The WARC station is QRT.

==========
HF - One HF station is QRT whilst the second HF station will stay on air until local AM Monday.

==========
Logs - The hand written 6M entries are being computerised at the moment, but it will take some time. Please also note that logs do not include RTTY, yet.

Complete Log - This will be available in due course. Information will be posted on this site and to the VK9WI e-Group mailing list.

==========
Dinner Party Tonight - The MET Buro guys are putting on a dinner party for us tonight so spirits will be high :-) (Willis is an Australian manned WX station)

==========
De-rig - Packing going well, although moving a ton of gear with 2 people is not what you call fun!

==========
We hope this DXpedition has given you a new country on at least one band.

The group is considering the activation of other VK9 islands in the future and generous support of this DXpedition will help those plans come to fruition.

73 from the pilots, Adam VK4CP and Bill G0VDE

Hello!

I was doing some price/feature shopping, and found the IC-746 and Yaesu's FT-847 to be quite similar. I want a transciever that can do HF, 6m and 2m. Anyone owned/operated either? Any pros and cons for either would be greatly appreciated, to help decide. This will be my first radio, as I am fairly new to the hobby. I would have bought a handheld, but I'm going to be moving to an isolated community, where there is no repeater for 388 km. I kinda doubt that a little 5W handheld could pull that range! Thanks!

Andrew

Andrew,

First welcome to the hobby. I am in the same boat and have ask a lot
of people. The answer always seems to be that Yaesu is a good radio,
but the 746 is a great radio. A friend just got the 847 a while
back and has said that he would go with ICOM. The only reason
he got the 847 was for sat. work. So if you don't care about the
440 band then I would go with 746. That is what I am going to do.

I have been told and maybe someone can help out here that the
847 isn't a good rig for contesting/DX. I heard the second
hand so I don't know the details. I might change my mind yet
about the 847.

thanks all

Source record: 20790

Andrew,

I own an 847 and there are a few downsides to the radio. First for DX-ing, there is only one scratch pad memory. I think Yaesu could have dedicated more memory to this function. Also, I found the receive to be slightly noisy (possibly IF noise), as to it having a slightly high noise floor. If you tune up a station and then disconnect the antenna, you will find all radios have some noise. Seeing I do not have the ICOM to compair it to I suggest you do so if you have the chance. I have an FT-990 HF rig that has a lower noise floor so that is my compairson reference. The key to this is the lower the niose floor, the more likely you will not loose someone in that noise. One last item, the keypad buttons, to directly enter frequencies, are a little small. If you have large fingers you will wind-up hitting two buttons.

Now for the good stuff: The 847 is a awesome radio! The DSP is excellent and the digital noise reduction is extreamyl useful. The IF shift is a little on the "digital side" but very effective.The radio has excellent interference rejection features.... hands down! The specification between your two radios are not vastly different in that you will see a major advantage (or even a minor one) of one over the other. I believe it all comes down to the features you want/need.

The 847s' receiver is very good. I've compaired it with my 990, it comes very close! I found by either leaving the preamp on or leaving the digital filtering on, it cures the noise level problem noted above. For me, having all the various bands in one radio is the best for me (I live where ther are a lot of repeaters on 10, 6, 2 & 70.SO for me its great).

Overall the radio is very solid, , but seeing my only ICOM experience is with the IC-707 (very basic, but nice), you will need to judge for your self.

I think either way, you will be getting a very nice, very capible radio!. Make sure it has what you need!!!!

Hope it helps.

Joe

The story goes that it's a good radio out of the box, and
a great radio once you add Collins or INRAD filters. That's
on HF; it's a great radio out of the box on VHF/UHF.

I bought an FT-847 and added the Collins 500Hz CW filter,
which works very well. I haven't changed the SSB filters
yet (there's one each for receive and transmit -- needed
for duplex (satellite) operation, and also used by the
RF speech processor).

Otherwise, the 847 has 70cm which the 746 does not,
but the 746 has 100W on 2m while the 847 only has 50W.
The 847 has duplex operation while the 746 does not.

I'm very happy with my 847.

Greetings and welcome to the ham radio. I have owned both Yaesu and Icom rigs and I am completely sold on Icom for one reason, the transmitting section. They both have wonderful features and I am sure you would be happy with either, but after much research, I have found the transmitting section of the Icom rigs is much more robust. If you plan on running full duty cycle (full power) using AM, FM or RTTY, you can only transmit for a MAXIMUM of three minutes on the Yaesu and then have to let it cool off for another three minutes. I know this to be a fact since I smoked the drivers and finals in my dear old Yaesu FT-747 many years ago! With the Icom, when they say full duty cycle, they mean it! I believe the full duty cycle time is somewhere around 20 minutes. This is why I chose the Icom 756 over the Yeasu FT 920 when I bought a new rig last year. Even if you are not planning on running full duty cycle for long periods of time, the heat sink and cooling capabilities of the transmitting section of the Icom radios will keep the drivers and finals much cooler which can only be a good thing for those delicate and expensive transistors!

I regret to report that I was informed by the ARRL DXCC Desk today that QSL cards for XW2A are not acceptable at this time. I have requested that the ARRL Atlantic Division Director look into the matter; ensure that the DXCC community is made aware of the non-acceptance thru ARRL DX Bulletin or ARRL letter, (if not already done) and that the outcome of the research be announced.

While that is disturbing news to those that need that card it underscores the decision I made some time ago after first getting my DXCC certificate to stop sending cards. I do not care to be 'officially recognized' for any further contacts. I do track my country count thru logging software and should I get to Honor Roll numbers will pat myself on the back.

I sure do not need any organization to 'confirm' my qso's for me for some awards program any longer. Furthermore dealing with foreign postal systems that may pilfer the $$ and never deliver the card is a gauntlet I choose to no longer subject myself to. Casting my cards into the postal system and then relying on dumb luck mixed with blind faith to get a return card has absolutely zero to do with my skill in making the contact in the first place. Moreover in closing I would say the day of verifiable email qsl cards is already way over due and once implemented will put many less then honorable and $$ - hungry DX stations out of business for good. My $ .02 worth.

Hello!

I was looking into buying an antenna in the next little while. As of right now, I am entitled to 6m and up, however, I will be starting a morse code regimen in the next few months. Does it make more sense to purchase an expensive 10 band antenna, and not use most of its capability, or would it make more sense to get a cheaper and smaller antenna that would handle 6m and 2m, and buy an HF antenna later. More than likely, I will be using it with an IC 746 transciever. I will be taking my rig to Northern Manitoba (58ï¿½N), and the winds can be pretty cold and brutal up there, so I'm afraid of toppling tower syndrome :)

Any recommendations? Product recommendations? Thanks!

Look on www.contesting.com for a link to KA5WSS's "logconv". It
converts between a variety of logging formats. I'm not certain that
Cabrillo<=>ADIF is supported, but I'd be surprised if it isn't.

I would tend to suggest against an antenna that handles 6m/2m and HF all
in one piece.

A lot depends on how much room you have for your antenna and how
portable you expect it to be. Are you talking about something you
expect to use mobile, or are you establishing a base station?

Andrew,

For base station use, I just bought a GAP Antenna Eagle DX. This weekend I will be stretching her wings on the WPX CW contest. You may want to look into one of their models that covers 2/6M, the Challenger DX I think. Only problem is that you need some buried ground radials, but that should not be too bad. They are designed to be ground mounted (on a 10' mast pipe) so no towers are needed.

About the winds, they seem pretty well built. I see comments of the thing withstanding some fierce winds, but do not quote me.

Good luck on upgrading! HF is alot of fun.

Do you really feel that you will need/want antenna's for "all the bands?"

Just as you will eventually discover that there are one or two modes you
really enjoy you will also find that there are only one or two HF bands
that appeal to your operating style. (chew the fat, collect QSL cards,
emergency operations, whatever.)

Nothing can beat a simple dipole for portability, ruggedness and ease of
reinstallation after the wind blows it down.

For a band like 20 you can homebrew a "plumbers delight" beam comprised of
a couple of elements that will hopefully be rugged enough for the nastiest
Canadian winter.

When the time comes, welcome to the HF world.

Well Andrew, antennas designed for a specific band almost always perform better than one designed for several. However, there are other considerations. How much room do you have for multiple antennas (some antennas will have to be placed on a separate mast because the others will interfere with it)? Do you want to run all that coax for multiple antennas? Will the separate antennas cost more than one? What about the multiple masts, guy wire, and ground rods, if separate masts are required? For many people, these other considerations lend weight to the multi-band antenna.

Hi, folks.

If there is anyone here from the city of Kent in the King county, WA who can provide some useful information and his experience with tower erection and zoning laws, I would certainly appreciate if he can contact me.

I am planning on building a house in the area, so any feedback would help immensely.

Furthermore, to make this post interesting for everybody outside Kent, I am open to any input as far as building a house from the ham radio point of view is concerned. If you were building a house, what would you do to make it DX friendly? (I am interested primarily in DXing and HF contesting)

Any comments, suggestions or feedback?

Thanks and 73,

Zoran WA7AA

Yeah, write to your senator too!! The DXCC people should have told
you why the cards are not acceptable - did they say "no documentation
received"? That's the usual reason, and there's nothing your division
director or parents can do about it. If the DXCC people didn't give
you a reason, ask them for one.

Hi Andrew,

I have Yaesu folded dipole for HF, Force-12 C2SS tribander YAGI (20-15-10),
Comet CA-52 for 6 meter (bad antenna!),
Hygain V2R for 2m & V4R for 70cm, Diamond X-500 dual band (144.430), and
Cushcraft 26B2 for 2m.

All served best for what their design intended to do! (Except for Comet
which is a real bad one).

You can see the pictures in my site: http://www.geocities.com/reinhardsual

My suggestion is make or buy an antenna (or antennas) for 6 and 2, then make antennas for HF later. Dipoles for HF are easy to make, and just as good as the ones you can purchase.

Andrew,

I would avoid multi-band commercially made antennas. They are always
less efficient than dedicated single band ones, besides being very
expensive. The one exception to this is an antenna fed with balanced,
tuned feeders, fed from a good balanced antenna tuner. Such an antenna
will work on most ANY hf band, and efficiently. It is my choice for
multiband with a single antenna. The best arrangement for general use
is a center-fed horizontal wire as long as you can make it, as high as
you can make it. A length of just 66 ft will work well on 40M and up,
and can cost almost nothing to make.
Don't purchase a tuner. You can make one fairly easily with a
capacitor and home made tank coil and link coupling. See any ARRL
handbook of recent decades. The split tuning capacitor for this will
cost you a fraction of the cost of a multiband vertical antenna, for
example.
If you have VERY limited space, try Hustler mobile whips and
resonators, or even a pair of them back to back, making a loaded short
dipole. Quite lossy, but still better than most anything indoors, and
not too expensive.

73 and GL,

Don, W6JL

First, use a wire antenna, put it up as high and clear as you can get it. Feed it in the center with ladder line -- balanced, 450 ohm line. Buy or build a tuner to match your rig's unbalanced 50 ohm output to the ladder line. A standard installation is 135 feet of wire, split in the middle and center fed with the ladder line. Check out QST ads for a device called a Ladder Lock -- it's a neat plastic device that clamps onto the ladder line, anchors the antenna wire, and allows you to solder the ladder line to the antenna wires. In fact, you can find in the QST ads a combination deal, 100 feet of ladder line, 135 feet of antenna wire plus a little for the end insulators, end insulators, and a Ladder Lock.

Do not get to excited about a lot of the stuff you will hear about how to run the ladder line. Just keep it a foot or so away from metal -- like the gutters and downspouts. My shack was in my basement, I punched a hole in the concrete block wall, pushed the ladder line through, filled the hole with foam sealant, draped the ladder line across the roof, up to the antenna, and worked the world on 100 watts.

135 foot long antenna will work on 80 meters and higher; it will load on 160 but is very narrow. 67 feet of wire, center fed, will handle 40 meters and higher.

Try not to shorten the ladder line -- for some reason, this antenna likes about 100 feet of ladder line.

Now, if you can get a tower up, the optimum is single antennas -- yagis -- for each band. However, that gets heavy and expensive -- big rotator, lots of cable, big tower, etc. If you must settle for what most hams have, put up a 50 foot tower and stick a good tri-bander on it. The 7 and 9 element Cushcrafts are good; even the 3 element Cushcraft will do an adequate job. Moseley's have a good reputation but I have read some very critical comments about them of late. Telrex makes a fine antenna also.

A 135 foot wire, fed with ladder line, and a 50 foot tower with a good tri-bander (and some VHF or UHF antennas, fed with 9913 with tower mounted receive pre-amps) will yield a respectable antenna system without breaking your bank account (too much).

Can't dig a hole and fill it with concrete for the tower and cover your property with guy wires? Then buy enough tower sections to clear the top of the house. Bury a tower base in the dirt (or concrete) at the side of the house, and use house brackets to mount the tower to the side of the house. With a two story house, you can get 30 feet of tower -- not the best but it'll do until you win the lottery.

Take a look at http://people.delphi.com/cecilmoore/mystery.htm
to find out why. Look at the current maximum points on the feedline.

Hello Andrew,

See, you ask 15 hams the same question and you get 15 different, but all good, answers! I won't tell you what kind of antenna to buy or build, but I agree with the concept of getting some sort of HF antenna. Even before I got my first license, I bought a multi-band vertical (Cushcraft R7 - mostly due to $$$ and space limitations). My grandmother always told me, "You have two ears and one mouth. Use them in that proportion!". So I took her advice and did a lot of listening during the months when I was studying theory and code. You will quickly be able to determine which operators have an easy to listen to style and which ones do not. When I did get my license, I tried to emulate the style and mannerisms of those operators that I enjoyed listening to so I wouldn't sound like a total "greenhorn" on the air.

Good luck with whichever antenna you decide to buy/build.

Hello again,

To everyone who responded - thank you. I think what I may do is pick up a Cushcraft Multidirectional Yagi. There is one that is a 6m/2m/70 cm tribander. It sounds like it isn't cheap ($285.00 CDN) from a compant called "NTF", in Calgary, Alberta. For the HF bands, I will try to build some verical dipoles, and do lots of listening, as I work on my HF qual. Apparantly, that particular Yagi is light enough to be able to use a simple Radio Shack rotator. If any Canucks out there know of any cheaper Canadian dealers, I'd sure appreciate to hera from them. With the GST, duty, and exchange, it becomes too costly to import from the U.S. Once again, thanks to all!

It you are referring to clusters you can Telnet to, as opposed to web
pages, what's going on was the WPX contest. Due to the unstable,
uncoordinated, messy nature of the global packet cluster 'network',
nodes go down because they choke on contest weekends.

This weekend there were several loops that were ciruclating 4 to 6
hour old DX spots around the world - over, and over, and over....

At one point on Sunday, there was a ratio of 12 old spots being
circulated for every one new spot....

Here are the last few spots from the OH2AQ web cluster as of now,
30-May-2000 at 05:11 GMT:

DL8UI 21038.5 HB4/RS3A 1808 29 May
YB0HD 7031.5 YB0ZZ just to give qs 2225 29 May
N3HF 21026.7 UA3RA 1808 29 May
IK2IQD 28490.0 FR5ZQ/G 0505 29 May
W6UC 21295.0 EA8ID Justo n his new 1811 29 May
W8ERD 21028.0 IT9BLB 2223 29 May
NC8C 28370.0 LU7LJ 2222 29 May

Notice the date/time stamps. Of those 7 spots, ONE is a new spot,
the rest are old garbage that are still being circulated thru the
'network' and it doesn't even have the right date on it, the date
stamp is a day old....

From the date/time stamps on 'current spots' on OH2AQ now,
you can see that some parts of the network are still forwarding
spots that are up to 13 hours old.

At this point, the lack of current spots at OH2AQ is probably due
to the fact that a lot of people running nodes (who are awake)
have turned them off while they wait for the residual mess from
the contest to filter itself out of the loop. And a lot of the people
running nodes who aren't awake are probably down because they
choked on the garbage.

We have a very big problem with the integrity of our cluster network, now that it has reached global scope, but unfortunatly few people are willing to face the fact that we have a problem, and even fewer are willing to try and do anything about it.

Out of curiosity, what were you trying to connect to that was missing ? Send me an email and I can point you at a few network cluster nodes that stay up during contests and filter the garbage for you....

73, Jim KH2D

Got a question for you, Walter. Is 70 mhz a ham band in the UK ?
Blocked a bunch of spots at our local node on 70200.0 this weekend,
and most came from the UK.

I should know the answer to this, but...

Are we sure one can use U.S. stamps and write "USA" on mail to Kosrae?
Isn't FSM now independent?

Unless its a very recent change a US stamp works to any US zip code. Best bet
is ask the post office.

Cross-posted to: rec.radio.amateur.dx,alt.ham-radio.dxing

This DX telnet software checks a few servers one by one.
Goto http://www.ah8dx.com
click on dxtelnet and look over the information.
It really works quite well and has features like voice announce and has
the ability to keep the internet connection alive if your isp likes to
dump you due to inactivity.

Source record: 20548

Dale, I have had my 990 about 5-6 years now and I love it. I do a lot of DX, contesting and RTTY. It performs very well in all modes. Often I can hear DX that no one else is calling. I just wish I could get a gain antenna up so I could crack the pileups on occasion. I run it barefoot, 75-100 watts, depending upon the mode, and I work my share of all except the DXpeditions where I have to compete with kilowatts and tribanders and where everyone has to work the station 10 times just to be sure.

The only addition I would like to make is an external DSP filter, as I find the one on the 990 isn't quite up to par. I will either get a Timewave or put the DSP option on my PK900. I have the extra 2 kHz SSB and 250 Hz cw filters on it and they work very well. I would only consider an FT1000 or MP if someone were to swap me even up, and that isn't likely to happen!

Hope Dayton was fun and you made your decision.

1965. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-02 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <8h7ffkiji1@news.hawaii.edu>
Source record: 20351
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any amateur topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and its
content drifts further and further away from being "on-topic" in the
various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman, KH6O

1968. Internet Accessible AR-Cluster

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-03 00:00:00 UTC
From: Ron <no-spam@no-spam.non>
Message-ID: <8W_Z4.1309$mR.104817@news7.onvoy.net>
Source record: 20354

You are welcome to connect to the internet accessible AR-Cluster at KC0DJO
in Duluth Minnesota.

The IP address is 209.32.226.63

At your first check in you will be asked for your Call, Name and QTH. Please
enter your QTH in the form: Chicago IL or Oslo Norway so that we will know
where all our new friends are from! You will also be reminded to
SET/LOCATION, that's optional but recommended. If you set your location,
then the AR-Cluster will calculate beam headings for you to various
prefixes. For HELP on these commands you may type

HELP SET/NAME
HELP SET/QTH
HELP SET/LOCATION

To see what you have entered type: SHOW/STATION your_call

You can correct any errors using the SET commands.

For more information on AR-Cluster including a Logon Tutorial and Command
List go to:

http://www.cestro.com/pcluster/logon.html

The AR-Cluster homepage is http://149.74.21.166

Ideally you should use your logging program to make your telnet connection.
Its a huge advantage as then your logging program will monitor the dx spots
and alert you to contacts you need. However, here are two very simple ways
to connect. The first uses the built-in telnet client in Win95/98. The
second better way uses the free HyperTerminal Private Edition program.

Using the built-in telnet client:

Click START/RUN, then in the box enter: telnet 209.32.226.63 Now click
OK. If you use a telephone modem for internet access, and were not already
connected, your modem should begin dialing automatically.

Once connected to the KC0DJO AR-Cluster enter your call. If what you type
does not display, then you must turn on local echo. In the Telnet window
click on Terminal/Preferences.. and check Local Echo and then click on OK.

Using HyperTerminal:

I am sure you will greatly prefer HyperTerminal, BUT you will need a more recent copy of HyperTerminal than that which comes with Win95/98. Pick up the latest version of HyperTerminal Private Edition for free personal use from ZDNET.COM at:

http://www.zdnet.com/downloads/specials/free.html

Search there for HyperTerminal and download the program. When downloading you may select 'Run this program from its current location' I did that, it works, but you may prefer to save the install program in a directory of your choosing and execute it from there. When installing I choose all the default install options, which caused my old version of HyperTerminal to be replaced by this new version. All of my previous connection commands were retained.

Once you have installed HyperTerminal Private Edition:

Simply click here: telnet:\\209.32.226.63 -OR-

START/RUN, then in the box enter telnet:\\209.32.226.63 and click OK -OR-

Enter telnet:\\209.32.226.63 in the address field of your broswer and hit return -OR-

Start HyperTerminal and set up an ICON for KC0DJO, useful for quick starting later, selecting TCP/IP as your connection method with a host address of 209.32.226.63 then click OK.

You should set certain options for best operation:

File/Properties/Settings/ASCII Setup/ and enable these options:

Send line ends with line feeds
Echo typed characters locally
Wrap lines that exceed terminal width

There are many programs much better suited for cluster access. Look here:

http://www.cestro.com/pcluster/files.html

Welcome to the KC0DJO AR-Cluster.....and 73 de Ron N5IN

A private chat room with a ham, now that is exciting.
More exciting than talking to the finast woman in the world.

Please visit my World Wide Web Site, you have never seen a page like it. You
will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the A+ Certification

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics
Amateur call South Dennis, Ma. (Cape Cod)
K1OIK Bacteria-the only culture most hams have

I totally agree! I have been an SWL and scannist for many years, and that
is what "sparked" (sorry!) my interest in Ham Radio. Every prospect should
listen a lot before jumping on the air.

That's because it took that long for the license to arrive in the
mail after passing the exams! (Back then, one couldn't get on
the air until the postman delivered the license.)

greetings all:

i have been listening to the bands while i have been preparing for my general class exam. i have noticed that there are lots of people talking on 11 meters between 27.405 and 28.000. plenty of foreign countries but lots of americans (cb'ers i think) also. additionally, i have heard people on 7.311 (and adjacent frequencies) talking using AAA prefix code id's.

what's the story here? these frequencies are not in the FCC allocations?

comments are appreciated.

In the former case, the operations are illegal. Unfortunately, there's so much of it going on that the FCC usually doesn't prosecute unless it receives a bunch of complaints.

The latter case sounds like a MARS (Military Affiliate Radio Service) network. MARS is a kind of "amateur auxiliary" to the Army, Navy, Air Force, and Marines. Probably its most important duty these days is providing morale-boosting phone calls home for servicemen in isolated areas. MARS operations are authorized by the military. Federal government stations do not require FCC licenses. (though in this case, they do require a MARS permit from the military)

As a 99.99999 % cw man I'd go for the FT990 every time.
My reasons are as follows
1. It is possible to fit dual IF filters in the 990
2. The 990 is very much a sit down and use rig
3. The 990 is reasonably fixable
4. The Switched Capacitor (digital) Filter is great
5. If you want DSP you can have the MFJ unit as an outboard filter (there
a lots available secondhand as
more and more people "upgrade" to the latest rigs with inbuilt DSP) and the
MFJ unit allows you to
have dual DSP filters for FSK.

The 990 I've used in contests, the 920 I've owned and used in contests.

If you want 6 metres and DSP
then I would suggest the 920 but you will be well advised to add the INRAD
mod board (very easy to fit)
which allows cascaded IF filters. The 500 Hz filter available from Yaesu
for the FT920 is a joke... and nice
tho the DSP on the 920 undoubtedly is it is no substitute for a decent IF
filter.

The 920 is a very well designed unit but I'd definitely vote for the 990.

Good luck and I hope you have loads of fun with whatever rig you end up with

>are willing to face the fact that we have a problem, and even fewer
>are willing to try and do anything about it.

My suspicion is that the circulation of several series of old spots
(having some hours difference to each other)
happened deliberately.

Nearly all links were cut from DB0MDX during the last 2 weekends.
After many hours of investigation a network of main nodes in Europe
was set up which was separated from those in the US, Japan etc.
This stopped the circulation al least for this separated net.
But it continued elswhere.

We had a similar problem last year:

Spots were duplicated by converting the writing of a comment from
small to capitol letters, in case the spotter used small letters.
This could be traced down to a certain dx-cluster (sysop).

Another problem occured, when control-letters (e.g. ^D, ^K etc.) were
introduced in the comment-field although the spotter did not put them
in. This brought the repetition rate to be > 50, because each spot was
seen as "new" when differences in the comment field occured by
different handling by different cluster software.

After making this public, even by naming the suspect node, all these
manipulations stopped.

My impression is that somebody now wants to reveal the lack of
appropriate check methodes within certain cluster software, while the
software he is using (or promoting, or selling) can handle better with
such old spots - under this UNnormal situation..

In the US such a situation is called FUD: fear, uncertainty, doubt.

Read www.geocities.com/SiliconValley/Hills/9267/fuddef.html

Even during the cq-ww-contests last year with much much higher load of
dx-spots the network could cope fine with it. Why should it not cope
now with less spots?

Of course the cluster software in use at DB0MDX will be adjusted with its next version to handle these "old" spots, as it was done after experiencing the above mentioned problems....

From: Patrick Croft <mai@iquest.net>
Message-ID: <393BE8C5.92C4D789@iquest.net>
Source record: 20373

Russ,

In general terms you've many options and you'll get many opinions.

An often overlooked place to gain ideas is the QRP and backbacker groups for excellent field reports. Many are using the newer HF mini-rigs (Icom 706, Kenwood TS50, etc) but some take older rigs like the IC735's, TS430/440, etc.

Antennas are a VERY important part of the equation for a successful portable station. The telescoping masts available today offer lots of flexibility (you'll need to be ready for the unexpected!) with simple wire antenna. L.B. Cebik has some worthwhile examples of antennas on his website (www.cebik.com). A personal favorite to me is the 44 foot solution in various forms. For masts I like the German 33' poles that retract to about 3 foot.

As for power, most of the little rigs work on 12-14vdc and thus take a newer switcher like the Samlex 1223 (13.8vdc@23A) which is smaller than the radios and weighs about three pounds. Very clean (no noise in the receiver) and under a hundred bucks USD. It runs on 110/220, 50/60cy. If no commerical jams around, a common practice is to buy/rent/borrow a auto battery. Remember to take 12 volt lamp and a battery powered clock.

If you get a high balcony room at your hotel you're ready to work the world.....and if unlucky, all the TV's in some facilities with poor cabling! Some things to consider also are the modes (CW & PSK31 for example) that offer lower power communications. If you carry a laptop for biz travel you've got the best station control and logger for the pileups.
This topic has a thousand paths, so do a little web searching and you'll find a mess of info for the ham traveler. Designing and transporting the station can become a hobby in its self. One caution - be ready to open rifle cases for most airline inspectors! Personal experience. Still use when taking some vertival arrays, but golf cases get less looks and will hold yagi's along with the equipment.

Happy traveling.

Patrick - W9GTA

1988. BCL-club supports 40 meters intruder

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-05 00:00:00 UTC
From: "Georg (DL5NO)" <dl5no@einnet.de>
Message-ID: <8hgsvv$aq2$1@news.online.de>
Source record: 20374
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc

The frequency spectrum between 7000 kHz and 7100 kHz is allocated to the amateur radio service only according to international regulations on ITU level. As I know, that allocation is valid worldwide, and no other services (e.g. broadcasting stations) shall operate within that band. I remember, that at least until the 80's, 40 meters has been a difficult band, due to many intruders (mainly broadcasting stations).

So, I am concerned about an information, which I have found a few days ago on the webpage of Cumbre DX (http://www.cumbredx.org), a club of shortwave broadcasting listeners:

Cumbre DX Press Release May 15, 2000
by Hans Johnson
Cumbre DX sends parts to Radio Gaalcayo.

Cumbre DX has just sent tubes and other spares to the
Somali station Radio Gaalcayo. The station has been on
since 1993 and the spares were desperately needed to
keep them on the air. Radio Gaalcayo can be heard
daily from 1000-1200 and 1600-1700 UTC on 7012 kHz.

As part of Cumbre DX's on-going efforts to help both DXers
and DX stations, the parts were shipped today and should
reach the station by early next month.

Cumbre DX is eager to partner with other organizations that
are interested in helping small stations. A prime example would
be Radio Miskut in Nicaragua. This station is currently off the air
which means that the country of Nicaragua is no longer on shortwave.
It seems that just a few spares will get both this station and country
back on shortwave. If you are interested, you can reach me at
hansj@worldspy.net

That webpage clearly indicates, that Cumbre DX is giving technical support to a 40 m intruder station, which operates or is going to operate on 7012 kHz.

I have e-mailed my concern about that support to the author of the press release, who is editor-in-chief of the Cumbre DX bulletin, and proposed, that Cumbre DX should contact their partners at the broadcasting station, so that they QSY to a frequency outside the 40 m amateur radio band.

I also informed our national intruder watch coordinator (Ulli, DJ9KR).

Well, I you are concerned about that type of support also, feel free to contact that listeners club yourself...you can find a list of e-mail-adresses of their officials on their homepage mentioned above.

Hello Russ,

I've operated /VE/XE/UB/UA etc plus island activations. I settled on the
FT-847. 2nd choice was the IC706/bunch. The 847 had better DSP and satellite
operations.

Antennas depend on what kind of travel. If you're doing the KH circuit a
vertical works well. If you don't have any idea what you will encounter, lots
of copper wire and coax will let you build wire antenna as the location
permits.

Hello Tom,

The Antartica is an international zone and anyone there with a base can
operate with their own country callsign. VK0, HL, CE, KC4 etc. The CE9/KC4 is
the ARRL prefix for managing the list. Sybmit the R1 card. Its a counter

No, the " Occoulter Disk" was created by
Art Bell and Whitley Streiber for use in
predicting global superstorms and ARBITRON
Ratings. ;)

(It's actually nothing more than a device mounted
within the telescope that covers over the body of
the image of the Sun, allowing for an "artificial
eclipse" to be simulaqted, thus producing a rather
good rendition of the Coronasphere. Quite clever!)

Milt.

No, it's a disc mounted in the centre of a telescope to block the image
of the sun and just leave a tiny part of the rim showing. It eliminates
the glare.

I thought that I had all my Ants sold with my last post.
But the Ham that wanted the 10/6 m vert. never sent the
money order, nor will he answer my email. Had a lot
of later replies from Hams that want the Ant too, but
didn't keep there replies.
So the Ant is up for sale again.

"New In Box" NCG Comet Antenna #CA-350DB 10/6 m dual band vert.
10m 2.15db gain & 6m 6.5db gain; 22.6 ft long 6.4lbs.
new price $259.95 from AES asking $125.00 + shipping in the USA.

Hi All

The best place to find a VK email address or URL is the VK's on the
Internet online database. The site has just had a Domain Name change
and can now be found at:

http://www.vk2ca.com

Please adjust any links you have to this site and advise any sites that
are still using the old domain name of vk2nnn.com
Stop by sometime to check it out.

You might also look into the Sportube ski transporter for your
antenna/antennas.
Check: http://www.sportube.com/

I got one and used it last Feb on a trip to Scotland. Used it to take my
trusty ol' R-5 vertical [was going to be in a cottage with a really
small back patio]. I wrapped the R-5 in bubble wrap and all came through
with no problem. In addition, there was no problem with the airline
[Icelandair]. I had 2 other bags checked & there was no charge for the
Sportube. It's a bit costly but it really works well and gives good
protection to those traps on the R-5.

Cheers

An occulter disc is a disc that blocks the sun's disk so they can
see the corona.

Perhaps the operator is running a club station and would also like their
personal call in the DX log. Its very common operation in Europe and the CIS.

WOW!!! touchy touchy... considering i've counted over 1100 hits in the last 24 hours, with quite a few eminating from the link I posted here (over 400), somebody's dress (es) are getting blown up, and they like the feel with no panties on!!

These radios are on consignment, and as such I am not responsible for how they are modified, and since it IS NOT illegal to recieve 11 meter signals on them, and I do not transmit on those frequencies, forward away, here's the address if anyone's interested www.fcc.gov

I'm guessing that the Icom 735 with the two diodes clipped will piss quite a few off, but the price wont ($450.00 with matching power supply) again, these radios are taken on consignment, and I do not modify them in any way..

Major Solar Storm Detected

By Joseph B. Verrengia
AP Science Writer
Wednesday, June 7, 2000; 3:11 p.m. EDT

BOULDER, Colo.�� Scientists have detected a major solar flare erupting on the sun that could buffet Earth with a geomagnetic storm in the next two days.

The blast of charged solar particles already is producing scattered radio blackouts but is not expected to significantly disrupt telecommunications or electrical power. It might generate a dramatic light show for midnight stargazers in the northern latitudes until early Saturday.

The sun is approaching the height of its 11-year storm cycle. Unlike previous cycles, this period has been relatively quiet, with eruptions every two months or so.

This storm is estimated to be 20 times stronger than a solar flare in early April.

"Finally, the sun is beginning to flex its muscles," said solar forecaster Dave Speich of the federal Space Environment Center in Boulder.

The latest eruption came at midday Tuesday from a cluster of sunspots on the upper left of the sun as viewed from Earth. A powerful X-ray flare ejected an estimated billion tons of charged particles into space.

Riding the solar wind at speeds up to 2 million mph, the particles should zap Earth's magnetic field late Thursday or early Friday. The sunspot cluster could be active another eight days.

Solar flares can create electrical disturbances that disrupt power supplies, telecommunications and signals that control pipelines and other systems. The particles can damage satellites and alter their orbits.

The storm is rated as moderate on the federal government's new space weather scale.

In 1989, a severe solar storm knocked out power stations serving Canada and the northeastern states, as well as an electrical transformer in New Jersey. Since then, power grid and satellite operators have taken steps to protect their systems.

The clouds of charged particles also produce the aurora borealis, or northern lights. Weather permitting, the light show from this storm could be

visible as far south as Washington, D.C.

2013. Re: Small Rig for DX Travel?

Source record: 20399

Warning!

Be sure you check with the airlines before travel if you plan to take
something like the sportstube or a fly pole case, etc. Some airlines
will charge you $100USD EXTRA per LEG of the trip for anything over 63"
in length. While you may be blessed like Leo and get waved right on,
you may also be asked to pay an oversize baggage fee.

The hard shell golf cases seem to be accepted on most airlines and
flights....and they offer about 50" of vertical length with plenty of
'bulk' space. Some will handle a small tribander plus your verticals
and cables, etc. Watch the weight limits or you'll be paying additional
also!

Also need to have a padlock on the case and be ready to open it as
requested.

Bests,
Patrick

While contesting, on several occasions I will work several stations in a row in the same country and with the same distinctive signal. (and sometimes, the same distinctive CW fist)

Hi Dave,

you'll see, even more often, that some guys work the DX for a friend, or the whole series of friends. Just pay attention to the audio quality of some signals, you can always "pick them up" Especially in eastern Europe.

73 Mike VK4DX (ex VK4NM, VK4EXA)

Shortwave is *WEIRD* tonight, no doubt about it. A lot of weird noise
all over the bands, and some of the major broadcasters are swamped.

2019. Can one reasonably operate AM on 160 with 50W and Bilal antenna?

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-08 00:00:00 UTC
From: wa2ise@netcom.com
Message-ID: <8hn9ceipn1@nntp9.atl.mindspring.net>
Source record: 20405

My TS440S has AM and the 160 meter band. Have heard AMers, but not been able to raise a contact with my crude 20 meter dipole and antenna tuner. Would one of those Isotron Bilal antennas (limited space antenna) be any good for this, or do I just not have enough power to routinely make contacts on AM on 160?

I live in an apartment so a longwire is out of the question.

Would this have any connection to what I saw tonight?

I'm in Victoria BC, CA, at about 49 degrees north.

I was walking home this evening (June 7/00) and I looked in the sky, and saw strange lights in the sky. Here is the best description I can offer.

There were two lights, which for a split second, looked like they were connected together by some sort of framework. The lights had the approximate colour of high pressure sodium bulbs. One of the lights would flash brighter than the other (at regular intervals). Let me remind you, they were much brighter than any light I've seen on any aircraft. Also they were absolutey silent when they went from straight up in the sky, towards the north, and began moving west - east for a few minutes, then dissapeared.

This occured at approximatly 23:50 on June 7/00

For those wishing to explore traveling and hamming I suggest you spend a little time reviewing some of the many reports available by the dx'ers and contesters that do it often as published in the National Contest Journal.

A couple of 'almost regular' topics can be found worthy of your time. Check out:

http://www.ncjweb.com/index.php3?leftcol=travel&rightcol=contesttrav1

Additional sources include some websites offering rentals of villas with stations awaiting and some other special interest groups pass tips regularly (diving clubs, senior traveling group, int'l backpackers, etc).
Perhaps a reflector would be of interest on these issues?

bests,
W9GTA
Patrick

Howdy,

You are in for a 'real' challenge. 160 meters is tough under the best of conditions. Very few 'compromise' antennas do much on 160. It seems most of the regular 160 guys work very hard on their antennas.

I could of course be very wrong, but would recommend you save your money.

Perhaps you could rig some sort of 'almost stealth' wire. Even possibly just 'string' it at night. :-)

Regards,
Jim

On 160 you are competing with Mother Nature. A reasonably efficient
antenna is a necessity. Are you sure you can't put up a stealth antenna.

I, for one, would be very interested in a reflector on DX travel/operation.
I'm at the beginning stage in planning a trip to the Outlying Islands of
Scotland for an IOTA/ISOA DX-pedition.

Home again from a very successful DXpedition, we are working to collate documentary material for posterity, fun and as learning material.

To that end we seek soundrecordings from "the other end of the pile-ups" from all bands. If any of you have some, or know of people who have, we would love to have them. Any format can be used, digital or analog. If you send tapes we will digitize them and return the tape.

Email to:
oz1pif@get2net.dk

or snailmail to:
OZ1PIF, Peter Frenning
Ternevej 23
DK-4130 Viby Sj.
Denmark

Best 73 and thank you to all who spent countless hours in the pile-ups to work us - it was great fun to be at the receiving end although it got a bit rough sometimes!

OZ1PIF, Peter and the OX2K team.

Patrick:

QSL on the longer items but for most antenna use, the Sportube need not be extended that far. I think it was only out to about 52-53 inches to handle to R-5 sections. Here are the dimensions for the two models. I used a double for my R-5 and thus did not have to remove the match box at the base. Then just wrapped it all in bubble wrap. But, you're right; always check your airline first. I did get a few stares as I wheeled it through the Glasgow Airport to the car rental counter, HI.

Sportube: http://www.sportube.com/

Single Sportube:
Dimensions: 5 1/2" X 5 1/2 " X 48" adjustable up to 83"

Double Sportube:
Dimensions: 11" X 5 3/4" X 48" adjustable up to 83"

Source record: 20430

Did some pretty good DX last night at 6:55 zulu June 8th on 20 meters
from California to Australia. Heard a QSO going on, when they finished,
I called once and the Australian came back to me. About a 5-5.
Very little activity on the band other than us. So no pile up
or anything, Australia probably isn't that rare, just far away.

Is this good propagation the result of that solar storm? Or in
spite of it (ie, it hasen't hit us yet?)?

hello all
this weekend is a VHF contest. i finally got a rig with 2
meter, all mode capabilities. i also have a small beam/yagi. for the
heck of it, i thought i would listen in on the contest, my first vhf
event.
anyhow, on 2 meters, what is the band plan for contests? is
there a freq. where contesters call cq?
also should i position my antenna in the vertical or horzintal
confiquration. i believe horizontal, but i wanted to check.
also, in a vhf contest, is ssb or cw the mode to use i prefer
cw, but i may need to bring a microphone.

any info will be appreciated. i'm crossing my fingers that i might
make a vhf qso!

Tim,

It's part of an elaborate plan to immantize the Eschaton.
If you understand this, you have been properly illuminated...
otherwise, nevermind.

Actually, it could just be ionized particles. Charge can
transfer pretty fast, possibly explaining what looks to be
impossibly fast motion for an object with substantial mass.
But it's more fun to suppose that several governments are
conspiring to make lights shoot around in the sky for
mysterious purposes, cloak-and-dagger spy-vs-spy or
mysterious weapons research, isn't it? :)

Haven't noticed too much difference in propagation tonight, at
least Radio Netherlands on 9590 was as strong as usual.

Source record: 20434

Welcome to the VHF contesting world. I started about 10 years ago. I don't know the complete band plan, check out the AARL site, they may have it listed.

For FM, you cannot use 146.505, 146.520, or 146.535 if using 15KHz spacing. In some areas if you are using 20KHz spacing it will be 146.500, 145.520, and 146.540. The rule to follow is you can't use the FM calling frequency and the two "guard" channels. Also, no repeater contacts, FM simplex, FM simplex channels or locally recognized FM simplex frequency. One of the club I use to belong to everyone met on RADIO 5, 145.555 so this would be a locally recognized FM simplex frequency, although the packet and satelight guy may not like it.

SSB calling frequency is 144.200, the contest move up and down +/-100KHz, sometimes more. Below 144.100 I believe is EME work, above 144.300 I believe are beacons. The old AM calling frequency used to 144.400, but I personally never heard anyone there and I think it is now used for something else.

FM is vertical, everything else is horizontal, well satelight and EME may be circular, but horizontal will work.

SSB is generally used but you will here some CW, even I will switch to it as the moment requires. Cross mode contacts are permitted.

Good luck and enjoy.

Source record: 20437

Here in NW Washington State, I can copy W6WX's 28.200 beacon for large segments of almost every day. What I cannot seem to find, is how many power levels does the transmitter sequence?
When the power reduction sequence runs, I can hear three, sometimes four, and is it my imagination or "tin" ear that hears a fifth power level?
Some web sites give the range of levels W6WX transmits, but in how many pieces? Is there a site, or newsgroup that deals with the beacon subject in greater detail? Forgive my ignorance, just trying to get going again after quite a few years of inactivity. TIA

Steve;

I bought an AV-620 SN-001 (little brother to the AV-640) when
first intro'd. and quality is very good. Performance is good as
well for this type of multi-band antenna.
The Teflon loading coil for 40m on the AV-640 is a big plus in
my opinion. It should hold up under legal limit power FB.

Good luck
Jim, K4SQR

=============================================================================|
Notes:
1) * due to low Take-Off Angle, may require better than average antenna.
2)MR Mode is Most Reliable Mode (MRM).
3)Take-Off Angle - angle required for MRM. Your antenna may or may not
have good performance at this angle. Poor performance at this
angle will result in poorer Signal Quality.
4)Service probability relates only to the mode (cw/ssb) used for analysis.
5) N=Noise, P=Poor, F=Fair, G=Good
6)The following values relate SNR and signal quality:
Poor Fair Good Excellent
SSB 44 54 64 74 2.5 KHz
CW 24 34 44 54 250 Hz

Quite a normal thing, mate. I usually work a few hundred US stns in every contest with 100 w and vertical or dipole antennas on 20 and 40m . The only easier thing from here is Japan, you may work them any time, any band, any mode, with any power and it never ends, :-)

2066. Maryland Hamfest - 18 June

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-10 00:00:00 UTC
From: windbrkr@erols.com
Message-ID: <MPG.13ac3bb153024843989761@news.erols.com>
Source record: 20452

The Frederick Amateur Radio Club (FARC) presents the annual
Father's Day Hamfest on Sunday, June 18, 2000
from 8:00am to 3:00pm, rain or shine.
(Access for tailgaters opens at 6:00am)

It's at the Frederick County Fairgrounds on East Patrick Street in
historic Frederick, Maryland. Easy access from I-70, I-270, US-15, US-
40, etc. Plenty of parking.

Talk-in on the 147.060(+) MADRA repeater.

We'll have Radios, Electronics, Computers, Acres of Tailgating,
Indoor Commercial Vendors, VE Testing and more.

AMSAT rep. will be there.

Good food and refreshments available.

On the web go to http://www.qsl.net/k3erm/ for more info and a map.

General admission is a $5.00 donation.
Tailgating spaces are $5.00 each + general admission
Indoor tables are $10.00 each before June 10th, $15.00 after.

One of the largest and most popular hamfests in the
Baltimore/Washington metro area. Don't miss it!

Questions? E-mail k3erm@qsl.net or direct to me.

Thanks & 73,
Bob K9CMR

2069. Re: What is a QRP station at Field Day??

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-12 00:00:00 UTC
From: ac6v <ac6v@ix.netcom.com>
Message-ID: <3944E8C0.EC61AD6F@ix.netcom.com>
Source record: 20455
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.policy

David QRP is generally considered to be an output power of 5 Watts or less.

For Field Day Rules see URL:
http://www.arrl.org/contests/announcements/rules-fd.html

4.2. (Class A -- Battery) Club / non-club portable: Club groups (or non-club groups with
three or more licensed amateurs) set up specifically
for Field Day, all contacts must be made
using an output power of 5 Watts or less and the
power source must be something other than
commercial power mains or motor-driven generator
(e.g.: batteries, solar cells, water-driven
generator). Other provisions are the same for regular
Class A.

7.2. Power multipliers: The power multiplier that applies is determined by the highest power
output of any of the transmitters used during the
Field Day operation.

7.2.1. If all contacts are made using a power of
5 Watts or less and if a power source
other than commercial mains or motor-driven
generator is used (batteries, solar cells,
water-driven generator) the power multiplier is
5.

7.2.2. If all contacts are made using a power of
5 Watts or less, but the power source
is from a commercial main or from a motor-driven
generator, the power multiplier is 2.

7.2.3. If any or all contacts are made using an
output power up to 150 Watts or less,
the power multiplier is 2.

7.2.4. If any or all contacts are made using an
output power greater than 150 Watts,
the power multiplier is one.

Reading the entire rules on Field Day at URL:
http://www.arrl.org/contests/announcements/rules-fd.html
Should clarify the QRP issue.

Good Luck

Source record: 20456
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.policy

The rule I'm not sure about is whether a battery charged off the mains counts as "Emergency Power". I run a Class E station off a couple of big deep cycle batteries and last year my station was not listed. No, I don't charge the battery during contest hours :-)

Maybe it was my soapbox entry where I bitched about not allowing 146.52 as a legit frequency. Some geezer probably threw it straight into the trash when I dared challenge the ARRL's all-powerful contest rules :^ Sheesh, all the high-power multi-op clubs run 146.52. Then they have to QSY because frequency cops make a complete mess jamming the channel with obscenities and packet transmissions. Out here on the W coast, 146.52 is stone dead every other day of the year except for the odd bozo whistling into his microphone to test his rig.

Four watts from the CW transceiver of an Extra class ham would be QRP.

Four watts from the CB radio of a restructured ham wouldn't be QRP.

11 meter band field day contacts should be written on the ARRL F.D. entry form where it says "other band". 11 meter stations exchange, CB brand, the cost of your echo-mic, in dollars; and the number of days since April 15th you've been a ham.

2072. Need advice on DX QSLing.

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-12 00:00:00 UTC
From: "Louis A. Destree" <destree@flash.net>
Message-ID: <vH915.150$eb4.10276@news.flash.net>
Source record: 20458

Greetings,

I've been licensed about ten years now, but only recently managed to get a HF station set up at the house. My main interest is DX HF.

I need some advice on the best way to get return QSL's from DX stations. From what I've read so far, there seems to be a few ways to do this.

1) Put my card in the mail and hope for the best.
2) Put my card in an envelope with a SASE and a dollar bill.
3) Put my card in an envelope with a SASE that has local return postage affixed.
4) Send my card to the outgoing bureau, and hope for the best.

What works the best? Is there a method I haven't heard of yet?

I certainly don't mind putting a buck in an envelope if it will get me a return card, but I'm unsure how 'spendable' American currency is in certain countries. Keeping track of postage for all the different countries seems like a nightmare. I've heard some folks refuse to use the QSL bureaus, which is unfortunate as they seem like the best solution to the problem.

Thanks and 73,
Louis

***I have had 100% return in my 50 years of DXing by using the following
methods:

(Mailing Overseas): SAE with a few dollars, well hidden/tucked away
where it cannot be seen through the envelope. Also, no reference to
amateur radio (e.g. callsigns, etc.) on the outside of the envelopes.
You can opt for 2-3 IRCs instead of the dollars. Certain countries do
not permit money to be received and could result in severe problems for
the DX recipient. So ensure that the DX station can receive money,
sometimes referred to as "green stamps" in amateur DX circles.

(Mailing Stateside): SASE instead of SAE. Remainder of the above the
same, except no problem with sending money. Good luck.
73 Murray, K3BEQ

In the case of stateside managers, same things except use an SASE

My comments are for sending mail directly to the DX station or his QSL
manager; not rpt not the bureau.

Forget it!

>2) Put my card in an envelope with a SASE and a dollar bill.

This usually works, but gets costly. Another option is sending an IRC.
Don't buy it at the post office. Buy them on the secondary market from
QSL managers, or others selling them. AT the PO they're $1.05 apiece.
Typical going rate second hand is about 75 cents each.

>3) Put my card in an envelope with a SASE that has local return postage

This usually works too.

Unless it's a rare country, use the bureau. If you are ARRL member,
you can send cards for $6/lb. (about 150 cards).

Another way to get the rarer cards such as Dxpeditions, or those with QSL managers is send it thru a QSL forwarding service such as WF5E QSL Service. Les charges 5 cards per dollar, and has a pretty good return rate.

OK....for starts please send your reply directly to me at VE7LWB@rac.ca
and
" NOT " to the address of NO_SPAM@NO.SPAM.com

Here is the question. Lets say I have two 4 element yagis, and lets say
that each
give a gain of 10 dbd on UHF. Now if I co-phase them the gain will not be
20 dbd
that much I know all to well, but how much extra gain will the second
antenna give
to the one that is there. I am not sure, but something tells me the gain
increase
would be in the order of 2db making the two 4 element yagis give me 12 dbd.
I THINK ???

Can someone give me a clear ansewer to this question?

Also, if I would use 4 of them all co-phased, would the db gain go in
steps or would
it what ??????

And last part of this question. How many antennas could I co-phase
together
before the law of deminishing returns would step into play here.

And please don't tell me it's in the ARRL handbook. I already looked and
can
not find what I need, so don't even go there.

Please reply directly to me at VE7LWB@rac.ca Thanks......

.

2080. Re: IRCs

2081. using a regenerative receiver

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-13 00:00:00 UTC
From: "sb1963_bis@yahoo.com" <sb1963_bis@yahoo.com>
Message-ID: <39460948.7A9CC2BB@yahoo.com>
Source record: 20467

I need some help with clear, step-by-step instructions on how to use a regenerative shortwave receiver like the TenTec 1253.

I heard somewhere that the best way to pick-up weak signals on a regen. receiver is to:
1.- start by increasing the regen control until the radio begins to oscillate
2.- back-off the regen control a little to stop the oscillation
3.- tune to the station
4.- adjust the regen and volume controls to achieve best audio

Is this the best way/procedure to tune/find stations? How do I use the RF gain control of the 1253? Should I start scanning with the RF gain set high or low?

I will appreciate any help to develop simple, step-by-step instructions on how to best use my tk1253 receiver.

Thanks.

2082. Re: ANTENNA QUESTION / help !

Simple, two 10 DB antennas cophased will give you an overall gain of 13 DB. Four 10 DB antennas cophased will give you an overall gain of 16 DB. Eight 10 DB antennas cophased will give you an overll gain of 19 DB. Basically everytime you double the amount of antennas your gain goes up by 3 DB - theoretically anyway. However each time you are putting a splitter (for more antennas) into the feedline you are increasing the loss factor. There is no set limit to the amount of gain that you will be able to achieve but I have not seen to many go past 16 beams - the EME crowd do go for more but the amount of money it would cost makes it prohibitive for most of us to do this. For 2M and 70cm most people don't normally go for more than 4 beams - indeed most will stick at one or maybe two. Hope this helps you out.

Cheers

Matt

3dB is double the power. In general, if you double your antenna system,
you approximately double your gain so two properly phased 10 dBd antennas
yield about 13 dBd gain.

I have an ft-101ex I would love to sell or trade. I don't know what it is worth, the AM recieve is a little low, and the transmit power is a little low, but I think that is nothing big, i think anyone who knows the radio can fix it easy. I would like to trade, possibly with cash for a radio I might be able to use for a backup rig, maybe even something else with minor problem/s If interested, email me at n1umj@mediaone.net thanks, and 73

I have tested for some time the brand new skysweeper software
(www.skysweep.com).
It seems to work fine atleast with CW, RTTY, PSK31/QPSK. I had to test it
with .WAV files (only signal input from file
is allowed in demo mode)
Have anybody tested the registered version? How it does perform in real-time
environment?

-Tero

The term "occult" means 'to hide' (as in hiding the disk of the sun) or 'hidden' (as in occult or hidden knowledge) hence the duel use of the word. The moon routinely occults (eclipses) stars and planets as it orbits the Earth. Such events are known as 'occultations'.

<tangental soapbox rant>
Religious types seem to obsess WAY too much on satan (it almost boarders on worship in itself). Not all occult knowlege is satanic -- in fact, if you go forth with an open mind, you will find MOST occult knowledge is NOT 'satanic'. But fear is the mind killer and many preachers and polititions will use fear against the masses as a very effective means of thought control. I better end this here. If the religious types don't accuse me of being 'satanic' the non-religious types will probably call me a 'crackpot'for giving occult knowledge any credence whatsoever. :)

The gain would increase by 3 db, so you were close. If you put up a second pair for a total of four, the second pair would give you an additional 3 db for a total of 6 db over the single. The next three db would cost you four more, etc.

Nothing personal, but I really dislike this logic -- the cards can't be submitted for DXCC until Oct. 1, therefore timeliness of returns is not as critical.

I can submit this card for WPX, IOTA, and the French Overseas Islands awards right now -- all of which I am fiddling around with right now.

DXing is a lot more than DXCC.

I don't think you'll need a $200 program to do SSB, Darryl.
Most people using SSB manage it with just a microphone.

I would use the 500 Hz filter. If you use the 270 Hz filter and the station
drifts only slightly off frequency, you will lose them.

I prefer a 1000Hz and a 500Hz filter. I don't care much for my 270Hz
filter unless I am using my receiver a pickup for repairing a bad LO.

I beg to differ.

In a noisy band, once I've "settled" on a signal, I usually
narrow it down to 250 Hz (Yaesu rig), and when I'm done, it
does back to 2KHz.

However if you must choose only *one* filter, then 500Hz
would be more practical. I use both (500Hz is very handy
for digital modes :-).

I have used 500 and 250 khz filters. Under really crowded conditions, the
250 khz filter is preferable. However, most of the time, I use the standard
1.8 khz filter for tuning, zero in on the desired signal with the 500 khz
filter, and use the 250 khz filter only under rough conditions.

If you can have only one filter, I recommend the 500 khz.

Just my opinion, not based on engineering.

I guess by now you see that this question equates to the 'What kind
of radio should I buy?' question.... Lots of different answers.

I would say the right CW filter depends on two things - the operator,
and who makes the filter.

Some filters get 'ringy' when they get narrow, the older Icom radios
were famous for that, anything tighter than 500 hz made by Icom
didn't sound too great.

Personally, for me anyway, a 400 hz filter is about the right CW
width. 500 hz is too wide, 270 hz is too narrow. The radio I use now
has 500, 200, and 100 hz CW filters, but I rarely use anything but the
500 hz filter.

Since you are probably going from a 2.4 khz SSB filter to a CW filter,
any filter you chose will make you think you are using a different
radio, but I would guess that you'd be happy with the 500 hz one.

Don't restrict yourself to Kenwood as a filter supplier - INRAD makes
filters for all the ham stuff, has more width selections, and
everybody who uses them seems to be happy with them. I've used
them in three HF radios and have no complaints.

The other thing you metion are 'utiiltiy modes' which I assume may
be digital... Check the width of what you are going to listen to -
you don't want to get a filter that's too narrow for the mode you
want to try and copy.

Mr. Baggums,
It's called STALLING. Herbie has no confidence whatsoever in his frivilous garbage being heard by the S.C. All he's doing is hoping and praying for a Bush victory in November and with it a revamping of the S.C. along with the F.C.C.

Although being a staunch Herbie hater lo these many years, I must give credit where credit is due and difficult as it is to admit, so far the felon has made monkeys out of the F.C.C. Let's see now-when did he start lying to Judge Luton-I think it was in 1994. Can you believe that the guy's still on the air with a call removed from the FCC database when Moses parted the Red Sea and Jesus walked on water?

God, the guy has used every type of appeal short of a banana-has essentially tied up the Feds in a mass of paperwork and has cost the taxpaying citizenry probably a million bucks or more. It's called due process while some of us refer to it as a "doo doo process."

And from what I hear, whenever he does make an appearance on 14.313, it's the same old bullsnot he's been pulling forever. Attacks on Intercon, Ruth Hoffman, AF2Y, WB2OTK and other sterling ops while Riley Hollingsworth sits there quietly never citing him for agitating which he decries and about which he writes threatening letters. Why not you ask? Because if he pops FZ, IT'S APPEAL TIME LADIES AND GENTLEMAN and the saga continues.

AF2Y

It takes about a year for a QSL to traverse the bureau system. It will take a bit longer for the bureau to accumulate enough cards for you to make it worth sealing & mailing the envelope. (they wait until there are enough waiting to use the postage you sent - I seem to receive something like 30-50 cards in a shipment.)

I just received two envelopes yesterday, and most of the cards were from my operation in the 1999 CW WPX Contest, in May of 1999. Some dated back further, as far back as 1996.

The bureau is *not* fast. However, it's a whole lot cheaper than $1.05 for an IRC and $0.60 for an airmail stamp.

Almost a year is not near long enough. With few exceptions, it takes a
lot longer. Remember, you send your cards to the ARRL, etc. They
accumulate enough to send. They go by surface mail in most cases, so
your card sits waiting for the next slow boat to china. They arrive at

that countries buro who then may sit in them for months till they get distributed to card sorters who then send them to the card recipients, who then may wait till they have enough to send out. In some countries, they wait till they get 2-3 pounds. Then they go back to their buro, who sits on them till there's enough to send back to the US. From there they go to your local buro who distributes them to the sorters (in the case of the W2 buro, once a month), who then sort the cards, and may wait till there are enough to send

In the short of it, I have seen buro cards coming to me that are 3 years old. If you are looking for a quick turn around, the buro ain;t the thing.

BTW, sase's with local postage are a better bet than $1 or IRc's. Bill Plum sells all sorts of foreign postage at reasonable prices. He's usually at the bigger hamfests.

--
DX= FCC rules DO NOT prohibit the inclusion of any
type of reimbursement for postage, nor does it make
illegal any voluntary donation that the sender wishes
to include

Repeaters= The FCC recognizes the right of individuals
and organizations to maintain close repeaters and
DOES NOT make it a crime to allow cited examples from

****
W1XT reply.

Rich,

I guess I don't understand your posting to the newsgroups.

We are in the process of replying to about 30,000 envelopes with QSLs
from 8
different Myanmar operations. We are about half way through. We are
processing them in the order received -- not by the order they were
sent,
sorry.

Most people would not believe the amount of mis-directed and damaged
mail we
get -- which tells me that a lot of *our* mail is mis-directed as well.
Just
this week we had 11 envelopes in our XZ0A mail that were not for us but
rather for people in other states! Some were credit card bills! We've
returned them, of course. This happens every week.

While we don't talk about this aspect of QSLing very much, it took
several
months after the operation ended to get the data base information
collected
and in proper order. The DXpedition used CT which does not recognize
PSK-31,
10 meter FM, 10 meter AM, 2 meter FM, RTTY, etc. Add to that the seven
operators at XZ0A who went off to other cities in Myanmar and operated
from
their own issued calls (not XZ0A) from a hotel, and you can see some of
the
complications. And then there were the paper logs...

The problem with separate operations is that people send us QSLs for
more
than one of the Myanmar operations in the same envelope! So, if we don't

want to be making out separate envelopes and using our own personal postage
at a later date, we have to process them at the time we do the XZ0A QSL.

Very time consuming.

Each card must be run through the data base so that a proper QSL label can
be printed. So, sorry to say, your printout doesn't help us.

And your latest envelope, mailed just a few weeks ago is down in the pile
for processing since it was probably received recently.

Please let me assure you that we are working on the cards on a consistent
basis. We just mailed out over a 1000 cards last Wednesday!

Also, QSLs with special requests such as separate cards for each QSO, YL

QSL, special 160M cards, duplicate cards, etc. hold up the operation quite a
bit too.

I hope we get to your request soon. We are, however, taking next week and
weekend off and doing Field Day -- not QSLs.

I'm sorry to have these things posted on newsgroups. It suggests we are not
working on the cards because we haven't processed your card yet. Considering
how many cards we have put out in the past 8 weeks, I think we are doing a
pretty good job, even if some others don't.

I hope we get to your card soon but unfortunately we have no way of sorting
through the unopened envelopes looking for specific QSLs from individuals.
Sorry.

the antenna that you have in questions would have a extra 3 db gain
that would give you 13 db
now if you add another beam it would not give you 3 db
but it would only give you 1 db of gain and os on and soforth
hope that this will help

Time to straighten these things out. Stacking two identical beams can actually give you a shade more than the expected 3dBd of gain. Spacings etc have to be on the nose to get the higher figure.

By and large 3db is about right but you also have to take into account the losses in matching systems splitters etc. A good rule of thumb is that every time you double the size of the system you are going to see around 2.7dbd of extra gain. With this figure in mind the law of diminishing returns will not come into play.

Remember that if you are going to stack two beams [especially VHF and above] It makes sense to stack them one above the other. This way you get the extra gain by robbing the vertical pattern. To put it another way, the beamwidth does not narrow down in the horizontal. Stack them alongside one another and you get the extra gain by stealing from the horizontal pattern and the horizontal beamwidth tightens up.

I would appreciate any help finding an on-line directory for Swiss or French 2 meter and 70 centimeter repeaters (e.g. location, frequencies, offsets, tone if any). I will be in the area around Interlaken in Switzerland, and Albi, near Toulouse, in France.

I have not operated in Europe before and so would appreciate any information about repeater use conventions (I do have a copy of CEPT requirements). I have a T81A, and was told that broadcasting the "3" dialtone should bring up European repeaters. Can anyone validate this?

Please forward replys to my mail address.

Thanks in advance.

My view is that Glen Ross' comment, while theoretically correct, is way too optimistic in real world terms.
Yes, it is possible to get a bit more than 3 dB gain by stacking identical antennas at large spacing, but the effective bandwidth will be narrow. In practice, one might get about 2.7 dB net gain in stacking 2 as against 1 antenna but as one adds more antennas to the array, the stacking distance grows and becomes more critical and the system losses accumulate quite quickly, such that net gains fall towards 2 dB and lower. The comment by Leonard Davis referred to a specific case of stacking high gain systems and is probably nearer the truth (perhaps a little pessimistic). There is certainly a point of diminishing returns and for moderate length yagis that point is at about 8 or 16 antennas in the array (for long yagis, the optimum is perhaps 4 to 8).

Antenna gain G is k * D, in which k is the efficiency and D is the
directivity. The splitter losses reduce the efficiency k, so (1-k)
part of the transmitter power is converted to heat, the rest (k) is
radiated somewhere.

Directivity D is the ratio between the main lobe radiation to
isotropic radiation. For a clean single lobe pattern this is quite
simple, but usually, when stacking several antennas, there are usually
quite strong minor lobes in various directions, eating up the
radiation from the main lobe, thus the stacking gain would be less
than 3 dB, even without splitter losses.

One way to get some idea of the antenna directivity is to measure the
main lobe width (at -3 dB points) both horizontally and vertically.
However, if the antenna system has large side lobes, they take
radiation out of the main lobe and the main lobe would be narrower
than with a similar antenna with a clean pattern and it would appear
that the directivity is greater for the antenna with multiple minor
lobes.

By stacking two antennas at a larger distance than optimal will create
a pattern with a lot of "fingers" and the main lobe is quite narrow.
If you just measure the main lobe width, you might incorrectly
conclude that the stacking gain is over 3 dB :-).

From: robert4@nojunk.flash.net
Message-ID: <MPG.13b8c69476b1b5fe989695@news.flash.net>
Source record: 20320

What do I need to look for in propagation reports to find out if conditions are good for 6 meters?

I have yet to make a 6 meter contact on my VX-5. I have a 1/4 wave mag mount antenna on my truck being fed by 5 watts FM. Maybe I am trying on the wrong frequencies, but I am getting frustrated. I never even hear anyone. At least actually listening to a QSO would give me hope. I do hear alot of static though. I love challenges and HAM is a big one.

Any help or advice on what to look for in propagation reports would be appreciated. I know that an A-index of under 10 is good and that a high solar flux count is good, but I don't know what is considered high. Do these measurements even apply to six meters?

thanks,
robert

Paul

I agree with most of the above, but must take exception to the last
sentence. If the main lobe measurement shows >3dB then you have >3dB

gain. Gain in the directional antenna sense is a
maximum_radiation_direction parameter.

If you have an off-air tv, watch for channels that you don't normally get coming in. I used to do that be for I got a dish, now I just leave the rig on and listen to static in the background.

Four suggestions Robert:

1. Log on to a nearby telenet Packet cluster -- see URL:
http://www.cestro.com/pcluster/telnet.html
You will see all kind of 50MHz spots during the day.

2. Check out the 50 MHz calling frequencies at URL:
http://ac6v.com/pagecall.html
Set them in memory and go to the scan mode, keep the squelch just above the
noise level.

3. Call an occasional CQ -- sometimes everyone listens and no one tries a CQ

4. Sit back and wait -- 50 MHz activity can be far and few in between.

I have made some out of state contacts on FM

This is going into semantics.

Directivity is usually defined as radiation angle of an isotropic
radiator (4 pi square radians) divided with the main lobe size
(expressed in square radians). Now everything is fine, as long as the
minor lobes are more than 15 dB below the main lobe. This is the
directivity over isotropic.

Now, assuming there are strong minor lobes eating up some (say 20 %)
of the isotropic power that could radiate. You can measure the main
lobe beam width and get a gain figure of > 3dB over something, but it
is definitely not over isotropic (or over single antenna in this case)
but over something that is less (- 1dB) than the original reference.
If you measure the field strength at a large distance (several
wavelengths) at the centre line, the field strength is up only by > 2
dB, since 20 % of the power was eaten up by the side lobes. As I said,
this is semantics and you have to be very careful about the reference
level.

Source record: 20328

Robert -

If you plant your FM receiver on 52.525, the national 6m FM calling frequency, you are certain to hear something the next time that there is Sporadic E (Es) propagation. May and June are the peak months for Es. The normal propagations indices (e.g. A Index) don't correlate with Es at all. That seems to be the reason for the name. The best times of day to listen are mid-morning to just after noon and again late afternoon into the evening. But it can occur on any day of the year and at any time of day.

An alternate idea is to look up the frequencies of some local 6m repeaters and monitor them. You should hear something if the radio is working.

Good luck and 73, CJ K0CJ

I thought most of the guys on this reflector were lucky to tye up their shoe laces, finally we get some serious aswers to a query

trent vk4ti

Ps What is relevant is the desired result: that being what are you trying to acheive from stacking, if the optimum you are after is 15 degrees radiation then 3/8 stacking distance is probably fine. Refer to the articles in the most recent ARRL antenna handbok or subscribe to TOWERTALK reflector and get some real answers o your real world question..

I agree with this last statement...furthermore, in "real world"
practice,
the gain from a large vertical stack is not very useful on HF because
it's
concentrated in a very narrow low-angle lobe which is generally not too
useful. I have a stack of three 6 element monobanders on 10 meters and
find that all 3 is seldom the best choice. Usually either the bottom 2
or top 2 will beat all 3 together. If you have access to N6BV's Terrain
Analysis software in ARRL's Antenna Book (18th edition), it is very easy
to see this as he shows antenna takeoff angles plotted against signal
arrival angles to different areas of the world. Of course if you had a
case
of measuring the antennas on a test range, the largest stack would
always
win...it just happens to be at a takeoff angle that is not very useful
in
the real world.

As another poster has confirmed, it is possible to obtain more than 3dbd by stacking two identical aerials. Another point to bear in mind in my original post was that I made reference to a "rule of thumb" for calculating gain. As can be shown, this is not an accurate figure in most cases but, in any aerial system that the average amateur is likely to erect, it will give a close approximation to the true figure. There are not that many people around who can install 16 times 11 ele yagis on 50Mhz <GG>

=========
WARC-1979 was held in Geneva, Switzerland, with positive results for Amateur Radio. Three new bands were
assigned to the Amateur Services at 10100 - 10150 KHz., 18068 - 18168 KHz. and 24890 - 24990 KHz. (30M, 17M, 12M). Not sure of the dates of activation. DXing is allowed on the "WARC" but not contesting. For modes of operation in these bands see URL:

http://www.qsl.net/sdgarrl/hamfreqs.htm

Best Sporadic E opening I ever worked on 10. It came just in time for FD. This was the first major contest since I up graded to General. It was a blast working towards a 5 band WAS.

The main page is rather graphic intensive, but at 33.6 (my connection)
it only took 1 minute and 15 seconds. It is a little longer than I would
normally wait, but a long ways from 4+ minutes.

It appears to be worth the wait. The call sign graphic is rather
stunning, and must have taken a while to create!

Andrew,
Rather than spend a lot of money for an antenna you may not
use much, why not try a simple dipole. Not difficult to make,
and you can put one up almost anywhere. If it isn't what you
think you want, your not out much. If you make it your self,
it's even cheaper.
'Doc

Or maybe is was the lack of a front-end on my cheap-ass HTX-10 10m rig.
Can you cay 8 kHz bandwidth?

Nevertheless I managed to work WA, MT, WY, CO, NM, and MO, as well as
all of the locals from the SF Bay Area, in about 1 hour of operating.
Everything in a 1 hop radius! Couldn't hear anything on 10 from closer
or further.

And HI was loud and clear at 9 AM PDT Sunday, sporadic-E I would think.
I've never heard HI that early in the morning. Yup would have been a
good day for 6.

I had never worked 6 meters before Field Day, but I can say that
my interest is definitely piqued now. The sporadic E was anything
but sporadic this weekend. At K5MDX (MS Gulf Coast) we worked
37 states + VE2/VE3/VE4 on 6, missing only the far West, a
couple of New England states, and LA/GA/FL. What a blast...

That's one of those words that has two very divergent meanings in the US! It is occasionally used the way you say it is in the UK, but it's more frequently used the way Ray did.

(I think we convinced some 6m people they had some *real* DX; one of our two 6m operators at K4FUN was a visiting G3...)

(yes, the sporadic-E *was* excellent this year. We made something like triple the number of 10 meter CW QSOs we did last year, and the 15 meter total was way up too. You know things are hot when you're working 400-mile QSOs on E-skip...)

Walt, I'm confused? That remark was made by ND8V, an EXTRA class
amateur. So what does this have to do with "code-free licensing" ?

According to Buckmaster, ND8V was an Extra in 1-99, prior to that he was an Advanced. Both licenses were issued long before the restructuring took place. You must have meant "the realms of" Extra "no brains." :>)

On the WWW now too - just put "DX Cluster" into your favorite
search engine. Nice if you have a cable modem and don't want to
tie up a 2 meter radio, TNC, antenna, etc. just to get spots.

2201. KC4AAG callsign

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-28 00:00:00 UTC
From: Scott Oakland <soakland@home.com>
Message-ID: <395A45CD.83F2F739@home.com>
Source record: 20237

Hi, I am curious about KC4AAG. He operated at Terra Nova Bay in
Antarctica in '94/'95, STrange tho, the FCC has assigned KC4AAA-KC4AAG
to Antarctica more recently, (calls issued by Nat'l Science Foundation)
and novice calls after that began with KC4AAH (they skipped over
KC4AAG). So does anyone know what KC4AAG's origin might be and why is it
an orphan?
Any help is appreciated.

2205. callsign R3SRR/2 in IARU headquarter contest

Newsgroup: rec.radio.amateur.dx
Date: 2000-06-29 00:00:00 UTC
From: DK4VW_anti@Mailer.Uni-Marburg.DE
Message-ID: <8jf5cu$f3r$1@surz18.HRZ.Uni-Marburg.DE>
Source record: 20241

Hello!

I just got knowledge of the callsign which has to be used by the RK2FWA group in Kaliningrad representing Russia in the IARU HF World Championship (8./9. july) as the national headquarter station:

R3SRR/2 !

In all other countries the radioclub and administration are looking for a callsign as short as possible. In DL the callsign DA0HQ is used, which indicates also very clearly that this station is running for Germany in this contest.

It is a pitty that the Russian headquarter station has to use such a long callsign. Clearly a disadvantage!

My guess is that - as seen very often in Russia - again JEALOUSY of some people prevented the requested callsigns R2HQ or (at least) R2SRR.

What a shame for Russia!

That's a thought provoking question!

Actually, I think there is a different "normal" for different bands.
Normal for 2mx would be "K4XL monitoring."...followed by an
indefinite, but lengthy period of silence. For 10mx, normal would
certainly involve the exchange of silly numbers such as "my number is
four hundred seventy nine dollars and twenty-two cents." For 15mx it
is "CQ DX." For 20mx it would seem to be noise making and name
calling such as "brrrrrp, you silly #$%@@$, he's listening up! UP!"
For 40mx, the normal conversation usually involves health and age
related issues such as "had a good day...no blood in my stool." All
of the other bands also seem to have their own "normal" conversations.

Surely this is a "good thing!" With this many different kinds of
"normal," almost anyone, even those who some might regard as
"abnormal," can find a comfortable spot on the bands.

Still, it looks strange.
The additional prefix for England is only M without a number.
Also, one would expect a /P or /M after the callsign according to
CEPT recommendations.

Hi !

Hereby I inform al DXers of our annual IOTA DXpedition. This year we will be on the Archipel of LOS FRAILES in the Caribbean Sea.

Callsign: YW5LF
IOTA: SA-059

Our activities will be on all bands (incl. WARC).
LOS FRAILES will be QRV (if all works as planned) from July 12 to 16, 2000 on CW &SSB.

The expedition is organized by the Venezuelan Navy and our DX-Clubs.

QSL via W4SO (maildrop)

CUL

Ray

Seeing his call was last update in Jan 1999 I doubt that this fellow
upgraded as a "no-code" Extra after April 2000.

He is obviously a "REAL" extra and not the product of 5wpm HF licensing. So
please point the finger where it belongs

Here our problem. During field day we decided to go QRP on batteries to get the 5 point multiplier. Well at the time we thought that the free stations where not limited to QRP so we ran our VHF/UHF and satellite stations at full power. Is this correct or should he have QRP on the free stations?? Dose this mean we can still be the 5 point multiplier on the stations that did count?? Thanks in advance.

Dang I didn't hear any such thing. Of course I made ALL of my contacts
on that dead mode called CW. And guess what? I heard a lot of skilled
operators. But then thats how it always is compaired to slop bucket,
contest or not.

> free stations??

The rules state that in order to get the 5X QRP/battery multiplier, ALL FD contacts must be made using 5 watts or less output power, AND must be powered by energy sources other than commercial mains or petroleum-derivative engine-generator sets.

Decades ago, it was possible to have multiple power levels. But today, the power level of the highest-power rig in an FD setup is the one that determines the power level for all FD QSOs from that setup.

> Dose this mean we can still be the 5 point multiplier on
> the stations that did count??

Unfortunately not. Using more than 5 watts in any station disqualifies.

But there may be a way out:

The FD rules say that any station that begins setup before 1800 UTC Saturday is limited to 24 consecutive hours of operation, while stations which wait until 1800 can go 27 hours. However, I have read of stations that set up before 1800, yet operated the full 27 hours - they just did not claim the QSOs made in the last 3 hours for point credit. (I recall that the late great KH6IJ used to do this, just to maximize the number of hams who could work Hawaii on FD.) The hams who worked him got QSO credit, but he didn't.

It might be possible to apply this idea to your situation. You might consider not claiming the contacts made with more than 5 watts for point credit. Tally up the point scores both ways, and see which is greater.

Your best bet is to email the folks at ARRL Hq, and ask what they will allow in this area.

the free stations should have been 5 watts also, plus if you ran 1A Battery
you didn't get VHF/UHF for free. That was for 2 and above.

Not bad, however I can't help but make one comment.
Don't take it as a put down but rather as a suggestion.

On the personal picture section of your web page the statement
under one pic said something like this: "I spend 50% of my time on the
radio and 50% of my time on the computer." This is obvious if you
look at the picture.

It would be better if you could some day post a new improved picture
and a explaination below that says: "I spend 33% of my time on the
radio, 33% of the time on the computer, and another 33% of my time
looking after my health.

And that is just so wrong on so many levels ($1). Having the option to shift power up and down according to the bands, modes, and conditions would be right in line with the FCC requirement to use the minimum power necessary, yadda yadda.

It would also add a bit more strategy to the hard-core contest clubs.

Sure, it's another stat to accurately log in under sometimes frenzied conditions and yeah, it can be fudged by FD weasels, but so can a lot of things. If I'm underestimating this, it might be the showstopper.

Hmm, neither of the BR68 copies I have here mention using 0 or 1 (and
one of them is pre-M), and neither does the copy on the RA web page.
So, M/ is correct for CEPT operation. However, when I got a
reciprocal license, it did specify the "0". Maybe he's working with a
reciprocal, since US CEPT operation is relatively new, and maybe he
had a license from before that.

And if he were operating from the station location on that license, or
had notified the proper authorities, he'd not need /P, either.

So, it could be a totally legitimate call, in spite of all the
hypothetical nits being picked.

As I've said before, I have a document that says my reciprocal call
for that period is GE0N6TQS.

And after I'd posted the previous message, I recalled that there's
a situation where a US licensed ham would still need a reciprocal
license. The US CEPT regulations only apply to US citizens, so a
resident alien with a US license is not eligible for CEPT privileges.

Walt is right. When I got a reciprocal call for use in Scotland in the Spring of 1999 [pre-CEPT for the U.S.], the license said: MM/W3LEO.

After CEPT, I called the Radio Licensing Centre to confirm that the call would be MM/W3LEO [again without a number]. I also checked with them about the "MM" and the possible confusion with Maritime Mobile [couldn't I use "GM"]. After a discussion in the background, they agreed thee might be a problem with MM but that the call would have to be MM/W3LEO, with no number.

I also remember playing around in the CQWW [fall of '99] and the ARRL Int DX [Spring of '00] contests and being told: "My logging program says I need a number after the prefix." "Are you maritime mobile?" "I can't work you 'cause you don't have a number after the prefix." "What ship are you on and where are you?"

With CEPT, there are probably going to be a lot more casual operations by U.S. hams and they should check the appropriate web sites for call prefixes for the country where they will be operating.

Also, if you have a logging program that "needs" a number after the prefix, either fix your program [some don't even have the M series as a U.K. country yet] or add a number if you have to. Please don't tell the operator that THEY have to add a number.

Cheers and CU from GB2LMG [Mull of Galloway Lighthouse] as a guest op with the Wigtownshire Amateur Radio Club during the International Lighthouse Weekend [19-20 August] and then from Portpatrick, Scotland from about 22 October till 18 November, including the CQWW. Hopefully, by that time, I'll have a "permanent" MM callsign.

But why do foreign visitors HAVE to use the 'M' prefix? We Brits have to use it because we have run out of 'Gs' (at least for the Class-A licences). I'm not a CW guy, but it must be a horrible thing to have on CW - especially 'MM'. Ain't got no rhythm! There is absolutely no reason why the traditional 'G' could not continue be used. It is still a perfectly valid prefix. Presumably, the 'G' comes from the 'Great' in Great Britain. Maybe its use is considered to be politically incorrect these days?

Ian.

I agree about the "M" prefix for use as a prefix to foreign calls under CEPT. It was a lot of bother to be MM/W3LEO. I tried w. the Radio Licensing Centre but no luck using "GM." for my time in Scotland. I understand that with "new" countries coming about, the U.K. wanted to keep the M series.

Walt: is it true that a number-prefix combination issued to someone then covers ALL the U.K. areas? I.e., if you get M0CVS in England, then in Scotland you would be MM0CVS; in Northern Ireland, you would be MI0CVS; etc. If this is true, it is a system that "uses up" the available callsigns at a quicker rate than in other countries.

Anyway, I'm glad CEPT is in place for the U.S. to let us save a few $$ on licensing while we are visiting.

Lenio,PY3DF

2249. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-02 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <8joe15$5hh$1@news.hawaii.edu>
Source record: 20185
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any amateur topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and its
content drifts further and further away from being "on-topic" in the
various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

M0/K9ZO? GE0N6TQS? What's all this whinging about goofy Brit callsigns?

Hell, back in the golden age of reciprocal licensing if you were an
American trying to put up your mast in The Kingdom you got stuck with
your British call slashed together with your American call. Remember
the likes of GC5ACI/WB6QEP and GM5ABN/KP4BRY from the summer of '66?
Now THOSE were some meaty callsigns!

Dxpedition Artic 2000
---------------------------
Svalbard (IOTA EU-026)
06~13 July 2000

With pleasure, the "Modum Group of NRRL"
announce that: from July 6th to July 13th
J W 7 M will be on the air.....!!

The team operators are the follows:
-------------------------------------------

All the operators use the call JW7M,
but probabily, we will use also our call /JW

LA7IL - Jon
LA3OHA - Terje
IK2XDE - Andrea
IK2JYT - Giovanni
KF6XA - Dave
KG0VL - Jeffery
OE3GEA - Gerhard
S57FYL - Alexandra
S53AC - Atila
SM3EQY - Haakan
SM3JGG - Staffan
SP5DRH - Jacec
Artic guide: Eugeney Bouzney (Russia)

Approximately operating frequencies:
---------------------------------------------

CW SSB

1,825 - 1,850
3,525 - 3,750
7,025 - 7,050
10,125
14,025 - 14,250
18,075 - 18,150
21,025 - 21,250
24,925 - 24,950
28,025 - 28,450
50,100 - 50,150
144 ...??
```

We will be on the air all band & all mode, 24 hours in a day.
We work also in RTTY, others frq. update come up later.

6M Enthusiasts

If you hear the beacon JW7SIX on 50,068
Will you please inform us on DXsummit.
We will try to direct our antennas in the current direction.

Others info

During the week, we will try to go at Kong Karl Is. (IOTA EU-063)...MOST WANTED...!!
During the weekend 08~09/07/2000 we will partecipate at IARU HF Championchip (SSB/CW)
For more info please mail us: dxpedition2000@dxpedition.org
Web Page: http://www.dxpedition.org

Pilot

When needed, our local pilot will be LA7ZO - Tore

QSL Information

Qsl manager is LA7M, qsl via boreau is ok.
If you prefer direct QSL use:
LA7M - Modum Group of NRRL
P.O.Box 48 - 3341 Aamot - Norway

Hi Mark in Meriden,

On the contrary, there has been a lot of stations on particularly due to the reorganization of islands that the RSGB just did. It took effect on June 19, 2000. Fifty-eight new island/groups have been added by splitting them off of already existing groups. Many have been on the air already. There have been so many on that you will find them well below and above 14.260. Also are you aware of the other freqs for the other bands? 21.260, 28.460, 28.560, 18.128, again, listen above and below those freqs as well.

My home page is the EU Cluster IOTA Spots and many islands are posted; I have a tough time hearing a lot of them, though. Even though we are at the top of the cycle I don't feel that propagation is as good as it has been for the past two cycles I was licensed for - Hi.

Hope this is helpful information from Waterbury!

73,
Tony, WF1N

Hello Mark,

No, IOTA is one of the busiest awards currently on the bands. Be sure to
listen to the IOTA contest the last weekend of this month.

I worked several new IOTAs this weekend, EM5UIA, GM0VIV, another GM on the
Outer Islands, As 56 from Japan, and heard about a dozen more that were
already in my log. Connect to one of the internet DX clusters and do the
followinf command:

sh/dx/25 'iota'

and you'll get a pretty good picture of whats happening. You can also log on
to the RSGB IOTA site and IOTW to see scheduled activity.

From: "Scott B. Nichols" <snichols@mvosprey.com>
Message-ID: <39647066.7A00FFCE@mvosprey.com>
Source record: 20104

In my 24 years of DXing, I have found the best way to get a card back is to send a self-addressed envelope with a US dollar or two included, especially if the card is going through a manager. I receive upwards of $200 US a year from stations looking for cards, and even though I can't spend them here in Canada, I use them to get cards that I want from other DX stations. Nothing guarantees getting a card back, but of all the methods I've tried, this seems to be the most effective. A seld addressed envelope is also essential as, believe me, when sending out numerous cards, filling out addresses on envelopes is a pain.

Also, avoid doing what many stations have done to me...DON'T send an envelope with an American stamp on it as obviously it is no good outside the US!!!

Good luck and 73,

Scott, VE1OP

Postage in Germany in particular is approaching the equivalent of $2, so be considerate. Remember that most of the dx stations really could care less if they ever get a card from you (nothing personal)--they get LOTS of North American cards--they don't need another, so don't ever expect anything back if you don't cover the postal charges. Imagine yourself being on the other end and knowing that every time you got on the air it was going to cost you perhaps a hundred dollars in postage.......you wouldn't be on the radio very much. Check with the dx managers in your area and see if you can buy some of the recycled IRC's at discount. This can help a bit with the expenses, but plan on a small postage budget each month and spread the expense out over the year and it won't hurt as much.

I would like to know, what possibilities there is to receive many (different
mode)
transmission at the same time in 5kHz (or wider) band?

Now I use skysweeper (www.skysweep.com) for that purpose, but the bandwidth
is limited
in it to 5.5 kHz.

I am just getting back in to amateur radio and would like to know where I can find some documentation on band conditions. I am going to setup a sked with my Dad and I want to get an idea of where we might think of meeting. Each has multiband antennas and 100 watts. We are about 1700 miles apart and plan most of our work at night. Any ideas? Thanks

Rick

Hi Rick,

I notice from looking up your call in Buckmaster that you have a technician license. Your best bet (not a very good one) will be 6 meters. If you can pass the 5 WPM code test and upgrade to General, the 80, 40, or 20 meter bands would be your best bet.

73,

Marv

Depends upon how many receivers/demodulators you choose to operate, all
tuned to the same passband, etc.

I commonly operate PSK31 with a 3.5 KHz passband displayed on my computer
screen in a waterfall display. With my Kachina transceiver, I can display
and copy CW, PSK31, Pactor, etc all simultaneously. Makes quite a unique
set of sounds at times!

He may very well have passed the 5 wpm exam. An N8H** looks pretty old
(circa 90-91). In the 2 call area, codeless tech sprang to life around
the N2M** series IIRC. If so, taking and passing the General written
will get him on the bands immediately with a "temporary AG".

And of course you can demodulate all PSK31, CW and Pactor signals that
happen to be within the passband at the same time, provided their signal
strength is within a certain limited range.
(no worse than trying to copy any single narrowband signal using a receiver
with a passband that wide)

2294. Warning! -- SONY SUBSTANDARD SERVICE

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-08 00:00:00 UTC
From: An_American_Consumer@tsuqokrmav.com
Message-ID: <D450F3ACC1B28E.wiwrcde@snaihihmes.org>
Source record: 20130

Anyone considering the purchase of a Sony peripheral for their computer
might want to give it some further thought. There clearly is not a
reciprocal relationship between what they sell and what they service.
-
I purchased a CD-RW drive back in April that just recently went bad
(won't read). When I called Sony service, I was told that I could not
get a replacement and that I had to ship it across the country to be
"repaired" (and we all know what that means...) - with a three (3) week
turnaround. Assuming that they keep their 3-week commitment, with
shipping both ways, I'd be without the use of the unit for at least
five weeks!!!
-
I hardly think that's reasonable or fair.
-
Compare this to HP, who under the same circumstances would simply ship
you out a replacement unit and issue a call-tag for the old one.
-
Sony is a behemoth in the marketplace and as such, they have an
obligation to scale their service facilities to meet demand. To not do
so is an indication of their lack of commitment to customer satisfaction
and an unwillingness to stand behind their products.
-
Buyer be ware!
-
-
-
-
-
-

2301. INVITATION TO 3 ANTENNA REFLECTORS (LISTS)

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-09 00:00:00 UTC
From: fractenna@aol.com
Message-ID: <20000709091554.02311.00000252@ng-cb1.aol.com>
Source record: 20137

QST--

You are invited to join one or all of the following lists on e-groups(formerly onelist). All these reflectors are e-mail based, friendly, objective, and moderated ,so that no spam, porn, off-topic, or personal-offensive posts are sent out. You will receive no off-list e-mails by subscribing: again; no spam.

These lists (with average recent subscriber sizes) are:

ANTENNAS@EGROUPS.COM 180 members
CROSSFIELDANTENNA@EGROUPS.COM 67 members
FRACTALANTENNA@EGROUPS.COM 265 members

Please review the descriptions at:

http://www.egroups.com

Please note the CFA list specifically deals with this antenna in an objectively critical fashion and no posts will be allowed that make grandiose claims without supporting data presented. To date, no data has been presented which requires the extraordinary claims made by some pundits: there is no evidence for better performance than any other small vertical antenna (and that performance is poor).

To subscribe to any list, either go through the process at egroups, or to skip the process (and some say 'annoying questions') just do:

---------- -subscribe@egroups.com

where the ---------- is the name of a given list (such as 'fractalantenna')

If you have a specific question on this post, please e-mail me off-NG at chipn1ir@aol.com.

73,
Chip N1IR

2303. ITU zones question/confusion

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-09 00:00:00 UTC
From: Gary Knight <gknight7@gte.net>
Message-ID: <NU4a5.2487$HD.396170@dfiatx1-snr1.gtei.net>
Source record: 20139

According to the rules for the 2000 IARU HF World Championship, the U.S. (K, N, W prefixes) consists of ITU Zones 6, 7, and 8.

But in the "Radio Amateurs World Atlas" (DARC Verlag) the U.S. is indicated as being comprised of Zones 3, 4, and 5.

Further, the CQ Worked All Zones rules also put us in Zones 3, 4, and 5.

What's the difference? Please respond by direct e-mail if you know the answer -- thanks.

Gary

CQ zones and ITU zones are different. The CQ WAZ award and CQ WW
contest (and most hams) use CQ zones, but the IARU contest uses ITU
zones.

Unfortunately, the borders for the two types of zone are different. (so
if you're in CQ Zone 4, you're *not* necessarily in ITU Zone 7 - though
you *might* be! I can never remember my ITU zone, and I gave out the
wrong one (7) for over 500 QSOs yesterday...)

In addition, the DARC Verlag edition is obviously referring to Zones 3,4,5 for the USA as the CQ Zones, not ITU. Incidentally, the state of Alaska is CQ Zone 1 and Hawaii is Zone 31. Don't ask me what ITU zones these two states are - I only need to know once or twice a year for contests.

From: AC6V <ac6v@ix.netcom.com>
Message-ID: <8kch0k$7h9$1@slb0.atl.mindspring.net>
Source record: 20145

Hi Gary -- two different zone assignments. There are about 90 ITU zones --
see URL:
http://www.arrl.org/contests/announcements/ituzones.gif

There are only 40 CQ Zones - see URL:
http://www.cq-amateur-radio.com/wazrules.html
AND
http://www.cqww.com/images/wazmap4.gif

So these are two different zone assignments. When its an ITU zone based
contest -- the USA is in zones 6,7,8 but for CQ and other contests, the USA
is in zones 3,4,5 as you noted.

For a cross reference -- see URL:
http://www.ac6v.com/pageazone.html

The (DARC Verlag) book lists CQ Zones (40)

Brad,

It looks like you have made a good start, but I would recommend that you
do 2 things:

1. Check out the web pages on the Koch method. I think the Koch
method is the best way to learn code. The default should be 18 wpm
instead of 5 wpm. The theory is that by going at 18 WPM it forces
the student to learn by sound and using the Koch of starting with
2 letters then only adding 1 at a time until they have it down
solid before going on.

2. Make it a program instead of an activeX control.

More on Koch

http://griffy.nmt.edu/sara/sara/finley.sm404.html

I got this tid-bit from the Ohio/Penn DX Bulletin No.467:

CY9, ST. PAUL ISLAND (Press Release). "After lengthy negotiations with the Canadian Coast Guard and extensive work by a non-amateur Canadian on our behalf, the required insurance documentation and fees were submitted on 19 June for final official permission to visit the island. Hopefully, this will be quickly forthcoming."
Their planned dates are July 6-10th (weather dependent). Callsigns will be AI5P/KE1AC/WA4RX or WV2B Portable CY9. No activity for 160/80 meters is planned. Emphasis will be on the higher bands. Suggested frequencies are: 50115, 28495/28030, 24945/24895, 21295/21030, 18145/18075, 14195/14030, 10130, 7185/7170/7030 (By agreement, U.S. stations in Canada must operate SSB in their own National bandspace.) QSX as announced. QSL info: AI5P (via Home Call), KE1AC (via K1WY DX Association), WA4RX (via N2AU), and WV2B (via N2AU). Additional information and late-breaking news will be available there on: http://www.geocities.com/Heartland/Pines/7651/DXpedition.html

OPDX WORLD-WIDE WEB HOME PAGE (provided by John, K8YSE): http://www.en.com/users/k8yse/opdx.html

This news letter is well worth subscribing too ! And the price is rite....Free !

2331. Equipment Info request

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-12 00:00:00 UTC
From: Laurent <jegou@univ-tlse2.fr>
Message-ID: <396C71C1.2AE64A1A@univ-tlse2.fr>
Source record: 20067

Hello, 73 to everyone

I'm a SWL who wants to escape from the HF frequency range, ie after 30 Mhz, notably the RA bands on 50, 145 and 450 Mhz.

So i've few questions about the equipment :

- is the SSB usefull on thoses frequs ?
- what can i find on those frequs ?
- what kind of equipment do you precognise : Icom R10, Yupiteru MVT 7100/7200/7300, Yaesu VR500, Uniden BC9000XLT (table) ?

Or where can i find (on the net) more informations ?

Thanks for your help !

yes,you are right.but i was only answering someones question.
i think that it is rather tacky to post info from a news letter,when i'm
not the one
sending out the news letter.But then again maybe we could get the publisher
to
post it in this news group like it is done on packet (this is how i found
out about it).
If you subscribe to it,you also get a little bit more info in the news
letter.here is the
URL:
http://www.en.com/users/k8yse/opdx.html

another good source of info is listing to this on ur computer:
(this week in amature radio) URL:

on 50mHz ssb,simplex,and repeater activity amature band
on the other 2 mostly commerical (ie: police,fire rescue,bussiness) fm.
for the equiptment try there websites.
144mHz and 420-449.995 see 50 mHz amature bands.

Wednesday July 12 8:24 PM ET
Sun Eruption Causes Radio Blackouts

WASHINGTON (AP) - A strong solar flare early Wednesday morning caused some radio blackouts on parts of the Earth facing the sun and more are possible as the active solar region rotates toward the center of the sun, NASA announced.

The space agency said on its science web site that the Solar and Heliographic Observatory (SOHO) satellite recorded a massive solar flare, called an X-class flare, about 6:37 a.m. EDT Wednesday.

Streams of electromagnetic energy erupting from the flare disrupted some radio communications, the announcement said.

SOHO, a joint project of NASA and the European Space Agency, also detected two coronal mass ejections, huge clouds of electrified gas, erupting from the sun on Monday and Tuesday.

The National Oceanographic and Atmospheric Administration, which predicts the effects of solar eruptions, said there was a 40 percent chance that the mass ejection would trigger a disruption of the Earth's magnetic field by Friday. This could create aurora lights reaching into the mid-lattitudes, which would include the southern U.S. Aurora lights are common in the far northern and southern latitudes.

The coronal mass ejection sent a bubble of plasma, or electrified gas, toward the Earth at more than 2 million miles an hour. The first shock wave of the fast-moving mass was expected to smash into the Earth's magnetosphere, the magnetic field that surrounds the planet, on Thursday. Material from a second, more powerful ejection is expected on Friday.

The aurora, or northern and southern lights, are a shimmering glow in the sky caused when energetic particles from the sun strike atoms of gas in the upper atmosphere of the Earth. The Earth's magnetic field protects the planet from these solar particles, but the field dips low over the poles. For this reason, the aurora is most commonly seen at high northern and southern latitudes. Unusually powerful solar bursts can produce the blue and green lights in the night sky closer to the equator.

Experts say that the aurora is best viewed around midnight, local time.

The corona mass ejection poses no health risk to people on the ground, but such solar bursts have been known to damage spacecraft and to disrupt electrical power grids. Most utility systems and satellites now are designed to resist such effects, however.

The sun is currently at the peak of its 11-year cycle of intense activity.

Not at all, provided that his quoted event exists at the intensity that is needed to provoke the display.

The occurance of the visible Aurora as far south as the Central Texas area of the USA, for example, is very unusual. I'm 60 now. In my lifetime I've only seen it here a handfull of times here at W5WQN.

At least three times I can remember, the news media has also made it a point to post the alert to the general public, which as made it possible for many more folks to see the rare southward displays.

They are striking, even though not near as noteable as the normal Northern stuff, when they do make it this far down.

Taking a look tonight and tomorrow is a small price to pay for a chance to see it. However if you are out in the country, it's much more likely you'll be rewarded if it is there, as the lights of a city can mask the far less visible display intensity down here..

There are no multipliers, in the usual sense, in the ARRL Field Day.
The multiplier is based on your power level, not how many sections,
countries, etc. that you work.

>I tried to can several US stations with no result....

DX stations do count for points like any other. There is no reason
they should not work you. I worked every DX station that called me.

In fact, there are no QTH multipliers at all on the ARRL Field Day.
It's only partially a contest, anyway.

There are a number of US stations I'd like to can, but with no
results.

The only multiplier in American Field Day is the power level. DX
contacts do count for point credit, but they count for the same number
of points as other W/VE QSOs.

I suspect a lot of American FD operators only get on HF once a year.
It's not particularly unusual to have people who hold a VHF-only license
operating HF (legally, under supervision) on Field Day; of course, these
people aren't very familiar with HF conditions. Some simply can't hear
anyone who's weaker than S9+10 through the QRM.

They don't have a clue themselves Kent.

What I do find utterly amazing is that whenever
a topic of a technical nature comes up in a ham
radio newsgroup, it does not take long for it
to degenerate to a name-calling session, a discussion
about "who's-QRM'ing-who" or a combination of both.

I think this may be the result of an effective job
by Mr Hollingsworth of cleaning up places like
14.313 and 3.894.5 and 3.901 - it looks like all
the kooks are now taking up residence on the internet.

(I personally wish he'd left 14.313 and 3.894 be alone.
this way all the pathological screwballs and looneys
would stay in those two spots on the dial. A "Ham Radio
Bellview State Hospital" or such.

This way their all in ONE or TWO places. Like effluent
safetly stored in a septic tank.

Too late now I guess.

>Methinks you confuse Mike with Martin!

Methinks you know something! Huge grin..

Martin was related to me, but I am not related to Martin! Chuckle. The Luther group from whence I'm sprung was the John Luther crew that came in with the family to the Swanzy, Mass, site from England with the Pilgrims.

That branch of the Luther group was in England some two hundred odd years before Messr. Martin wast born, I'm told! Cousin Martin did prove, however, that it seems possible to go out on a limb, saw it off on the tree side from you, and fall into Grace. Chuckle.

To keep this into DX perspective, you really need to go out on a dark night, not one lit with a half-moon, which, incidentally is pretty obscurative while looking for weak other visual things. Take a two cell "D" flashlight or bigger. Shine it up in the dark night sky and take a look at the beam as it goes up there.

Then, stop to consider that about the same power, on a VERY good propagation night with a decent gain antenna on 40 meters ..

can be heard and copied on CW all the way around the other side of the World.

One watt or so is really copyable between Central Texas and Australia on 40 CW at times. I and a lot of serioys low band folks have done it many, many times.

You really perhaps don't understand and respect what is really going on here in this world of DX until you stop to think that, as well, if there were a thousand hams listening at the same time ..

all of them at the receiving end of the path could copy simultaneously..

yeah .. one watt

That's around the same power level as your flashlight beam or maybe a bit above it...

No aurora was visable in the Centex area to me on the way back from Beaumont to Bryan-College Station around midnight to two am last night. However it sure didn't cost me anything extra to look up rather

reverently in the sky ..

;)

--> Sleep well; OS2's still awake! ;)

There's a lot of belief that third party traffic rules come into play
here, since the operator on the air isn't licensed for that
frequency.

2365. **"Paddles" for Paddle Switches: TS-520SE (Kenwood)

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-14 00:00:00 UTC
From: xtx99@aol.com
Message-ID: <20000714151005.20914.00000567@ng-fs1.aol.com>
Source record: 20251

I recently purchased a used Kenwood TS-520SE (I'm new to this...am taking my first test next week). The left side of the front panel has 5 paddle switches including "Send Rec" and "Off Slow". The switches appear to work but it seems that the plastic "paddles" that apparently pop into the switches are missing on these two paddle switches. For me to work the switches I've inserted the end of a pencil into them. I've called several Kenwood parts retailers with no success. The Ham that sold me the transceiver said I'd have no trouble finding the "paddles" for the switches (he's since moved). Any suggestions are appreciated.

2368. Help - Naval Academy ham radio club in danger!

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-15 00:00:00 UTC
From: k3for@aol.com
Message-ID: <20000714223058.20048.00000251@ng-fj1.aol.com>
Source record: 20254

Help!

I am looking for other Naval Academy graduates or US Naval personnel who can assist me in saving the amateur radio club at USNA.

I have been the officer rep for the past 2.5 years, but a decision was just made in the past 48 hours (over the summer while the mids are conveniently out at summer training or on leave) without notice or discussion, to disestablish the station W3ADO (also Navy MARS station NNN0NNN). Perceived lack of participation, lack of knowledge of our various missions and accomplishments ("oh, ham radio is dead..."), and funding probably played a role.

Mailing address for support letters:
Captain Sam Locklear, USN
Commandant of Midshipmen
101 Buchanan Road
US Naval Academy
Annapolis, MD 21402

cc me at:
Ryan "Skip" Johnson
510 Norton Lane
Arnold, MD 21012
k3for@aol.com
if you can

Or if you can't write a letter, please email me something and I will forward it to the Deputy Commandant by email.

Thank you ! I only hope its not too late -- I have to run down there and see if they've thrown out the gear already...

Check out Pathfinder at http://www.qsl.net/pathfinder/index.htm
It gathers all the major search sites into one application.

Another good one (for USA & possessions only) is
http://ifsclinux.ifsc.ualr.edu/callsign.html at the University of
Arkansas. It's updated daily from the official FCC files.

Vi comunico che ho aggiornato il mio sito personale. Ho aggiuto una
sezione dedicata alle QSL con articoli e suggerimenti utili rivolti in
particolar modo ai novice.
Inoltre ho ampliato la pagina dei links ed apportato un po' di
migliorie generali.
Visitatelo e fatemi sapere cosa ne pensate lasciando una firma nel
guestbook!

SB DX @ WW < KB8NW $OPDX.470
Ohio/Penn DX Bulletin No. 470

The Ohio/Penn DX PacketCluster
DX Bulletin No. 470
BID: $OPDX.470
July 17, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1JN, K1XN, N2OO, WB2YQH/WB2RAJ & THE 59(9) DX REPORT, W3UR & The Daily DX, K4VUD, N6HR, K7BV, K8YSE, NR8U, WB8YJF, CU3AN, EA4ATI, F5LMJ, F6AJA & Les Nouvelles, G3NUG, GI0TJJ, GU0SUP, HL1TXQ, IK1QBT, IK0YVV, JT1CD, LA9VDA, PA5ET, PP5LL, PS7AB, PY2TNT, SM3CVM, UA6AF, UT5UGR, VK3DYL, VK8AM and YO3JW for the following DX information.

" DX IS (???) "..... Is what? (Update). Your editor was very impressed with the responses received last week to the question below. Most of the answers were to the point, some witty and some dissatisfied that I chose to seek the true meaning of "DX IS". Anyway, keep your inputs coming. For those who missed it last week, here it is again:
DX IS ..... We hear this incomplete sentence all the time. Well, here is your chance to finish the sentence or explain what this phrase means. Your editor is working on a project and would like your input. If the response and input is good, I (editor) will put something in print in the future. So, send to your editor the completed phrase/sentence in two to three lines only (if longer, the delete key will be used) at:
kb8nw@barf80.nshore.org

3B8, MAURITIUS. After 4 years for the conversion of his French Ham licence, Piero is now officially "3B8GO" with a Mauritian Ham Licence. No QSNs have been reported with his new callsign, but check out his Web page at:
http://pages.intnet.mu/ingepru

3W, VIETNAM. Jani, YB0US (ex-3W6US), is now active as 3W2US due to the district changes in Vietnam. He was heard this past week on 20 meters CW/RTTY on 14083 and 14245 (DX Net) between 1300 and 1500z. QSL via N2OO, PO BOX 345, Tuckerton, NJ 08087 USA. Also, active this past week was Hans, WA1LWS, as 3W2LWS, on 20 meters CW (1330-1600z). He will be there until July 30th.

A5, BHUTAN. Gerard, F2VX, President of the Clipperton DX Club (CDXC), reports that their project is now "on the road". They will fly from Paris to Bangkok/Timphu on September 1st and return on the 15th. The team consists

of: F6ANA/Alain, F6HWU/Denise (YL), F5LMJ/Alain, F5MBO/G0LMX/Vincent, FH/TU5AX/Christian and F2VX/Gerard. They will travel with five tranceiver: 2 Kenwood TS50, 2 Icom IC706 and 1 Yaesu FT757. They have the authorization of the MOC to use one of the A52A antennass (a Cushcraft triband A3S). Also, they will have verticals and dipoles for the other bands and the WARCs. Power is still limited to 100 watts. They ask the DX community to help them with their project. Since the past 20's years, the CDXC has sponsored many international DXpeditions, for other DX Club from all around the world. They hope some clubs or associations could help them. The cost for this "A5" activity with travel, staying in A5 and licence is around 23 000 F (or 3400 USD) for each operator! The QSL manager will be F8RZ (Jean). All the team's members are both member of the Clipperton DX Club and REF-Union.

AX8, AUSTRALIA. Steve, AX8AM, will be operating as AX8AM, mainly on CW, from Darwin Northern Territory until November 2nd. He has been spotted on the 20 meters CW as early as 0630z and as late as 1300z. Also, check 40 meters around 1230z. QSL via VK8AM, Steve Salvia, 1 Elliott Point, Larrakeyah, NT 0820, Australia.

CARIBBEAN TOUR 2000. The Low Land DXpedition Team (LLDXT) is proud to announce this year's Caribbean Tour 2000 which will take place in August and September. The will be active from the beautiful islands of Antigua and Barbados. This year's team members are Ronald/PA3EWP, Peter/PA4EA, Rob/PA5ET and Dennis/PA7FM. Activity is scheduled as follows:
Antigua - August 11-24th, callsigns V26WP, V26EA, V26ET and V26FM.
Barbados - August 24th through September 4th, callsigns unknown until arrival.
There will be two HF stations (160-10 meters) active around the clock on the modes CW, SSB, RTTY and PSK31. As other years, on-line logs will be available during the tour as well the tour diary and digital photos. Alex, PA1AW, will be their Web master and will send out mailings with up-to-date information. The guestbook will be forwarded to the team on a daily basis. Also, 6 meters will be activated on a low profile, the grids are as follows: V2 - FK97, 8P - GK03. The team will be active in the WAE CW contest and SART and SCC RTTY contest. A Caribbean Tour 2000 web site has been setup on the LLDXT Home site which is fully operational now at:
http://www.qsl.net/lldxt/v2_8p_2000/index.html
The aim is to focus again on Europe and Japan and especially on the WARC bands. Because they will operate from two excellent sites, they also expect to work a lot on topband. The QSL manager for this tour will be Rob, PA5ET (ex PA3ERC): Rob Snieder, Van Leeuwenstraat 137, 2273 VS, Voorburg, The Netherlands.

F, FRANCE (Island DXpedition). Look for Marc, F6HQP, to be active as F6HQP/P from some island in the Gulf of Morbihan. These islands do not count for the IOTA award, but they do count for the DIFM award. His activity will take place between August 1-12st.

FM, MARTINIQUE. Gerard, F2JD (ex-PY2ZDX, HK3JBR, HP1XBI etc...), will be active as FM/F2JD from early August for 4 months. He will be active on SSB and CW as usual. During this period he will try to be active from some

other islands in the Caribbean Sea.

FY, FRENCH GUIANA. Laurent, F5AEG, will be active as FY/F5AEG from August 8th through the 22th. His activity will be will on 10, 15 and 20 meters SSB.

IOTA NEWS.....
NEWS -- Heorhei, UY5XE, reports that the results of the EM5UIA activity from the following IOTAs is as follows:
EU-180 (For UIA BS-12) [Lebyazh'yi Island]: July 2-4th (1128-0459z - 43 hours); 4500 QSOs, 96 entities (Ops: UR5LCV, UT8LL, UY1LA, UY5XE)
EU-179 (For UIA BS-08) [Kalanchakskiye Island]: July 5-6th (1143-0352z - 15 hours); 1700 QSOs, 57 entities (Ops: UR5LCV, UT8LL, UY5XE)
EU-182 (For UIA DU-01) [Poludennyi Island]: July 7-8th (0833-0825z - 24 hours); 2400 QSOs, 74 entities (Ops: UR5LCV, UT8LL, UY5XE)

AS-NEW. A Group of UA6s plans to activate NEW IOTA reference in the Black Sea Coast Group (Sudzhuk Island). They are going to use the callsign UE6AAA. Activity will be July 22-23rd. QSL either via the bureau or direct to UA6AF (Victor Kravchenko, PO Box 33, Novorossiysk-22, 353922 RUSSIA). Please do not enclose "green stamps"... IRC is enough for direct reply.

AS-041. Takeshi "TAKE", JI3DST, will operate from Oki Archipelago (Oki-Gun Shimane) from 0800z July 28th through 0200z July 31st and 0800z August 6th through 0200z August 15th. His callsign will be JI3DST/4. Activity will be on 40/15/10/6 meters SSB. For the IOTA Contest look for him on 40/15/10 meters. QSL via the JARL Bureau or direct to: Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN (Please do not send USD).

AS-085. Look for Duk-Nam/HL1OYF, Phil/HL1TXQ and Park/DS1CJE to be active from Soan Islands (located in the Chunranam-do Islands) on July 28-30th. Their callsigns will be HL1OYF/4, HL1TXQ/4 and DS1CJE/4. They will be active during the IOTA contest CW/SSB on 40/20/15/10 meters. They plan to bring 2 transceivers and 4 element beam antennas. QSL via HL1OYF (Duk-Nam Kim, P.O.Box, Dong-Jack, Seoul 156-600, Korea) or via homecall's CBA.

EU-008. Bill, M0BNN, will be active from the Isle of Skye between July 24th and August 2nd as MM0BNN/P. His modes and bands were not reported. QSL via homecall.

EU-052. Gerard, F2VX, will be active as SV8/F2VX from July 29th to August 13th from Kefalonia Island.

EU-077. Dani, EA4ATI, will take part in the 2000 IOTA Contest from Sisargas Island with the callsign EA4ATI/1 (category Single Op SSB, only 12 hours). QSL via direct or bureau to his home

callsign.

EU-079. Trond, LA9VDA, will be active as LA9VDA/P from Runoy Island (Soroyane) August 20-21st. Activity will be on the usual IOTA frequencies 40-10 meters. Look for LC3NAT to be active on 2 and 6 meters from JP22 grid square. QSL to home callsigns. For more information, check the Web page at: http://home.online.no/~la7sl/la9vda/

EU-083. Operators Tony/IK1QBT, Nino/IK1ZOZ, Vincenzo/IK1YEK and Gianni/IZ1DFI will be active from Bergeggi Island (Ligurian Group) from 0700-1900z on July 30th. Operators will sign homecall/P and activity will be on all HF bands SSB/CW (WARC included) around the standard IOTA frequencies. There will also be activity on 6 meters, CW and SSB. Tony, IK1QBT/p, will participate as a Single Op/Low Power entry in the IOTA Contest. Reference number of Bergeggi Island for the Italian Island Award (IIA) is SV-02. QSL cards via their respective home callsign, bureau or direct CBA.

EU-122. Ernie and Jim will sign GI0GDF/P and GI0PGC/P respectively from Rathlin Island now through Wednesday, July 19th. They will try to operate on all the usual HF bands. QSL to their home callsign.

EU-175. Look for members of the Graciosa Island Radio Association to use the callsign CU4ARG to activate Praia Island near Graciosa Island. Operators will be CU4AH, CU3AN and CU3DJ. Activity will be from August 5-6th on 80-10 meters SSB. QSL via CU3AN.

EU-183. Pit, YO3JW, was recently active from Sacalinu Mare Island last weekend as YP1W for 12 hours on July 8th, running only 40 watts (powered by batteries) into an inverted V for 14 and 21 MHz. He plans to go back during the period of July 23-30th for three days and may enter the IOTA Contest as a low power station. He states that EU-183 is a natural wild life reservation (like Navassa Island) and is very difficult to receive permission to operate on. QSL to YO3JW.

NA-062. Jon/WB8YJF and Jim/NM8O will be active from Conch Key, FL (USI FL-066S) from July 28-31th. Activity will be on all modes, 40-10 meters. They will be active in the RSGB IOTA Contest as a Multi-Multi (2 xmtr, 2 ops) entry. Also, look for them to be active on RTTY before and after the contest. QSL via home callsigns.

NA-075. Elsie/N7WDX and Hillar/N6HR want to remind everyone that they will be active from Galiano Island of the Southern Gulf Islands, British Columbia during the IOTA Contest. The callsign will be VE7DX/7. Weather permitting, they hope to be on the air before the contest beaming Europe.

SA-NEW. A group of Brazilian operators consisting of PP5, PY5 and
PY2 operators will activate the South Catarina South Group
on August 2nd (beginning after 1800z on 20 or 15 or 10 meters)
through August 7 at 1200z. Activity will be on CW/SSB on all
bands including the WARC bands, 2m, 6m and 160m. Their callsign
will be PV5IOTA. QSL via PP5LL.

SA-028. Operators Anderson/PY2TNT, David/PY2DCE, Adriano/PY2AHX,
Andres/PY2XIS and Alex/PY2RAZ will be operating as ZW2I from
S. Sebastiao Island (DIB 016) July 27-30th in the RSGB IOTA
Contest. QSL via direct to: Anderson Serevincis, P.O.Box 2605,
Mogi das Cruzes - S.P. - Brazil - CEP- 08780-990 or via Bureau.

SA-046. Operators PR7SD, PR7SM, PR7FB and PR7AR will activate Itamaraca
Island (also Orange Fort) (DIB 18, DFH PE 01) July 29-30th as
ZV7I. Activity will be on CW/SSB 40, 20, 15 and 10 meters. QSL
via PR7SD, Manoel - POB 008, Joao Pessoa-PB, 58001-970, Brasil.

SA-059. Ray, DL2GG/YV5, reports that the DXpedition to Los Frailes in
the Caribbean Sea had to be cancelled because of logistic
problems for the "YV Navy". He will announce the next schedule
soon. Right now it seems that the DXpedition will take place
in August.

IS0, SARDINIA. Marco, IK0YVV, will be active now through July 31st
signing IS0/IK0YVV. He will be active in the IOTA Contest as Single Op
on CW ONLY. The QSL is OK via home callsign or the ARI Bureau.

JW, SVALBARD. Look for YL Unni, LA6RHA, to operate as JW6RHA from July 21st
through the 26th. Unni will only operate 20 meters and will probably use
the frequencies of 14222-14248 or 14288 kHz in the mornings and late
evenings. QSL to her home address: Unni Gran, Mellomaasvn.128,
N-1414 Trollaasen, Norway.

NEW ELECTED OFFICIALS. The following committee was elected on July 1st
to serve until June 30, 2001, as Chiltern DX Club (CDXC) officials:
President - Bob Whelan G3PJT Secretary - Shaun Jarvis M0BJL
Chairman - Neville Cheadle G3NUG Treasurer - Barry Cooper G4RKO
Vice Chairman- Mike Devereux G3SED Member - John Butcher G3LAS
Digest Editor- Don Field G3XTT Member - Ian Capon G0KRL

NEW "GOLIST" WEB DOMAIN. John Shelton, K1XN, reports that the Golist has a
new Web domain at: http://www.golist.net
Also, new are John's and the GOLIST's E-mail addresses which are:
golist@golist.net --- and --- k1xn@golist.net
The Golist is also the world distributor for "DXTelnet" program for DXers
and Sysops. Visit the Web site's products page for descriptions and use
the order form to make purchases.

QSL INFO AND NEWS.....
A52JS QSL Bureau cards. Jim, VK9NS, now confirms that arrangements have
been made to handle Bureau QSL cards for the recent A52JS operation.
Cards should be sent to A52JS via M0BJI at the RSGB QSL Bureau only.
No other route will work or at least Jim cannot guarantee it. OPDX

InterNet Subscribers will receive the complete press release by Jim as an additional bulletin.

Charly, K4VUD, who operated as XW1UD, is still in the process of supplying the ARRL DXCC Desk with all the documentation (permission papers, photos, Laos visa, etc...) it wants to accept his XW1UD operation from last December. He is currently getting some papers translated into English. More details will be forthcoming, and Charly states to hold onto those XW1UD QSL cards you may have pending the outcome of this activity.

Dennis, K7BV, has returned from his European trip. He made a few hundred DL/K7BV QSOs 50 km from Frankfurt at the QTH of the newest CQ Hall of Fame inductee Walter, DJ6QT. His next stop was in Crete where over 2,500 CW QSOs were logged with a heavy emphasis on the WARC bands from the beachside QTH of Manos, SV9ANJ. A few hundred more QSOs were made as S5/K7BV from the mountain cottage of S57U and S57KAA - the site of the S566Z callsign used by Dennis and his teammate Ralph K9ZO in WRTC 2000 July 8-9th. QSL all via Steve KU9C.

Bob, NR8U, the "O" QSL Manager for the ARRL 8th Area Incoming QSL Bureau, states that N8OW is not the QSL Manager for VQ9TW. In addition, VQ9TW appears to be a pirate operation as no information could be found from various internet sources on the callsign. Cards have been coming into the Bureau with N8OW listed as the QSL Manager for the period of 1992 through late 1994. Most claimed the operation was on 15m sideband with some CW contacts during the period.

QSL the following Mongolian stations to their respective QSL routes:
JT1FCY via I1QOD JT1FDA via KO6UW
JT1FCZ via I1ZB JT1FDB via DL2ECW

Phil, GU0SUP, informs OPDX that there is a GOOD, accurate, on-line callbook for all GU/MU/2U callsigns. It is on the site of the Guernsey Amateur Radio Society, and the precise URL is:
http://www.gars.org.gg/calls.html

Special QSL and photo of the WRTC Ukraine Team (callsign S548X) is available via UT5UGR (Dimitry Stashuk, P.O. Box 115, Kiev-147, 02147, Ukraine). QSLs of S5/UT5UGR and S5/UU2JZ are available also via UT5UGR.

QSL ZY3PEI via PY3MHZ. Activity was from the Itapoan State Reserve to celebrate the 27th aniversary of the Reserve. Reference numbers mentioned are: DFH RS 05 and DFB RS 15

QSL info for special event station W1S, OP SAIL 2000, New London, CT, active July 12-15th is as follows: QSLs will be automatically sent via the bureau for DX stations. Stateside and DX direct requests send SASE to K1JN.

SI9, SWEDEN (Attention Prefix Hunters!). Injuction with "King Chulalongkorn Day", the new "Visiting Station in Sweden", SI9AM, will officially be opened July 19th around 0900-1000z at the permanent QTH Utanede near the King

Chulalongkorn Memorial Building (Grid Locator is JP82iw). Special HF activities will take place until July 23rd, at 1700z. QSL via SM3CVM, bureau or CBA. After July 23rd, visiting operators are welcome to use SI9AM. The prefix is very rare and SI9AM is the only station in Sweden using the SI9 prefix! For more information, send E-mail to " si9am@qsl.net " or check the Web page at: http://www.qsl.net/si9am

TK, CORSICA. "The 59(9) DX Report" reports that Serge, F6AUS, is active as TK/F6AUS until July 31st. OPDX has found that Serge was active on 15 meters RTTY last weekend between 1400 and 1500z. He will try to be active from EU-100 or EU-164 in IOTA Contest.

ZK1, SOUTH COOK ISLANDS. After operating on Penrhyn in the North Cook Islands, Gerard, PA3AXU/ZK1AXU, has returned to Rarotonga in the South Cook Islands and will be active until July 20th. Over the past weekend, he was heard on 20 meters SSB between 0730 and 1200z. He was also on 40 meters CW working JAs 1015z. QSL via PA3AXU.

I bet you "Normal people" get such a roaring hardon by coming into our newsgroups, where you don't belong and posting
moronic drivel like below.
What do you mean by get a life? You mean, act normal like download porn all day? Fuck the wife? Pet the animals?
Hey loser, you are on the internet so you must be a pretty ugly chunk of shit yourself as you wouldn't be logged on if
you had a life.

Actually I monitor this group for the solar events, so I know when the amateur radio and shortwave HF bands are going to be unusable. As for what I get off on, that's none of your business.

There are no specific frequencies listed for VHF/UHF operation. Perhaps a note to the IOTA folks at the RSGB would be in order.

2399. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-18 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <8l127a$h8g$1@news.hawaii.edu>
Source record: 20285
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the

group includes Cary Oler's daily solar progagation bulletins, ARRL bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

I am working on a much more modest one. The biggest killer will be the power supply. The power supply will run that much, even used because of the transformer. If you can find a match, try pairing a pair of microwave oven transformers. I believe these put out something in the 2KV range. I got a couple from an appliance repair place used for $5.00. Currently rewinding these for my service. Real pain, these were welded together not bolted!

However, best of luck.

Dennis WB3KUM/9

2403. QSL status questions

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-18 00:00:00 UTC
From: Jan Ditzian <ditzian@alltel.net>
Message-ID: <3974ACF2.AA8552C8@alltel.net>
Source record: 20289

Does anyone know the status of QSLs for the following:

4W6MM May 15
XR0ZY April 20
FR5ZQ/G June 16
TX0DX March 27

I have the qsl routes, and sent qsls via managers, but I have received no responses yet. I expect that I am simply among the throng awaiting cards, but if one or more of these have qsled to others, perhaps it is time for me to resend a qsl.

Thank you,
Jan, KX2A

Hello all!
On July 8, I passed my Tech license test and I am looking for a rig.

I am looking for some information, suggestions, comments, statements of fact and/or any other information on getting a Tech Class rig.
What are the best bands to run?

Anyone have a rig they want to part with. I am trying to get started on a small budget for now.
I am in Houston and I have heard that there are repeaters in almost every band here.

Thanks for any help you all can pass along!

Scott Bowen

======
Hi Scott for Texas repeaters -- see URL:
http://ac6v.com/pageai.html

2 Meters is far more popular than 6M, 440 or 220 MHz.

Lots of used low budget 2M rigs out there. Be sure it has PL as many areas of
the country require a PL tone.
For rig reviews see URL:

To all on the newsgroup,

My name is Larry Pritchard, and I wish to apologize for the actions of my nephew who was using my computer on the day that vulgar posting was made. I have reprimanded him for doing it. It was even reported to my ISP, so I think that I have been sufficiently punished for his actions. I am sorry that you were offended. Yes I do belong to those other newsgroups, most of them for professional reasons.

I am very interested in radio and understand the impact that the sun's activity can have upon reception. My 16 year old nephew was simply not exercising the good sense that God gave him, as many his age are apt to do. He has been forbidden to use my computer for one month as punishment for his posting and nearly getting me booted from my ISP.

Once again please accept my sincere apology.
Kind
Regards,

Larry Pritchard

For right around $100 you can get a W9INN 5-band dipole. It has 6 traps and offers a resonant antenna on each band. Bill (W9INN) will set the center frequencies for you before shipping at a test installed height similar to yours. I have had mine up 4 years and it has given me no trouble. As far as performance goes I believe it out performs any vertical. Mine is installed at 50ft as an inverted Vee. I have 268 DXCC countries with it most of which were with only 100W. Bill's antennas are advertised in tiny ads in QST and CQ. The model I have is the 78ft Max Performance Dipole MPD-5. For an SASE Bill will send you info on his full line of antennas.

Those 6 traps sound like great attenuators Charles! My five band
vertical has no traps at all.

Another 'local country' not to overlook is the United Nations building in NYC.
It counts too as a separate DXCC country. The callsign for that station is
4U1UN.

So do you have a rig suggestion for a new guy? Used is fine, I just need a
good priced starter. 50 MHz is what I would like to try...

But 4U1WB, the World Bank station in Washington, DC, does NOT count for
DXCC [other than as a US station].

Icom IC-551 6m transceiver
10 watts output, covers 50-54MHz in SSB/CW/FM/AM
in perfect working order and appearance
This transceiver has all the options, including:
- IC-SM2 desk microphone
- IC-EX106 FM unit
- IC-EX107 VOX unit
- IC-EX108 Passband tuning unit
I have all the original documentation. I am asking US$325 or C$450 plus
shipping.

I received QSL from BY1DX yesterday via the route: Bureau to OH2BH.
The QSO's made in WAE 1999 (CW)

QSL via China bureau should work as well, because extrem good relations
between the NOKIA club station (BY1DX) and CARC...

2437. FRACTAL FLYER K2--ON THE AIR!

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-21 00:00:00 UTC
From: fractenna@aol.com
Message-ID: <20000721095006.06527.00000212@ng-fy1.aol.com>
Source record: 20023

If 20M is open tomorrow morning, I will be on going for Euro Q runs at about 14:00 UTC or so on, about 14.190 MHz or so.

WITH the new FRACTAL FLYER K2!

This antenna is a fractalized version of a sloping monopole. It consists of a Koch iteration 2, connected to the 'hot' and two fractal ternary tree branches as a counterpoise attached to the 'shield'. The counterpoise branches are about 6 feet long.

It is about 9 1/2 feet high and about 16 feet horizontal.

It has about a 12 dB F/B. So far, anecdotal on the air reports give it an 8-10 dB advantage over a 20M dipole at the same, low height.

The SWR is about 1.2:1 with full 20M bandwidth. There is no ground screen or 'radials'.

There are no parts, such as loading coils, or ATU.

More info, and technical descriptions, will be on the web site ham page of

http://www.fractenna.com

in a week or so.

In the meantime, I would appreciate an EU listeners tomorrow, if it's possible. If this doesn't work, I'll try again and will apprise of time change.

73,
Chip N1IR

This is not ment to be a rude answer, but I see the Subjec title a lot.
Why ask DXCC questions here? Write to DXCC@arrl.org and get the answer
straight form the horses mouth. I'm not talking about DX questions but
DXCC ones. After all, they have the final say.

OK, so I complained about AB7SL's frequent newsgroup postings and cluster announcements telling us to check out his website. He then replied:

>>The recently added FAQ page on my site addresses these
>>concerns you have expressed.

The FAQ says, in effect, "I have to keep posting to newsgroups and making announcements on the packet clusters because otherwise nobody would go to my web site".

WHy do you feel you have to do this, when other people don't? Why not just set up links from other sites and stop pestering the newsgroups and international packet clusters?

Oh well, 'nuff said (hope).

You mean he puts this stuff on the packet clusters, also?

Maybe he's suffering from terrible insecurity if believe that nobody
will look at his site, or it's so bad that no one will look at it
twice.

Of course, there's at least two possibilties about the reasons he
wants site visits: He doesn't have a life, and the only validation he
gets is this way; or he's collecting addresses for sale to spammers.

And there's the Briedbart Index, which combines number of postings
over time and number of newsgroups to decide if something is abusive
or not. Perhaps someone could run those numbers on him, and get a
quantitive evaluation, that might be sent to his ISP.

Note that AC6V has a VERY good web site, and advertises it in an
effective manner by responding to questions with the approriate URL
from his site. It is, in fact, the first web site I hit for ham radio
references, unless I know exactly where to find what I want.

Derek - It gets old, I agree.. One or two initial announcements should
be sufficient. Used to be the same for "Rod in San Diego" but he finally
got the notion that a good website (and his is GREAT!) get referrals
from the community.

It is quite easy to set up your newsgroup to not show messages from a particular source or with a particular content in the subject.

I do the exact opposite and have the messages which contain subjects that interest me in different colors.

Source record: 19951

Persistence is the key even when they are weak as water. I snagged them yesterday on 15M phone after about an hour of calling. Francesco is a great op even if his English is a bit difficult to understand. He picked me up as a partial call then worked with me till I gave him a 'roger-roger' on getting the full call right. Hang in there. BTW this was done on a dipole at 50 ft from Arizona.

I can second this. I finally snagged him on 20m SSB last night after
hours of frustration over many days. This was barefoot with a C3S at
50 ft - not exactly "big gun." Listening hard is the key. Try to
figure out where and how he is listening and keep trying to be there.
Eventually, he may hear you.

I'll second Klein's second. I got him Saturday night [0006 Sunday] after
tring for about an hour or so. This was on 20 [14195, up 5-10]. His
signal was actually quite good, whick meant all heard him. O.K., O.K.,
I'm on the East Coast, but this was with 100 watts to an R-7 vertical.
Not the best performer on 20. I do better with the R-7 on 40 SSB, HI;
got the 7P8AA on one call.

Hang in there.....

Leo Boberschmidt - W3LEO

2465. Want: Logging Software

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-24 00:00:00 UTC
From: Douglas Snowden <snowden@peoplepc.com>
Message-ID: <397cd08e@flexnet239.uunt.net>

I am looking for something you have used and have
decided you don't like anymore. Not looking to steal
software. I'll pay a fair price.
I am mainly looking for something to keep
track of QSO's and most importantly, print labels.

Doug N4IJ

His concerns are either addressed by your stopping or your continuing.
The contents of your web page, and your desire to get lots of hits on it,
are irrelevant.

SB DX @ WW < KB8NW $OPDX.471
Ohio/Penn DX Bulletin No. 471

The Ohio/Penn DX PacketCluster
DX Bulletin No. 471
BID: $OPDX.471
July 24, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1HT, K1XN, NK1K, N2OO, K2EWB, WB2YQH/WB2RAJ & THE 59(9) DX REPORT, K4VUD, N4XP, KF4OBL, N6RT, AD7U, K8AV, K8YSE, W9VNE, DJ5AV & DX News Letter, DL6YFB, DU1/K7JOE, FK8GM, GM4SUC, GM0CLN, IK2DUW, IK7AFM, IK7JWX, JA7SSB, MM0BCR, OK1FLM, PS7AB, RA3SL, RZ1OA, S50U, SP6ECA, SP9GKM, VE7IPU, VK3EW, VK4FW and YO3JW for the following DX information.

EDITOR NOTES (by KB8NW): Individuals continue to send impressive reponses to my request of "DX IS (???)..... Is what?" (refer to OPDX.449) and I want thank the many who have. Keep your inputs coming. This will be the last week that I will ask for them.
There will "NOT" be an OPDX bulletins for August 14th and 21st. I know, you heard this before, but it is true this time. My wife (chief-proof reader) and I will be going to Las Vagas (without the young adults) for our 25th wedding anniversary (How did she put up with me all these years?) and to visit my Dad. I can really use the break!
Lastly, I want to send out a special thanks to John/K8YSE, Pete/N8TR, Bill/W8JGU, Clark/N8PZD, Carl/K8AV, Dave/WD8IOU and Ray/W8BIN for their help in getting my station back on the air, respectively, with a new Crushcraft X7 antenna. Without the technically knowledge of John/Pete/Bill, I did not think the antenna was going to make to the top of my tower (fighting the tree limbs, guide wires and the new mast pipe). It is great to know a super team like them..... TNX de Tedd KB8NW

4X85, ISRAEL (Special Event). Look for special event station 4X85FUK to be on the air celebrating the "85th Esperanto Congress" in Tel Aviv between now and August 1st. Suggested frequencies are: 7066, 14266, 21266 and 28766 kHz.

A5, BHUTAN. Charly, K4VUD, is looking for all/any radio amateurs from any country who may wish to join him in an effort to activate Bhutan during the first week in December. He can arrange your air travel from your home or from Kathmandu, or you can arrange your own travel. He expects to arrive in A5 about December 1st. He has a Bhutan contact person to

arrange passage of rigs, licenses, and hotel rooms. This is not a cheap trip. The license alone may cost 300 USD EACH! If interested, contact Charly at: k4vud@hotmail.com

A9, BAHRAIN. The "DX News Letter" reports that Gus, KH2/K4SXT, has shut down his activities from Nimitz Hill, Guam, and will be active from A9 in September. Gus prefers the lowbands, especially 160 meters.

AP2JZB CW-PIRATE. Apparently a station signing AP2JZB on CW (on July 21st at 0230Z) has been active. AP2JZB's QSL Manager Leon, K2EWB, reports that this is a SLIM and AP2JZB does not now, nor has he ever operated CW! As a matter of fact he's up in Northern Pakistan on vacation at this time.

C6, BAHAMAS. Joe Pater, W8GEX, reports the team is ready to be active from Berry Island (IOTA NA-054) for the IOTA contest next weekend. The team will be active July 27th through August 2nd as C6AJR and C6DX during the contest. They will have four stations on the air. The team consists of Mike, K9AJ, a veteran of many DXpenditions including Heard Island. Mike, N9NS, was part of the recent Clipperton Island team. Jim, W9VNE, a FOC member, has worked many CW contests from VP5. Rick, K8WWA, is a very active dxer from the Cincinnati area and making his first DXpedition. Joe, W8GEX, has been on many DXpeditions and contest groups. This experienced team will be on 6m to 40m, CW, SSB, PKS and RITTY. QSL C6AJR and C6DX to W8GEX. SASE PLEASE.

DU, PHILIPPINES. Joe, DU1/K7JOE (ex-BV/N0IAT, 7J1AOF, etc), is now active for the next two years from Manila, Philippines. Joe is a high speed CW operator who tends to favor the WARC bands. 17 meters is his preference. QSL to the W7 QSL bureau.

FO0, FRENCH POLYNESIA. Phil, KH7FQ, is now active from Huahine Island (OC-067) as FO0MCC. He was heard last week on 17 meters SSB on or around 18145 kHz between 0230 and 0330z. Reports state that he will be there until September and be active on 80-10 meters.

FS, SAINT MARTIN. By the time you read this, Brian, N3OC, will be active from here as FS/N3OC between July 24th and Aug 2nd. Activity will be on SSB/CW/RTTY and all bands including 6 meters, the WARC bands and the IOTA Contest. QSL via N3OC.

GM, SCOTLAND (Hebrides IOSA/IOTA Expedition). Andre, GM3VLB, will team up with Lorraine/MMOBCR, Alex/G(M)0DHZ and Andre's son Niall (recently VP8NJS) to activate a few Scottish island between July 21st and August 4th. The team will be based on Harris/Lewis. Weather permitting, they will activate Killegray (OH-20) and Ensay (OH-21) Islands during the period of July 21st (PM) through July 26th (AM). Their next target will be St. Kilda (OL-02/EU-059) bewteen July 28-31st (WX permitting). During the IOTA Contest they will use the callsign GM5K (Courtesy Pabay Radio Club, GM0PNS). Alex/G(M)0DHZ will be their "No. 1" CW operator with GM0VLB providing relief. At other times individual callsgns will be used. Following the St. Kilda operation further "surprise" operations may take place. The St. Kilda DXpedition will involve high costs due to its very remote/distant location out in the Atlantic. Currently, the team

reports that so far no sponsorship has been offered/received as of this writing. QSL cards for contacts other than St. Kilda (via GM3VLB) should go to the respective operators. QSL cards without adequate return postage will not be replied to. For those unfamiliar with GM3VLB's QSL - reply system, please refer to his web site at: http://www.IOSA.co.uk

IOTA NEWS.....
AS-NEW. A group of Sakhalin amateurs (RA0F...) will activate a new IOTA at the end of July from the Island of Moneron. Their activity will be on 20/15/10 meters and the WARC bands only. They are expecting to use the callsign RK0FWL/p. QSL via the RK0FWL CBA address, but in any event all QSOs will be confirmed through the bureau. ADDED NOTE: Eugene, RA0FF, reports that in the July/August of 1998, RK0FWL/p has already been worked from the Island of Moneron, but back then the island was not yet separate from Sakhalin (AS-018). Now that Moneron Island is a NEW IOTA, all relationships with RK0FWL/p for 1998 will be considered as NEW IOTA.

AS-066. Look for Alex, RU0LL, to be active from Putyatini Island between July 24th and August 1st. They will also be active during the upcoming IOTA Contest using the special callsign R0L. Activity will be on HF (including the WARC), CW, RTTY and PSK. Other operators present will be RW0LZ, RW0LV, UA0CAL, RU0LL, RZ4HF and UA0LST. Check out Alex's WEB site for this event at: http://www.qsl.net/r0l

AS-104. Six Taiwanese Ops and two Japanese Ops will team-up and be active from Kim Men Island, Taiwan, from July 28-30th. They will use the callsign BO0K in the IOTA Contest and use BO2/homecall before and after the contest. The JA Op are JR7TEQ and JA1EFO, and they will fly to Kim Men Island via Taipei, Taiwan on the morning of the 28th.

EU-073. Look for the Taranto A.R.I. Section members to sign IJ7IJU from San Pietro Island (IJ7) during the last week of July. They will be operating on 80-6 meters, CW/SSB/RTTY and VHF/UHF-SSB. Also, they will operate in the IOTA Contest. QSL via IK7AFM, direct CBA or via the bureau or via E-mail: < roccoafm@libero.it > confirming via ARI bureau.

EU-091. Operators IK7JWX/P, IK7FPX/P and IK6CAC/P are expected to be active now from Capezzone Island (I.I.A. LE 004) on CW/SSB 10/15/20/40 meters. QSL via the bureau or direct (QRZ.COM addresses).

EU-092. Operators (probable) Jim/MM0BQI, David/GM4WLL and Colin/GM0CLN are planning an expedition to the Summer Isles from September 1-3rd. The site will be on the island of Tanera Mor for which the various references are: IOTA - EU092, IOSA - SC10, WAB - NB90 and Maidenhead - IO78HA. They hoped to operate on both HF and VHF (hopefully all bands from 160m to 2m). They plan

to be active during both the HF SSB Field Day and 144MHz Trophy contests. Callsigns to be use are: MM0BQI/P on or near usual IOTA/IOSA frequencies; All HF CW and SSB on the WARC bands by GM0CLN/P; and SSB Field Day Contest MM0BQI/P. The special VHF callsign, GB4XS, has been applied for. If for any reason this callsign is not available they will use GM4WLL/P. OPDX InterNet Subscribers will receive the long press release as an additional bulletin.

EU-115. EI1DD will be activated by the members of the Dalkey Island Contest Group during the IOTA Contest. Operators will include EI2CA, EI4FBB, EI5DI,EI5HD,EI6EW, EI7CC, EI7CD and EI8CE, and will be active from Enniskerry, Co. Wicklow. QSL is via the EI Bureau.

EU-128. DF8QJ and Ray/DL6YFB will stay on Fehmarn Island for the IOTA Contest from July 29-30th. They will be active on 80-10 meters as DL6YFB/p. QSL via the German Amateur Radio Bureau or direct to DL6YFB's callbook address or E-mail at: rlehmann@Cityweb.de

EU-132. Adam/DJ0IF, Zbig/SP6AZT, Big/SP6CZ and Andy/SP6ECA will be active from Wolin Island in the RSGB IOTA Contest as a Multi-Multi entry, callsign SN6F/1. Before the contest, SP6CZ/1 will be active from this location on RTTY until the end of the month and SP6ECA/1 on SSB. QSL via home callsigns, SN6F/1 via SP6ECA. All cards for SN6F/1's contest activity '98 and '99 were sent via the bureau.

EU-148. A group from the Framingham Amateur Radio Association will participate in the IOTA Contest from George's Island as a Multi-Operator entry signing AA1IZ. QSL via AA1IZ.

EU-153. Vlad/RZ1OA and Dima/UA1OLM will be active as RZ1OA/A and UA1OLM/A from Lyasomin Island between July 25th and August 1st. QSL via RZ1OA: Vlad Sadakov, P.O. Box 48, Arkhangelsk, 163040, Russia.

EU-170. Milan/OK1DJG, Martin/OK1FLM, Martin/OK1FUA, OK1PAT, Jaroslav/OK1TC, Petr/OK1UCI, Svetozar/OK1VEY and Nikola/9A9AA will be active as 9A0A from Vir Island (IOCA CI-141) through the IOTA Contest. QSL via OK1FLM. They will operate as 9A/homecall before the contest from July 24th.

EU-183. Pit, YO3JW, reports that the YP1W operation for next weekend has been cancelled! This is due to a quarantine in Danube Delta. The operation will be scheduled latter.

NA-065. Caleb, AD7U, will be active in the RSGB IOTA Contest as N7U from Whidbey Island (USI WA-001S). His category will be Single Op/24-hour/IOTA Island Permanent station. QSL to AD7U via bureau or direct to: Caleb Skurdal, 1015 N Custer St, Oak Harbor, WA 98277-8201 USA.

OC-033. FK8GM, FK8HC and VK4FW (all Life members of Oceanai Amateur Radio DX Group) will be operational from Lifou Island. Their callsign will be TX8ISL. QSL Manager is VK4FW, P.O. Box 929, GYMPIE, 4570, Australia. They will be on all bands on CW/SSB. Eric, FK8GM, reports that they will also be active with their home call, FK8GM and FK8HC from OC-033 on all bands when they are not operating in the contest.

SA-020. FY5FU and FY/F5AEG will be active from the Phare de l'ile Royale in French Guyana during the International Lighthouse/Lightship Weekend August 19-20th. QSL manager F5AEG.

SA-024. Look for ZV2S and PW2S to be active from Comprida Island (DIB 21) July 25-30th. QSL Manager PY2ZY: POB 45.436, Sao Paulo-SP, 00479-970, Brasil. Suggested frequencies:
CW - 28040, 24920, 21040, 18098, 14040, 101114, 7030 and 3530
SSB - 28560, 28460, 24950, 21260, 18128, 14260, 7-055 and 3765
Checkout the Web site: http://dxpedition.cjb.net

ISLAND CHASERS WEB PAGE. Chris, NK1K, informs OPDX that the "Islands on the Web" website has opened a new web discussion forum specifically for the RSGB's IOTA contest. This forum will be used to make announcements regarding islands that will be active during the contest. Additionally, the forum will give the IOTA community a place to post claimed scores for all to see following contest. The Web page is at: http://www.islandchaser.com

KH5, PALMYRA. Mike, KH6ND, has returned here and is again operating as KH6ND/KH5. His operating schedule is not yet known as Mike is again assisting "The Nature Conservency" in its operation on the atoll. His length of stay has yet to be determined. He is expected to be active everyday on several bands. Activity so far has been on 20/15 meters CW generally between 1100 and 1230z (there was some activity around 0830z). QSL K4TSJ CBA. Tom, N4XP, also reports that it should be noted that some pirate activity did take place after Mike's departure from the atoll last month.

QSL INFO AND NEWS.....
As reported last week, the "GOLIST" now has a new Web domain at: http://www.golist.net
John, K1XN, reports this past week that coming soon will be a Windows Golist search program for accessing the "Golist Online QSL Manager Look Up Page". This Online database is updated daily with new/changed QSL routes.

QSL Manager change for DX station RZ9OU. QSL to KF4OBL via the Bureau or direct to: Susan Driggers, 129 New Grade Road, Moncks Corner, South Carolina, 29461, USA (http://home.sc.rr.com/simplyinfo/kf4obl/)
Please Notes: Please send SASE, SAE and 1 IRC, or 2 IRC's. Cards via the Bureau are OK. 100% Return QSL. Stamps of any country are accepted as donations.

Vlad, RZ1OA, reports that he has received the RZ1OA/P and UA1OLM/P QSL cards, for their EU-066 operation from the printer and has started

processing the direct requests.

QSL the S50E club station to: Radio club Cerkno, P.O. BOX 16,
5282 Cerkno, Slovenia. To see lots of photos of the S50E clubs site
that were taken during/after WRTC2000 in Bled, Slovenia (along with
photos of all locations used by the other competitors) check out the
S50E Web page for more information and details on how to receive two
special WRTC2000 stamps at: http://lea.hamradio.si/~s50e/eng/photos.htm

SPECIAL EVENT. Look for the special event station SN600UJ to be active
from July 20th through October 20th. The station will be celebrating the
600th anniversary of refounding of "Jagiellonian University" in Cracow.
They are expected to operate on all bands CW, SSB and RTTY. QSL via SP9PKZ.

SPECIAL EVENT. Special event station AX3OLY has been allocated to the
WIA Victoria by the Australian Communications Authority to commemorate the
Olympic Games being held in Sydney, Australia. WIA Victoria members will
be sporadically operating the station on DX bands over the next three
weeks. The band of operation being chosen to coincide with the best pro-
pagation at the time. AX3OLY is being activated for the first time this
week to mark the arrival of the Olympic flame in VK3 which is half way
through its 100 day torch relay around Australia. The special event station
will later highlight the holding of Olympic soccer games in the VK3 capital
city of Melbourne, Australia, which also hosted the 1956 Olympic Games.
A commemorative QSL card will be available. QSL is to VK3WI via the Bureau
or the Callbook address.

VE0NWP STATION. The ship "Simon Fraser" is recreating the voyage of the
ship "St. Roch" through the North West Passage. It was heard on Saturday
at 0521z (band was not mentioned) from the Aleutians Islands. Check
out the Web page: http://www.stroch.org

XU7, CAMBODIA. Jani, YB0US, has left Vietnam (3W2US) as of July 19th and
is active as XU7AAP through July 27th. Watch for Jani on SSB and RTTY. He
was spotted on 15/20 meters RTTY (14083 kHz as early as 1100z and as late
as 1700z and 21083 kHz between 2230z and 0100z). QSL via N2OO.

ZD8, ASCENSION ISLAND. "The 59(9) DX Report" reports that Chris, G3WOS,
will sign ZD8SIX starting October 30th on 6 meters.

ZK1, SOUTH COOK. Andy, ZK1AND, is active from Rarotonga (OC-013) for the
next month. His activity has been mainly on 20 meters SSB around 14260
kHz between 0300 and 0500z, and again around 1030z. QSL via AB7FS.

2468. Re: Logging Software

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-24 00:00:00 UTC
From: Rob <Pse@NoEmail.Com>
Message-ID: <LN6f5.35981$qS3.73579@tor-nn1.netcom.ca>
Source record: 19957

Well, it is hard to provide recommendations without further information.
Are you looking for a general purpose logging program or a contest logging
program??

If you are looking for a general purpose logging program, you may want to
try one of the FREEWARE programs first to see if it meets your needs.

There are lots of great FREEWARE logging programs for
Windows available. Here is a brief list:

1. LUXLOG by LX1NO (32 bit) -- see
http://www.qsl.net/lx1no/llog_win.html

2. WINLOG32 by G0CUZ (32 bit) -- see http://www.winlog.co.uk/

3. SuperWinLog (16 bit) by G0CUZ - see http://www.winlog.co.uk/

4. XMLOG, see http://www.xmlog.com

For a great QSL label program (that imports ADIF files), check out BV
Label -- see http://www.qsl.net/df3cb/

But if the programs above don't meet you needs, you may want to try Logic 5
from PDA. It is VERY flexible. But it my take you some time to completely
master Logic 5 due to its flexibility.

If you are really interested in a CONTEST logging program, try the following
commercial programs:

1. CT for DOS
2. NA for DOS
3. TRLOG for DOS
4. SD for DOS
5. WRITELOG for Windows

There are quite a few call sign servers on the internet. the best compilation can be found at www.ac6v.com. Go to the alphabetical index to find it under Callbook. There you will find servers that give you calls, that neither QRZ nor Buckmaster have.

Traps are fine... typically the only noticeable effect will be a shortening of the antenna due to inductive loading which results in narrower bandwidth, and of course they can be a trouble point with high power, but traps DO NOT have a much effect on gain. Don't confuse theory with marketing hype.

And sometimes even that ain't enuf. Previously, I had tried to work
the 1A0KM from a nearby "superstation" which has a stack of six Force
12 C3's on a 200 ft tower and a kilowatt and failed. Sometimes, the
propagation just isn't with you. Be patient. Keep trying.

My point was about the insertion loss of the traps. I understand that
they can be quite lossy. A friend of mine who has the same trapless
5-band vertical as I do bought a Cushcraft trapped vertical second
hand and compared them side by side; signals on the the trapped vertical
were quite a bit lower in strength.

I will second that. Logger is a great program, but be careful it the system
crashes while logger is open you can be locked out of the program. Do backs often (true of any logging program). But easy to do.

Logger doesn't do labels well. I have written a small program to convert
the logger dump format to Dbase that MS Word can understand and it prints
the labels. Except for those two things I really love Logger.

It has great features like:

Telnet to DxClusters
Radio control
Digital CW and Voice Keying
PSK support
Awards support.
Reset QSO Numbers.

Missing things:

QSO Sequence numbers in backup files should be easy to compute
No database repair function
No Auto backup of data.
Poor label support.
No Cabrillo file format, but I am going to write a converter.

Good luck!

Hi Darryl,

I am glad you are going to write a file converter for Logger. Are you going to add ADIF support?

I do not believe that Logger allows you to export the log in ADIF. (I think you can only IMPORT logs in ADIF bit not export them in ADIF). If you could export Logger's log in ADIF, then you could use the great FREEWARE Label program BV6 to print labels.

No need to reinvent the wheel when there is already a great FREE label program out there.

If you do write a program that converts Logger's logs into ADIF (as well as Cabrillo etc), please let us know where we can download it.

Oh, where can I get it? Logger does support ADIF for export. Just
tested it
and it seems to work well. I have heard others say it has some problems
on
importing from other apps or something.

Sure, it will be written in Delphi and GPLed.

Fuck you, you shallow little bastard of a dwarfed dicked ballbag licking aboriginal clusterfucker.

Bill Cheek was a great man.

Funny... You bag on him, and I am from San Diego.. However, knowing most of the people in and around the San Diego area who where hobbiests and / or tinkerers, your name doesn't ring a fucking bell.

Seems to me you probably knew Bill by reputation, and not personally.

Fuck you for baggin on someone in their death.

TollHolio...

(sorry for the language, but this pissed me off)

When you walk up to a dead person at a funeral to show him respect in real life,
if you see someone you don't like, do you shout out loud "Fuck you, you shallow little bastard
of a dwarfed dicked ballbag licking aboriginal clusterfucker"?
This is where we are to pay respect for Bill Cheek, not a place where we take out all our hate towards
every moron who gimps by us in life.

Thanks for the link. It looks like a great Windows based Contest logging program. To my knowledge, the only other Windows based logging program geared mainly for contests is WRITELOG.

I hope one day someone releases a FREEWARE Windows based CONTEST logging program that supports a multitude of contests. There are some FREEWARE Contest logging programs out there but they typically support only one or two contests.

73's

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help curb the growing problem of online stalking, a U.S. Justice Department report recommends. Internet service providers, which link users to e-mail and the World Wide Web, report a growing number of complaints about harassing and threatening behavior online, the report said.

Honolulu Advertiser, 9/16/99

The Illinois State Attorney of Cook County, has proposed legislation prohibiting harrassment or threats on the Internet. From the reported proposed penalty, threatening or harrassing via the Internet would be a Class 4 felony in Illinois, punishable by up to 3 years in prison. The state legislature has not yet considered this proposal.

Bill, I think someone said it before "Dying is not a laughing matter".

Anyone who tried to make a life helping and catering to the people that populate this hobby has to be commended.

From the little I know most everyone who has a modified scanner owes Bill Cheek a thank you, I haven't found anyone else who has contributed more to the hobby.

The "A" hole that started this thread has already received more attention than he deserves.
My suggestion is to show our respect kill this thread and not be lured into anymore regarding a persons death.

I never heard of the fellow, but seeing he's gone that's a tragedy all by itself. That he was important to so many people makes it doubly so. And only 50. I am muchly sorrowed.

I have the right to choose to obey the law. And deal with the consequences of my actions through due process of the law.
It is no different than speeding in a car with a motor designed for a race track.
What or who is affected by a modified scanner? Scanners were around before cell phones and cordless phones. Most of those are digital now so the old scanners and the modifications are pretty useless for listening to those devices.

Many of the modifications that Bill Cheek publicized were prior to the law. Fortunately we still have freedom of the press and speech in this country so his books are still available.

I guess a person like you would burn your books and turn in your guns if someone passed a law.

Myself, I will continue to enjoy, support and fight for the freedoms afforded everyone in this country regardless of what unenforceable laws your elected government can dream up this decade.

Gary and others.....I send out the famous ' Visit www.ab7sl.com '
newsgroup message once in every 5 days. Don't you folks have anything
else meaningful in your lives to aspire to then to claim you are
'really tired of being spammed'? Besides according to FEDERAL LAW
spam is unsolicited - email messages - delivered to your email inbox.
The law makes no mention of newsgroup posts. You read plenty of
unsolicited newsgroup posts every single day. I think you better give
it up all together. Obviously this computing is just too much for you.

See the FAQ Page on my site for further info ......

Jeff, Comparing Bill Cheek to a drug dealer is simply ASSANINE!! as is the Cell laws..... If a person needs privacy DON'T use a cell phone..... There is a very large number of laws on the books through-out the US that if enforced would cause a CIVIL WAR! some of these laws ar ancient!! I'm not a Scanner Buff at all..... I could care less about modifying scanners..... I do however recognize Bill's name, Its unfortunate when Cancer or any other disease causes an un-timely death! Any ones death! Again I'm not a Bill Cheek fan, but even my casual glimpses of articles written by him, allow me to conclude the fellow made some valid contributions..... Other than BLOWING YOUR HORN, what contributions have you made??? I'm not refferring to a local level either! I don't recognize your name from any National publications..... No matter what subject a person chooses to write about critics will always be there! Pleasing everyone is highly unlikely! Why Rip on a guy after death? If you felt this negative about him, express this to a living person..... Not after he's dead and gone!

To Bill's family, hats off to the man!

Many, if not most of Bills mods had nothing to do with cell. Adding
channels, getting rid of keyboard beep, rf meters , receiving ssb on the
2006, speed up mods. . . Modified does not mean "opening the cell freqs".
Any way , most of the cell mods were legal when his books went to publish.
I'll miss Bill as well. We sent a few e-mails back and forth. He was a good
guy. He could be a jerk, I'll admit that (that's true of many of us). But
at least he posted a BUNCH of on topic , helpful info.
It seems to me that this is the perfect time NG bickering to end.

Good scanning !

Here's what you do. You post as person X telling people about your website. Then you respond to yourself as person Y telling everyone else how great the site is. Then someone else ruins your day by making a sarcastic comment about killfiling you. I'm telling you Walt, it's people like you that totally mess with a spammer's day.

C'est avec une profonde tristesse que nous avons appris le d�c�s de Jacques Cartier F9YZ.

Il a �t� inhum� le 25 juillet au Cap-Ferret (33) ou il s'�tait retir� il y a quelques ann�es, luttant contre la maladie.

Jacques �tait un des plus grands DX man fran�ais, t�l�graphiste magnifique, technicien hors pair, un des fondateurs du Bordeaux DX Group (n° 00), un des pr�curseurs du DX sur la Top Band et sur les bandes basses.

Sa gentillesse l�gendaire n'avait d'�gale que sa immense simplicit�. Plus qu'un OM, c'�tait un MONSIEUR.

Que ceux qui l'ont connu et appr�ci�, lorsqu'ils ouvriront leur transceiver lui adresse un "73 TRES QRO JACQUES "

What really begins to bother me is that he is doing the same thing with his full coverage announcements on the dx packet cluster. If he doesn't stop that crap, someone is going to do something nasty. If anyone wants to see his web page they would already have done it by now, and if there is anything worthwhile to see, it will all take care of itself via the search engines. Guy must have some serious ego problem to want to advertise it so much; either that or he is making money on each hit.

That's like thanking a drug dealer for providing you with drugs. (Of course, the two are not in the same catagory -- illegally modifying a scanner is a federal crime.)

Until a law is changed, you have the obligation to obey it, even if you disagree with it.

The web address for VK0MM is:
http://www.geocities.com/vk0ld/1.html

He's not on a dxpedition, just down there working at the research station
and doing us all a favor as time permits. I'd like to get a card from him
right now too, but I figure I shouldn't be looking a gift horse in the
mouth.

Well, Gary, the two articles mention "threatening behavior online." Your
comment, "If he doesn't stop that crap, someone is going to do something
nasty" comes across as a very strong online threat, something both
articles speak out against. Just what were you planning on doing to
him? (Hopefully, you're not in Illinois!) 73, Jeff KH6O

Call it what you want to. I'm not splitting legal hairs here. You have repeatedly posted full announcements on the dx packet system to invite net users to your site. Judging from comments within the system, other folks are iritated as well. I've seen the web page and you have some interesting stuff there, but I don't enjoy being reminded of it as much as you enjoy reminding ME about it. DX clusters are intended to convey timely information on that topic. General announcements are made my participants to gather information or to share timely knowledge relevant to DXing. Advertising, in any form and by any other name, is not highly appreciated. Spam is spam.

Jeff,
Many (90% or more) of the mods that Bill Cheek developed have nothing to do with listening to cell phones. Improved squelch, computer control of scanners, expanded memory channels, add-on signal strength meters, baseband audio taps for recording signals, just to name a few. And modifying a scanner isn't a crime, listening to phone conversations is. It's what you DO with the radio that can get you in trouble. BTW, id you think drug dealing isn't a federal crime, you've apparently never heard of the D.E.A.

I myself use one of Bill's mods, a discriminator output tap, to monitor and decode EMWIN (Emergency Managers Weather Information Net), which is distributed by the Nat. Weather Service and rebroadcast by our local amateur radio club. Ironically, it was this mod, a "data-slicer", that got Bill arrested last year. The info is freely available on a N.W.S. site. Go Figure!

>I'm not a Scanner Buff at all..... I could care less about
>modifying scanners.....

I'm a scanner buff... but I don't see the attraction in
listening to cellular phones. BORING! Who wants to listen to
some guy call his wife and let her know what time he'll be home
for dinner? Besides, most people are moving to digital PCS.

Now cordless phone conversations, those can be interesting
(disclaimer - I am not saying I listen to them!). People do not
realize that cordless phones are RADIO TRANSMITTERS that can be
picked up within a several block radius with a good outdoor
antenna, sometimes even from a greater distance. It's amazing
what kind of information people give out over cordless phones.

I use a cordless phone myself, but if I'm going to give out
credit card data or something I ALWAYS unplug it and use a
regular corded phone. It's unbelievable the number of people
out there still using 25-channel 49 MHz unscrambled cordless
phones, and even more amazing people don't realize these can be
heard from quite a distance on a scanner. It would be nice if
someone educated the public about this, because an unscrupulous
person could commit all sorts of crimes using the information
heard over cordless phones (second disclaimer - I do not listen
to cordless phone conversations, never have, and never plan to).

Lots of people posting that they received their cards in the first couple
weeks of July. I wonder how long I should wait until I assume my direct
QSL (with enclosed greenstaamps) was lost?

Kevin,

Well said, however the small minded, unknowing, upcoming lawyers real or imagined always relate to modifications as illegal. Because like most of their species they usually don't know what they are taking about until someone teaches them. Kind of like monkeys.

"Kevin Patterson" <kpatt@rconnect.com> wrote in message news:snv8cui13j114@corp.supernews.com...
> Many, if not most of Bills mods had nothing to do with cell. Adding
> channels, getting rid of keyboard beep, rf meters , receiving ssb on the
> 2006, speed up mods. . . Modified does not mean "opening the cell freqs".
> Any way , most of the cell mods were legal when his books went to publish.
> I'll miss Bill as well. We sent a few e-mails back and forth. He was a
good

Are you as ignorant as you are ASSANINE? Direct quote..

<snip>
That's like thanking a drug dealer for providing you with drugs
<snip>

You specifically compare it in the above statement! No matter what you
say in the next sentence, you've made a comparison here......

Doing so was not always a crime, about the only thing that is now a
crime is the modification to open up the receive for the cell phones and
this only after 1994 and only in the USA, adding more memory to the
scanner and all the other MODS in Bill's 3 book's are not illegal.

There are no laws here in Canada that say I can't do what I want to my
scanner, I can modify it for cell phones, I can listen to cell phones,
cordless phone's whatever I like.
There are countries other than the USA, and the laws of the USA do not
apply to the rest of the WORLD!

Cheers

BZZZZZZZZT Try again

In your javascript coding you have

<script type="text/javascript" language="JavaScript<A
href="http://sm4.sitemeter.com/stats.asp?site=sm492" target=_top>

<IMG
src="http://sm4.sitemeter.com/meter.asp?site=sm492&refer=&hours=14&minutes=1&rtype=4"
border=0 title="Site Meter"></A

HMM the sm492 is an affilliate program number, now why would sombody
need that ... lets go see

http://www.sitemeter.com/affiliate/

Under the discription we find

Why be an affiliate?
To earn 50% of our profit, that's why!

Visitors to your site are encouraged to join an email
notification
service on dozens of topics. If they join, their names
are held securely
in our database. Mailings to those names will be offered
to brand
name clients for a fee. Because it is an 'opt-in'
service, the
subscriber has specifically asked to join, plus the

subscribers' email
address is never given out, and they can unsubscribe at
any time.

So tell me again about the hit counter not being an affiliate program
for making money????

Rick
kf7qz

btw thats the only click you got from me.

The best thing we could all do is to just ignore Charles and his web site. All the replies and confrontations are giving him exactly what he wants, angry replies to his baits only raise his feelings of self. Sad, but many people can not feel a sense of belonging unless their actions stimulate a response in others. He will act calm and try to further the confrontation, when someone gets angry he feels he has WON. Don't give him what he seeks.....ignore him.

The question I ask is simple. Why? To what ends do you make these posts?
Self-importance? Why?
If you can come up with a logical answer, maybe people might take you a little
more serious.

He was inimitable, surely. I never met him but I have fond memories
of him in the old Fidonet SHORTWAVE echo. In fact, I got published in
his old newsletter "World Scanner Report" (March '92 if anyone's
keeping track.) One day, I posted my Carpet Loop plans on the echo,
and Bill was so taken by my plans that he asked my permission to
publish them if I would draw a schematic for him. I did, and he did.
I was delighted!

I know about his freebanding history--it was the subject of many a
flamewar on Fido. I don't care. Even though freebanders and hams are
supposed to be natural enemies, I could never hold that against him,
not when he worked so hard to develop mods for so many of our favorite
radios. Not when he got indicted for having a device (a data slicer)
that *I* own myself (otherwise known as a HamComm decoder!)

>Hey Bill! What freq's does St Peter
>use at the Pearly Gates ? - thanks Bill we miss ya!)

Rest assured that neither the FCC nor the CTIA will bother him again.

R.I.P., Bill

Take care,

"That ideas should freely spread from one to another over the globe, for the moral and mutual instruction of man, and improvement of his condition, seems to have been peculiarly and benevolently designed by nature, when she made them, like fire, exspansible over all space, without lessening their density at any point, and like the air which we breathe, move, and have our physical being, incapable of confinement or exclusive appropriation. Inventions then cannot, in nature, be a subject of property." - Thomas Jefferson

All you did was come here, read the original post, and reply with malice.

Go to hell.

You NEVER did address the question about you knowing him that I raised, did you.

More than not, that means that you DON'T want to, or it would destroy whatever small shred of credibility that you have.

Have a bad day today, a worse one tomorrow, and hopefully, someone treats you the same way in YOUR death.

No, it isn't.

Spreading information, with the intent to help others gain knowledge is one thing.

Selling drugs is another.

You think that someone who is doing 56 miles an hour in a 55 zone is just as bad as the one who sells drugs to your daughter, too, eh?

I would hope so, you hypocritical ass!

> 527 rec.radio.amateur.policy ..."
>Let's see: 2505/12 is roughly 200 messages per month.

Or about 6-7 per day. And this one *single* message alone will count
as five. I notice that you append "x-no-archive: yes" to the header of
each of your articles so that no count can be made of your postings.

>I'm sure that each and every one of those was necessary ...

Conversations go back and forth; do you keep a count of the
number of verbal responses you give per day? Are each necessary?
That you've responded to me means you yourself just posted five
articles (one to each newsgroup in this new thread you've started).

Many of us on here are ham radio operators -- we're communicators --
on here that involves posting responses, and responses to responses.
Do you understand?

Now, answer the query I posed in my earlier message to you. Why do those newpaper clipping bother you so much?

Jeff

Help me out, Tom -- I've never been able to understand the use of
profanity in a public forum such as this. Does using it mean the
writer has been driven to losing his temper and is boiling over?
Do my words have that drastic of an affect on you?

After I log out, I'll think more about the gecko crawling across
the ceiling than anything you've written; you should practice that
same attitude.

Take care, Jeff

In the US, you can't make such a claim until you've done a thorough
reading of both Title 47 CFR Part 15 and the Type Acceptance standards
that the FCC imposed upon the manufacturer of a particular brand and
model scanner. Without a fully-equipped lab, you have no idea if
the modification you've performed keeps your scanner within the limits
of the Type Acceptance boundries.

Just giving your scanner more channels might have an adverse effect
that you're not even aware of, yet could be causing havac with other
spectrum users.

If your query is directed to me, several hundred of those posts are due
to the posting of FAQs and charters to the rec.radio NGs. And this single
post, written to answer your concern, will count as five posts due to you
(or someone else) x-posting it to five NGs. I'd trim it down to a single
NG if I knew which of the five groups you were on.

Toll Free <tollfree@bigradios.com> wrote:
>No, it isn't.
>Spreading information, with the intent to help others gain knowledge is one
>thing.

Without a fully equipped lab and the expertise to use it, you have
no idea if the modification you make to your radio will have an
adverse effect to other users of the spectrum. Your scanner is
covered under the CFR Part 15 regulations as an unintentional radiator,
and it DOES radiate RF. There was a case where someone's unattended
scanner was radiating enough RF to lock up a repeater some distance
away.

An innocently done "mod" to your scanner might cause havoc to any
of a number of radio services; in particular, if you reside near
an airport, use special care with what you do to your radio(s).

>Selling drugs is another.
>I would hope so, you hypocritical ass!

If you want to have fun,6M is it. Get yourself a low cost SSB/FM rig and build you a 6M 3 element quad for under $40.00, you can even put a 2M element on it as well. A good 2M rig is the ICOM 2000 series, I believe they have the 2100 out now at a cost of under $200.00. My Icom 2000 cost me $300.00 4 years ago. The quad is easy to build and more affective than a yagi. Hope that helps.73

Aids Marathon runners K0OO and YL- SWL need your help in sponsorship during the Marine Corps Marathon
Please click and help us achieve a victory in meeting an ultimate challenge in defeating hiv/aids.

http://www.aidsmarathon.com/sponsordc.htm

Mark runner numbers 1414 Pat and 962 Anne

We desperately need your assistance to help defeat aids. In order to participate as part of the teamon the Marine corp Marathon we need to assist in raising at least $1700
per runner. Don't let these efforts go astray.
Please be a part of the solution. It isn't just a walk in the park it is a
matter of survival for those that have been affected by HIV/Aids..
The money will go towards defeating aids.
You may pledge on line and we look forward to your help in defeating HIV/Aids.

We have physically trained. This will be our first marathon and we are now up to running over 18 miles on the 26.2 mile course..

Don't let the efforts go in vain. Help out the team today.

We thank you , The Whitman Walker Clinic thanks you, and so do the many that you are assisting with you donation.

This question is often asked, here is the standard response below.

Bill Cheek was a man who lived near San Diego. He used to be active on
Fidonet but then had
to leave due to reasons we won't speak of now. He then became active on
this NG & the
internet but was again involved in much trouble. Various problems with Mr.
Cheek's action's
resulted in Peter Laws kicking him off of the "Scan-L" mailing list. More
similar problems with
Mr. Cheek caused him to have his internet access revoked by his Cable
company
ISP in summer 1998. In 1999 he was briefly held by (federal) authorities
and has
been charged in (federal) courts with various illegal actions in regards
sales for the use
of scanners. (He had admitted to other legal problems in the past, also) He
was the owner
& operator of a company called "Comtronics" & has produced a few books based
on
information he had complied from various sources.

Despite various rumors, Mr. Cheek did NOT have any FCC issues licenses
within
the last 15 years.

Mr. Cheek claimed to have been in the Army, others said he had been in Navy.
His
rank or billet is unknown.

Mr. Cheek was well known by many for various reasons in the radio community.
Some
people feel his technical knowledge was notable, some people feel certain
aspects of his
personality were notable.

Due to mounting legal problems followed by health problems, in 1999 a
donation request was
made to the general public to assist Mr. Cheek who had no health insurance.
His legal issues

were being addressed by a public defender.

Mr. Cheek was a smoker and died in July 2000 due to complications of Lung and Brain Cancer.

He is survived by his wife Cindy and his children.

Mr. Cheek will be missed.

I agree that it's a great radio but I think the IC-706 mk II, which is on closeout now for $899, is the deal of the century. I love mine.

Mark

Dave:

It would be helpful if you could narrow it down a bit. You say that you wish to build an amplifier. Do you want to build:

-- a linear that will pump your 100-watt all-band transceiver up to full legal limit?
-- a linear to go behind your QRP rig to go from 500 milliwatts to 5 watts?
-- a GaAsFET receiving amplifier to mount on the mast next to your 1296 antenna?
-- a voice amplifier to provide adequate output from your mike to drive the audio stages of your transmitter?

There are amplifiers and there are amplifiers.

various illegal actions in regards sales for the use of scanners. (He had
admitted to other legal problems in the past, also) He was the owner
& operator of a company called "Comtronics" & has produced a few books
based on information he had complied from various sources.

Despite various rumors, Mr. Cheek did NOT have any FCC issued licenses
within the last 15 years.

Mr. Cheek claimed to have been in the Army, others said he had been in Navy.
His rank or billet is unknown.

Mr. Cheek was well known by many for various reasons in the radio community.
Some people feel his technical knowledge was notable, some people feel
certain aspects of his personality were notable.

Due to mounting legal problems followed by health problems, in 1999 a
donation request was made to the general public to assist Mr. Cheek who
had no health insurance. His legal issues were being addressed by a public
defender.

Mr. Cheek was a smoker and died in July 2000 due to complications of Lung
and Brain Cancer.

He is survived by his wife Cindy and his children.

Mr. Cheek will be missed.

2635. Who Is John Mackey

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-30 00:00:00 UTC
From: John Mackey Sr <anonymous@cotse.com>
Message-ID: <200007301858.OAA02451@anon.cotse.com>
Source record: 19873

John Mackey, barely a boy was born on a reservation in Iowa. He attended East High School where he was the constant target of abuse by all his classmates and shunned by his teachers and the school administration. As a child he was know to the authorities for a broad range of deviant behaviors. He was classified as a sexual offender and had to move to Oregon in later years. John is a nurses aide and works for an agency dealing in mental patients. John spends most of his time driving to sights in Oregon and Washington to empty bedpans. He used to be active on Fidonet but then had to leave when the scanner echo moderator and John's BBS operator removed his access for acting as he does on this NG. John holds the record for off topic posts to this NG, 389 in one month. Most of these posts were made in the process of stalking Bill Cheek. John has been booted by many ISPs and BBSes. Even now he tries to lure the newbie into thinking parg.org is the place to send complaints when @Home is his ISP and the place to report abuse. In 1999 he was briefly held by (federal) authorities regarding the sale of Amateur Radio licenses. (He has admitted to other legal problems in the past, also) He is the owner & operator of no company, has never produced a book or any information of any use. He is known for destroying a repeater and power supply after he reversed the polarity during installation. John probably bought his ham license, even thought the answers to the test are published on the net and in many books. John has never served his country in the military due to his criminal history. John Mackey is not known by any the radio community being he has never contributed anything. Most people feel his technical knowledge is zip, most people feel all aspects of his personality are sick and demented.

If I had know John Jr would have turned out like tis, I would have cut my balls off.

John E Mackey Sr

Ohio/Penn DX Bulletin No. 472

The Ohio/Penn DX PacketCluster
DX Bulletin No. 472
BID: $OPDX.472
July 31, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL, K1ZZ, WB2YQH/WB2RAJ & THE 59(9) DX Report, W3UR & The Daily DX, W4MPY, N6RT, W7WX, K8EP, K8IW, K8YSE, WB8BGY, CT1ETE, DJ5AV & DX News Letter, DJ5JH, EA3EJI, EA5XX, EU1SA, F6AJA & Les Nouvelles DX, HL0C, IK7JWX, JM1LJS, LU7BQ, SP2DX, SP2UKB, TA3J, UR7GG and Ciprian Sufitchi for the following DX information.

EDITOR'S SPECIAL NOTE (by KB8NW): There will "NOT" be an OPDX bulletin for August 14th and 21st. I know, you heard this before, but it is true this time. My wife (chief proof-reader) and I will be going to Las Vegas (without the young adults) for our 25th wedding anniversary (How did she put up with me all these years?) and to visit my Dad. I can really use the break! However, PLEASE continue to send your DX info to me.

3DA0, SWAZILAND. "The 59(9) DX Report" states to look for Norbert, ZS6ANL, to be active August 21-24th as 3DA0/ZS6ANL. His activity will be mostly CW. QSL to: N. Taferner, P.O. Box 6282, Homestead 1412, Rep. of South Africa.

4U1UN, UNITED NATIONS HEADQUARTERS. Fritz, DL4TT, will be in New York from now through August 27th and plans to operate from the club station 4U1UN. Operations will be mainly on CW. QSL ONLY via 4U1UN, NOT via DL4TT.

4X & E4, ISRAEL AND PALESTINE. Hide, JM1LJS/T88LJ, informs OPDX that he will be active between August 6-13th as 4X/JM1LJS and E4/JM1LJS. Activity will be on 40/30/15/10/6 meters. Sightseeing is his main goal on this trip. QSL Manger for both 4X/JM1LJS and E4/JM1LJS are via JL2XUN.

7Q, MALAWI. The "DX News Letter" reports that Harry, 7Q7HB, will be active again during the next five months. He was spotted this past weekend on 21343 kHz around 1532z. It was also mentioned that he will do the first time ever QSOs on SSTV from Malawi. QSL direct only to the CBA of G0IAS.

DXCC NEWS.....
As of July 16th, there were 801 applications and 80,217 cards out-

standing. The DXCC Desk was processing mail received the third week of May. The DXCC Desk had processed 1213 Millennium DXCC Awards processed as of July 16th.

During the second meeting of the year by the ARRL Board of Directors on July 21-22st, the following topics were announced and discussed as per the minutes by David, K1ZZ and a ARRL Bulletin:
* The 12 and 17 meter DXCC's will be added in January 2001, thus rounding out the program.
* An update on the "Electronic QSLing Project" (EQSL) will proceed with written specifications for an automated system incorporating extensive electronic security measures.
* DXCC Card Checking Program will be re-evaluated at the next Board meeting.
* The Membership Services Manager was tasked with studying the possibilities for managing a QRP DXCC.
* The MSC will be developing a set of goals and criteria to send to the Contest Advisory Committee for a study of the Club Contesting program.
* A new DXAC Chairman will be appointed soon to replace Wayne Mills, N7NG, who joined ARRL staff as the Membership Services Manager.
* The ARRL Board also okayed the expenditure of up to $1,025,000 to develop a new information technology platform for ARRL Headquarters. The new computer software and hardware not only will enhance the ARRL's e-commerce capabilities but update membership information and accounting systems. It well also eventually enable such services as electronic QSLing, member Web access to DXCC records, nearly real-time updates of DXCC listings, and expanded, detailed contest results.
* The Board also agreed to put the League's muscle behind an international effort to secure a 300-kHz exclusive as signment for Amateur Radio in the vicinity of 7 MHz. The 40-meter realignment issue now is on the agenda for World Radiocommunication Conference 2003.

The minutes of the ARRL Board of Directors July meeting are available on the ARRL Web site at: http://www.arrl.org/announce/board-0007/

FM, MARTINIQUE (Change of plans). The departure for Gerard, F2JD, is delayed for one month. He will leave early in September for Martinique for 4 months. Please refer to OPDX.470.

FR/T, TROMELIN ISLAND. Just a quick reminder that the Lyon DX Group is expected to be on the air by August 1st. Operators Gil/F5NOD, Larry/F5PYI, Eric/F5PXT and Erwann/F6JJX are expected to sign FR/F6KDF/T until August 16th. Activity will be on 160-6 meters on CW, SSB and RTTY. Again, suggested frequencies are as follows:
CW - 1823.5, 3504, 7004, 10104, 14020, 18074, 21020, 24894, 28020
SSB - 3790, 7065, 14195, 18145, 21295, 24945, 28495, 50110
RTTY - 14080, 21080, 28080 kHz
QSL via F6KDF, Radio Club de la Gendarmerie, 292 route de Genas,

69677 Bron Cedex, FRANCE. For more information, check out their Web site at: http://perso.easynet.fr/~f6jjx/menu.htm

HR, HONDURAS. A group from Spain will be active from here September 17-25th, transmitting on all HF bands, SSB, CW and RTTY operation, while installing 9 new digipeaters. This will be another DXpedition of the URE (Union de Radioaficionados de Espanoles) "RADIOSOLIDARIDAD" group. There will be 7 operators going to HR-land: Angel/EA1QF, Chema/EB1ADG, Pere/EA3CUU, Paco/EA4BT, Tony/EA5RM, Julio/EA5XX and Belinda/EA8NN (YL). They will operate from Tegucigalpa 24 hours day, while some of the operators will be travelling throughout the country to install the new digipeaters for packet-radio. TNCs, PCs, tranceivers, coaxial, antennas, etc, will be carried from Spain and give to the HR radio amateurs in Tegucigalpa who will be in charge to keep it working in the future. No callsigns were mentioned in the press release. The QSLs will be confirmed via EA4URE, URE's Headquarter, P.O. Box 220, Madrid 28080, Spain.

HU4, EL SALVADOR. A group of Spanish operators will be active September 17-25th as HU4U. The team will operate as time permits as they will be there to install a communications network. Look for them on all bands CW/SSB/RTTY. QSL via EA4URE.

IOTA NEWS.....
AS-085. Stro, a representative of "Hanyang University Wave Research Club" (HL0C), informs OPDX that a group will go to So-An Island (under Wan Island to the southwest of Korea) near Mokpo (Cholla South Province of South Korea between August 3rd and 9th. They will be active as HL0C/4 during their DXpedition on 40/20/15 meters CW/SSB. So-An Island also has a KDN (Korea District Number) which is H30. QSL via: Hanyang University Wave Research Club, CPO 4397, 100-643, SEOUL, KOREA. They have a Web page at: http://hl0c.hihome.com

EU-052. Look for Gerard, F2VX, to sign SV8/F2VX from Keflonia Island now through August 13th. After the contest they will be active on HF CW/SSB with their individual callsigns (DH7NO, DL2RTK, DL2SWW, DL2VFR). Pictures from last year and logs after the contest will be available at: http://www.qsl.net/dl0kwh

EU-070. Eric, F5SSM, will probably be active from Les Embiez Island August 12-19th. Be careful, this island was previously EU-095.

EU-179. Look for Oleg, UR3GA, to be active from Orlov Island (UIA BS-13). He is a local resident and will operate on all HF bands CW and SSB. QSL via UR7GG, Victor Tkachenko, P.O.BOX 73, Kherson, 73000 Ukraine.

J43, GREECE. Wolff, DJ5JH, will be active from Peloponnese with the special contest callsign J43J during the WAE Contest (CW) August 12-13th. QSL via the bureau to his home call DJ5JH.

J6, ST. LUCIA. "THE 59(9) DX REPORT" reports that Juha, OH1HX, will be active August 1-6th as J6/OH1HX. Activity will be on 20, 15 and 10 meters SSB, maybe CW.

PIRATE ALERT. Marcos, LU7BQ, informs OPDX that the station signing XQ0X/LU7BQ on 20 CW, is a pirate. He has worked only SSB for about 40 years and has never gone to XQ0. He is currently receiving a lot of QSLs, and he is so sorry for the guys wasting their geenstamps and IRCs...

QSL INFO AND NEWS.....
TX0DX, 4W/N5KO and 4W/W3UR (QSL status report by W3UR & The Daily DX):
"As of Monday, July 21, U.S direct requests covering (prefixes) letters A and K0 up to K9Z were released. The next batch covering KA0 thru N9Z will be released August 10 while the final release from N0 thru WZ9 will be made August 25th. Since the validity date and submission date of October 1, 2000 will be easily met, there is no reason for 2nd QSL nor for any other action.
Each claimed QSO is being checked while QSLs containing missing QSOs will be re-processed by early September, still meeting the October 1 submission date.
During the week of July 21, the following other countries were either released or will be released; EA, F, G, HB9, I, LA, OH, OZ, SM, VE, VK, ZL. The team is currently busy on sorting out Germany and Benelux followed by South America, Russia and Eastern Europe. Everything will be completed following the same schedule as U.S.
JA envelopes (HF) will be released during the first week of August while 50MHz cards have been released by JA1BK. Considerable extra work is experienced here since another pirate was very active toward Japan - especially working on 7 MHz and 10 MHz. Large numbers of requests on these two bands will be returned..... The following team is providing you the TX0DX/4W QSL service; OH2BN, OH2BAD, OH2BH, OH2NB, OH2RF, OH3LQK, OH9MM, JA1BK, N4GN and W3UR."

Please address QSL cards for EW5HQ only to the following address: P.O.Box 469, Minsk 220050, Belarus. This is the address of the Belarussian QSL Bureau. Please DO NOT send cards to the official address of BFRR.

W4MPY is "NOT" a QSL Manager for any station! Wayne informs OPDX that in each bureau mailing, 50% of the cards are for stations for which he has printed cards in the past. He also mentions that forwarding these QSLs gets to be expensive.

John, N7CQQ, states to "PLEASE be patient" for the Clipperton FO0AAA QSL cards. He is working on them every day.

The QSL Manager for last weekend's activation of ED3IM on Medas Island (EU-078) is not EA3CCN as announced, but was changed to Santi, EA3CKX. They report that the activity had to stopped early on Sunday morning because of bad weather predictions with the possibility of strong winds which would hamper their return.

Jean Michel, F6AJA, reports that all PY0F/PY2ZDX direct requests are on their way.

F5TXM, F5TRO, FB1BON, F4BHZ were active as F5TXM/P from Noirmoutier Island (EU-064) during the IOTA Contest. QSL via FB1BON.

GM5C was activated by the Crocodile Rock Amateur Group from the "Isle of Great Cumbrae" (IOTA EU-123) during the IOTA Contest. QSL Manager is GM0DEQ.

IK7LMX/P from Pedagna Island (EU-091) was activated by the "Salento DX Team". QSL to homecall via the bureau or direct via HCA (qrz.com).

Doug, N6RT, reports that the final 7P8AA log is now available online at: http://dx.qsl.net/logs

The PZK Headquarters Station SN0HQ, which took part in the recent IARU Contest, will mail QSL cards in approx. 2 months. QSL via SP2PI CBA or via the PZK QSL Bureau. The PZK Headquarters will have a new address starting August 1st. QSL cards to Poland should be send to the following address: PZK Central QSL Bureau, P.O. Box 54, 85-613 Bydgoszcz 13, Poland.

QSL cards for TA3J, on July 26, 2000, were sent to the QSL bureaus of Bulgaria, Latvia, Brazil, Luxembourg, Estonia, Belarus, Ireland, Lithuania, Israel, Kuwait, Portugal, Finland, Croatia, Sweden, Norway, Romania, Slovakia, Japan, Greece, Belgium, Slovenia, Denmark, Hungary, Switzerland and Netherlands. QSL cards were also sent on July 28, 2000, to the QSL bureaus of the USA, Germany and United Kingdom.

Paulo, CT1ETE, reports to OPDX that a new Web Site is available which displays QSLs in a photo album (along with Database) for hams to view. He asks hams worldwide to send him your QSL in JPEG format (about 360x250; 24/16 million colors; size between 20k and 35k). The site also has a Ham Forum where individuals can start discussion threads. The Web site is at: http://www.qsl.net/ct1ete
Any suggestions are welcome via his E-mail address at: ct1ete@qsl.net

SPECIAL EVENT. The Ukrainian special event station EM500E will be active in August on all bands and modes to celebrate the 500th Anniversary of the "Cossack's Glory". QSL via UR4EYN or UR4EN.

SPECIAL EVENT. The Western New York DX Association will operate special event callsign K2L during the period August 7-20th in conjunction with the Buffalo (New York) Harborfest and culminating with operations from the Buffalo Lighthouse during the Lighthouse/Lightship Activity Weekend August 19-20th. During the August 7-18 period, activity will be on CW, SSB, RTTY and PSK31 on all bands, including WARC. During August 19-20th, activity will be on CW and SSB from the lighthouse. A special photo QSL will be available for QSLs requested direct. QSL via WB2YQH, P.O. Box 73, Spring Brook, NY 14140 with SAE/SASE. All DX QSOs will be QSLed automatically via the bureau.

WORLD TRAVELER/DXER PETER. Peter, ON6TT, currently 9A/ON6TT, informed the DX community that after being based in Kosovo for the UNWFP since February, he is moving his base to Pakistan. He plans to start setting up shop in Islamabad as of November. Peter expects to stay there for probably the next 4 years and will try to build up a station again, as he did from 5X1T (Uganda). He is sure the location will be more challenging than in Africa to work pileups. He states Mario, 5X1C, has recently joined his team and will be based in Islamabad also. Peter adds that his upcoming business trip is not only taking him to Pakistan, but to Laos, Sri Lanka, Indonesia, East Timor, Thailand, Bhutan, Cambodia and India. He is still looking for E-mail contacts of active DXers in Sri Lanka, Cambodia, and Laos (for the latter 2, any licensing information would be welcome). If you can help, Peter's E-mail address is: Home.Peter.Casier@wfp.or.ug He will only stay a week "max" in each of those places, so he will only be active after work but with no special activity nor a large scale operation.

XX9, MACAU. Ed, K8EP, will be travelling here and will operate as XX9TEP from August 17-21st. His operation will be CW/SSB on 160-10 meters. He mentions that he will be in the SEANET contest as well. QSLs to K8EP at his new Buckmaster address: Ed Sawyer, 14 Greycrest Pl, Woodlands, TX 77382.

YO DX HF CONTEST. Romanian amateurs want to remind everyone to not forget to try your skills operating in YODX HF Contest 2000, on August 6th. It runs for 20 hours (0000-2000 UTC) and it is recommended to work YO counties. Activity will be on 3.5 to 28 MHz bands CW/SSB. An ITU exchange will be used for DX stations and YO County for YO station. Logs are sent to: Romanian Amateur Radio Federation, P.O. Box 22-50; R - 71100 Bucuresti, Romania (or E-mail to: yo3kaa@pcnet.pcnet.ro). Full details on the rules are available on the Web at: http://www.qsl.net/yo3kaa

Can't answer the first question. The answer to the second - usually
not. I have seen it happen, when there's a ham onboard. (larger ships
have so many folks on board that you can be pretty much guaranteed
there'll be at least one ham!) From what I hear from ex-Navy hams, it's
awfully difficult to hear anything on shortwave on a naval vessel
because of interference/overload from the high-powered radar
transmitters.

Not sure where you heard that, I was on the USS Observation Island and operated W4JLE MM from all over the world. If you are not familiar with the OI, do a quick search on "Spy Ships", a quick perusal of a picture of the antennas will confirm that the radar environment was worse than most.. In spite of the RF environment, I never remember any interference from radars. We were the very first ship to run ship to shore telex and were also the testbed for such neat things as the first shipboard GPS system (BRN-3 satellite navigation system. We also were the only surface ship capable of launching Polaris missiles.

2644. Caution - Stay away from DWM Communications!

Newsgroup: rec.radio.amateur.dx
Date: 2000-07-30 00:00:00 UTC
From: Newswatch2 <newswatch2@my-deja.com>
Message-ID: <8lvs76$427$1@nnrp1.deja.com>
Source record: 19949

To All Readers:

DWM Communications website can be found here:

http://www.qth.com/dwm/

AVOID Tiny-Tenna and buying ANYTHING from DWM communications. Not that the products themselves are bad (although many say they are!), but DWM communications is actually a terroristic organization similar to the Scientologists. If you say something they do not like publicly, they will pursue you with their lawyers, tell lies to your employer, and do everything they can to smash your reputation. Ask the folks in rec.radio.shortwave!

Take a look at the spamming going on in rec.radio.shortwave. All of it is originating from DWM communication staff. They are currently attempting to disrupt and destroy many radio-related newsgroups through repeated, malicious spamming.

The president of the company, Bill Lauterbach, entered r.r.s. for the purpose of threatening, terrorizing and spamming the group.

If you give your personal information to DWM Communications, Inc. they will most likely abuse it, and may even give it to others! This company (that makes the "Tiny-Tenna") is UNSAFE TO BUY FROM, and if you buy from them you are risking not only your money, but your sanity and peace of mind as well!

You should note that this company also advertises freely on radio stations that promote fascist and racist material and carry such programming. This makes the company a racist organization, and if you buy from them you are supporting racism!

The "Tiny-Tenna" product is simply $5.00 worth of parts that anyone could build themselves, even a child. Yet they charge $19.95 for it, making a probably 400% markup.

Take this as a warning, and NEVER buy anything from DWM.

DWM's website can be found here:

http://www.qth.com/dwm/

Their phone number is 1-517-563-2613

Their address is: P.O. Box 87-W, Hanover, MI 49241

DO NOT ORDER FROM THIS COMPANY!! You will be risking a lot, and it is not worth it! Keep your sanity, your peace of mind and your money, and

order from another company instead!

If you are wise, please contact the company and let them know how you feel about the spamming going on! And above all, avoid ordering from this company at all costs! It will be the biggest mistake you have ever made in your life!!!

Sent via Deja.com http://www.deja.com/
Before you buy.

Good morning to every one...

On july 24 Wonderful opening by sporadique E over W Europe from France ,Rennes IN98eb ,On 144Mhz

J have done 20 country from EA8 to GM ,the begining :around on 7h ut starting from south of France Toulon

So near in Mode E it is very unusual ,after the departement of Corse , same remarque :jn 42... and Italia.

All the day was very good during 10/15' ,stby during 10/15 and so and.so during 12 h.

The end for me was around 19 h ut and contrarely at the others times it was in all directions F, HA, UA, SP, OK

DL ,OZ ,HB ,G ,EA8, CT, OM, IS, I ,9H, PA0 ,SM ,LA ,OH ,ON...

In 40 years of activity on 2 ,it is my best day ,with perhaps december 1998 in MS

The qrk was between s7/s8. From 144250 to 144350 it was like on 7Mhz...!

The best point was perhaps between Rennes and Brest.

So wonderfull day !

Some shorts test on 432 were negatifs ,on 50 Mhz it was the same as on 2 metres

Can we think that it was a very good solar activity ,the best of the 11 years i don't know but 2000 was

very good for e way !

73 qro

Guy F2lq

Ps: unhappy to full W ihave only VE and W or FM stations it is a little bit farther hi! for the next time ...

Sorry, my last post was wrong. The navy ships all have HF rigs on them. They are not tied to a single freq, they are like we are. What class license the operator has is where he will be. I have talked to them on 10 & 20 M, so just search around or go on the internet and look up that ship and see if they list the freq they can be contacted on. I know that during the JOTA they lurk around all the bands so that the scouts will be able to talk to them. 73

Has anyone ever been prosecuted for doing such? In a highly visible case, my congressman, John Boehner, was monitored on his cell phone and a tape of it was even given to a newspaper. No one was ever prosecuted even after Congressman Boehner's repeated requests.

IMHO, the law HAS been changed by the Justice Dept's failure to enforce it.

Rob... keeping logging software up to date with all the contests is a lot of work... you are better with a supported product such as CT, Log-EQF, DX4WIN or the like... you generally get what you pay for. Not much incentive for someone to keep working on freeware.

Many logging program has a interface to a call book CD. I uses logger
and QRZ
myself. I couldn't do it in 2 seconds, but that isn't the software
problem.

I use LogWindows version 3.something. It interfaces to my QRZ callsign CD. When I enter a call sign in the log, it accesses the CD and pops up name, QTH, if/when we worked before. Takes a few seconds.

Hi guys

Despite the fact that I have been licensed on HF for several years, I am a newbie to digital modes. I currently have an AEA PK 900 with which I work vhf packet but I have not managed a single contact on hf on any of the advertised modes (Amtor, Pactor).and one very brief contact on RTTY but this lasted less than one minute.

The rig I use is a Kenwood TS-440S which has been doing a marvelous job all these years on all modes (has FSK mode for data) and is in perfect condition. Some of the names that have come up in conversations with other hams is Hal. I had a Kantronics on loan for a while and was not impressed by its performance - mind you that was a few years ago and the quality may have improved some. It just did not seem able to pick out weak signals.

One of the recent issues of CQ magazibe ran a story on the Hal and the reviewer seemed to like it a lot.

Ideally, I would also like to use it for satellite work (phase rd etc) but it sems to me
that it simply is not possible to get all modes in one package.

I would also like to know which are currently the preferred and most popular data modes

I would greatly appreciate any and all advice from you experienced bunch as to which way to go. Getting the gear to South Africa is not a problem as a friend from New York is coming to visit me in December and has kindly volunteered to bring it along

I am going to post this same message on the other packet boards as well in case some guru only reads the one board and misses it. No offence intended/

73's and all the best

Kind regards

After days of watching the cluster for spots and not able to get over the " East Coast Wall " Tromelin Dxpedition was actually listening for west coast only on 17M. Got them on the first call. Glad my amp has a short warm-up. So if you are west coast keep your eye on the cluster they are bound to do this again. 73 / DX

They are not very strong in the midwest either. Just above the static
level and even hams in Florida saying they don't copy them. Did they
take a beam with them. Are they running barefoot or what. The same day
we barely heard them ZD7 land was coming in loud and clear. Don't
understand it.

I always get a kick out of comments such as this. No matter where you are someone is having difficulty working a station. East Coast? ... how about the West Coast wall when trying to work the Pacific, or Southern wall for South America and on and on. That's were good ops come out on top with knowledge of propagation and the technical aspects of our hobby.

Yep. FR/T isn't the worst place in the world for propagation from the USA, but it's far from the best. ZD7 is among the best.

The expedition's choice of bands seems to be yielding plenty of QSOs in all parts of the world, but it's not doing me much good! Haven't heard a peep on 15m - heard 'em on 10 CW but so incredibly weak there was no point in calling - did work 'em on 20 SSB.

Anyone know how long they're going to be on the island?

It's hard for me to believe that the next president of the United States will be George W. Bush or Al Gore. Both remind me of Hollywood movies that have been focus-grouped to death: they push all the appropriate buttons, but have zero original vision. Both stand for the same thing: corporate-driven business as usual.

There must be some way outta here.

Ralph Nader is no joker or thief. I think he and the Greens could give Al & George a good run for their money. At 65, Nader isn't running as fast as he used to, and the Green Party doesn't exactly have its platform figured out, but I think they have what it takes to inject a dose of radical democracy into the race. Unlike the two Tweedles, Nader is real, he stands for decency and common sense and he still commands a lot of respect in progressive and activist circles. And hidden behind the rainbow coalition of lefties, eco-feminists and crazies, the Green Party does have some great ideas. It's the only party that stands for the Tobin Tax, true cost markets, media reform and putting corporations in their place.

In October, with a fired-up Nader hurling intelligent sound bites into the presidential debates, the whole game show might actually be worth watching. The alternative is the most sophomoric presidential race in American history . . . and the lowest voter turnout ever.

I'm putting a GO GREEN - VOTE NADER graphic at the end of all my emails from now on. I'm betting that, between now and November, the American people will wake up to the fact that their sacred democratic experiment has now degenerated into a choice between a corporate-sponsored Republican and a corporate-sponsored Democrat.

In these heady post-WTO days, a sudden, massive protest vote against Al & George is entirely possible and Nader would be the most apparent heir. With perhaps less than 25 percent of the people voting, an inspired Nader campaign could grab a surprising share of the action. And even if he does not come close to winning, at least imagine how his campaign might pull together some of the fired-up, post-WTO forces and lay the groundwork for something really visionary in 2004.

==========

What it Means to be Green

"At the root of all Green political action is nonviolence, starting
with how we live our lives, taking small, unilateral steps toward
peace in everything we do. Green politics requires us to be both
tender and subversive. Affirming tenderness as a political value is
already subversive. In Green politics, we practice tenderness in
relations with others; in caring for ideas, art, language, and
culture; and in cherishing and protecting the Earth. To think Green
is to build solidarity with those working for social justice and human
rights everywhere, not bound by ideologies."

-Petra Kelly

Ok, whatever . I guess we all think differently . Well now we
understand each other. But if the person doesn't wish to leave
his " real name or call sign " why should he be title as a bad
or dumb person . Just respect there right to keep certain
information to there selves . Iam sure you got issues you like
to keep to your self. So regardless of what it might be don't
worry about. Just answer there question or somebody elses
question who "reveals" there real name or call sign and leave it
at that.

"Sam":
I don't believe that anyone is saying that we need to put our callsigns
here. What others are saying is that there is an enormous difference posting
anonymously with a nickname versus posting with your real name and/or call.
Those who hide behind a cloak of anonymity and routinely spout garbage seem
pretty juvenile to me and are generally not taken very seriously.

check out www.qrz.com.

It has a searchable callsign database, enter a callsign and it spits
out the FCC info for that call. All he had to do was type it in and
hit enter.

On Wed, 02 Aug 2000 00:58:42 GMT, rong@computer.net (Ron Goldstein)
gave a crackwhore a 5 dollar rock to spew the following:

> I had a contact with OD5NH last night. I flipped in my call, and within
>2 seconds he came back to me, calling me by my first name, letting me know what
>my QTH was, and telling me that we never worked each other before. What kind of

The Ohio/Penn DX PacketCluster
DX Bulletin No. 473
BID: $OPDX.473
August 7, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH/WB2RAJ & THE 59(9) DX Report, N4VA, W5KAU, K8AV, K8YSE, W9XF, 4X6UO, DJ5AV & DX News Letter, DJ7AA, DL5MO, EA5XX, EI4GK, EI6HB, G3SWH, G3TBK, G0PSE, HA0HW, IK2XDE, IK7JWX, JH6RTO, JI3DST, OK2BMT, RA0FF, RK1PWA, SU1HM, SV2CWY, UA9OJG, VA3QSL, VU2JOS and YO4AUL for the following DX information.

EDITOR'S SPECIAL NOTE (by KB8NW): There will "NOT" be an OPDX bulletin for August 14th and 21st. I know, you heard this before, but it is true this time. My wife (chief proof-reader) and I will be going to Las Vegas (without the young adults) for our 25th wedding anniversary (How did she put up with me all these years?) and to visit my dad. I can really use the break! However, PLEASE continue to send your DX info to me.

3A, MONACO. Jeff, VA3QSL, will be visiting Europe during August and will be operating occasionally from Monaco (3A) between August 8-13th. His callsign will be 3A/VA3QSL/M under his CEPT licence. He will likely be on the 40, 20 and 15 meter bands using 100 watts into a mobile hamstick antenna. QSL direct to homecall or bureau.

4X, ISRAEL. The "DX News Letter" reports that Mirko, DL8ABO, will sign 4X/DL8ABO/p while he is on a business trip to Tel Aviv and Haifa from now until August 19th. He will be active on SSB with 100 watts into a wire antenna. QSL via bureau to DL8ABO or to his CBA.

6 AND 30 METERS NEWS FROM INDIA. Jose Jacob, VU2JOS, reports that from August 1st through December 31st, 2000, Indian Amateurs (VU) have been given permission to use 10.100 to 10.150 MHz and the spot frequencies of 50.350 and 50.55 MHz.

D2, ANGOLA. Hossam, SU1HM, is now active as SU1HM/D2 from Luanda, the capital of Angola. He can be found every evening on 14160 khz (+/- QRM) on SSB. Hossam starts around 2300z. QSL direct via his home callsign address (OK in callbook) at: Hossam El Shenawy, 16 El Daher Square,

Cairo 11271, Egypt.
Also, look for D2EB on 15 meters SSB around 21290 after 1830z.

E4, PALESTINE. Guenter, OE1GZA, was expected to operate this past Saturday as E4/OE1GZA on 20/15 meters and 17/10 meters if propagation was good. However, it looks like it did not happen. There were no QSNs reported. Arie, 4X6UO, informed OPDX that 6 meters is definitely not allowed in Palestine at the moment (The question was asked and very kindly refused). Arie also mentioned that in a little while Guenter will operate RTTY. The equipment is in hand; it is just a question of what software to use.

FR/T, TROMELIN ISLAND. The Lyon DX Group is still active as FR/F6KDF/T until August 16th. Many have been asking, "Is there online logs?" The team has indicated that online logs will be available after the DXpedition is over. For more information, check out their Web site at: http://perso.easynet.fr/~f6jjx/menu.htm

HO1, PANAMA. Operators Wil/DJ7AA, Manfred/DK1BT and Tina/DL6MYL will be active as HO1A from September 16th through October 1st. The principal purpose for their DXpedition is the participation in the CQWW DX RTTY Contest. They plan to be active before and after the contest on all HF bands. However, Panama is actually not a rare country. The team wants to be active on the WARC and low bands as well as CW and RTTY which are still very much in demand. For this reason, they will concentrate mainly on these modes and bands. They will pay special attention particularly on the low bands to Europe and Asia. The time around the equinox is surely ideal for connections with this continent. For more details and information, check their Web site at: http://www.qsl.net/ho1a/

HR, HONDURAS (Update, Please refer to OPDX.472). A group from Spain will be active from here September 17-25th, transmitting on all HF bands, SSB, CW and RTTY operation while installing 9 new digipeaters. The Spanish team will consist of 6 OM and 1 YL and work together with the "Radio Club de Tegucigalpa". This is more than a simple DXpedition. The operators are very experienced DXpeditioners, but also have the knowledge to work with TNCs, antennas, Tranceivers, Eproms , etc. They are going to operate from two HF stations, 24 hours a day, but currently the callsign is not known. The team has asked for HQ1R, and they are waiting for the authority's answer. More details are forthcoming

INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND ACTIVITY. Members of the Wicklow Wireless Society will operate EI9KLH from the Lighthouse on the Old Head of Kinsale on the south coast of Ireland during the International Lighthouse/Lightship weekend August 19-20th. QSL via bureau or direct to EI9HQ.

IOTA NEWS.....
AS-041. Look for Takeshi "TAKE", JI3DST, to be active as JI3DST/4 from Oki Archipelago (Nakano-shima Oki-gun Shimane) now through 0200z August 15th. Activity will be on 40/17/15/ 12/10/6 meters SSB. QSL via the JARL Bureau or diect to:
Takeshi Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city,

OSAKA 545-0021 JAPAN

AS-089. Andy, UA1PBP/9 will operate from Marresal'sky Koshi Island
for 5-7 days beginning around August 5-7th. He will be
using 100 watts into a dipole antennas on 40-10 meters
including the WARC bands. QSL via RK1PWA.

EU-011. Three members of the Western DX Cluster Group, G3WNI/Bill,
G0PSE/Tom and G0WMW/Doug will be activating St. Mary's (Isles
of Scilly) using the special event callsign GB0SM. They will
be active from September 30th through October 7th, on 160-10
meters and possibly 6 meters. The modes will be CW, SSB and
probably RTTY. QSL via the Bureau, direct to G3WNI or via
E-mail to: g0pse@qsl.net

EU-052. Laci, HA0HW, will spend his holiday with his family on Korfu
(Kerkira) again and will be active as SV8/HA0HW/p now through
August 19th. Activity will be on all bands (including the
WARCs) CW/SSB and maybe RTTY. The low band activity will
depend on the local area to hang up some long wires. On the
other bands Laci will use mono verticals on fishing rods
like he did in the last few years. He states this is a
vacation, but he will try to be on the bands during the local
early mornings and later evenings while family members are
in bed.

EU-183. Corneliu, YO4AUL, informs OPDX that the complete story about
Sacalinu Mare Island (EU-183) can be found on the Web page:
http://www.qsl.net/yo4aul/

IOTA OOOPPPSS DEPARTMENT. In last week's bulletin, two items apparently
were mixed together. Not sure how it happened (it may have happened
during the power outage), but the following should have read as follows:
EU-052. Look for Gerard, F2VX, to sign SV8/F2VX from Keflonia
Island now through August 13th.

EU-057. After the IOTA contest, look for the DL0KWH team to
be active on HF CW/SSB with their individual callsigns
(DH7NO, DL2RTK, DL2SWW, DL2VFR). Pictures from last
year and logs after the contest will be available at:
http://www.qsl.net/dl0kwh

J3, GRENADA. Dave, G3TBK, is now active as J3/G3TBK and he told your
editor Sunday morning that he is currently working there for about the next
6 to 8 weeks. He will be active on all bands but will concentrate on
the WARC bands. Dave was spotted this past weekend on 20 meters CW/SSB
(14020 and 14195 kHz after 0130z), 17 meters SSB (18145 kHz after 1230z)
and 12 meters on 24900 kHz around 1615z. He states that he will be active
75% on CW. QSL via CBA.

JW, SVALBARD. Jarda, OK2PBM, will be active as JW/OK2PBM from Longyearbyen
(IOTA EU-026) from August 9-16th. Activity will be on CW, SSB, RTTY and
(possibly) PSK31 on 160-10 meters. He is planning to operate on CW 35 kHz

+/- QRM up from band edge, on SSB 10 kHz below DX windows, RTTY and PSK31 on the usual frequencies. QSL via OK2PBM, Jaroslav Rohleder, Karla Capka 2348, 697 01 Kyjov, Czech Republic.

MJ, JERSEY. Barry, N0KV (M0CQS), currently living in the UK, informs OPDX that he just received confirmation from the Jersey Amateur Radio Society for the use of their club station for the CQWW SSB Contest (October 28-29th) and associated operation beginning October 22nd. He will use the callsign MJ/N0KV from LaMoye, Jersey, Channel Islands, UK, from Zone 14 and operate as a Single Op or Multi/Single. Operators will be N0KV and possibly others. Station 1 consists of: IC-756, Alpha amp (400W), A3 tri-bander, R7000(WARC) and bandpass filter. Station 2 consists of: FT-100, club tri-bander, 40/80M dipoles and bandpass filter. Operation outside the contest will be on both CW and SSB starting Sunday, October 22nd, and ending after the contest. Activity will be largely day/evening hours (local) before the contest. Jersey is IOTA EU-013. Barry plans to be back in the US after the contest. QSL via N0KV: Barry Mitchell, 12200 Boothill Dr., Parker, CO 80138 USA

OOPPPSSS DEPARTMENT. Information last week under "HU4, EL SALVADOR" was received/translated wrong by sender. This operation took place last year, so please disregard.

QSL INFO AND NEWS.....
Phil, G3SWH, is pleased to announce that he has now answered all the direct QSL requests for the Wasini Island, 5Z4WI, operation as received to date. If you sent a direct card but enclosed anything other than 1 USD or a valid IRC, then your reply will have been sent via the RSGB Bureau. Phil states, "Please note that 1000 lire and other small denomination banknotes of other currencies are valueless in UK."

Steve, W9XF, received an E-mail from Abubaker, 5A1A, and in the message he mentions that Libya does not recognize IRCs and asked that any QSL requests should include green stamps and be sent via registered mail. So far, it appears he's been footing the postage bill for QSLs he receives unless they contain green stamps.

The QSL Manager for EJ7M from EU-121 during the IOTA Contest should be sent to: Denis O' Flynn EI6HB Ladysbridge P.O., Castlemartyr, Co. Cork. Ireland. QSLs can also be sent via the IRTS Bureau.

A group of Sakhalin Island Radio Amateurs activated the new IOTA AS-149 from Moneron Island (RR-16-01 for Russian Robinson Award) for 8 days beginning at the end of July and at the beginning of August as RK0FWL/p. Operators were RA0FF, RA0FU, RA0FW, RA0FN and RA0FY. They made about 8000 QSOs, including 800 QSOs in the IOTA contest. QSL via RK0FWL (not RA0ZD) to his callbook address: P.O.BOX 79, Yu-Sakhalinsk, 693010, RUSSIA (or via the bureau).

IK7JWX/7, active from Grande Island (EU-091) during the IOTA Contest, is to be QSLed via the bureau, or direct to: P.O. Box 218, 73100 Lecce, Italy.

Chris, SV2CWY, informs OPDX that SY2T counts for DXCC as Greece and to QSL via SV2CWY at: PO Box 40130, Salonica 56000, Greece (or via the Bureau).

The complete logs of "Arctic 2000 Dxpedition" from Svalbard Island (EU-026) from July 6-13th, 2000, are now available at: http://www.xdenews.net/logs/svalbard

Larry, N4VA, reports that he has a bunch of IRCs available (for USA addresses only). He states, "They are piling up from my QSL chores for S21AM and S21R. 75 cents each, any quantity. All have a postal mark of some sort in the left corner and all are the airmail variety." If interested, they should E-mail him at " N4VA@yahoo.com " to request/reserve a quantity.

VP9, BERMUDA. Seiji, JH6RTO, will be active as M0RAA/VP9 from September 21-26th. His activity will be on 40-6 meters. QSL via JH6VLF through the JARL Bureau or CBA. Seiji also states that he will stop his QSLing until next February when he returns from England to Japan. This includes his AH0R (/AH2/VP9), KC6FS/T88FS, S79SF, etc... operations. Please note that Masanori, JH6VLF does not have the logs and QSLs for these operations.

WEB PAGE OF INTEREST. One thing amateur radio operators are very fearful about is lightning strikes. Check out the Web page at: http://lightningstorm.com/lightningstorm/gpg/lex1/mapdisplay_free.jsp

ZD7, ST. HELENA. Barrie, ZD7MY, was active this past weekend on 15 meters SSB (21310 kHz) between 1900 and 2130z. He uses a three element beam with 90 watts. QSL via CBA.

ZONE 23. Look for Alex/RA0WA and RA0WAC to operate respectively as RK0YWA/P from Tuva (Zone 23, WAZ). This expedition will take place in the Sayanskij Mountain. No dates were provided (we will try to find out), but they will operate on all bands including the WARCs. QSL via RA0WA

Name even one time when anything was ever posted by me that was inappropriate.
You can't. So yet another theory bites the dust. Just like a tv set, if you
don't like what you see, turn the channel.

What the hell is the big deal with giving your Call sign hear !!
This is an INTERNET message board not a HAM BAND. There is no
rule hear that says you should give out your call sign. You
idiots made that stupid rule up your self !! So why dont you
obey it and dont worry about the rest of us who chose not give
our call sign. Why should those who choose not to give out their
call be treated any different from those who do . Their just
hear to ask a question , so either you can help them out or not.
Just dont judge them over something stupid. And thats all Iam
going to say, so if you decide to come back with a stupid remark
about what I had to say. Dont worry about because I aint reading
anymore of your stupid remarks about how your right for coming
in here and making up your own damn rules and at the same time
judging someone (like your any better than the next guy) . I
dont think I want help with my hobby from some idiot who thinks
he can come in this message board and make up his own damn
rules !!!!!!!!!!!!

I assume that was a question, despite the lack of a question mark.

It's very simple, and applies not only to newsgroups, but life in general. When a person makes a statement or comment and attaches his full name, callsign or other positive ID to it, it carries more weight. Period. Anyone who goes by "Sam" and whose email address is "alphacentauri" will get little or no respect here. Like it or not, that's how it works.

I worked them on 2000-08-06 at 1115Z on 20M. It was rather strange. I listened a bit and they were calling CQ and with one was responding. I have only a modest setup running 100W into a random length semi-triangular shaped loop (circumference about 120 feet) up about 15 feet. Got them on my second call. Not sure where everyone was Sunday morning...

Hello
The team are using Beam Antenna ...
But Tromelin is Indian Ocean and skip is long for you.

One Generator is out...
But i thinks the team make all for you

Come in Europa, to work T33 ZK1 ...and you see the signal...boys...

It is easy in a good shake to say... bla bla .. but not easy on
expedition...

The problem that you have , is the same since for European people with
middle pacific.

To day Monday, no trafic during a part of the day, but they came back
very soon..

Why is it that the FR/T operators always work EU before the rest of the world. The only exception seems to be 75 SSB.

This morning they were S9 on 24945 at 1230Z but EU only. They finally starting working USA at 1300Z but were S3 by then.
Some USA still had conditions and it was easy but for the rest of us we can only hope to work them tomorrow. I see the JA posts on 28
CW saying the same thing.

Please FR/T crew, you must be able to work EU 18 to 24 hours per day (the A52 group said it was 24 hours a day)....Try to work the rest of the world when there are openings.. To SE USA 1200 to 1300Z on 10 and 12 seem to be the only opening with SF at 159 so long as A and K index stay low.

I disagree with your evaluation. This is not radio and one's identity is compromised all too often via the Internet. Spammers and the Echelon Project, that has recently been publicly discussed, are just a few examples. Are you saying in life we should judge others by their look instead of their content? Be careful when answering that question, for the politically correct cops will be on you. Kill the messenger antics died with the Romans :) Self appointed newsgroups police obviously have nothing better to do in life except the making of rules. Obviously control addicts with other issues. You can't tell a book by its cover, judge the quality of the information presented, not the presenter, or you will miss a lot in life.

Swisslog is such a program.You can add a CD-Rom to it so when you type in a
call you instantly see all the details off the station.....

This is at : www.swisslog.net

There's a dosversion and a windows version.
At first it looks difficult to work with,but after a while it's working
fine.
I can't imagine what's not in it,you name anything....

Do you always communicate in such a band wasting manner, devoid of insight, failing to contribute to the discussion in a positive manner? Your comments do nothing to facilitate communication, but rather just a meager attempt to kill the messenger. I suggest to see the original statement and response BEFORE going off track. Here in the US we fought for our independence and value it. Therefore, should have no problem expressing our views freely without fear of the self appointed Internet police.

DXbase 2001 has rotor control plus everything else under the sun in an intuitive easy to operate interface. The database itself uses the Microsoft Access database format and as such is extremely robust and rugged. One can also have internet and VHF DX clusters both going at the same time. It also prints custom qsl cards. It is compatible with and supports all the CD Rom callsign lookup CD's. This is a case of there being " too many features to mention " I have used it since DXbase 2000 without ever having one single program crash ever. It is a reliable workhorse that is capable to meet the needs of the serious DX'r and is also just as home logging a rag-chew QSO with an old friend.

It does require a Pentium so it is not for everyone I suppose. I have a link to the demo on my site on the Software Downloads page.

I was in communication with Bill, when he was in the Navy, in Calif.
He helped me a bunch, on building communications gear. His small
trailer was left at my place near Albuquerque, on his way back East,
when it broke down after he got out. Came back later and picked it up.

The simple fact that others do things, doesn't make it right or appropriate, such as wilding incidents in parks or riots.
It must be a sad life when others become all too consumed with playing Newgroup policeman instead of providing information on topic to share. So much for the spirit of amateur radio and the friendliness it used to have. I'd be willing to bet that this same mentality goes on to the DX cops that appear during operations.

Yes, I am. Thanks for asking.

Doing PSK31 Alot, one of the most amazing and easy modes of Operating ever.

go to http://www.qsl.net/k8cpa and check out the link to psk31 info page, to find out about it.

I'm also getting on 75 meters, not very often, as I'm working alot of hours, and just don't have alot of time on my hands. and for the record, CD, It's Chuck, Not chuckie... I'll tell you what, you call me chuck and not chuckie and I'll call you CD and not Nigger boy. Deal?

Man is this outfit tough to work from Seattle! I'm wondering if any other of you rainmen are having as challenging a time as I am? I hear them on 20 mtrs from 1900utc to 2100, but then they're only s1 or 2. And today, the loudest they've been, they were only working eu only. I'm glad I snagged them on 17 mtrs early on in the dxpedition. Not a peep from them on 40 any day. Forget 80 or 160, zilch. Same with 15 or 10. And I've got my antenna at 100 feet. Very challenging. Well as the europeans are saying, "Now ya know what it's like for us to try working those islands in the Pacific...whine, whine." Well if you guys out there on FR/T are reading this, how about picking a time to listen for us poor blokes in the USA Northwest and advertising the time on this newsgroup. That would be much appreciated by a big bunch of dxers here in moss country. Thanks for being there and 73s! I'm still gonna keep trying..... K7JY

Hi All!

The Giant Page O'Shortwave Links is going "DC to Daylight!" Now
covering all facets of the radio listening hobby, from longwave to UHF
and beyond! And not only links, but the page now includes original
features! There are only a couple non-link features now, but plans
are to have a 50/50 split eventually!

http://swlinks.webalias.com

AOL Users: <A HREF="http://swlinks.webalias.com">Click Here!</A>

Over 200 links to radio-related sites all over the Web -- please
enjoy! Radio is a fun and exciting hobby, and my sincere wish is for
the Giant Page O'Radio Links to reflect that sense of excitement, the
ability to both eavesdrop on and talk to the world! Any suggestions
for links or features are most welcome, and you can mail these to
fewtch@yahoo.com.

2744. Re: FR/T in W7 Pacific NW

Newsgroup: rec.radio.amateur.dx
Date: 2000-08-11 00:00:00 UTC
From: Steve <ai7w@NoSpam.com>
Message-ID: <39940560_2@huge.aa.net>
Source record: 19730

If you look at a call area map, you'll see that the W7 district extends from the
32nd latitude all the way to the 48th latitude. The propagation over this range of
latitudes varies greatly and usually favors the southern latitudes.
When a DX station calls for W6 and W7 the result is that Hams in the NW USA at
latitudes above 45deg are competing against the huge population centers in southern
and central California and southern Arizona where the propagation is usually much
better.
To add to the problem, The thousands of ham calling from Southern California and
Southern Arizona are much louder in the NW USA than the DX station.
That doesn't mean it can't be done. I'm just saying that Walt isn't just whining, it
is harder up here.

Steve AI7W wrote:

> That doesn't mean it can't be done. I'm just saying that Walt isn't just
> whining, it is harder up here.

You are correct. The Low Band Monitor did an interesting analysis using
a
spreadsheet to calculate the average distance to work all DXCC countries
from
various areas of the world (May 2000 issue). Here are a few selected
results:

Call Average Miles per DXCC country

VK9NS 7629
VK6HD 7087
KH6CC 6947
NI6T (CA) 6280
W7AWA (WA) 6073
AA0RS (CO) 5971
W4ZV (NC) 5622
K1ZM (NY) 5449
VE1ZZ 5274
G3XTT 4594
IV3PRK 4530

Based on average distance to all countries, it is indeed more difficult
from
the West Coast of NA than the East Coast. This doesn't take into
account the
differences that result from latitude (i.e. greater difficulty if you
happen
to be in an auroral zone rather than on the Equator).

73, Bill W4ZV

Hi, this is wb6gki, Ron

I am new to this ng.
Is this just a flame group? Or can one ask technical questions here?

I'll take a chance.
I have a Kenwood MA-5 mobile antenna, and don't have any instructions
to tell me which part goes where for the different bands. Can someone
here help me?

Maybe a site that has the manual for it?
Or maybe someone could email me a set of instructions?
ANY help is apprecieted

From the San Francisco area (with 100w and 2 el minibeam at 30') I've had success on 20m both cw and phone, but only in the early morning, about 1300-1415Z, beaming long path. Both contacts were mid-week. There have been plenty of days when there was no copy here, even though other W6s were getting through (presumably with more, higher aluminum than I've got).

Hi All--

The K2 Fractal Flyer is a new class of monopole, which uses an elevated fractal counterpoise and fractalized sloping 'sloper' section. Low height; high performance; unidirectional!

Especially if you are height restricted, this antenna is very appropriate.

The antenna is covered by pending patents, but radio amateurs are invited to build their own for private, non commercial use, and without sale or manufacture.

Enjoy!

The link is on the ham page of:

This is IK4VYX, Fabrizio, the developer of the
DXTelnet software package:
http://www.qsl.net/wd4ngb/telnet.htm

One of the things you can do with DXTelnet is to
connect simultaneously to many different kinds of
DX resources (telnet, http, IRC, RF) and, why not,
feed your log with the Internet DX spots received by
DXTelnet.
The format of the spots is the classic one (DX de ...)
so your log will not detect any difference.
The way how to do this mainly depends on the kind
of log you use (if it is Windows or DOS based)
and on the available system resources (if you have
only one or more serial ports, and if you plan to link
DXTelnet to your log using a single or separate PCs.
In any case, the minimum requirements are:

* A Windows PC connected to Internet
(All windows family is OK, except NT and 2000;
I don't know about Win ME)
* At least 1 free serial port
* The log must support a serial port connection
(for example a TNC port).

I made several experiments and I was able to feed
successfully dumb terminal applications such as
Hyperlog (Windows) or Telix (DOS), this on a
single PC using just one (I repeat: JUST ONE)
serial port!!!

Note: even if your log already embeds a telnet client
to reach Internet DX clusters, using it combined
with DXTelnet is recommended: DXTelnet will bring
in more spots; if you dont believe my words just
download DXTelnet (see the above URL), install it
and connect to the CQDX-IRC node.
Moreover DXTelnet has DX Spot specific filters so
that you can choose which spots to feed and which
to ignore.
Just an example: a very useful filter is the
"Reject Old Spots" one; this, combined with
the antidupe filter, allows you to kill the spurious
DX spots sometimes originated by huge cluster loops,

especially during major contests.

As the link method depends on the log and on the
system you use, I will not spend pages here describing
all the different cases.
Just email me telling me which of these cases you
fall in:

A) DOS Log single port
B) DOS Log double port (or double PC)
C) Windows Log single port
D) Windows Log double port (or double PC)

I will be glad to email you a step by step describing
how to proceed in order to setup a link with immediate
benefits.

My email address is:

What kind of
> program can give all this info so fast---I'd like to have it also.

Try DXTelnet:
http://www.qsl.net/wd4ngb/telnet.htm
DXTelnet has an "Ham Info" menu which points to several online
ham databases...
No CD Rom needed, with most up to dated info (cause online data base
are often updated real time),
If your Internet connection is fast, it will retrieve the info you
need in a few seconds.

Hi,

I am trying to locate a Science of cambridge (Later to become sinclair) Mk14 computer. The computer was available in a home built kit in the UK and, from what i am led to believe, many were sold to amateur radio enthusiast, as, at this time they were the only people experimenting with electonics in the home build environment. (Hence my reason for posting in this group)

If you have one, or any spares, or indeed any sinclair items ie radios, calculators, watches, etc, working or otherwise, that you would like to sell please email me as i cannot regularly access newsgroups.

I would also possibly be interested in early home computers from the late 1970 to the late 1980s. Preferably boxed but all will be considered.

Thank you in advance.

The simple fact that others do things, doesn't make it right or
appropriate, such as wilding incidents in parks or riots.
It must be a sad life when others become all too consumed with playing
Newgroup policeman instead of providing information on topic to share. So
much for the spirit of amateur radio and the friendliness it used to
have. I'd be willing to bet that this same mentality goes on to the DX
cops that appear during operations.

Yes, I finally got around to taking my element 1,3 and 4. No I am
really
enjoying working some 20M DX. But, the band conditions haven't been
that great for me since I have gotten my CSCE. I have only managed to
work 5 DX countries so far from my 5-band vertical. But, I must say
that I like it alot. Only one problem was that one DX station didn't
understand the /AE after my call sign and gave me a brush off. Oh
well such as life.

I have worked the following all on 20M SSB

CT1ESO
DF1OM
EA1ALE
HB0/PI4TUE
UX1MM

Thanks all,
KF4YYA/AE

========
Great Joe on the DXing -- look for big improvement on the bands come fall.
12M and 10M should be wild. Last spring it was wall to wall Europeans and
many African stations on 10&12M in the morning. Skads of Asians stations
in the afternoon/eve.

Good Luck and good DX

When the DX station is having trouble with the /AE, I think you'd be justified in repeating your call a couple of times without it. Just be sure you identify properly otherwise (beginning and end of QSO, etc) and you'll be ok.

I worked two KG4's on 10 meters last night (band was in great shape!). Both of them were legit, newly-assigned calls to Florida hams. I expressed disappointment that they were not in Guantanamo Bay, Cuba, and they acknowledged that they hear that comment often when working DX stations.

So, my questions are these: What's the FCC thinking with these overlapping call regions? Is there a method to this madness that I am missing? Will any stateside call area begin overlapping with off-shore calls with sequential license assignments? KP4, KH6, KL7 ...

Larry,
I agree with you. I was shocked when the FCC chose not to skip the KG4xxx sequence and decided to issue them to US stations. I'll be very disappointed if they don't skip the KH4xxx sequence for US stations as these really ought to be for Hawaii. One could argue that the "ownership" of the KG4 sequence was a bit more ambiguous as only KG4xx (2 letter suffix) seem to belong to Guantanamo.

Richard Eckman KO4MR
Hampton, VA

p.s. As for your DX4WIN question in the reflector, I just go into the Prefix window, right click, and chose the appropriate country to override the DX4WIN defaults (when, for example, KG4xxx shows up as Guantanamo).

======
Hi Larry -- Its my understanding that the KG4 prefixes are as follows:
KG4 USA OR Guantanamo Bay
Single letter suffixes KG4x and three letter suffixes KG4xxx can be issued
anywhere in the USA fourth call district, and used anywhere in the United
States.
Two letter suffixes KG4xx are issued for Guantanamo Bay.

I believe some of the KC4xxx calls are being issues stateside instead of Antartica, as well.

I realize that this weekend will be a hot bed of activity for lighthouses.
Is this a contest or a kinda group special event? Are there any recommended
frequencies? Is there a specific exchange that should be used?

Hi,
My Icom 751A lost its' brain battery. Duties and VAT prevent me from
sending the board all the way back to the states and back
here just for reprogramming and battery change. No local
service here. so....
Anyone have a Willco or one of the italian-made
memory boards for Icom HF rigs that store the parameters in
non volatile eeprom?

thanks

2790. Re: Overlapping "K" callsigns - KG4?

Newsgroup: rec.radio.amateur.dx
Date: 2000-08-19 00:00:00 UTC
From: AC6V <ac6v@ix.netcom.com>
Message-ID: <399E8F6E.C545AE48@ix.netcom.com>
Source record: 19626

Had several E-Mails regarding:
Its my understanding that the KG4 prefixes are as follows:
KG4 USA OR Guantanamo Bay
Single letter suffixes KG4x and three letter suffixes KG4xxx can be issued anywhere in the USA fourth call district, and used anywhere in the United States.
Two letter suffixes KG4xx are issued for Guantanamo Bay.
==========
For more info -- try this:
Go to QRZ.COM - go to NAME SEARCH -- enter in Guantanamo Bay
Get all the 2x2 KG4 calls.

Now go back to CALLSIGN SEARCH and type in KG4A, KG4B, etc -- get all USA calls.
And type in KG4AAA, KG4AAB, etc --- get all USA calls

May be some exceptions -- who knows

2795. CONSUMER ALERT - Beware of Eucalypt Software - Makers of Autopost & Rocketfuel!!!

Newsgroup: rec.radio.amateur.dx
Date: 2000-08-20 00:00:00 UTC
From: Warning-Warning@yngqulkoqa.net
Message-ID: <F42562D4DDD432.hcbflsuyoh@sdcpaqfrn.org>
Source record: 19631

Eucalypt Software - Makers of Autopost & Rocketfuel --- Ripped Me Off!!!
-
All potential buyers should be warned to steer clear of this company. They have a repeated pattern
of ripping people off and ignoring requests for support.
-
I know someone who sent in the $10 registration fee for Autopost TWICE (thinking the first one may
have gotten lost) and in both instances, never got a registered version of the program and all of his
emails were completely ignored.
-
I myself purchased Rocketfuel on-line and had to pull teeth to get an unlock code. The web site was very
quick to take my money, but no registration/unlock code came for days and days. I repeatedly emailed them,
only to receive nothing but autoresponses. After 5 days I sent them a message stating that if I did not have
a working version of the program by the close of business that day, that I would challenge the credit card
charge. Magically, the code arrived several hours later.
-
What kind of way to do business is that?
-
In any case, its academic... there are other products available for free that do virtually the same thing
and I only wish that I had known about them before I wasted my time with Eucalypt Software.
-
If your in need of automatic news posting software, there is nothing better than "NNTP Power Post 2000".
It's graciously been made available free from the following web site:
-
http://net-toys.8k.com/
-
Save your money... your time... and the aggravation!
-
Peace,
-
PPN
-
-
PS: I have no affiliation with the makers of PowerPost 2000.

2800. Announced Operations for 2000 CQ World Wide DX Contests

Newsgroup: rec.radio.amateur.dx
Date: 2000-08-21 00:00:00 UTC
From: wfeidt@cpcug.org
Message-ID: <8F976CAD2wfeidthiscom@207.126.101.97>
Source record: 19637

The NG3K "Announced Operation" tables for the 2000 CQ World Wide DX Contests are now available. They can be found at the following URLs:

SSB - http://www.ng3k.com/Misc/cqs2000.html
CW - http://www.ng3k.com/Misc/cqc2000.html

This year I've added the ability to view the operations sorted by any of: Call; DXCC Entity; or CQ Zone. The tables at the above URLs are sorted by callsign. If you want to see the data sorted by DXCC Entity, just click on "DXCC" in the table header. Likewise, click on "CQZ" in the table header to view the operations arranged by CQ Zone. If you're viewing either the DXCC or CQZ view and want to return to "By Callsign" listing, simply click "Call" in the table header. The alternative views should become quite useful as the number of listed operations grows.

As ever, new listings for significant (M/M, less common DXCC entities and CQ Zones, etc.) operations are welcomed. Just send full particulars to:

wfeidt@cpcug.org

Please include:

1. Callsign to be used in the operation
2. DXCC Entity
3. CQ Zone
4. Intended class of entry
5. QSL route
6. Any other operation details likely to be of interest to other DXers and Contesters (e.g. operator's callsign(s), specific station location, QSL address if not commonly available, power level, antennas, etc.)

73,

--

And from the Americans, who are just as pathetic in their pile-up
behaviour as the Europeans. And the Africans. And the Filipinos. And the
South Americans.

Jeez, I love working KH2-piles with the odd KH1 and KH3 in between.

I'm a proud owner of a TH-D7 rtx...
my little problem is the...connection beteen the rtx and the gps or pc com. I can only do it with the original cable, included in the original box, but...ahi ahi, i bought this "total weapon" as second hand, so...i can only connect it with a "rented" cable kindly proviede by a friend. The cable i managed to build seems to be not the right one, but, belive me, after several test i decided to ask if someone has the same problem, as the links are made following the rtx manual and the soldering have been made and remade being sure that the soldering mateiral was ok...I cannot explain why with the original cable (headed with a 90ï¿½ broken 2.5 mm jack) it can be connected even with the expresso machine, and WHY (???) i can 't do the same with my home made cable (maintaning same wiring order, perfectly working 2.5 linear jack, checked and tested with a tester for the wiring order)...WHAT DOES THE ORIGINAL ONE HAS DIFFERENT FROM MINE?

I will appreciate very much any suggestion from every person who has had the same problem, and i hope everybody will forgive my poor vocabulary and wrog grammar...
Wishing all the best, from IK5ZVE, Denis

I believe that for any QSO to be legit you need to exchange call signs and at least one other piece of information. Many times it is signal report, grid square, state, etc. Also, just because he got the callsign incorrect doesn't mean he did not "work" him. They obviously had an exchange of some sort. They just failed to meet the minimum for a sucessful QSO. I have worked numerous stations and never copied or wrote down the call. I just was interested in ragchewing or getting some information at the time.

TE is a valid callsign for Costa Rica, and is ocasionally used during
special operations.

4XA is Ovidio, who I believe does maintenance work on TI4CF's antenna
farm. Strange he should operate with a TE callsign tho... but it could be
possible...

I assume you mean the PC connection.

The maunual is confusing regarding send/recv lines -- I had the same
problem
-- just reverse them and it should work fine.

Hi Walt. Is there a requirement in the DXCC rules that the call be
copied correctly? If so, how can they enforce? I have made QSO's
thinking the call was on thing, only to find later that it was
something else.

E.g., I copy VW6MM and log him. During his next QSO, I discover that
the call was actually 4W6MM. Is my QSO invalid?

Or, I log VW6MM and 5 minutes later is see 4W6MM posted. Is that
valid?

Or, I log VW6MM and learn at my DX club meeting that everyone else in
the club worked 4W6MM. What then?

Of course, it must all be on the honor system, right? Is it the QSO
that counts? He returned MY call. He may not have heard what I sent
as his call, if he even cares! What makes a QSO?

Just mental gymnasties!

There is, or was, a TE5T call sign in active use. It was used by TI4SU in
contests. I have a couple of QSLs from TE5T from 1993/94.

The prefixes are assigned to the USA by the ITU; the use of the
"special"prefixes are a courtesy (if you will) by the FCC AND as a
method to differntiate various non-contiguous US licensced stations.
Sadly, with the vanity callsign program in place as it is, the use
of a callsign to quicklky determine where a station is located is noww a
thing of the past.

2838. Operating in Ukraine for U.S. ham??

Newsgroup: rec.radio.amateur.dx
Date: 2000-08-28 00:00:00 UTC
From: Casey Bahr <caseyNOSPAM@foreign-interests.com>
Message-ID: <39AAA209.E5255A81@foreign-interests.com>
Source record: 19675

Folks,

I'm looking for information regarding how to obtain permission to operate from Ukraine (mid-October). I'm a U.S. amateur, Extra class. Information at the ARRL site appears to be ambiguous and over a year old.

Does Ukraine now recognize the U.S. as a participant in the CEPT agreement?

If not, it appears I need to obtain written permission from Ukraine to operate and one of the requirements (stated by the ARRL) is that I get a letter of good conduct from the ARRL. Is the latter requirement strictly necessary (as I am not a member)?

Do I need any other documentation in order to take my transceiver in and out of Ukraine (a K2, btw)?

tnx es 73,

Hello Casey,

Having made several trips to Lvov in the Ukraine I suggest you quickly enlist someone currently in the Ukraine to help with the application. What part of the Ukraine will you be visiting? I may be able to come up with a name. Being a member of your national association is a good idea. Request a letter stating that from the ARRL before you go. You'll also need copies of the CEPT regulations in English, French and German.

John,

When was the last time you operated in Ukraine? Information seems to change faster than the ARRL updates it on
their site. A Mr. Zeldin of the Ukr. ARS said that since last July I could operate under the CEPT, but did not
mention an application to fill out, just recommended that I visit the local PTT to get permission. Are you
talking about the application/address listed at the ARRL site? Is that still necessary if Ukraine now
recognizes U.S. hams under CEPT?

Thanks very much for your information es 73,

Casey, KS7J

Peter,
Its my contention that he is SPAMMING because he get paid for people going to his page. And since there is not much content there (Just a few links tossed together) he needs to constantly hope people click on it.

And he can say he makes no money all he wants, but I found a link on his page for an affiliate program that pays 50% of what goes to his page. Now AC6V does have some support pages, but he doesnt make you click to use, he only askes that you buy from these to support if you wish. AC6V also doesnt constantly SPAM the crap outta news groups just cause he changed a word on his page to make it refresh.

But I dont think globalcenter will do anything about it. Best we can do is Killfile him.

As an addendum,

Mr AB7SL has buried this into his pages deeper thinking I cannot find
it. But, I did and its still there plain as day.

This line

<script type="text/javascript" language="JavaScript1.2"
src="http://sm4.sitemeter.com/js/counter.js?site=sm492">

has site# sm492, thats the affiliate number

Go to sitemeter and you see

Updated the javascript code (on Site Meter, no need to update the
HTML in your pages) to capture more referrals
on Sites using frames. If you have a
framed sited and you are using the javascript
counter but still aren't getting referrals
then see this page.

SOOOO,

If he doesnt make money on his page (as he tries to say) then why

1. Does he need an affiliate number to an obiously money making scam
(Sitemeter.com)
2. Trys to hide his affiliation after the last time I pointed it out.
3. According to this gets more refferals, So what else does his little
script do to
your computer when you check his pages (see next why I can go there)
4. KEEPS SPAMMING HIS PAGES, We know they are there. But he says he
changes them, but
Ive never seen a real page. The only reason is he needs you to get
there to activate his affilliate clicks (BTW I use a new safe
browser that doesnt activate
his affiliate script so he dont get clicks)

I posted this once before and asked him to refute it. He never has.
Silence is everything

Well you can start apologizing right away then. The SM492 is my account code with the counter that runs each time someone visits the page. It is - NOT - any kind of affiliate number. Simply the account number at the service that keeps track of the visits to my page. Your assumption that I am making money from my site is simply 100% wrong. Please make sure you make a public apology. Thank you.

Check at ARRL- DXCC

2854. Question: Astron SS-30 Switching PS

Newsgroup: rec.radio.amateur.dx
Date: 2000-08-30 00:00:00 UTC
From: Joe <K7JOE@yahoo.com>
Message-ID: <39AE75B7.51B2425A@yahoo.com>
Source record: 19690
Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.dx

Hi Gang,
Based on an article that I read in QST magazine a while back, and
the fact that I needed a light weight PS for DXpedition/travel use,
I decided to purchase one of the Astron Switching Power supplies,
model SS-30. I got it from HRO last time I was traveling
through the SFO bay area.

For those that dont know, this is a 30 amp unit that is very small
and light weight. Best of all, it was the only model that QST endorsed
as being very good about the hash noise so prevalent with switching
PS's.
Also, it runs on either 110 or 220 volts AC, making it ideal for my
specific application ..... or so I thought.

Anyway, here's the situation: AC lines here do not offer a ground plug
or ground lug as is common in the USA and many other countries. All we
have here is a hot wire and a neutral wire on the AC line. The PS
itself comes with the standard black 3 wire cord as is common on most
computer power supplies (you know the one, I'm sure). I had to use one
of those adapters to get it plugged into power (but, of course, had to
leave the little ground wire floating since there's no place to ground
it....hell, over here, dont even use conduit inside the walls....fire
trap, yep).

Now, it works ok but I note lots and lots of hash on the HF receiver. I
presume this is due to the PS not being grounded. I also am getting RF
into
the PS and the HF rig at power levels above 100 watts. HF rig is an Icom
751A, which was designed to be run from an internal switching PS or
an external supply.

Voltage here varies from 210 on the low side to about 240 on the high
side.
High spikes happen, but slightly low voltage is more the trend.

Lastly, I note the PS makes some strange high pitched noises at times.
These noises are unrelated to the fan operation (which kicks on and
off based on temperature). I note this after the power switch is cut
off...strange.

Before I chuck this thing and go find a linear PS, I'm wondering others
experiences with these little switchers.

I dont have access to things like new gel cell batteries, marine
batteries,

etc....So, As a work around, I snagged the old battery out of the diesel van and lugged it just outside the window and am using the switching PS as a battery charger to charge the car battery while operating. The battery provides what appears to be good filtering and the RX hash noise goes away.

Thoughts or ideas?
thanks,
Joe DU1/K7JOE

Hello Rick,
I wish I had a dollar for every visitor but I have made nothing off that site. I created the site and registered the ab7sl domain all as a logical extension of my Ham Radio hobby. My only reason for promoting the site is to see how many visitors I can get and to get the site known for the resources it does contain.
Spam is unsolicited - email - arriving in your personal email inbox. I have cleared my newsgroup posts with my ISP. I am not selling anything and am simply inviting people to drop by the site. Newsgroup posts are not spam. There is no federal or local law prohibiting any type of newsgroup post. Just because some folks may not like the posts for whatever reason does not make them legally spam. The term spam is now being used for any message found anywhere on the internet that someone doesn't like. But that is not the accurate and legal definition.
Thank you for the apology it is appreciated . 73 / DX

Well, I have bad news for you. Your ISP must have changed his terms and conditions since you checked last time.

I would urge you to read the terms and conditions of your ISP *very* carefully and stick to them in the future:

"Usenet newsgroups

Global Crossing places no content restrictions on
newsgroup postings by its users except that (a) no illegal content,
including pyramid/Ponzi schemes, is permitted and (b) all postings
should conform to the various
conventions, guidelines and local culture found in each respective
newsgroup and Usenet as a whole.

Posting 20 or more copies of the same article in a
45-day period ("spamming") or continued posting of off-topic articles
after being warned is prohibited. Users who engage in spamming using
Global Crossing accounts
will be charged the cost of labor to issue cancellations and respond to
complaints, with a minimum charge of $200. Users who engage in spamming
from another provider advertising or implicating, directly or
indirectly,
the use of any service hosted or provided by Global
Crossing, including without limitation email, web, FTP, and DNS
services, is prohibited and is grounds for termination of those services
to those users.

Excessive crossposting (Breidbart Index of 20 or
greater in a 45-day period) is prohibited. The Breidbart Index (BI) is
calculated by taking the sum of the square roots of the number of
newsgroups each copy of an
article is crossposted to. If two articles are posted, one crossposted
to 9 newsgroups and the other crossposted to 16 newsgroups, the BI
=sqrt(9)+sqrt(16)=3+4=7. Crossposting articles to newsgroups where they
are
off-topic is prohibited; a good rule of thumb is that if you are
crossposting to more than five newsgroups, it's likely to be off-topic
on at least one of them.

Commercial advertising is typically off-topic and/or
a violation of charter in most Usenet newsgroups. Information about

advertising on Usenet can be found in Joel Furr's "Advertising on Usenet FAQ".

For more information on "spam," see the FAQ on which is regularly posted to the news.admin.net-abuse.misc newsgroup by Chris Lewis, or visit Fight Spam! .

Posting articles with falsified header information is prohibited. "Munging" header information to foil email address harvesting by "spammers" is acceptable provided that a reasonable means of replying to the message originator is given. Use of anonymous remailers is acceptable, so long as the use is not otherwise a violation of this policy.

Users may not issue cancellations for postings except those which they have posted themselves, those which have headers falsified so as to appear to come from them, or in newsgroups where they are the official moderator.

Users are urged to familiarize yourself with the workings of Usenet by reading FAQs regarding Usenet before becoming active participants."

Given your usual behaviour in this group, I have my doubts that you actually understood these terms and conditions, which is the reason I posted them here for your enlightenment and your education."

End of quote.

Read the terms and conditions carefully and act accordingly in the future.

2863. filter for a switching power supply

Newsgroup: rec.radio.amateur.dx
Date: 2000-08-31 00:00:00 UTC
From: "sb1963_bis@yahoo.com" <sb1963_bis@yahoo.com>
Message-ID: <39AE3103.1C045977@yahoo.com>
Source record: 19556

I just got as a present from a friend a compact switching power supply from his defunct computer. This tiny power supply delivers 12.4V DC at 1.2 A and can be plugged into any AC outlet from 90 to 240 VAC. Looks like a nice option to power a small SW receiver, but...

I tried this power supply with my home-build TenTec 1253 receiver. This power supply is definitely not filtered. The result is a strong AC hume through the radio speaker.

Does anybody in this newsgroup have any experience in filtering out the AC hume from a switching power supply so it can be used with a SW radio? Will a 1000 uF or so capacitor be enough? Or do I need to build a more elaborate filter ?

Any help or advise will be greatly appreciated.

Charles,

I will publicaly appologise to you for saying you make money. If you
say you dont then you dont. To that end I do applogise.

But I wont appoligise for the spamming part, I really dont see a need
for the continual posting to all groups about your page. Especially
since many many people have asked you to stop.

SPAM is whatever someone continues to place in my inbox or newsgroup after having been told numerous times that what they are distributing is unwanted. You, and numerous others, are using a very loose definition for SPAM. While technically correct, you are doing yourself and your work more harm than good. There are many, many, help sites that exist with little more than bi-weekly, or even monthly, notices.

You are the types of individuals who will be "...in someone's face..." whether that someone likes it or not simply because you are technically correct. Your almost continuos notices are evidence of the fact that few people have interest in what you are peddling. Have your fun. Filters are especially useful in cases like yours.

Hello Peter ,
Yes evidently they have from what they told me over the phone some months ago. Thank you for bringing this to my attention. I have amended my ab7sl posting schedule to include only 5 Ham Radio newsgroups posting to them once every 10 days.
I feel this is frequent enough to get the job done and after a little arithmetic I can see it is also within the guidelines of acceptable use posted by my ISP. Thanks again. 73 / DX

From: David <david.oharrow@btinternet.com>
Message-ID: <8omnd9$mu0$54@uranium.btinternet.com>
Source record: 19563

Hi,

I am trying to locate a Science of cambridge (Later to become sinclair) Mk14 computer. The computer was available in a home built kit in the UK and, from what i am led to believe, many were sold to amateur radio enthusiast, as, at this time they were the only people experimenting with electonics in the home build environment. (Hence my reason for posting in this group)

If you have one, or any spares, or indeed any sinclair items ie radios, calculators, watches, etc, working or otherwise, that you would like to sell please email me as i cannot regularly access newsgroups.

I would also possibly be interested in early home computers from the late 1970 to the late 1980s. Preferably boxed but all will be considered.

Thank you in advance.

Guidelines of acceptable use in ham radio:

Check your transmitter. On the DX's frequency
Last two letters
Nets etc.

All of this is perfectly acceptable. And I bet it makes you just as
popular with the DX-community as spamming, mindless fullquoting etc.
does with usenet community.

Oh well...

Source record: 19568

QST--

You are invited to join one or all of the following lists on e-groups(formerly onelist). All these reflectors are e-mail based, friendly, objective, and moderated ,so that no spam, porn, off-topic, or personal-offensive posts are sent out. You will receive no off-list e-mails by subscribing: again; no spam.

These lists (with average recent subscriber sizes) are:

ANTENNAS@EGROUPS.COM 176 members
CROSSFIELDANTENNA@EGROUPS.COM 70 members
FRACTALANTENNA@EGROUPS.COM 255 members

Please review the descriptions at:

http://www.egroups.com

Please note the CFA list specifically deals with this antenna in an objectively critical fashion and no posts will be allowed that make grandiose claims without supporting data presented. To date, no data has been presented which requires the extraordinary claims made by some pundits: there is no evidence for better performance than any other small vertical antenna (and that performance is poor).

Fractal antenna posts should go the the fractal antenna reflector; not the antennas reflector.

To subscribe to any list, either go through the process at egroups, or to skip the process (and some say 'annoying questions') just do:

---------- -subscribe@egroups.com

where the ---------- is the name of a given list (such as 'fractalantenna')

If you have a specific question on this post, please e-mail me off-NG at chipn1ir@aol.com.

73,
Chip N1IR

==========
Hi Jeff -- I'd like to list this net at URL:
http://ac6v.com/pagep.html
But not sure of the category or function of the net. DX, Traffic, MM,
General ???

The Ohio/Penn DX PacketCluster
DX Bulletin No. 474
BID: $OPDX.474
August 28, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2KW, N2VW, WB2YQH/WB2RAJ & THE 59(9) DX Report, W3UR & The Daily DX, K4VUD, W5BOS, WP4Q, N6RT, AC7DX, K7BV, K8YSE, 9M2TO, BA1DU, CO2QQ, DF3CB, DJ2MX, DJ5AV & DX News Letter, DJ7UC, DL4MCF, DL5ME, EA4DX, EA5EYJ, EA5RM, EA5XX, G0IAS, GW0VSW, JA1ELY, OH1EH, PA1AW, PA3BIZ, PY2HN, RA0FF, SQ6ELF, SQ8BGJ, SV1IW and VK4FW for the following DX information.

EDITOR'S SPECIAL NOTE (by KB8NW): Well, I am back from Las Vegas (pockets empty) and fighting some kind of illness (flu) along with attending a weekend "Teamster Seminar" which made it a little difficult to write this week's OPDX. However, I did the best I could. I want to thank the many who continued to send information (you would not believe the amount of E-mail I received....WOW!). It was hard to read/sort/delete the information collected. Hopefully, things can get back to normal next weekend......73

3B8, MAURITIUS. Look for DL7DF and DL7BO to be active from November 3-17th. No callsigns were mentioned, but they will operate from 3B8 with one station, a beam and a vertical for 80 and 160m. QSL via the German QSL bureau DARC to DL7DF or direct to: Sigi Presch, DL7DF, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany.

4W. EAST TIMOR. "The Daily DX" reported last Friday that Peter, ON6TT, will be active mainly during his evenings for the next few days as 4W/ON6TT. (He may be on for the whole day on Sunday.) Peter only operates SSB. QSL via ON5NT.

4W, EAST TIMOR. The 4W/K7BV East Timor DXpedition website has been updated with additional information. The website can be view at: http://www.qth.com/k7bv/timor/

5B4, CYPRUS. Look for Dez, 5B4/G0DEZ, to be active until 2003. He seems to like 17 meters CW/SSB. Check between 1830 and 0300z (sometimes as early as 1430z). He is hoping to obtain a 5B4 and ZC4 callsign. QSL via G0DEZ.

5V7, TOGO. A German team consisting of DJ7UC, DL4WK, DL7BO, DL7DF and DL7UFR will be here October 3-9th before heading to Burkina Faso (see XT2 below). Activity will be on all HF bands plus 6 meters CW/SSB/RTTY with an emphasis on the low bands. Their equipment consists of 4 transceivers, 2 linear amplifiers, 2 beams, a vertical, a 21m high vertical for 160 and 80m and a 5 element beam for 6m. QSL via DL7DF. For more details and updated information, visit their Web page at: http://www.qsl.net/DL7DF/

7Q, MALAWI. Allan, G0IAS, informs OPDX that Les/7Q7LA will be teaming up with Harry/7Q7HB. Harry at the moment is sending the first ever SSTV pictures out of Malawi from the "Club Makakola" on the South West shore of the lake. There is a possibility of a "get together" of ALL the hams currently operating from Malawi (7Q7DC, 7Q7JL, 7Q7BW, 7Q7BX and perhaps 7Q7RM.... if he is up to it) because they are all heading to the lakeshore. More details are supposed to be forthcoming.

8Q, MALDIVES. Roberto, EA4DX, informs OPDX that after two years of touring the Pacific (3D2DX 1998 and T24DX 1999), he will return to the Maldives were he operated in 1997 as 8Q7XX. He will use the same callsign, but his main targets for this operation will be the U.S. on the higher bands and EU and JA on the lower bands where 8Q7 is most needed. This trip is entirely devoted to radio, he states, so although his operation will be focused on the above, other continents and bands will not be unattended. Look for 8Q7XX between August 31st and September 11th on all bands 80-10 meters including the WARCs on the usual SSB DX frequencies. Equipment includes Yagis for 10-12-15-17-20 meters and a vertical for 40-80 meters, plus 1 kw linear. QSL via EA4DX (Callbook, QRZ or HAMCALL addresses OK). Log search on the Web after the trip at: http://www.qsl.net/ea4dx

9A & T9, CROATIA AND BOSNIA-HERZEGOVINA (IOTAs to be activated too!). Mario, DJ2MX, informed OPDX that he will be on holiday in Bosnia and Croatia. He will be active as T94DX between September 3-13th from Sarajevo on 80-10 meters CW/SSB/RTTY. After that he will go to Croatia and be active as 9A/N0MX from Brac Island (EU-016, CI-010) on 80-10 meters CW/SSB between September 14-28th. He has also planned to be active (if possible, only for a few hours) from some another islands (Solta Island EU-016 CI-126; Ciovo Island CI-013 NOT IOTA). PLEAE NOTE: QSL cards are only via his German callsign DJ2MX, through the DARC Bureau or direct to: Mario Lovric, Am Oelberg 11, D-61231 Bad Nauheim, Germany. Bureau QSL request is also available on his home Web page at: http://www.qsl.net/dj2mx

9H, MALTA. Once more a large group of Dutch amateurs will be leaving for Malta Island (IOTA EU-023) in order to have their holiday combined with a radio DXpedition. They managed to get the callsign 9H0VRZ for the three weeks of operation together with all their induvidial 9H3 callsigns. The first group will arrive on September 15th to build up the site. Their operations will start on September 16th and last until October 8th. The QSL Manager for 9H0VRZ is: Andre van den Bos, PA0JR, Olof Palmelaan 5, 9649 BH MUNTENDAM., The Netherlands. QSLs for all indivdual 9H3 callsigns are via CBA or QSL bureau. The team will be active on 80-6 meters CW/SSB, and in case of good propagation also 2 mtr. They will try to arrange a daily updated online log on their home page at: http://www.vrza.org

The home page will have further information on the starting date.
E-mails during the operation can be sent to: 9H0VRZ@vrza.org
Or from now until Septrmber 14th to: PA3BIZ@vrza.org
Participants will be as follows:
Frits PA0BEA 9H3IE (SSB/CW) Francis PA1FR 9H3AAH (CW)
Bill PA3BIZ 9H3ON (SSB/CW) Sietse PA1XA 9H3AAG (SSB/CW)
Ger PA0OI 9H3OI (CW) Jim PA2SWL 9H3SWL (SSB)
Sjirk PE1OFJ 9H3YM (SSB) Harry PA0QBS 9H3AAJ (SSB/CW)
Wilko PA3BWK 9H3R (CW) Jan PA0LD 9H3AAI (SSB/CW)
Andre PA3HGP 9H3S (SSB/CW) Louis PA0LRK 9H3LRK (SSB)
Renee PE1CAJ 9H3V (SSB) Hans PA3FYG 9H3AAL (SSB/CW)
Maarten PE1MQI 9H3W (SSB) Allart PE1RVQ 9H3AAK (SSB)
Jaap PE1NGF 9H3X (SSB)

CE/CE0Z, CHILE AND JUAN FERNANDEZ. "The 59(9) DX Report" states that in mid-September, Rick, PY1VOY, will begin a 2 month job in Chile and hopes to be active. He will try to get to CE0Z on his days off for a 4 or 5 day operation at a time.

CN8, MOROCCO. The Bavarian Contest Club will be operating again as CN8WW from here in the upcoming CQ WW Contests. They will be a Multi/Multi team, so there is a very good chance to work CN on all bands from 160-10m, for which they kindly ask you to work them again even if you worked them in the past (Even if you have received your QSL card). There will be a new picture QSL card for the upcoming activities. Work them on 5 or 6 bands and receive a special QSL card to honor your high performance.
CQ WW Contest SSB (October 28-29, 2000):
QRG's (+/- QRM): 1840 / 3799 / 7099 / 14255 / 21355 / 28455 kHz

CQ WW Contest CW (November 25-26, 2000):
QRG's (+/- QRM): 1833 / 3503 / 7003 / 14033 / 21033 / 28033 kHz

Before and after the contest they will operate as 5C8M in CW, SSB, RTTY, on 6m and also on the WARC bands. More detailed information about their DXpedition can be found on their homepage at: http://www.dl6fbl.de/cn8ww/
QSL cards for CN8WW and 5C8M go via DL6FBL (bureau or direct):
Bernd Och, Christian-Wirth-Str. 18, D-36043 Fulda, Germany

DX HOLIDAY WEB SITE. Kenny, K2KW, informs OPDX that he has just launched a new Web site called "DX Holiday". The goal of this site is to share information on DX operating locations, and DXpedition "how-to" information. He hopes the readers find it helpful, and he especially hopes they will contribute to it! Check out: http://pages.prodigy.net/k2kw/qthlist/

HF, POLAND (Special Event). Now through November 6th, look for station HF6WR. The station is active to celebrate the 1000th anniversary of Wroclaw City in Poland. Activity will be on 80-10 meters, as well as 6/2 meters. Most of the activity seems to be on 15 meters between 1400 and 1930z. QSL via SP6ZDA, via bureau or direct address: Scouts Radio Club SP6ZDA, Box 41, 51-673 Wroclaw 9, Poland. A special diploma is available. For further information, check the Web page at:
http://www.wroclaw.tpsa.pl/user/sp6pwr

HQ, HONDURAS (Update, Please refer to OPDX.472 and OPDX.473). Julio, EA5XX, informed OPDX that the Honduras Authorities have confirmed that the Spain team will be active as HQ0R from September 17-25th on all bands.

IOTA NEWS.....
AS-NEW. A group of hams from "The Beijing DX Club" will be active on Juhua Island, unnumbered IOTA China LIAONING PROVINCE WEST group. They will operate two stations with one beam and one power amplifier during September 1-4th. The callsign will be BI2J. The team consists of BA1AA, BA1DU, BA1FB, BA1HAM, BA1KA, BA1MK, BA1MT, BA1TU and others. The BI2J team is supported by Chinese Radio Sports Association and is sponsored by Island Radio Expedition Foundation Inc. QSL via W3HC. If there are any questions about the expedition, contact the team leader Alan, BA1DU, at: ba1du@arrl.net

AS-073. Tex, 9M2TO, will be active from Perhentian Island from August 31st through September 3rd as 9M2TO/P. Activity will be on normal DX frequencies 40-10 meters on CW. He will use an IC-736 with a G5RV and a 6m Yagi. QSL via the Bureau to JA0DMV or direct to 9M2TO.

EU-179. Tomek/SP8CTE, Wojtek/SP8NCF, Ryszard/SP8ONZ and Jakub/SQ8BGJ were active this past weekend from Uznam Island on all band SSB, CW and RTTY signing their callsign portable /1. QSL via their home call, bureau or direct.

NA-NEW. Lanny, W5BOS, will be on from Cay Sal Bank "The Bahamas" beginning October 6th or 7th for 2-3 days. This is the last unnumbered island group in "The Bahamas". The callsign will be W5BOS/C6A. QSL via W5BOS: Lanny Phillips, 8381 FM 2101, Quinlan, Tx 75474-4836 USA.

NA-093. Look for CO1OTA to be active September 1-3rd from the archipel-ago "Los Colorados" (Last time on the air was November 1995). Activity will be on the IOTA frequencies 80-10 meters CW/SSB. QSL via the GRUPO DX CUBA, Apdo. 1, Cdad. Habana 10100, Cuba or via Bureau.

J2, DJIBOUTI. "The 59(9) DX Report" reports that Houssein, J28FH, is a new operator in Djibouti. He is using a 10 meter only rig with a small amplifier (70w) to a mobile antenna 3 meters high. He is building a 3 element beam for the HF bands. OPDX has found that he frequents the frequency 28580 kHz after 1930z. QSL via WA2VUY.

LLDXL DXCC personnel at the "W9DXCC Bash"
in Chicago next month. He will advise us later. ADDED NOTE: Charly is still aiming at a A5 operation in early December 2000. He is looking for any experienced 160m Op for this operation. His E-mail address is: k4vud@hotmail.com

-=-=-=

C, DL4WK, DL7BO, DL7DF and DL7UFR will be active
here October 10-15th. Activity will be on all HF bands plus 6 meters
CW/SSB/RTTY with an emphasis on the low bands. QSL via DL7DF. For more
details and updated information, visit their Web page (mentioned above).

XU, CAMBODIA. During the coming month of October, Toni/EA5RM and Pedro
Luis/EA7DBO will be active from Sihanouk Ville in the southern part of
Cambodia as XU7ADB. They plan to arrive in Phnom Pehn at 10:00 AM (local
time) on October 3rd. If the customs do not delay their plans, they will
be on the air that same evening and continue until the early hours of
October 11th. Operation will be on 80-10 meters SSB/RTTY, with some CW.
They also requested a licence for 6 meters band, but their request was
not accepted by the authorities. They will use an Icom IC-736 and a power
amplifier using a couple of 4CX250Bs to try to give readable signals in
Europe. The antennas will be a tribander beam for 10/15/20 meters and
wire dipoles for the others bands. An online log will be available on a
Web page during the operation (updated everyday). The Web is active now
with picture and info at: http://www.qsl.net/xu7abd
QSL is via EA4URE at: Union de Radioaficionados Espanoles, Apartado 220,
E-28080 Madrid, SPAIN

XW1UD DXCC STATUS (Also A5 info). Charly, K4VUD, reports that he finally
got a local Lao man to translate his XW1UD paperwork from Laos and will
present that in person to an ARRL DXCC personnel at the "W9DXCC Bash"
in Chicago next month. He will advise us later. ADDED NOTE: Charly is
still aiming at a A5 operation in early December 2000. He is looking for
any experienced 160m Op for this operation. His E-mail address is:
k4vud@hotmail.com

2887. RE: Serial o Crack para SWISSLOG?

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-02 12:07:37 UTC
From: pp <ea5om@wanadoo.es>
Message-ID: <d46s5.163$bH4.5004@m2newsread.uni2.es>
Source record: 19574
Cross-posted to: es.rec.radio,es.rec.radio.amateur,es.rec.radio.misc,es.rec.radio.ondacorta,rec.radio,rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.dx

Por favor, l�elo todo

Un colega de mi ciudad (usuario registrado)me pas� el Swisslog para windows para que lo usase unos d�as y le explicase c�mo funciona, ya que de ordenadores ni pum. (yo utilizo de libro de guardia uno que me hice en casa).
Como esas cosas me gustan, lo rod�, convert� mi base de datos, etc etc. Y por curiosidad estuve intentando hackearlo...lo logr� pero todo qued� ah�:
En mi distracci�n en lograrlo, ya que de paso aprendes un mont�n de cosas.
Naturalmente NO he pasado a nadie c�mo se hace, NI PIENSO HACERLO, ni lo recomiendo.
A ver si me entiendes: El autor del programa se ha gastado un mont�n de pasta en legalizar en primer lugar el motor borland en sus primeras versiones y ahora con access. No se pueden vender programas en los que se utiliza material pirata en su desarrollo!.
Despu�s de much�simas horas de trabajo, el hombre tiene que ir puliendo las much�simas observaciones (a veces no muy amables) de sus usuarios registrados (los hay que no tienen ni idea, pero hay que hacerles caso, ya que son sus clientes!) ; en fin...un trabajo ingente, ya que el programa es muy completo y el m�s configurable que existe (que yo sepa, pero salvo el m�o hi hi)...en fin y ahora llegas por ac� y le pides a todos que te env�en la clave o c�mo hackearlo...perdona, pero creo que tienes mucho morro! y perdona la expresi�n.
Mira, el K6STI realiz� unos MAGNIFICOS programas creados en ensamblador, muy cortitos, que eran una aut�ntica pasada; pues bien, no s�lo le crackearon los programas y deshicieron de un plumazo su ingente trabajo y conocimientos, sino que encima, le env�an un correo explic�ndole c�mo lo hab�an hecho y que gracias por todo!!!!!
Bueno, del K6STI ya no se sabe nada y se dedica a su profesi�n olvid�ndose del mundo de los radioaficionados por �ste motivo. (Hizo estos programas por necesidades financieras particulares, pues atravesaba un mal momento tal como explic�)
Bueno...juzga tu mismo, que el programa no vale veinte mil duros, sino justamente el diez por cien o por ahi...
T� mismo, chico...

jose <josito.s@teleline.es> escribi� en el mensaje de noticias 6A9r5.3784$dO1.47964@telenews.teleline.es...

Nobody gets to the islands unless the navy says so, and that means transport via naval vessel. Apparently the original plan was for the navy to stay a number of days but it turned out their stay was very limited, so the PS0S guys took what they could get. I never heard them either.

I just completed an overhaul of the Propagation Center at the HF Radio Resource Center (SWLing and Ham Radio). If you have not been by in a while, or never, please take a look at the resources available - they are updated in real-time. Included are eAlerts.

http://www.hfradio.org/propagation.html

I hope this is useful to you.

As others have stated, you probably have the connections reversed... had the same problem here since Kenwoods documentation is misleading... Note that if you are trying to use with APRS program (such as WINAPRS) I've found you will need to switch to Packet mode instead of APRS mode (2nd push on TNC button) to get the data out of the PC port.... check out the following links for additional help on cables...
for PC cable: http://kg7il.foxinternet.net/ham/aprs/d7pintouts.htm
for GPS cable: http://kg7il.foxinternet.net/ham/aprs/45xl-d7a.htm

Message-ID: <uPss5.141$y8.143@firefly>
Source record: 19581

: Hi Walt. Is there a requirement in the DXCC rules that the call be
: copied correctly? If so, how can they enforce? I have made QSO's
: thinking the call was on thing, only to find later that it was
: something else.

: E.g., I copy VW6MM and log him. During his next QSO, I discover that
: the call was actually 4W6MM. Is my QSO invalid?

People will probably argue semantics of the rules on this one, but they
don't say WHEN you have to copy the call correctly, only that YOU do it.
My opinion is that if you hear the callsign differently some time after
you work him, you can go back and correct your log.

: Or, I log VW6MM and 5 minutes later is see 4W6MM posted. Is that
: valid?

: Or, I log VW6MM and learn at my DX club meeting that everyone else in
: the club worked 4W6MM. What then?

The above two are NOT valid IMHO.

: Of course, it must all be on the honor system, right? Is it the QSO
: that counts? He returned MY call. He may not have heard what I sent
: as his call, if he even cares! What makes a QSO?

When I was a new DXer, I worked someone with a huge pileup on 40 CW. He
never gave his call within a half an hour, and went QRT without giving
it. I never did find out who I worked. I guess I really worked no one.

I sent "call?" and some smart aleck responded with "A51JS". I knew enough
then to know THAT wasn't the case.

: Just mental gymnasties!

Frizz <senorpurpl@hotmail.net> wrote:
: Anyone have a site where you can get plans/kits to build 2 meter QRP gear
: just like the HF stuff? I am already using an Alinco DJ-C5 which produces
: 300mW but would like to try my hand at some home brew stuff (besides Ramsey,
: I know about them already). Any ideas? Thanks!

: KG4IVT
: KG4IVT@hotmail.com

I'd suggest building or buying a transverter. You can use an HF rig with
28 MHz as the IF. My favorite for QRP-portable operation is the
Realistic HTX-100. My homebrew transverter puts out about 8 watts CW/SSB.

More questions. Just what is the ARRL/DXCC definition of a QSO? Does
the ARRL require that the callsign of the station worked be accurately
known at the time (real time), or, as you say, if you later _hear_ the

callsign, you can go back and correct it. Does that change the otherwise accurate exchange of information? What information must be exchanged in order for the QSO to be a QSO?

If I have a QSO and don't get a QSL, did I really have a QSO? Since if I didn't have a QSO but sent for, and received, a QSL, I can send it (albeit unethically) for credit!

When we use a system of self imposed ethics and rules and depend on honor, all sorts of variations on the _norm_.

"Ethics in this case equate to unwritten 'rules' re: DXCC, WAS, etc."

2899. Several Questions regarding HF DX

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-03 19:12:55 UTC
From: Randy Mclean <k5drm@noaddress.com>
Message-ID: <39B2A2AF.BF62D732@noaddress.com>
Source record: 19585

I have a few questions regarding dx. First what is DXCC?? I know that some countries are DXCC, but not sure witch ones are and aren't, is there a list??. Second I've keep hearing the phrase "confirmed worked countries" or something along those lines. Is this where the two stations exchange qsl cards, station information, or something totally different. Finally, When sending a qsl card to an amateur outside the us, is there a one rate postage or it there a different rate for each country?? Thanks

2900. Re: Several Questions regarding HF DX

Source record: 19586

These are some good questions deserving a lengthy personal reply, but alas, you don't have a legitimate mailing address to return email to, so I will direct you to www.arrl.org and search for dxcc, and then to new.usps.com and search for rates. I know that some folks don't like to post their real address for fear of spam, but if you are going to ask serious questions, it would be helpful to have something up their that we can decode.

The DX Century Award (DXCC) is sponsored by the ARRL == you need 100
countries confirmed (QSL cards received).
The DXCC award details and country list is as at URL:
http://www.arrl.org/awards/#dxcc
AND
http://www.arrl.org/awards/dxcc/
AND
http://www.cpcug.org/user/wfeidt/Dxcc/dxccen.html

Confirmed countries is achieved by making DX contacts, exchanging
callsigns, signal reports, and sending QSL cards verifying same.

QSLing postage, tips, advise is at URL:
http://ac6v.com/pageff.html#PRIMER

QSL Bureaus are at URL:
http://ac6v.com/page2.html#ARRL

All about DXing at URL:
http://ac6v.com/pagedx.html

Awards are in mixed, CW, phone, etc.

P.S. 100 countries is easy, 323 countries (Honor Roll) is difficult,
difficult, difficult.
Top of the Honor roll (all 332 of them) can take a lifetime or longer.
The wall starts at around 300 countries confirmed

The Ohio/Penn DX PacketCluster
DX Bulletin No. 475
BID: $OPDX.475
September 4, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AI2Q, W3UR & The Daily DX, KE4BKL, N4AA & QRZ DX, NI6T, W6KNB, K7BV, W7MP, K8YSE, 4X6UO, 9M2TO, DJ5AV & DX News Letter, DL2VFR, DL5NAM, EA8EE, F5NOD, HA0HW, JA1HGY, JI3DST, PA3EPG, S52DG, SV1ENG, UT9FJ, VK2EO, VK2GJH, VK4AAR and ZS5BBO for the following DX information.

4W, EAST TIMOR. Dennis, K7BV, has informed OPDX that he has recently updated the 4W/K7BV (4W6DX) East Timor DXpedition Web page. This Web page is very impressive, and you should take the time to check it out. The site contains up-to-date information on this operation, tentatively scheduled for October 8-16th. The site also mentions that Dennis has recently picked up the license (August 31st) at the UN Headquarters in New York City. The Web page can be found at:
http://www.qth.com/k7bv/timor/

5N, NIGERIA. Bogdan, 5N3CPR, operates quite a bit on 17 meters CW. He is usually active between 2200 and 0100z around or just below 17080 kHz. He will be heading back to Poland soon for "time off," but will return to Nigeria and resume his 5N3CPR operation in about five weeks from now (per AI1Q). He is running an FT-100 that he finds convenient to carry on air-planes, and a half-sloper antenna (not so convenient). His home call and QSL route is SP5CPR.

8Q7, MALDIVES. Adam, W7MP, will be active as 8Q7AB from September 30th through October 9th. His operating location will be Bandos Island (IOTA AS-013, CQ ZONE: 22, ITU ZONE: 41 and Continent: AS/AF). Activivty will be on 80-10 meters (QSX up). His equipment will be an ICOM 706 MK IIG into an Ameritron AL 811H at 800 Watts to a Butternut 9-band vertical and Alpha Delta 10-40 notrap dipole. QSL via W7MP. NOTE: This is a newly assigned callsign and is not in the Callbook yet. QSL information is as follows: Adam Boettiger, W7MP, 420 SE Kathy Street, Sherwood, OR 97140 (USA). For additional information, an online form to request cards via the bureau, propagation window projections, frequencies, further

updates and more, see the Web page at: http://www.dxpedition.com/

9M0, SPRATLY ISLAND. One of Japan's DX clubs, the Far East DX Ploiters (FEDXP), will carry out a DXpedition to Layan Layan Island in the Spratly Island group to celebrate the 40th anniversary of their club. The FEDXP was established in 1960. Some may remember that in 1982 FEDXP members went to the Republic of Guinea (3X) to celebrate their 20th anniversary (callsign were 3X3JA and 3X5DX). The Layan Layan Island operation will take place September 12-16th. This time look for operators JA1BRK, JA1RJU, JA4DND, JK1OPL, JR1FBE, 7K1WLE and JF2XGF to use the callsign 9M0F from the Spratlys. They will operate on 160-6 meters on CW/SSB/RTTY (using the usual DX frequencies). They plan to have two HF sations operating simultaneously and the beacon will transmit 24 hours around the clock on the 6 meter band. QSL via JA1HGY: Nao Mashita, 8-2-4 Akasaka, Minato, Tokyo 107-0052, JAPAN

A5, BHUTAN. By the time you read this, operators/members of the Clipperton DX Club should be active from Thimphu until September 14th. Team members include Denise/F6HWU, Gerard/F2VX, Alain/F6ANA, Vincent/G0LMX, and Alain/F5LMJ. As of press time, the callsign is unknown. QSL via F8RZ. Suggested frequencies are:
CW - 3505, 7005, 10105, 14015, 14015, 18075, 21015, 24895 and 28015
SSB - 3795, 7045, 14195, 18145, 21295, 24945 and 28475 kHz
For updated info, check the Clipperton DX Club Web page at:
http://www.multimania.com/cdxc
ADDED NOTE: From "The Daily DX", Laurent, F8BBL, is the pilot station for the Clipperton DXpedtion to Bhutan. He reports that the recent A50CDX station is not the group and is a pirate. As soon as the team starts he will confirm the callsign. They are not expected to be on the air until around 0630Z Sunday September 3, 2000.

A5, BHUTAN. A station signing A52FH was active on Sunday on 14195 kHz at 1250z and 21295 kHz at 1426z. No other details are available at this time.

D4, CAPE VERDE (IOTA operation). Operators Manuel/EA8BYG and Jose/EA8EE will be active near the capital of Mindelo from the Island of Sao Vicente (IOTA AF-86, new reference about June 2000) from November 1-8th. They will actually be operating from Carlos', D44AC, QTH and use his callsign. Their activity will be on all HF bands around the IOTA frequencies including the 17/12 meters and VHF 50 MH (grid locator HK76KM). Modes will be on CW/SSB/RTTY/PSK31/HELL/STREAM/MT63/SSTV and PACTOR. Their equipment will be an IC-706 MKIIG, with vertical antenna and a directional antenna A5S to be built on a mast. They will also have a homemade dipole for 6 meters, and TS44O Kenwood. The QSL via EA8URL (The Gran Canaria DX GROUP).

DX MAGAZINE - MOST WANTED SURVEY 2000. Carl, N4AA, Editor of QRZ DX, has asked for DXers throughout the world to participate in the DX Magazine's 2000 Most Wanted Survey. This year everyone will have a chance to participate because the survey is available on the Web site:
http://www.dxpub.com
It will also be in the September/October issue of The DX Magazine scheduled

for mailing later this month. The results will be published in the January/February 2001 issue of The DX Magazine and will be posted to the Web site in late January 2001. OPDX urges DXers to participate. The Survey is very important to potential DXpeditioners, and many use this listing to determine where/when to go on their trips. Carl's complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

E3, ERITREA. Members of the Bavarian Contest Club (BCC), DL5NAM/Chris) and DF4RD/Dieter, will activate from Asmara, capital city of Eritrea (7th most wanted entity), from October 17th through November 1st. Activity will be on 160-6 meters on SSB/CW/RTTY and PSK31. Their callsigns and QSL info will be announced upon their arrival. Any donation or sponsorship is welcome (their callsigns costs 1000 USD). For more information, contact Chris/DL5NAM via E-mail at: dl5nam@web.de
Or check later (under construction) at: http://www.qsl.net/e30??

FO0, AUSTRALES ISLANDS. Mike, KM9D (FO0MOT), is active from Raivavae Island (OC-114) as FO0MOT/P. His activity will be mostly on CW but on all bands until September 10th. He was spotted this past weekend on 3507 kHz at 1120z, 24918 khz at 1749z and on 14036 between 1100-1430z (also again at 0944z). QSL via OM2SA, Juraj Sipos, 93013 Trhova Hradska 550, Slovakia.

IOTA NEWS.....
IOTA-OOPPS. In last week's bulletin (OPDX.474) we stated that Uznam Island was EU-179. This is wrong it is EU-129.

AS-147. Takeshi, JI3DST, will be active from Hokkaido's Coastal Islands (Okushiri Island) as JI3DST/8 from 0800z September 23rd to 0200z September 25th. Activity will be on 17/15/12/10/6 meters SSB.
QSL via the JARL Bureau (Bureau is Best) or direct (Please don't send USDs) to:
Takeshi Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city,
OSAKA 545-0021 JAPAN.

CUBIAN IOTAs. Members of the GRUPO DX CUBA will activate ALL IOTA's references in Cuba during the month September and also activate a "new one".
NA-093. Sept. 1-3rd CO1OTA, Cayo Juatias, Archipielago Los Colorados
NA-086. Sept. 7-9th CO7OTA, Cayo Coco, Archipielago Camaguey
NA-NEW. Sept. 14-16th CO8OTA, Cayo Moa Grande (NEW REFERENCE)
NA-204. Sept. 21-23rd CO6OTA Cayo Sta. Maria, Archipielago Sabana
NA-201. Sept. 28-30th CO9OTA Cayo Caguamas, Arch. Jardines de la Reina
NA-015. Sept. 1-30th CO0OTA Cuba, (main land)
NA-056. Sept. 1-30th, CO4OTA Isla de la Juventud, Arch. Los Canarreos
QSL via bureau or GRUPO DX CUBA. Apdo, 6060 Cdad. Habana 10600, Cuba.

EU-136. Alen, S53MA, will be active from the Island of Krk using the callsign 9A/S53MA/P now through September 12th. This will be a QRP operation using a Sierra 1-2W, dipoles, GP for 20 meters. Activity will be on 80-15 meters between 2000-0000z. A special QSL will be provided. QSL via home callsign.

EU-136. Dusan/S52DG and Borut/S52LD will be active as 9A/S52DG/P and 9A/S52LD/P from Croatian Island of Krk (CI-046) from September 15-19th Activity will be on 40-10 meters, CW-SSB. QSL via CBA or bureau.

OC-212. A team of VK operators will be using the callsign VI2BI to activate Broughton Island from October 6-15th. Activity will be on most bands for the duration of the operation. The team will arrive on the Island at approx 0200z on the 6th.

OC-234. The "Timor Sea DX Group" TSDXG (ops VK8AN, VK8DK, VK8TM and VK6YS) finally got Browse Island on the air as VK6BM about 1145z, September 1st. They were using basic equipment to start and the antenna was only 20 ft. off the ground. Things were improved on September 2nd when daylight arrived. The seas were very bad which delayed the landing considerably. QSL via VK4AAR, Alan Roocroft, POB 421, Gatton 4343. Australia. ADDED NOTE: Some people are still using the Arana Hills address which expired in 1993, and others are using the Dalveen address which expired in 1998. Please use the GATTON address. **STOP PRESS**
The horrific seas which delayed the landing of the TSDXG team on Browse Island has now blown the catamaran "Tearaway" up on the beach. The operators have unanimously decided to abort this part of their DXpedition. They expect, at this stage, if possible, to refloat the catamaran at high tide around 0500z September 3rd. If there are no further difficulties, they will probably proceed to Cassini earlier than originally planned. Their QSL Manager Alan, VK4AAR, will keep us posted if any further changes happen. Browse is now finished for this trip.

KH5, KINGMAN REEF. Another press release by the Kingman Reef/Palmyra DX Group was sent out by Garry Shapiro, NI6T, this week. OPDX InterNet Subscribers will receive a copy of the complete release as an additional bulletin. In short, the plan DXpedition is on track. The Kingman Reef DXpedition team will depart Honolulu by air on Sunday, October 15 for Kiritimati Atoll (Christmas Island) in Eastern Kiribati. The team will be met by the motor schooner "Machias" for the voyage to Palmyra Atoll and Kingman Reef. At Palmyra, the team will be joined by Mike, KH6ND, who is currently active as KH6ND/KH5. The team may have the opportunity to spend some time at Palmyra before continuing to Kingman Reef. During at least 12 days at Kingman, they will be active on all bands from 160 to 6 meters on CW, SSB and RTTY with up to six stations. The expenses for this DXpedition include over $50,000 for transportation! They will be heavily dependent upon assistance from both individuals and DX organizations, especially in Europe, to meet their objectives. Contributions should be sent to:
Tom Harrell, N4XP, 2011 New High Shoals Rd., Watkinsville, GA 30677.

NEW 6 METER BEACON. Arie, 4X6UO, informs OPDX that a new 6m beacon is on the air with a temporary callsign and location. The frequency is: 50.080.20 MHz The beacon CW text is: " vvvvvvvvv 4Z5AY test 4Z5AY test 4X/4Z beacon located in Tel-Aviv km72jb now tx all the characters from memory abcde

fghij klmno pqrst uvwxy z1234 56789 0.,?-/ 15 seconds key down "
For more info, check the Web page:
http://www.iarc.org/~4z5ay/htmls/bea_tec.htm

QSL INFO AND NEWS.................
Ben, PA3EPG, reports that he is the new QSL Manager for Serge, 4K5CW.
He has the logs from August 16, 2000, and later. QSOs before that date
Ben can confirmed, but he must check these QSOs first with Serge.
Anyone who needs Azerbaijan confirmed can send the QSL card to the
following: Ben van Leeuwen, Zwolseweg 57, 8181 AC Heerde, The Netherlands

The FR/F6KDF/T Tromelin Island DXpedition's LOG is now available on
the Web page: http://perso.easynet.fr/~f6jjx/menu.htm
For direct links to specific items on their Web page use the following:
To the LOG: http://f5nod.waika9.com/frt_log.html
To the expedition statistics: http://f5nod.waika9.com/frt_stat.html
To the expedition pictures: http://www.citeweb.net/frt/pictures.html

9M2TO QSLs for contacts between July 5th through August 15th (including
the contest) have been sent out via the JARL Bureau on August 20th.

Ron/WA6FGV and Frans/K6SHJ were active recently on Moorea, French
Polynesia as FO0AND and FO0JAN, respectively. QSL to home calls: FO0AND
to WA6FGV and FO0JAN to K6SHJ. ADDED NOTE: They may be active again from
Moorea for a few days in mid September on their way home to Santa Barbara,
California, after operating from South Cook Island (See ZK1 below).

The SW8LH operation from Akrotiri Light House Santorini Island (EU-067)
by SV1ENG and SV1EFP is now QRT. The operators will transfer about
3000 QSOs from the paper log to the PC log. They will have the QSL
cards printed in the middle of October. For informations visit the Web
page: http://www.qsl.net/sv1eng/

A QSL new address has been announced for UX2FXX (UT9F contest callsign):
The Odessa City Young RadioAmateur Club Station, P.O. Box 100,
Odessa 65065 Ukraine

QSL CARDS FOR ZD9IL. Many have been wondering where their ZD9IL QSL
cards are and what is taking so long. Well QSL Manager Edwin Musto,
ZS5BBO, informs OPDX that the problem is that Ian's, ZD9IL, logbook
was mailed to Edwin about a year ago and has come up missing. The last
log Edwin received was dated 30-June-1998. Edwin has finally been able
to make a contact with Ian, and he has now promised Edwin that he will
mail him a copy of his log at the end of September when the next mail
ship leaves the island. Edwin wants people to realize that the logistics
for this island are not easy, and they only have about 4 mail boats a
year. Ian is not on any E-mail like we are, and this creates major
problems. As soon as Edwin has the log sheets, he promises to work his
tail off to get all the QSLing up to date. Please don't send a second
card as this causes more headaches. If you have sent a card it will be
answered once he has the log. The QSL address is: EDWIN MUSTO (ZS5BBO),
P.O. BOX 211032, BLUFF, 4036, SOUTH AFRICA. ADDED NOTE: Ian has also

told Edwin that he has not been very active as high winds have blown down antennas, and hopes he will be active within the next month.

SPECIAL EVENT. Look for the Alamance County Amateur Radio Club special event station, K4EG, on September 16, 2000, to commerate the Burlington Carousel Festival. The operating frequency will be 14.260, and others will be announced at the festival. The operating times will be between 10:00 AM to 5:00 PM (EDT). A nice certificate will be given out for the price of a #10 SASE to U.S. hams and a IRC for foreign hams (direct only please). The Certificate Manager will be KE4BKL, and the address can be found on the QRZ.COM or BUCK.COM Web sites, or he can be contacted via E-mail at: mwoakley@bellsouth.net
They request to please help them celebrate their festival and help the ACARC promote amateur radio to the public.

SV5, DODECANESE. By the time you read this, Laci/HA0HW and Tom/HA4DX will be active as SV5/homecall until September 11th (possibly the 18th). The two operators are on holiday with their wifes on Kos Island (EU-001) close to Rhodes Island. Activity will be on all bands including the WARC bands on CW/SSB and maybe RTTY. The low bands activity will depend on the local free place to hang up some long wires. On the other bands, they will use mono verticals on fishing rods as they did for SV8/HA0HW/p in August from Corfu Island (EU-052) and made 5200 QSOs. They want to remind everyone that this is a vacation, but they will try to be on the bands at local early mornings and late evenings while their wives are in bed.

T30, WEST KIRBATI. Jack Haden, VK2GJH, informs OPDX that he will be on the air from Betio (RJ-61), South Tarawa as T30JH from September 14-26th. He states priority will be given to 50 MHz using an Icom IC-736 (100 watts) into a Cushcraft 5 element beam on that band. He will also use a Kenwood TS-690S into a four element beam for the HF/WARC bands. QSLs go to VK2GJH (direct only) with the proper SAE for return reply. Jack mentions, "Due to immediate connecting flights there will be NO operation from C21 this time, sorry!"

XU, CAMBODIA. Peter, ON6TT, was heard active this past weekend as XU7ABI on 17 and 20 meters SSB. His activity is only going to last until September 6th. QSL via ON5NT.

ZK1, SOUTH COOK ISLANDS. Ron/WA6FGV and Frans/K6SHJ are now active on Rarotonga (South Cook) as ZK1FGV and ZK1SHJ, respectively, until about September 14th. They have been active over the past weekend on 20/17/15 meters CW. Also, look for them to possibly be active again from Moorea (FO0) for a few days after this operation as they head their way home to Santa Barbara, California. QSL via home calls.

Check http://www.ng3k.com. This site has lots of information on upcoming dxpeditions, including ZD9ZM.

Word yesterday from ZS/G3ZEM/MM, enroute to Tristan, said that he would be on the air on Wednesday according to some reports that I read on packetcluster.

2906. Could HF freqs reach Int'l Space Station or Mir?

Newsgroup: rec.radio.amateur.dx

Source record: 19592

Assuming they had a HF rig and antenna, could hams aboard the old Mir or

the new to be built International Space Station communicate with HF to
hams
on the ground? As I understand it, the ionosphere is leaky, and that
signals
could get thru. Also signals going straight up would punch thru
easily. Maybe
a bounce or two and then go into space? This would mean that you
wouldn't
need be line-of-sight to QSO ISS or Mir.

Most probably, yes. According to Sven Grahn's Space Radio Notes
at http://www.users.wineasy.se/svengrahn/radioind/radioin1.htm
several spacecraft have used shortwave communication when they
were "out of sight" of the ground station, mainly on frequencies
around 15, 18, and 20 MHz.

There are also allocations for amateur radio space communications
in the 28 MHz, 21 MHz, and 7 MHz bands, although it seems that the
latter haven't been used yet.

======
ZD9 is on the air right now on 24.893 See URL:
http://oh2aq.kolumbus.com/dxs/oldlook.html?
Type in ZD9 in the "Spot Database Search"

The ZD9ZM website is at URL:
http://www.dxtechnology.com/zd9zm/index.htm
They will have a on-line Log listing as the DXpedition gets under way.

Only someone with no consideration for others would post as you do,
just below the agreed-upon level of automatic spam determination, and
AGAINST the expressed feelings of many in these newsgroups.

I am convinced that this is an expression of your mental illness, and
think it's more a matter for your doctor than your ISP.

Before there were rigs like the ICOM 706 series and the Yaesu 847, how did most people operate CW and SSB on 6m, 2m, and 70cm? Transverters? Modified HF rigs? Homebrewed rigs? Anything else?

Well,

I wasn't all that long ago but I remember when a great VHF/UHF station had a rig for each band. I had a IC-575H for 6m (it did 10m also) and Icom made similar rigs for 2m, 220MHz, 440MHz and 1.2 gHz, too. Before that I had a FT-290 for 2m which drove a Mirage brick amp. I'm sure many built transverters, too. Basically you had One HF rig and many tranverters or many band specific rigs that each drove it's own amplifier. Bad side, too many mics. Good side, they were all on at once and if one part broke everything else still worked. Besides, the shack looked a lot more impressive to the uninformed.

Well, before I got my first "modern" V/UHF rig, an FT-726 in 1984, I used separate RX and TX converters for each band. That made a total of 6 converters to cover 50, 144 and 432. In the last year or so of such operation, I began using an HF transverter as the IF and modified the various converters so that they used a common LO for each band so that they would truly transceive. Before that, I used separate HF transmitters and receivers.

The amount of haywire in the shack could and did sometimes result in funny things happening. One morning a couple of solar cycles ago, I worked a bunch of stations in the Caribbean one morning before I discovered that my 6m RX converter had no antenna connected. Received signals were much better after I connected it although they weren't bad before. I think that says something about the quality of the RF shielding on the converter. I know that it says something about the radio conditions then compared to what we have had lately.

I became interested in Amateur Radio in the late 50s. By the fall of
1961 I was up and running on 2m AM/CW. The equipment I used was a
homebrew transmitter running two 12AT7's to a single 832A. I probably
got about 10-15 watts output. I modulated it on AM with a EICO 72?
plate modulator and a JT-30 crystal microphone. I received with a
Ameco Nuvistor convertor (10 meter IF). This to a Hallicrafters SX-111
receiver. THe antenna was a 10 element yagi fed with 300 ohm twinlead,
stuck outside my second floor bedroom window (shack) and rotated
by 'Armstrong'.

I later graduated to a better antenna and added some six meter gear.
As I recall it was a Clegg 99er.

Generally SSB was not used until much later. I.E. the 70s possibly.
But I was gone to the military by then. So AM and CW was the only mode
used when I was on at first.

To answer the question; most VHF/UHF stations were homebrew and/or
modified military surplus. Like the SCR-522 transceiver. The receiver
sucked, so most just used the tx and made it work on two meters.

Surplus FT-243 crystals were used. And sometimes 're-ground' to change
the frequency. The common frequencies of 8 mc or 6 mc was the norm.
And there were a lot of surplus rocks around too.

Receiving was done with a low band receiver and a VHF/UHF Convertor.

Hope that helps.

Dan/W4NTI

My experience is about 5yrs older than Dan's but pretty similar. We ran converters ahead of an old HQ120 Hammarlund. 2 meter was an aircraft transmitter modified for the purpose and ran the ubiquitous 832. On six the xmtr was a Meck T60 modded beyond belief to play transverter for an old Central Electronics 10A. We were on sideband but had about 6 others to talk to. I got off about 1961 to do useful things -- like college.

My VHF experience is limited to 2M.

My first station circa 1960 was a RX converter with a couple of 6J6 to a BC-342 and a modified SCR-522 transmitter.

Later the converter was replaced with the W2AZL design using cascode 417As. I built a transmitter using a ARRL design using a pair of 6360s, one tripler, one PA. I drove a p-p 829B final with that. The high voltage and modulation was "stolen" from my Heathkit DX-100.

In about '65, I converted the transmitter to a transmitting converter by making the final 6360 a high-level mixer, driving the cathodes with a Central Electronics 10A exciter on 20M. The PA was a single 4X150.

By the early 80's the station, including antenna and tower was entirely HB with GaAs FET preamp, 8877 PA, etc. A domestic upheaval put me QRT with 40 states confirmed as well WAC.

I'm slowly rebuilding in a new location and hope to finish the WAS one of these days.

Can't be of help with your particular situation, but I have an Astron SS-30M. When grounded via the standard grounding plug and running on 115V, I have no RFI whatsoever and the supply is completely silent when the fan isn't running. In fact, my Astron RS-20M makes more audible noise after it's been on for 24 hours or so.

My experience has been very similar to Floyd's. It is very quiet and stable with no signs of RF hash. I have tested it with a load pile for voltage and ripple at 0,5,10,15,20,25 and 30 amp loads, and voltage never changed. Ripple increases slightly with load, but never over 50mv. The fan is very quiet, but I notice the click of the thermal switch. The fan will actually cycle off at times with a 30 amp constant load. Seems to be a well designed amazing little box.

My first rig was an old Harvey-Wells TBS-50D, ran an 807 in the final, 80 - 6 meters, including the 11 meter amateur band. Doubled in the final for 6.

Receiver was a homebrew converter (using 12AT7s as I recall) to a real prize -- Hammarlund HQ-129X.

In 1960, I built a dream rig: 12AT7's driving a 6360 driving pair of 6146s; used the audio section of the old Harvey-Wells as the modulator. Also had a converted 6-9 (or was it 7-9?) mhz Command/ARC-5 rig as the VFO. Receiver was a homebrew converter that used RCA Nuvistors in front end, mixer, and oscillator.

Later, built a 2-meter version of the same xmtr with an 832 in the final. Built a W2AZL converter -- which I still have today and which still holds its own.

The 6360 rig was built in a series in QST; the W2AZL converter was a mainstay in the Handbook for a long time.

The old HQ-129X made a fine IF for the converters.

AM was king for the longest time on 6 and 2, long after SSB had taken over HF.

Now I've done it -- got to head for the nearest hamfest and find me a HQ-129X.

Your missing a number of generations of equipment.

Transceivers for HF weren't always around. Up until the late fifties,
an HF transceiver would have been an exception. It was separate transmitters
and receivers, and while some companies made both, it was far more common
to have a receiver made by one company, and the transmitter either home made,
or bought from another company. It was vastly different. If a transmitter
wasn't using crystal control, it sure wasn't using a VFO with a fancy
dial.

Interestingly, VHF may have been a different matter. There was always
the split between casual use and DX'ing, and there tended to be a real
split in equipment between the two on VHF.

On VHF and UHF, the pattern from the early days was simple equipment,
very simple to begin, and then better equipment moved in either through
legislation (as standards improved, the regulation expecting stable
operation kept moving up in frequency) or because people wanted to go
further.

The earliest VHF equipment was on the level of superregenerative receivers
and modulated oscillators. The earliest transceivers were probably VHF,
because it was fairly simple to turn that superregen receiver into
a modulated oscillator, making the tube serve a dual purpose. I've
seen schematics for that sort of thing, but I have no idea how common
they were.

Modulated oscillators not only drifted, but they tended to put out a
fairly wideband signal (the method of modulation resulted in both AM
and FM). Of course, the superregenerative receivers had a wide bandwidth,
so they complemented each other.

Once crystal control arrived on a band (or people were pushing for
greater achievements), the equipment was much the same as used for
HF. The transmitters would have a few extra stages in order to multiply
the crystal controlled signal up to the needed band (and crystal control
was more common on VHF even after the VFO became common on HF, since

it required more effort to make a stable VFO for VHF work, and besides the crowding was less than at HF). The receiver, as others have pointed out was virtually always an HF receiver os some sort, with a converter ahead of it.

These transmitters, like their HF counterparts, would have been used for AM and CW.

The surplus from World War II helped a lot, not just in the way of transmitters (HF operaters also benefited from surplus), but I think of all those 8MHz crystals that were available in surplus which multiplied up to the VHF and UHF bands.

WWII surplus also brought equipment for the higher bands. A lot of people fooled around on 1296Mhz by using an APX/6, which had a superhet receiver (though very wideband) but a modulated oscillator. And there were similar simple surplus rigs for 420MHz.

Early to mid fifties, a new wave of transceivers became available for the VHF bands. These were relatively simple rigs, but with crystal controlled transmitters of 5 watts or so output. The receivers were usually superheterodyne, but in some cases they were still superregenerative. The superhets would have had relatively wide bandwidth, to accomadate the tuneable receive oscillators operatiing at a relatively high frequency that couldn't be made all that stable back then.

These simple rigs evolved somewhat, sometimes going to double conversion receivers and even making the transition to solid-state, but remained basically the same right up till the early seventies when FM became popular and the AM rigs vanished.

They were intended primarily for local use, but of course when the VHF bands opened up you could go quite far with this simple equipment. Most were AM only, and if they had a place to plug in a key, often they weren't well suited for CW; most did not have a means of receiving it.

As I mentioned, FM eventually took the place of AM for this level of mostly local operation. That transition was fueled by the availibility of FM transceivers made surplus from commercial operation due first to tightened up regulations and then the transition from tube to solid state/ These were crystal controlled on both transmit and receive, and yes, you needed a separate crystal for both transmit and receive, and for each channel, you needed a new pair. And with time, those surplus rigs became surplus, as FM rigs intended for ham use became available, and these were pretty much all solid-state. A bit later, synthesizers became available to do away with those crystals, and then with time they became standard.

The idea of SSB had been around for years, and while I seem to recall reading that some hams tried it early on, it must have been the early fifties when SSB use started to grow. The earliest ham SSB transmitters were home made, and they would have been stand alone transmitters.

Then commercially made SSB transmitters hit the ham market, and with time, SSB transceivers. It was SSB that made HF transceivers common, though for the first decade or so, matching SSB transmitters and receivers were made by various manufacturers.

I don't know when somebody first tried SSB on VHF. It's likely that it came almost as soon as a noise started being made about SSB on the HF bands, for the simple reason that hams wanted to try new things.

Either sombody bui[t a complete SSB transmitter for a VHF band (not ionconceivable considering the early SSB transmitters) or someone used some sort of converter to move an HF transmitter up into VHF, in the same way that receive converters were used to convert a VHF band down to a frequency receivable by an HF receiver. Some have pointed out converting an existing VHF transmitter into a transmitting converter, and I suspect that happened before specifically built transmitting converters. All you had to do waws change a stage into a mixer, pop in a new crystal, and retune things.

I've seen articles about VHF SSB in magazines from 1958 or so.

With time, commercially built transmitting converters became available. A company would sell a converter that matched their HF transceiver or transmitter/receiver pair. Collins made one to go with the S/Line (which itself came out in 58 or 59) in the early sixties.

And these commercial transmitting converters were available to the late seventies at least.

Meanwhile, there were even VHF SSB transceivers available from the early sixties. These were just like their HF equivalents, with a single VFO dial that controlled the frequency of both the transmitter and receiver, though covering only one band. Most of them were six meter rigs. The only two meter transceiver that comes to mind was a Gonset from the early sixties In design, they were all pretty much like an HF transceiver with built in transmit and receive converters. They even matched the HF rigs of the same manufactuers. And once you had a six meter SSB transceiver, the company would often sell a matching transverter to use it on two meters.

With time, early to mid seventies, as with the HF rigs, the US manufactuers disappeared and the Japanese rigs took over. They too had single band VHF transceivers that matched their HF rigs. Two meter and even 432 SSB transceivers started appearing in the mid-sixties.

But even at that point, transverters were still common, sometimes built, sometimes matching the transceiver, but my recollection is of a wave of transverters made by third parties.

It was only the mid-eighties, maybe even a bit later, that the multi-band VHF SSB rigs became available. And while there were a few cases where sxi meters was tacked onto an HF transceiver, it's only really recently that there have been those rigs that go from HF up.

So over the years, people built transmitters, both CW/AM and SSB, modified surplus equipment, modified HF equipment, built transverters, bought trasnmitters, bought trasnverters, and bought transceivers.

2929. HAM dies in West-Timor

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-08 07:31:57 UTC
From: ON4CAS / N1TOI <egbert.hertsen@pandora.be>
Message-ID: <39B895E3.27EC3AD5@pandora.be>
Source record: 19515

The following is from Peter, ON6TT

Friends,

It is with profound sadness and anger I heard today that Pero Simundza - 9A4SP/3W4SP - a UN colleague and fellow ham, was amongst the three UN staff who were killed during a militia assault on the UNHCR office in Attambua, West-Timor yesterday.

The UNHCR office in Attambua was attacked by a vicious militia mob who overrun and trashed the premises and vehicles, stabbed three UNHCR relief workers who were working in the office at that moment to death. They thenen dragged the bodies onto the street and put them on fire. Pero was one of them.

Pero worked for UNHCR in Atambua as an international radio operator. He joined UNHCR years ago, in Sarajevo. Later on, he moved on mission to Albania, where I met him in June last year. He was then on the air as ZA/9A4SP. We spent a most enjoyable evening together, ending with me operating from his station. He stroke me as a young, very enthusiastic and true DX pashioned ham, and a great person.
Since then, we kept regular contacts, sending eachother news from where we were, and where we operated from.

After returning from Albania,to work in Sarajevo for a few months, he was appointed to Atambua, West Timor. He was real happy with his international assignment, close to the East Timor border. He regularly crossed the border to be active from the other side as 3W4SP, in a small house where he had arranged his shack. He sent me pictures by Email of his shack and antenna.

I looked forward to meet him during my current Asia tour, which included West and East Timor. Unfortunately, I had to reschedule my visit to Kupang and Attambua by a few days at the last moment, so Pero and I missed eachother by 2 days. He was on R&R when I had meetings in his office in

Attambua two weeks ago and I walked passed the radioroom he worked in.
Last
week we exchanged Emails again saying 'there will always be a next time,

people like us always meet again, one side of the earth or another'.

Unfortunately, Pero, I will not be able to keep my promiss. You parted
us
way too soon, in a senseless death. We all know the risks we face while
working in emergency relief activities, but your departure due to
inhumane
and totally absurd violence shocked many of us.

Farewell, my friend, we will all miss you. Our thoughts go to your
family
remaining behind.

Hello,

I would like to inform you, that all received direct cards for our
activity in March are answered since today.
We will go on to proceed all received bureau cards within the next days
and weeks.

The delay came up due to some problems during printing.
Please be patient, we will answer every incoming bureau card as well!

As we have seen, for a lot of stations the contacts has been a NEW ONE
or at least a CW BAND POINT. Nice to know that the sensed effort made
sense! Thanks again for the contacts and I hope we meet us soon in a
contest or from somewhere else (CW only).

73, de Arno - DL1CW & OK8EAO

2931. PR:Logwindows 3.07.30 released

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-08 16:19:42 UTC

Log Windows 3.07.30 released!

Update adds many new features

Muscle Shoals, Alabama. September 8, 2000: Creative Services Software announced that version 3.07.30 of the popular logging program Log Windows has been released.

Log Windows 3.07.30 includes the following new features:
- Support for Top Ten devices band decoder
- Support for Alinco DX-77
- Direct support for the Icom IC-706 MKII
- Stop rotor function for HYGAIN and Sartek rotors
- Browse function for PSK mode (in search options)
- Added option for W4CSS parallel interface (5th message with MFJ Voice Keyer)
- Direct Support for the Rotor-EZ
- Added Grayline windows display.
- Added DXCC2000 reporting support.

And has the new features of the 3.07.XX releases:
- Telnet DX Cluster Access
- Support for new radios, including the IC-756 and the Ten Tec Pegasus (direct and GUI support)
- New logging mode options
- IOTA Support
- WinQSL QSL Manager Support
- QSLMaker 2.3 QSL Printing Program Support
- Full ADIF support
- Support for the W9XT CW keyer
- Support for the K8CC parallel port interface
- Icom-718 support
- TenTec Pegasus GUI control support
- Sartek Rotor support

"If someone purchases or upgrades to LogWindows 3.07.30 now, they'll not only get all the future 3.x upgrades, but also a FREE upgrade to the 32 bit version of LogWindows when it becomes available. So for minimal investment now, they are saving money in the long run", said Rick Ruhl,. President and owner of Creative Service Software.

The product retails for $69.95 and upgrades from release 3.06.15 or earlier are $40.00. Those who have purchased version 3.06.50 or greater will get this upgrade free. It also appears on the Digital Trio CD . It is available from dealers around the world, as well as direct from CSS.

Log Windows is owned by SCO, Inc and is maintained by Creative Services Software.

Creative Services Software is at http://www.cssincorp.com
The Log Windows homepage is at http://www.logwindows.com

Windows, Windows 95, Windows 98 , Windows NT and Windows 2000 are Registered Trademarks of Microsoft Corporation

As you know, sad news hit us yesterday; 3 UNHCR staff were savagely killed and burned in Atambua, West Timor, Indonesia. I attach below the last email sent by one of them, hours before the rampage, because I believe it should be read by as many people as possible. The email was read out by UNHCR Sadako Ogata herself in the Security Council yesterday.

"From: Carlos Caseres
Date: 6 sept. 2000, 6:05 a.m.
Subject: Are you still there? - Reply

My next post needs to be in a tropical island without jungle fever and mad warriors. At this very moment, we are barricaded in the office. A militia leader was murdered last night - he was decapitated and had his heart and penis cut out. Segments of Timorese society must be some of the most violent and gory people anywhere on Earth: Atambua suddenly shut down when news spread that trucks and buses full of militias were coming from Betun (my former home) to Atambua. The town suddenly deserted and all the shops were boarded up in a matter of minutes. Traffic disappeared and the streets are strangely and ominously quiet. I'm glad that a couple of weeks ago we bought rolls and rolls of barbed wire.

I was in the office when the news came out that a wave of violence would soon pound Atambua. We sent most of the staff home, rushing to safety. I just heard someone on the radio saying that they are praying for us in the office. The militias are on the way, and I am sure they will do their best to demolish this office. The man killed was the head of one of the most notorious and criminal militia groups of East Timor. These guys act without thinking and can kill a human as easily (and painlessly) as I kill mosquitos in my room.

You should see this office. Plywood on the windows, staff peering out through openings in the curtains hastily installed a few minutes ago. We are waiting for this enemy, we sit here like bait, unarmed, waiting for wave to hit. I am glad to be leaving this island for three weeks. I just hope I will be able to leave tomorrow.

As I wait for the militias to do their business, I will draft the agenda for tomorrow's meeting on Kupang. The purpose of the meeting: to discuss how we are to proceed with this operation.

Carlos"

Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WF1N, KF2TI, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, N4AA & QRZ DX, NH6YK, NI6T, K7BV, WC7N, K8YSE, 9M2TO, DJ5AV & DX News Letter, DJ7ZG, DK9IP, G3NOM, G3VMW, G3XTT, G4ZVJ, JF1OCQ, JH8KYU, LU1BCE, PA5ET, PB7CW, PY2YP, SP3GTS, T93Y, VK4AAR, VK8NSB and 9A4NA for the following DX information.

3A, MONACO. "The 59(9) DX Report" states to look for Willi, DJ7RJ, to be active from October 1-20th, as 3A/DJ7RJ. Activity will include Topband operations (1832 kHz). QSL via homecall.

3V8, TUNISIA. Hans/DF2UU and Win/DK9IP were operating from the club station 3V8BB over the past weekend to participate in the Worked All Europe SSB Contest (WAE). Reportedly their operation started on September 6th and is to last until September 13th (early morning UTC). Look for them on the following suggested frequncies: 28443, 21243, 14243, 7043 and 3743 kHz. They plan to concentrate on CW/RTTY/PSK31 and 12m/17m/160m after the contest. IMPORTANT: QSL only for QSOs on September 6th through September 13th (2000) via DK9IP (Bureau is preferred!!!). All QSOs will be confirmed via bureau after their return. For direct QSL request use DK9IP's new address: Winfried Kriegl, Schoellbronner Str. 72, 76199 Karlsruhe, GERMANY

4W, EAST TIMOR. Erkki, OH2BF, is active as 4W/OH2BF and is currently working for the United Nations High Commissioner for Refugees (UNHCR) in Dili for a few months. He has been active on 17 and 12 meters CW between 1130 and 1500z. However, we have not seen any QSNs since the tragedy of Pero, 9A4SP (see "Sad Note" below). QSL via OH2IC.
Also, according "The Daily DX", Jose, CT1FKN, who has been in Dili since August 15th working in the Portuguese Army for the United Nations Transitional Administration in East Timor (UNTAET), is expected to be active soon as 4W6FK. He is expected to be there until February 2001.
ADDED NOTE: The 4W/K7BV Web site for the upcoming operation has been updated: http://www.qth.com/k7bv/timor

5A, LIBYA. Abubaker, 5A1A, reports that during the month of September he will be active with the special callsign 5A31 on the air on all bands. This special is to celebrate the 31st anniversary of the Lybian revolution. QSL via a registered mail, Abubaker Alzway, Box 74421, Tripoli, Libya.

9G, GHANA (5V, Togo?). Andy, G4ZVJ, will be in Ghana and Togo between September 9-21st. Expect some CW activity from 9G5VJ and *possibly* from 5V7VJ. QSL via G4ZVJ: Andy Chadwick, Ripon, North Yorkshire, UK, HG4 1UA. His Web site is: http://www.g4zvj.demon.co.uk

9M2, WEST MALAYSIA. Tex, 9M2TO, informs OPDX that he will now be active in the RTTY contest as a Single OP/All band entry on 40 meters (7040 +/-) and 20-10 meters (+/- 105 kHz up from band edge). QSLs will be sent out automatically 100% through the JARL bureau.

A5, BHUTAN. The Clipperton DX Club DXpedition is active as A52FH until September 14th. Most of their activity has been on 20 meters CW/SSB with activity also on 30/17/15/10 meters. QSL via F8RZ. ADDED NOTE: "QRZ DX" reports that Peter, ON6TT, will be joining the team in Thimphu. There was no indication when and how long.

C9, MOZAMBIQUE (possibly, 3DA and V5). The "DX News Letter" reports that Reinhard, DL6DQW, will be active again as C91RF from Maputo now through September 23rd. He will also try to be activate a new IOTA from September 15-18th from Ile Mocambique (AF-new). He will be running an IC-706 MKII with a wire antenna and a 6 element 6m yagi on all bands. He is still trying to get a 3DA licence for September 23-28th and will then be active from Namibia until October 8th. QSLs via bureau to DL6DQW or direct with SAE and 2 USDs or 2 IRCs.

CARIBBEAN TOUR 2000 WRAP-UP (V2-VP2M-8P). Rob, PA5ET, reports that the Low Land DX-pedition Team (LLDXT) returned tired back in Holland on the afternoon of September 5th, from the Caribbean Tour 2000. He mentions that their operation was a great success with a total of 31915 QSOs made from Anguilla, 1351 QSOs from Montserrat (which was an unplanned activity of 1-5 days) and 31108 QSOs from Barbados which makes a grand total of 64,374 QSOs in almost 4 weeks time. They were active 24 hours a day with 2 stations, which was a hard job with 4 people. The Tour's Web-site was visited 5000 times during the tour and contains on-line logs, a tour diary and even real audio files of pile-ups, pictures of the islands, locations and many more details. More information will be added the coming days at: http://www.qsl.net/lldxt/v2_8p_2000/index.html
They will have 3 full color QSLs printed and sent out as soon as possible. For the QSL Manager's databases: V26EA, V26ET, V26FM, V26WP, VP2MPA, 8P9JR, 8P9JS, 8P9JT and 8P9JU all are via PA5ET's address: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, Holland.

D6, COMOROS. The Five Star DXers Association, closely linked to CDXC (Chiltern DX Club) and the UK DX Foundation, are pleased to announce a three week DXpedition as D68C between February 6-26th using a Titanex Vertical and RX antennas for 160 meters. This will be an all mode and all band operation with 6 stations active. The multi-national group is looking for sponsors to help cover the high cost of this operation. More details

are forthcoming. For more information, contact Don Field, G3XTT via
E-mail at: g3xtt@lineone.net
OPDX InterNet Subscribers will receive the complete press release as
an additional bulletin.

E44, PALESTINE. Ten Japanese operators led by Yoshi, JA1UT, are planning
a goodwill trip to Gaza, Palestine, from September 21st. If they are
fortunate to be granted a licence, they plan to operate up to Sunday,
September 24th, mainly on RTTY, 30m CW and 6m (50.115MHz) beacon). Their
callsigns will be assigned by E44 plus individual callsigns. QSLs will be
handled by each operator.

FO0, FRENCH POLYNESIA. By the time you read this, James, K9KUZ, should be
active as FO0KUZ from Bora Bora (IOTA OC-067) until September 13th before
he moves on to Moorea Island (IOTA OC-046), September 14-15th. Suggested
frequencies are: 14200, 21250, and 28400 kHz.

HELP WANTED (Medical). The Kingman Reef DXpedition needs a medical
professional on the team. The team anticipates the usual bumps and
coral scrapes, heat exhaustion and tropical fungi, but the possibility
of an accident, requiring more than basic first aid makes inclusion of
a medical person a necessity for them. They will consider physicians,
emergency medical technicians (paramedics), and registered nurses. Good
interpersonal skills are critical; good operating skills--on one or more
modes--will be a plus. The succesful applicant must commit to the October
15th to November 5th DXpedition timeframe, travel to and from Honolulu
at his or her own expense, and contribute 2500 USD for his or her personal
participation in the adventure. The payback will be participation in a
major DXpedition to a rare and difficult DXCC counter. Please reply to
Garry, NI6T via E-mail at: ni6t@intuitive.com

IOTA NEWS.....
NA-NEW. With the recent reorganization of the IOTA Directory, the
Appledore Island, one of the Isles of Shoals in the New Hampshire
Group, qualifies as a NEW ONE. Tony/WF1N and Lou/W1DIG will be
on the island September 15th, starting around 1900z Friday and
ending about 1200z Monday. Operations will be on 20, 17, 15 and
10 meters on/near the usual IOTA frequencies +/-, SSB, with a
tribander and amp. They will also be on 40 meters (7260+/-) at
the top of the hour as long as necessary each hour for close in
ops. QSL direct (SASE, PSE) or Bureau via home calls. Appledore
Island is 3 points for the IOTA 2000. Any questions, E-mail
Tony at: megahertz260@mindspring.com

OC-185/OC-198. Stuart, VK8NSB, informs OPDX that he is about to start
planning for 2 more IOTA DXpeditions on 2 rare VK8 Islands for
early 2001, but he would first like to know if any amateurs
intend to activate OC-185 and OC-198 IOTA Reference Numbers.
Stuart states, "My reason for asking is, two amateurs
in 1999 went to one of my planned DXpeditions a few months
before my team did even after I had invited them 6 months
before the activation to join the Team. They knew that we had

planned & spent $$ for the DXpedition ... I do not want to spend thousands of dollars and months of planning and getting special permits just to stay on these rare islands to have others go to these 2 rare IOTA Groups one month before my Team does. If you plan on doing a Dxpedition to one or both of these groups within the next 12 months could you please inform me ASAP .... If I start to plan these two rare IOTAs and Amateurs know that these islands are going to be activated by my Team but decide to go one month before us anyway, both DXpeditions will be cancelled ...." Stuart's E-mail address is: vk8nsb@octa4.net.au

OC-234. Browse Island Update. Alan, VK4AAR, informed OPDX late Sunday that he "regrets to announce that the 'Timor Sea DX Group' (VK6BM) were unable to refloat the catamaran "Tearaway" on either of the two tides to date. It now seems certain that it will not be possible to go to Cassini either unless some miracle happens. They are waiting for me to make further arrangements with the West Australian Water Police and the Royal Australian Navy vessel HMAS "Geelong" that is in the vicinity. The guys are well and have sufficient food and water for quite a while. They may even continue making QSOs from Browse rather than twiddle their thumbs. Now is that not true dedication under the circum-stances? I'll keep you posted." No other releases have been received since Sunday.

JT, MONGOLIA. By the time you read this, Jay, W8JAY, should have started his short operation as JT1FCB which will last until September 14th. Activity will be on RTTY and possibly PSK31. QSL direct via W8JAY.

KH0, MARIANA ISLANDS. Hidetoshi, JH8KYU, plans to operate as KH0/JH8KYU again from Saipan Island. He had operated there in the last CQ WPX SSB Contest. His next operation will be on September 23-24th. The main purpose of the next visit is to take part in the CQ/RJ WW RTTY Contest from Saipan. He will enter in the low power all band category. The location will be the rental shack managed by Yaesu at Mariana Resort Hotel. The equipment will be FT1000MP with a home brew modem into Force12 C4 beam.

KH4, MIDWAY ISLAND. Hiro/JF1OCQ and Takeshi/JE1RXJ will be active as W1VX/KH4 and NB6A/KH4, respectively, from September 22-24th. They will be active on 80-6 meters using CW and SSB. They plan to oparate a beacon on 50.115 MHz all times. QSL to W1VX/KH4 via JF1OCQ, NB6A/KH4 via JE1RXJ.

NH4, MIDWAY ISLAND. Ted, NH6YK, will be active again as NH4/NH6YK starting next weekend between September 17-21st. Although he has to do some work on the island, it looks like he will have some spare time to operate from the station there. The station is currently running a 100 watts into a G5RV, Force 12 C3, Long dipole and Vertical antennas as needed. Due to the quickness/shortness of the trip, it will be a phone operation potentially from 160-6 meters depending on the propagation. He states that he will take a printout of RS12/13 passes for Mode K. Ted will be looking par-ticularly for: South Dakota (his last for WAS), stations to fill up the

DXCC count, anyone on 6 meters and everybody else (Europe when there is an opening, etc.). QSL via the bureau or direct.

PACIFIC TOUR (YJ/Vanuatu and A35/Tonga). Babs/DL7AFS and Lothar/DJ7ZG will be active as YJ0AYL and YJ0AZG, respectively, from Vanuatu, September 30th through October 19th. They will then go to Tonga after October 21st (length of stay was not mentioned) and be active. Their bands of activity were not mentioned but they plan to be active on SSB/RTTY/PSK31 and some CW. QSL via DL7AFS. For more information, go to the Web page: http://www.qsl.net/dl7afs

QSL INFO AND NEWS.....
The Saint Peter and Saint Paul Rocks, PS0S, log is now avaiable for searching for QSOs at: http://www.qsl.net/cwsp/indexen.htm

The log search feature of the SV9/K7BV website apparently has not been operating for some time. Dennis, K7BV, apologizes; it is again up and functional at: http://www.qth.com/k7bv/crete

During August 21-28th, the Radio Club Kennermerland, PI4RCK, was active with the special event callsign PA6Y. This station was to celebrate the sail 2000 event in Amsterdam, The Netherlands. If you have worked PA6Y, and you like awards, you can get this special full color "Sail 2000 IJmuiden Award" by sending 5 USDs or 7 IRC's to: Radio Club Kennemerland PI4RCK, Westerduinweg 9, NL 1976 BV IJmuiden, The Netherlands.

NOT THE MANAGER! OPDX has been informed that OH7XM is not the QSL Manager for TU2MA. Send your cards direct to TU2MA; he will QSL 100% at: Michel Toure Vakaba, Box 520, Abidjan 01, Ivory Coast. However, if you have problems getting cards from TU2MA; Arno, OH7XM, may be able to help you (CQWWDXCW-91 for TU2MA QSL via now OH3JF).

SAD NOTE. It is with great sadness to report that amateur radio operator Pero Simundza, 9A4SP (aka 4W6SP, T98P, ZA/9A4SP), was one of three UNHCR workers that were brutally killed on September 5th in, Atambua, West Timor, Indonesia. Pero worked for the United Nations High Commissioner for Refugees (UNHCR) since 1992. He was very active with the UNHCR. According to his friends/colleagues he was "based in Metkovic, Croatia, during the war in Bosnia and Herzegovina helping with humanitarian aid efforts. He was later based at the UNHCR office in Mostar, Bosnia and Herzegovina, and worked there with the Bosnian callsign T98P. Before he joined UNHCR in West Timor earlier this year, Pero spent few months in Albania helping UNHCR Operations during the Kosovo crisis." He was also one of the first operators to be active from East Timor and gave a new one for some of you as 4W6SP. At this time, OPDX would like to send out our condolences to his family and friends. Also, during these hard moments for his family, all working colleagues and friends are asking you to enter a few words in an online condolence book available at: http://www.qsl.net/9a4sp (which later will be handed to his family). More information will be sent to all OPDX InterNet Subscribers as an additional bulletin.

SPECIAL EVENT. Special event station from Poland, 3Z0MM, is again active until November 30th, to celebrate the millennium of the historical meeting of Polish King Chrobry with German Emperor Otton III in Szprotawa. QSL via bureau or direct to SP3JHY: Jerzy Ryks, os.B.Chrobrego 3/IV/7, 67-300 Szprotawa, Poland.

TK, CORSICA. "The 59(9) DX Report" states to look for GBQV, F6BQV, F5TFP and possibly others to be active from here September 22-30th. No callsigns were given.

VK0, MACQUARIE ISLAND. Alan's, VK0MM, Web page states that the supply vessel "Polar Bird" is due at Macquarie Island on November 7th for the annual resupply of the station and departs for Casey Station (Wilkes Land, Antarctica) on November 12th. The ANARE 2000 and ANARE 2001 crews will change over during this time. Ths ship is due back in Hobart, Australia prior to Christmas. Therefore, VK0MM will be permanently QRT as of November 12th. There is no licenced operator in the Macquarie Island Australian National Antarctic Research Expedition (ANARE) 2001 crew. Alan does mention that there may be a minor operation as VK0LD from the Casey Station. His Web page also mentions that he will mainly operate on CW on 30 and 20 meters. There MAY be some SSB. For up-to-date information and Alan's schedule, check the Web page: http://www.geocities.com/vk0ld/1.html

ZD9, TRISTAN DA CUNHA. Bob, G3ZEM, is now active from here mainly on CW 20/15/10 meters, but has been heard on SSB. There will also be some 30 meters operation when Bob has a chance to fix the vertical at Andy's, ZD9BV, QTH were he is operating from. On a sad note for low banders, the Titanex vertical didn't get unloaded from the ship. However, Bob states that he will use a 100 ft. tower at the nearby ZD9 Coastal Station and will try to set up something this past weekend for the low bands. He will be here until September 24th. QSL via K4CIA. Logs are available on log at: http://dxtechnology.com/zd9zm

2940. PR: Golist/Log Windows bundle released!

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-11 19:51:12 UTC
From: Rick Ruhl - CSS <ricker@cssincorp.com>
Message-ID: <mGav5.3173$br1.22431@news4.atl>
Source record: 19525

CSS and GoList work together for the Dxer's benefit.

Muscle Shoals, Alabama. September 11, 2000: Creative Services Software announced that they have reached an agreement with The GoList to provide a bundled package of the Log Windows logging software and The GoList . The package will include the latest version of Log Windows and a one year subscription to The GoList

The Log Windows/GoList bundle retails for $119.95. It will also be part of the Digital Trio package from CSS, which retails for $189.95. Cross upgrades from release 3.06.50 or greater to the GoList subscription are $60. A cross upgrade for current GoList subscribers to Log Windows is $60.

Log Windows is owned by SCO, Inc and is maintained by Creative Services Software.

Creative Services Software is at http://www.cssincorp.com
The GoList is at http://www.golist.net
The Log Windows homepage is at http://www.logwindows.com
SCO, Inc is on the web at http://sco.home.mindspring.com/lw.html

Windows, Windows 95, Windows 98, Windows Me, Windows 2000 and Windows NT are Registered Trademarks of Microsoft Corporation.

Hello Dan,
I get several DX newsletters and subscribe to a DX mailing list as well as this newsgroup. IMHO the really premier DX source is The Daily DX email newsletter delivered at least once a day to your email inbox. It is by far the most comprehensive and all-encompassing DX source available anywhere on the internet. It is not free. It costs $50 year. There is a FREE two-week trial subscription available from W3UR (Bernie) the author. To get your free two-week subscription go to http://www.dailydx.com

Arnie,

Sorry to say, but the last time I looked, we don't have a third party agreement

with Bangladesh. Phone patches between the US & Bangladesh are illegal

: Before there were rigs like the ICOM 706 series and the Yaesu 847, how
: did most people operate CW and SSB on 6m, 2m, and 70cm? Transverters?
: Modified HF rigs? Homebrewed rigs? Anything else?

: --
: Jason Hsu, KB9PNZ

Most of the people I knew who were on VHF/UHF weak-signal modes in the late 60's/early 70's used transverters. The popular transverters used Nuvistor tubes. Parametric amplifiers were used as low-noise preamps.

Somewhere I still have a Nuvistor transverter for 220 MHz.

My, how the world has changed! We now have GaAsFET preamps with incredible noise figures, MMIC's to serve the purpose of those Nuvistors, and no-tune circuits with printed hairpin bandpass filters. Makes it pretty easy!

From: "R. Radloff" <r.radloff@gmx.de>
Message-ID: <n6rCOeRWfFINVmk2bPqf6ix0wuiC@4ax.com>
Source record: 19548

Hi IOTA-hunters!

We will give another TRY to activate the rock Farallï¿½n Centinela IOTA SA-058.

If all works as planned, we will be QRV as YW5FC next weekend (Sept. 22, 23, 24)

Last year (see our failed trip to Farallï¿½n Centinela at http://www.kilohertz.de
or http://www.qsl.net/dl2gg) we could not get our generator up to the rock due
to extreme tides. Now we are supposed to get some help by a helicopter.

Just in case: QSL via W4SO

With the right weather and some luck we will make it this time. If not, WE WILL
COME BACK !

Hi Zack
In the real old days I miss some of ye ways we did things. Like screw terminals on everything, wiring run in very straight lines with proper right-angle bends. You never got burned by a soldering iron, or had the xyl have you explain that funny mark on the new rug.
They call it "progress"
Jack Parr

why not via the QSL-bureau?

HB2 is a special millennium prefix valid thru year 2000 for all Swiss HAMs.
The "normal" prefix is HB9. The use of HB2 is optional, so you will hear
both types of callsings during this year.

2972. AFFIRMATIVE ACTION NEEDED IN HAM RADIO!!!!!!!!!!!!!!!!!!!!!!!!!

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-16 00:00:00 UTC
From: crt4239@aol.com
Message-ID: <20000916143910.16208.00000294@ng-co1.aol.com>
Source record: 19458

Anyone who attends a ham club meeting would have to agree that certain minorities, especially, African Americans, are grossly underrepresented in our hobby. I believe, and I think many of you will agree, that perhaps we should remedy the effects of past discrimination by some sort of affirmative action allowing underrepresented minorities a FAIR OPPORTUNITY to get their tickets. Much has recently been reported in the last decade of growing "electronic divide" in the percentage of white versus black households having computers and Internet access. You would all have to agree that this "electronic divide" has ALWAYS been in the amateur radio hobby. This would be a perfect time in our country's history, especially in light of the dwindling numbers of potential hams lost to the computer hobbyists, to begin thinking about policies that might create real interest in our great hobby. My ideas of remedies for past discrimination include DROPPING THE CODE REQUIREMENT FOR MINORITY APPLICANTS and possibly WAIVING SOME SECTIONS OF THE EXAMS. Such remedies are a way to ensure an integrated society of amateurs and allow equal opportunity. Numerical goals for admission to our great hobby is necessary to integrate a hobby traditionally closed to minorities because of discrimination. At a time when our hobby needs a shot in the arm, these kind of policies might help in increasing our numbers and preserving our power to demand that no more of our frequencies be taken away. Any THOUGHTFUL replies are welcomed.

I am deeply disappointed to warn you not to deal with Warren Brooks W4WWB. He advertised a radio on ebay that was complete, but needed some work. What arrived was a parts radio - Pieces were missing and it will not power up. After he ignored my emails I contacted him by phone and in his best good ole boy drawl he told me " you bought it, you own it". He would not allow me to return it for a refund. I know that ebay is a take your own risk venture - but deliberately lying about the condition of the radio to sell it is dishonest. What a disgrace to the ham community. Don't be suckered by this man like I was.

One thing you can do is to post negative feedback about the seller on eBay. It stays in the sellers online profile and future buyers will be bale to see it and read your negative experience.

2985. TS-130 TRX URGENT !

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-17 00:00:00 UTC
From: "R. Radloff" <r.radloff@gmx.de>
Message-ID: <EQ3FOSdSWh8OqQ70Ha75vEptkEHN@4ax.com>
Source record: 19473

Hi !

We just got a TS130 Transceiver as spare-unit for a DXpedition during the coming weekend.

The rig does not have ANY documentation.

We found, it transmits on all bands, except WARC. But the receiver works normally.

Now my question: Has the TS130 initially blocked in factory for WARC operation in the TX-mode ?
If so, is there any jumper to be cut somewhere inside to de-block the unit ?
Or is somewhere a jumper needed to put the unit into the TX-mode for WARC ?

It's hard to believe, that the TX fails ONLY on the "new" bands....
So we believe there is a trick we don't know.

For any (fast) info to get the TX on WARC we would be very greatful.

Thanks in advance !

Ray

How does equal opportunity translate into making things easier for some by dropping the requirments based on race etc.

I am a delegated examiner in Canada and I DO NOT ask what colour a person is before I test them. All applicants have an equal chance to write and pass the written and code tests. There is nothing in my country to stop ANYONE from getting their license, provided they want to study and practice and then write the tests like everyone.

We all know that dropping certain requirements will lead to the degredation of the hobby.

The only "Affirmative Action" we need is something to get all ages, races and nationalities more interested in the hobby. If the interest is there people (ALL Races etc) will study and pass the tests.

It uses PSKcore.dll by AE4JY as its base, so it's somewhat like WinPSK. On
quick inspection, it appears to be quite nice. Judging from the DX4WIN
reflector, the new PSK31 window has already brought a bunch of new folks
into the PSK31 this past weekend.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, KA2AEV, W2FXA, WB2YQH/WB2RAJ & The 59(9) DX Report, NM3S, W3UR & The Daily DX, N4AA & QRZ DX, N4CT, W4WX, KU6J, K8YSE, CT1EAT, CT1EEB, CT1END, DJ5AV & DX News Letter, EA5RM, EA5XX, F6JSZ, GW3CDP, HA0HW, IK2DUW, JA1ELY, JA1HGY, JA1MXY, JH7IMX, VK2RD, VK4AAR, YO3JW, DL2GG/YV5 and 9M2TO for the following DX information.

30 METER SLIM. Several report working a station signing VU2TS on July 30th. Raj, VU2ZAP, reports that he talked to Miku, VU2TS. He states that he was not active on 10 MHz.

3B6, AGALEGA. The following is an excerpt from a huge press release that was sent out this week by Carlos, CT1END: " The preparations for this DX-pedition will soon come to a close. Everything is running according to plan. On September 23rd, Karl, HB9JAI and Jack, F6HMD head for Agalega in order to make final preparations on the spot. The rest of the crew takes off October 1st, flight MK071 from Zurich, 2200 local time." The crew will be missing two Swiss members who cannot come to 3B6. HB9JAX, Adolf, had to cancel the trip for professional reasons; HB9FMU, Phil, because of severe health problems. However, the team has been completed by the following operators: 9A4DU/Tony, CT1AGF/Luis, G4EDG/Steve and DL6UAA/Mart. Activity will begin about October 8th ending October 25th. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

3D2, FIJI. Look for Dragan, Z32AU, to be active as 3D2AU from September 18-26th. Activity on all bands CW/SSB are expected including 6 meters. QSL via Z32AU.

3W, VIETNAM. "The 59(9) DX Report" reports that Hans, WA1LWS, is planning to be active from here between November 9-26th. This will include the CQ WW CW Contest. He has applied for the uses of 80, 40, 20, 15 and 10 meters, however, 80/40 meters may be doubtful. He operates exclusively on CW.

9K2, KUWAIT. Look for Bob, K4CY (ex-N6BFM), to return to Kuwait. He plans to reactivate his old callsign 9K2ZZ. He is expected to be active this time on PSK31. QSL via W8CNL, direct only.

9X, RWANDA. Charlie, N4CT (ex-T5CT, SV0CT, G5BAU, GC5BAU, TJ1AW, K4PHY/YV5, DL5IX) will be in Kigali from January 12th through March 12th working at the U.S. Embassy. He is currently looking for some place to guest operate while there and would appreciate any info on where he might be able to. His E-mail address is: n4ct@onebox.com

A5, BHUTAN. A52FH is now history. All operations were stopped on September 14th, at 0125z on 20 meters CW. The team managed to make 14,015 QSOs, but this is not the final result. According to Mark, F6JSZ, the team thanks everyone for contacting them and especially Rafik, F5CQ, and Laurent, F8BBL, the two pilot stations. They say it was a fabulous experience to operate from Bhutan. Last week before leaving, F5LMJ and F2VX installed a 40/80m dipole and a Cushcraft R8 vertical, with a FT-900, TS-440 and FL-2100Z at the radio club of Thimphu. On September 12th, at 1500z, the first QSO was made by Thinley Dorji, General Director of Telecommunications in Bhutan, with the new A51AA callsign. Later in the week, Peter, ON6TT, was operating from A51AA. He was last heard on September 16th.

AX9, NORFOLK ISLAND. "The Daily DX" reports that a multi-national team of YL operators from seven countries will be active as AX9YL from October 5-12th. The team will be active on CW and SSB. The special callsign was obtained by the WIA Victoria for this trip, so QSL will be via the VK3 bureau or direct to VK3DYL, Gwen Tilson, 3 Gould Court, Mt Waverley, Victoria 3149, Australia, with return postage and a SAE.

CE0Y, EASTER ISLAND. Yuij, JA3IG, was very active this past weekend on 15 meters CW/SSB. Length of stay is unknown. QSL via JA3IG.

FG, GUADELOUPE. Four members of the Florida DXPedition Group (FDXPG), Bob/KR4DA, William/N2WB, Bill/W4WX and Clarence/W9AAZ, will be here from October 24-31st. They will be a Multi-Single entry in the CQWW Contest as FG5BG. Look for them before and after the contest signing FG/homecall on CW, RTTY and SSB. QSL FG5BG to KR4DA, FG/N2WB to N2OO and others to home callsign. For more info, visit the following two Web pages:
http://www.geocities.com/n2wb23/
http://members.xoom.com/FDXPG/

HO, PANAMA (Update). Wil/DJ7AA, Manfred/DK1BT, and Tina/DL6MYL are now active as HO1A from Contadora Island (NA-072) until October 1st. Their activity will include the CQWW RTTY Contest. Outside of the contest, they will be mainly active on CW, the WARCs and lowbands. They mentioned on the air this past weekend NO RTTY until the contest. QSL via the bureau to DL6MYL or direct to her CBA. Check out their very interesting Web page for more details at: http://www.qsl.net/ho1a

HQ, HONDURAS (Update from OPDX.472/473). By the time you read this, HQ0R will be on air from "Valle de Los Angeles", 20 miles from Tegucigalpa, Honduras. There will be 3 stations active, 24 hours a day, operating on SSB, CW and RTTY on all bands. Operation is organized by "Radio Club

Tegucigalpa" and URE, "Union de Radioaficionados Espanoles" and its RADIOSOLIDARIDAD special team. QSLs go via EA4URE, P.O. Box 220, Madrid 28080, Spain. For more and up-to-date information, check the WEB page at: http://www.ure.es/honduras/honduras.html

IOTA NEWS.....
EU-004. Laci, HA6NL, will be on Mallorca Island with his family for a holiday between September 28th and October 5th, and be active as EA6/HA6NL/p. He plans to be on all HF bands, mainly CW, but expect some SSB operation, too. Suggested frequencies are: 1831, 3511, 7011, 10104, 14031, 18081, 21031, 24901 and 28011 kHz. QSL via CBA.

EU-067. Look for Eric, KU6J, to be active from September 21-28th, and operating from Thira Island (aka Santorini) in the Cyclades group, Greek Islands (SV8). His callsign will be SV8/KU6J/P. His equipment includes an IC-706MKIIG (100W), dipoles and random wire with antenna tuner. He will be focusing on CW, primarily on the WARC bands. QSL via KU6J either direct or via bureau. Eric also mentions that he will be logging manually, so there will not be an online log available. He also added that his YL reluctantly allowed him to bring the radio suitcase, so this won't be a full-time operation!

EU-183. Pit, YO3JW, is planning activity from Sacalinu Mare Island between September 29th and October 1st. This will be a 72 hour operation (longer or shorter depending on local conditions). He will try to work on all bands, CW, SSB, may be RTTY and PSK31. He will also take a beam and a 100 watt radio. QSL via YO3JW.

OC-067. Francisco, CT1EAT, will sign FO0FRA, from October 24th through November 2nd, from Mai Mona Motu. He will also operate during the CQWW DX SSB Contest. He is not sure yet if he will use a his callsign or a special one. He will let us know ASAP. QSL via bureau to CT1EAT, or direct to: Francisco Costa, P.O.Box 172, 7801-902 Beja, Portugal.

OC-212. A team of VK operators will be using the callsign VI2BI to activate Broughton Island from October 6-15th. This follows the successful operation of last year when, in 3 days, the team made over 2000 QSOs. Activity will be on most bands for the duration of the operation and will involve SSB, CW 10 meters FM and hopefully PSK. The team will arrive on the island at approx. 0200z, October 6th and expect to be on air around 0500z.

OC-234. Browse Island Saga Update. Alan, VK4AAR, informs OPDX of the following: "I apologise that I didn't follow up with the drama on Browse Island in the first few days of this month. Things were happening and I was spending a great deal of time

on the phone to authorities and the wives of the team
(scattered all over Northern territory and Western Australia).
The outcome was that the operators were picked up by an
Australian naval vessel and eventually delivered safely to
Darwin. The skipper stayed with his catamaran (which was his
home also) as he believed it could be refloated even doing so
alone. He has radio and is being monitored. Browse Island
produced only 2,500 (approx) QSOs as the crew spent most of
their time digging sand away from the vessel which was above
the high water line. The expedition was more costly than
expected due to this occurance so, if you are able, please
feel free to donate a little something with the QSL card. It
will be greatly appreciated."

SA-058. Ray, DL2GG/YV5, and others will give it another try to
activate the rock Farallon Centinela. If all works as planned,
they will be active as YW5FC next weekend (September 22-24th).
Last year they could not get their generator up to the rock
due to extreme tides (see their failed trip to Farallon
Centinela at: http://www.kilohertz.de
http://www.qsl.net/dl2gg
Now they are supposed to get some help by a helicopter.
QSL via W4SO.

KH0, MARIANA ISLANDS. Operators Yama/JA1SGU and Kazu/JJ1KZI will be active
as KH0T and KH0V from Saipan Island, October 5-8th. They will operate on
80-10 meters (WARC bands included) mainly on CW. QSL via home callsigns
direct.

KH5, PALMYRA. Mike, KH6ND, continues to be active as KH6ND/KH5. He was
heard over the last several days mostly on 160/80/40 meters CW between
1030 and 1200z.

QSL INFO AND NEWS.....
9M0F is now QRT as of September 16th at 2220z. QSL via JA1HGY:
Nao Mashita, 8-2-4 Akasaka, Minato, Tokyo 107-0052, JAPAN

Jose, CT1EEB, reports that all 4W6EB, CU3/CT1EEB, CU5/CT1EEB, CU7/
CT1EEB QSL cards received up to September 8th are in the mail. As of
to date, the backlog of QSLs to answer is ZERO. Lina, CT1YRV, will
try to answer on a daily bases from now on. (You have to thank her
not Jose for the QSLing).

NOT THE QSL MANAGER. Denny, GW3CDP, informs OPDX that he has been
receiving QSL cards (mainly stateside) for EK4JJ and EK4GK, and states
he "is NOT and/or will NOT be QSL Manager for EK4JJ and EK4GK...again
or in the future..." Denny is however, QSL Manager, for EY8XX (via
E-mail) and EW6WR direct.

Tex, 9M2TO, reports that all QSLs sent to JA0DMV (received before
August 22, 2000) and to 9M2TO (received before August 31, 2000)
have now been replied too.

Antonello, IK2DUW, informs OPDX that QSL cards for R0L operation to Putyatin Island (AS-066) will be ready by the end of September. Logs are available on the Web page: http://www.qsl.net/r0l QSL via IK2DUW: Antonello Passarella, P.O.Box 22, 20051 Limbiate, Milano, Italy.

Eugene, W2FXA, informs OPDX that he is now the QSL Manager for Rep, YB0RP, and has the logs in hand up to September 2, 2000. Send a SASE or IRC or Green Stamp for immediate reply to: Eugene Nadolny, 21 Hidden Valley Dr., Elma, NY 14059.

R8, RUSSIA. According to "The 59(9) DX Report", Serge, RA0JJ, will be signing R8V/RA0JJ from September 18-22nd, from Agino-Buryatskiy Nationalny Autonomny Okrug, on CW and SSB. QSL to P.O. Box 1, Blagoveschensk 675000, RUSSIA.

SAD NOTE (More). It has now been reported that there were actually two amateur radio operators killed in West Timor, Indonesia. We reported last week that Pero Simundza, 9A4SP, was one of the three killed and now we are sad to report that Carlos Luis Caceres, KD4SYB, (age 33) was the second person killed. OPDX would like to send out our condolences to his family and friends. OPDX InterNet Subscribes will receive an additional bulletin which contains a message from Carlos's father about his son. Meanwhile, please visit and sign the Memorial Guestbooks for both families at: http://www.qsl.net/kd4syb http://www.qsl.net/9a4sp

SPECIAL EVENT. Look for special event station, K3G, to be active from the U.S. Coast Guard Auxiliary Station in Philadelphia, Pa., from 1400z to 0000z October 21, 2000. The station is commemorating the Sixty First Anniversary of the U.S. Coast Guard Auxiliary. Suggested frequncies are: 7232, 14332, 21332, and 28332 kHz. A "Special Commemorative QSL" will be available via NM3S at: Dan Amoroso, 196 Dam View Drive, Media, Pa. 19063. For more Information, contact Dan at: NM3S@prodigy.net

SPECIAL EVENT. The Greater Norwalk Amateur Radio Club (GNARC) will be operating a special event station to commemorate the visit of the traveling Viet Nam Wall Memorial to Norwalk, Connecticut. The Club will be using the special event call K1V beginning October 12th, 1600z until October 16th at 0400z. Operation will be in the lower 25 kHz of the General phone portions of 80, 40, 20, 15 and 10 meters. For specific frequencies, check for posts to DX clusters and at their Web page (http://www.gnarc.org) during the dates of the event. QSL to: K1V c/o GNARC, 324 Main Ave Box 115, Norwalk, CT 06851, USA. A 8.5x11 color certificate as well as a QSL card will be available. For the certificate, please include a 9x12 SASE with sufficient postage. For the QSL card ONLY, a business sized SASE. A donation of 1 USD to defray printing would be appreciated.

T8, PALAU. Shun, JH7IMX, will be active as T88SW between September 21-24th. He will participate in the CQ WW RTTY Contest. His activity before the contest will be CW, SSB and perphaps also PSK31 on 80-10 meters including the WARC bands. QSL via JH7IMX.

T8, PALAU. Look for Kazuo/JA3ART and Katsuji/JR3KFX to be on a DX-vacation from October 6-9th, signing as T88JJ and T88FX, respectively. Activity will be on 80-10 meters and also 6 meters. Operations will be on CW, SSB, RTTY and PSK31. They will concentrate on WARC bands and RTTY. QSL via the JARL Bureau or direct to their homecall below:
Kazuo Ebihara, JA3ART, P.O.Box 62, Sakyo, Kyoto, 606-8691 JAPAN
Katsuji Takagi, JR3KFX, 653-16 Yodo-Namazucho, Kyoto, 613-0914 JAPAN

V2, ANTIGUA AND BARBUDA. Team Antigua will once again activate V26B in this year's CQWW SSB Contest on October 28-29th. They plan to enter the the contest as a Multioperator/Multi-transmitter category. Team members will make special attempts to be active on RTTY, PSK31, 160 meters and the WARC Bands a few days before and after the contest. There is also a possibility of some 6 meter and Satellite operations with conditions permitting. Operators will make their presence felt on all bands starting on or about October 25th until about November 1st. The Members of Team Antigua and their callsigns are:

V26A Dale, N3BNA QSL via WB3DNA V26O Bob, N5NJ QSL via N5NJ
V26AK Tony, N2TK QSL via N2TK V26OC Brian, N3OC QSL via N3OC
V26AU Carsten, DL6LAU QSL via DL6LAU V26SZ Sharon, N5CK QSL via N5CK
V26B Sam, WT3Q QSL via WT3Q V26TZ Tom, ZP5AZL QSL via W3HNK
V26EW Ed, N2ED QSL via N2ED V26U Bill, W2UDT QSL via W2UDT
V26J Jay, WX0B QSL via W3LT V26YR John, W2YR QSL via W2YR

For a complete station descriptions, complete with photographs and rate charts of "The Team Antigua, V26B, Superstation", please visit their Web page at: http://www.frc-contest.org
OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

XU, CAMBODIA (Update/Change from OPDX.474). Toni, EA5RM, informs OPDX that the dates for the XU7ABD operation by him and Pedro, EA7DBO, have been changed. Due to flights connection problems, the dates for this DXpedition have delayed the team's arrival in Phnom Pehn until the morning of October 5th. The operation will finish on the morning of October 13th.

2992. Power lines: how far is far enough

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-17 00:00:00 UTC
From: Brett - N7OLQ <brett.miller_nospam_@intel.com>
Message-ID: <8q488p$rl@news.or.intel.com>
Source record: 19480
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc

I'm looking for a new house and a few I'm looking at have high power lines not far away. I'm wondering what affects on the various HF or even VHF bands the power lines might have. No these are are not so close that my antenna could ever touch. These are maybe 1/4 to 1/2 mile away... any advice is welcome. Can much of the affect be removed with the right antenna type & polarization?

Thanks
Brett - N7OLQ

Everyone already has an equal chance...it's called study for the exam, practice the code (IF you even need it for some licenses) and pass it. Quick frankly, it's much easier now than in my day.

There is no discrimination. To claim it does not gain any sympathy for you here, let alone the suggestion of eliminating some of the requirements just to improve the numbers.

I must admit his observations are consistent with my own observations. At those ham clubs that I attend, there are absolutely NO African-Americans. No Hispanic-Americans, either. No Asian-Americans. In fact, there are rarely any Americans of any flavour.

I live in Canada.

Our friend has clearly forgotten that the Internet is a global phenomenon and that he is preaching to a congregation on every continent.

I attibute this omission to the the author being thick and parochial.

Not to mention any AM broadcasters within a half-mile of the house if 1000 kW
or less. Anything stronger is a problem for 1.8-2.0 and other HF ham bands.
I lived near an AM transmitter in Michigan and it even caused problems on the
CB band, I was only 300 yards away from the transmitter though.

Hi Bret,

It depends on what you like to do,and how those lines are installed
and maintained. If you like low band DXing, I wouldn't chance it.
I've had problems from lines a couple miles away.

If you only work 40 meters and up, you are probably OK.

Just remember if you have a problem, it can be next to impossible to
get it resolved.

Source record: 19489

Increasing the number of hams by waiving code and parts of exams does nothing but put more undertrained people on the air. Are you saying that minorities are incapable of learning code and/or other parts of radio/electronic theory? I seriously doubt you will get any sympathy towards your cause around here. I suspect that you are not really interested in such a plan though as 1) It is ridiculous and 2) You are hiding behind 'Crt4239" and apparently afraid to identify yourself, so try causing trouble elsewhere.

Scott, VE1OP

I'd do the AM radio thing no matter where I moved. You don't need Distribution Lines to have electrical noise, just have a neighbor with a swimming pool or (don't ask me why)... but a funeral home across the street (at least i think they were the culprit). the Electrical noise was so bad that I had to get cabel TV to watch anything below channel 7. (then I moved next to the pool!!!) But that's OK, I installed a Sat Dish and it doesn't mess up the radio plus...it's an indoor pool and we have a key!

3006. Kenwood DFK-4B and 7B for sale

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-18 05:31:10 UTC
From: mcphly@my-deja.com
Message-ID: <8q49aucrr1@nnrp1.deja.com>
Source record: 19481

I don't know ham equipment at all but I came across I deal I sensed was good so I took it. Here I am offering another good deal to you....

I have a Kenwood DFK-4B for sale for $40

and a DFK-7b for $80. These work with the TM-733A.

I've seen these retail at $115 and $180 respectively so I figured the price I am asking is a steal for you. I have inspected them for completeness and they have all components and paperwork.

If you want to see some of my auctions on eBay, my handle is mcphly. I have them on eBay as well (actually, I have two of each to sell, one set being on eBay and one set here.).

I am a reputable person (look at my eBay feedback) and you can contact me at rovertnagol@yahoo.com.

The first to send me the check or cash to

Dan Alexander
16090 SW Tamera Ln.
Tigard, OR 97223

gets the prize.

Thanks,

Dan

In general high lines are not nearly the problem that old, grubby distribution lines can be. Assuming they are the usual 3-phase layout, only the unbalance current shows up in the near field anyway. Given the catastrophic nature of any failure and the numbers of people affected, your friendly neighborhood Reddy Kilowatt bunch is not going to let maintenance slip.

Beg, borrow, buy, don't steal, a battery powered radio, preferably shortwave capable and find out. Carry it with you and check the vicinity.

Personally, I have run 2, 10, and 15 mobile from a parking lot virtually under a 245kv line and listened to my el cheapo Grundig YB305 with no ill effects, to the radio reception at least. Until the glow dies down, it is hard to sleep :-)

Do the radio thing anyway; goofy noise sources are everywhere. And try to stay away from 400k ERP television stations and 100k FM if at all possible.

Enjoy being a homemoaner.

Dick N0BK

Brett:
The correct answer is:
Any location where any power line will be visible from the uppermost part of the antenna structure is too close.

The comment that distribution lines are more likely to cause radio noise than transmission lines is correct. All cases of noise can be mitigated, but some are too expensive, and often the downsized utility has no one knowledgeable enough to locate the sources, anyway.

Pay the utility which serves the area a visit and ask two questions:
1. Do you have TVI mitigation capability?
2. Does this capability extend to shortwave?

If they can answer either question without having to go into an engineering conference, you will be miles ahead.
--
Crazy George

I was happy with the INTELLIGENT email responses that I received to my posting on affirmative action. I did receive several racist emails as well, and that of course was expected considering the race and age of the majority of hams who use ham newsgroup sites. Several of the intelligent, thought - provoking replies came from Hispanics who thought that they too were grossly unrepresented in our hobby. I believe that it is our civic obligation to encourage Hispanics to enjoy amateur radio as well. I'm proud to say that in my metropolitan area, which is near 3 fairly large cities, Hispanics are finally catching on at least on our VHF and Uhf repeaters. I am happy to report that (at least in my area) that many communicate in Spanish, which makes the repeaters a bastion of cultural diversity, which is what our hobby should be all about. I would hope that many in this newsgroup make a special effort to show off their hobby to Hispanics in their own communities (especially in the use of 2 m and 70 cm radios and repeater operation) and help them with Element 2. Make sure that they understand that Spanish is welcome and they need only use English to identify their stations. I in turn hope to reap the benefits of learning our country's second language, Spanish, which will become even more important in upcoming decades as our nation undergoes further shifts in the proportion of Hispanics. My biggest regret is not applying myself in Spanish during high school. Now I know what my grandfather meant when he said "Youth is wasted on the young."

From: Yosi KAWAKU <7q7ja@mub.biglobe.ne.jp>
Message-ID: <8q8rrj$57c$1@bgsv5905.tk.mesh.ad.jp>
Source record: 19352

<<<<<<ZK1/North Cook DX-pedition 2000>>>>>>

Yasu/JI1NJC has activated several small entities in the Pacific and
Indian Ocean with his company at least once a year in the past
since 1989(KH0, C2, T30, T2, ZK1/S, 3D2, A35, FW, 8Q7, S79, 3B8 etc.).

This Y2K as a peak of Cycle 23 Yasu will make another DX-citing trip
with Yu/JR2KDN who activated one of rare entities in SE Asia, Lao in 1998.
Of course the target is to work stations in everywhere as many as possible
on ALL BANDS and also SPECIAL attention to 6m will be paid and various
propagations (e.g. Scatter, Skew path, Short path, Long path) will be
tried.

Now we are very pleased to announce our upcoming DX-citing/pedition
for all of those who love DXing as follows:

Destination: Penrhyn Island (ZK1/North Cook)
IOTA OC-082
Grid Locator: BI11

Call Sign: ZK1NJC, ZK1NDK (are being requested. The license will
be collected upon arrival.)

Date: Oct 28 to Nov 4 2000

Operator: Yu/JR2KDN
(also KD1N, XW8KPL/CSN, 3W5KDN, 8Q7US etc)

Yasu/JI1NJC
(also A35CC, C21/YI, T20CC, T30CC, ZK1NJC,8Q7CC, 3D2YI,
S79CC, KH0/JI1NJC, FW/JI1NJC etc)

Frequency: 160m - 6m
160m 1.832.5MHz QSX 1837.5MHz and UP
QSX 1.815.0MHz for JA

6m 50.100MHz QSX 50.140MHz and UP
6m Beacon: BREAKABLE beacon will be run on 50.100MHz.
(6m Beacon: CQ CQ de ZK1NJC ZK1NJC QSX 50.140 K)
* If you hear 6m beacon, give your call on 50.140MHz
since we will NOT (again NOT) listen on 50.100MHz at any
time to prevent QRM.
* We will show up on usual DX frequencies or close other
than the above two bands.

Mode: SSB/CW/RTTY

Equipment: 2 x IC-706, TS-50, IC-PW1 (160m- 6m KW Linear Amplifier)
160m : Inverted L
80m : Inverted L
40-10m : Cushcraft R-7000 Vertical
20/15/10 : Tri Band Yagi Beam @ 15m up
6m : 5 ele Yagi Beam @ 15m up

QSL: via JR2KDN (SASE, SAE+sufficient return postage, Buro)
Yuichi Yoshida
4th Floor Kato Building
529 Rokugaike-cho, Kita-ku,
Nagoya, Japan 462-1112

QSL REQUEST via email:

QSL request via email will be welcome to
jr2kdn@pluto.dti.ne.jp and our QSL will be sent out via
BURO after all direct request are processed.
Please write up your QSL request in the body as follows:

YOUR CALL
DATE / UTC / FREQ / MODE / RS(T)

We appreciate Warwick/ZK1WL for his great support and Harry/JH0HQP for his
generous contribution of 6m 5ele Yagi beam.

73 & See you on many bands.

de Nob/JF2MBF (wk3d@arrl.net)

I agree with the other posts. Why should we give minorities an easier test just to get licensed. If they truly want to become licensed, they will study for the test just like everyone else.

The FCC has already made it easier for anyone to get licensed. Getting more minorities into the hobby shouldn't come from an easier test, but from other hams acting as Elmer's. I you truly feel that the hobby is lacking in minorities, go out and help them study for the test. Get them interested in Ham Radio.

By making their test easier isn't going to create better relations with them when they get licensed. Just look at the new licensing structure and how older hams disrespect the newer ones. It would be worse in your seniero.

On September 21, 2000, Kevin@rollerskate.net stated:

Hi Ron,

And I thought I had seen it all! EVERY ham, regardless of their ethnicity, should be upset.

As we both know, AA is needed in Ham Radio about as much as I need to be hit by a train. If we as hams REALLY need this, then how did I obtain my EXTRA class license in the 70s, before ANY of the standards were lowered?

This AA thought process is strange, at best. I wonder why the author would suggest such an outrageous idea. Most, if not all of the potential amateur radio ops I know, and that are minorities, would be insulted by the mere suggestion. Besides, if the FCC were to lower the standards any further, we might as well have no tests at all!

BTW: My 11 year old daughter has been a ham for almost a year, receiving her ticket when she was only 10. I wonder how she did that without the benefit of the below suggested AA for minorities? Perhaps she studied??? WOW, what a novel idea!

Kevin Williams NI8H/6
Kevin@rollerskate.net
>>

Kevin,

With all due respect, I totally disagree with your argument and its reasoning. You should be very proud of your 11 year old daughter for getting her ticket. I have no doubt that both of you worked very hard for her to attain it; and both of your efforts proved successful. Your scenario makes my best argument. Now, think about the African-Americans in our society, whose ancestors were uprooted from Africa, where they were killed, tortured, turned into slaves, and made the property of white Americans. Think about how they were torn from their familles (especially after they were here as slaves), how they had their culture, language, family, and assets stripped from them. As a result of this, our country's greatest tragedy, generation after generation has been born into poverty, drugs, crime, teenage moms, and single family households. Because of what white America has done in the past and present, African Americans don't have a "fair" chance. If your 11 year old has an African American in her class at school, statistics show that she's probably poor, comes from a single parent family, and has a father who is absent in her life (and probably has had a run-in with the law at some point in his life). As further result of the tragedy set forth upon her by white America, she's probably far behind your daughter in her schooling. In fact, due to white America's actions for the last 300 or so years, many African Americans children have understandably

reacted to the plight bestowed upon them by being afraid to "act white" and study, which subjects them to further injustices. Our obligation is to make all African Americans feel good about themselves and not feel any sense of failure. Just think about all that your 11 year old could gain if more African American children could get there licenses with a scaled back, "neutral" exams which would require only, for instance that they know the frequencies they should be on. (No element 1 and a scaled back element 2). Hopefully, in time they would learn our hobby "on the job" and teach and enjoy it with future generations. I have received several emails asking if I would go to a doctor who hadn't passed a standard medical board exam, or want to be on a plane with a pilot who wasn't tested for flying. I think the tragedies possible when chatting on a microphone about the weather and what kind of rig one has seems to me a lot less worrisome than medicine or flying...it's only rag-chewing folks...what's the big deal???

3022. *** IT'S THIS WEEKEND! LARC HAMFEST SUN SEP 24

And you intend to take away another fair chance ?

Your statement is the statement of a racist, who camouflages his white supremacy beliefs in the cloak of concerns for other "races". What your whole posting actually is about, is trying to establish as a pseudo fact, that Americans of any other color of skin than white are inferior and thus entitled to having that farce of an exam, which gives you the Technician Class license be made easier for them even more.

Your "Affirmative Action" nonsense is nothing else than reworded old White Supremacy beliefs, which don't sell in their original wording anymore.

Troll elsewhere, but not on rec.radio.amateur.dx.

The "gender" of the antenna makes no difference. The directional
characteristics do.

Any antenna that has poor response in the directon of the noise source
will reduce the noise. The "most quiet" receiving antennas I have are
directional arrays of verticals because they have a sharp resonse lobe
I can focus away from noise sources.

The problem with big power lines is you can be totally "stuck" not
being able to hear weak signals in the direction of the power line if
they "act up", which they often do.

Unsure precisely what "gender" might mean as applied to an antenna, but guessing it may have something to do with design, I say such characteristics have a large impact on how much noise an antenna picks up. Monopoles are prone to be among the noisier antennas due to imbalance of currents. It takes a very well engineered, large radial/counterpoise system for a monopole to approach the relative quietness of a dipole, let alone a closed loop. I have had all three up simultaneously, on an A/B/C switch, and my results have shown the typical, generally observed differences in received noise. The most dramatic example of the effect of grounding on a monopole can be heard when using a random wire. With no ground, noise can easily rise above S9+. Connecting a ground, to a 8' CCS rod, will typically drop the noise by more than 20 dB.

In dealing with nearby noise sources, like power lines, HV street lamps, and transformers, I have found that polarization of a receiving antenna is even more important than any directional characteristics of the antenna. Much of the noise-avoiding ability of yagis owes to their (usual) horizontal polarization, as it is a first principle of antenna theory and design that most manmade noise is *vertically* polarized. The combined effects of polarization and a marginal counterpoise (which is typical, unless the ham has the space and takes the time to install a good one) make vertical monopoles the least desireable antennas in a noisy environment. The omni pattern of single verticals just makes things worse.

It sounds like you've had some experience with guy in the past. I
don't know him, so I didn't want to make a major issue out this.
Instead, I was hoping an appeal for restraint would be enough (if not
for him, then for the others reading this thread - who might get the
idea to copy him by posting a message about their own web page).

Unbalance of current has nothing to do with noise pickup, unless you
are talking about feedline unbalance.

Noise, once it propageates a short distance, is exactly the same toi
the antenna as any other type of signal.

>It takes a very well engineered, large
>radial/counterpoise system for a monopole to approach the relative
>quietness of a dipole, let alone a closed loop.

What does a "closed loop" have to do with noise pickup?

Noise is an electromagnetic wave just like the signal from an
intentional transmitter. In close, within the nearfield and induction
foeld region, noise can be either electric or magnetic field dominant.

The reason a "dipole" is quiet is because noise, once it propagates
any distance along earth, has any horizontal components attenuated.
The same is true for any signal source, even intentional transmitters.
The dipole has two nulls, as well as poor response at low angles where
local noise comes from.

It is the pattern of the dipole that rejects noise, not the fact it is
balanced.

The same is true for the loop. It is the pattern of the loop that can
be used to reject noise, it has nothing to do with the fact it is
"closed".

A folded monopole is "closed", as is a folded dipole, and neither is
any different for noise pickup than the "unfolded" examples of each.
The exception is if the antenna is in incliment weatehr, and corona in
the antenna is involved.

>I have had all three up
>simultaneously, on an A/B/C switch, and my results have shown the
>typical, generally observed differences in received noise.

It isn't suprising the S/N is different. The antennas has different patterns. The one with the highest ratio of response in the direction and polarization of signal to response in direction and polarization of noise will always be the most quiet antenna.

>The most
>dramatic example of the effect of grounding on a monopole can be heard
>when using a random wire. With no ground, noise can easily rise above
>S9+. Connecting a ground, to a 8' CCS rod, will typically drop the noise
>by more than 20 dB.

That's because without a ground, the power line an house wiring and everything connected to them become part of the antenna system! The noisey wiring in the house become the counterpoise for the Marconi antenna.

It isn't because a "grounded antenna" is quieter, it's because you have eliminated or reduced common-mode coupling to the power lines!

>In dealing with nearby noise sources, like power lines, HV street lamps,
>and transformers, I have found that polarization of a receiving antenna
>is even more important than any directional characteristics of the
>antenna. Much of the noise-avoiding ability of yagis owes to their
>(usual) horizontal polarization, as it is a first principle of antenna
>theory and design that most manmade noise is *vertically* polarized.

Manmade noise is randomly polarized at the source. The fact is horizontal antennas have limited response along the horizon, and ground wave propagated horizontal components from noise sources are attenuated much more rapidly than vertically polarized components as they are propagated along the earth's suface.

It isn't because manmade noise is somehow magically vertically polarized, but rather how ALL signals propagate and how all antennas respond.

>The
>combined effects of polarization and a marginal counterpoise (which is
>typical, unless the ham has the space and takes the time to install a
>good one) make vertical monopoles the least desireable antennas in a
>noisy environment. The omni pattern of single verticals just makes
>things worse.

The "quietest" receiving antennas I have are arrays of short verticals.

The best receiving antenna in any environment depends on that environment. What works well in one place might be a "dog" at another.

Dipoles are just as susceptible as vertical monopoles to unwanted common mode currents. There is little difference between feeding a balanced dipole with an less than perfectly balanced line.... and feeding less than perfectly unbalanced monopole with an unbalanced line.

In either case the feedline choke will cure the problem.

The only thing that makes any antenna quieter than another, assuming you do nothing foolish in the installation and the noise source is not right next to the antenna, is the directional response of the antenna. You simply need a response null in the direction of noise that isn't also in the direction of the signal.

I just hit the delete key now anytime I see his call in the header information. He posts this crap every ten days in hopes of the uninformed clicking on his web site. Apparently he makes a buck every time someone makes the mistake. He just doesn't get it. There just aren't that many new subscribers to these news groups in any given month, and once you've seen his page, well, you've seen it. You don't want to book mark it, so he is essentially just preaching to the choir and taking up space and time in the process. If he would just once post a serious question on some topic, or answer someone's question with a studied answer I might take him seriously, but I just know that he is vulgar and shallow.

If you stop and spend about 30ms to carefully analyze the situation,
you'd find that old Charlie isn't wasting near as much 'time and
space' as the people who whine about him EVERY time he
posts his web page ad are.

Go to Charlies web page and read the FAQ. Carefully. Maybe that
will give you a better appreciation of the situation.

If you spend another 30ms thinking about some of the other stuff
that gets posted in Usenet amateur groups, that nobody cares to
read, that everybody deletes and ignores, you'll probably figure out
that Charlie isn't the only dull subject in town.

This is Usenet. If you wanna find the gold, you gotta wade thru the
garbage. And whining about the garbage never makes it go away....

OK. In that case having a blunt conductor, and some form of DC
leakage to earth, will reduce noise. But that isn't loop specific.

The original post was talking about power line noise.

Ah, I didn't know he was a routine newsgroup spammer. I'm especially glad I didn't visit his web site now. Of course, I don't tend to visit many personal web sites unless I know the person, or I'm having a conversation with that person in a newsgroup.

Dr. OM/(X)YL,

Since December last year I live in Dubai, U.A.E.

Unfortunately foreigners cannot get a license here so it is impossible for me to enjoy the hobby.

Apparently there are only a few A61 stations, and very few are active.

If you have any info regarding upcoming activities, I'd like you to QSP it to me so maybe I could help out.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WA2VUY, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4NA, WA4ZJJ, W6IS, WC7N, K8YSE, W9DC, DJ5AV & DX News Letter, DK9IP, DL5MO, F5NOD, F6AJA & Les Nouvelles DX, G4ZVJ, G0MTN, HA0HW, HL1IWD, JA1ELY, JA1HGY, JF2MBF, JI3DST, LA5HE, YU1AB and The Prairie DX Group for the following DX information.

3XY2, GUINEA. "The 59(9) DX Report" reports that Dan, VE2DPS, has returned to Conakry as 3XY2D, but has antenna problems. He hopes to be active soon. QSL via W3HNK.

4W, EAST TIMOR (Web site updated). Rod, WC7N, reports that the upcoming DXpedition's Web site has been re-done to increase its usefulness. The data is the same, it is just presented in a different format. Check it out at: http://www.qth.com/k7bv/timor
The web page has been updated to include a picture of Thor, 4W6MM.

A3, TONGA ISLAND (also Fiji). Hrane/YT1AD and Dragan/Z32AU are active as A35AD and A35AU until October 28. After Tonga Island, they will be operating as YJ0AD and YJ0AU, between October 28 and November 5th. They will return to Fiji to be active as 3D2AD and 3D2AU between November 5-10th. Activity will be on CW and SSB on all HF bands including 6 meters. QSL via YT1AD and Z32AU.

A5, BHUTAN (Activity).....
A Japanese team led by Yoosuke, JH1NBN (who has been active from TI9X, TN7A, HK0, and etc...) will be active from Paro, Bhutan, between October 27th and November 3rd. The team consists of JA1PCY, JF1PJK, JH1NBN, JK1AFI and JR7TEQ. They will take three HF transceivers and one 6 meters transiver for this DXpedition. They will operate on all bands 160-6 meters, SSB/CW/RTTY. They will use their own callsign (callsigns not mentioned). Some of members will participate in the CQWW DX SSB Contest while others will continue to be active on CW/RTTY

or the WARC bands during the contest. Although only using a 100 watts, they will try to work 160m and 80m with a 65 foot vertical. JK1AFI strongly wishes to give a new one for any 6m DXers. QSL all callsigns via JH1NBN: Yoosuke Uchiyama, 924-4 Yokokawacho, Hachioji, 193-0823 JAPAN.

Charly, K4VUD, announced this past weekend: "I have it on good authority that I will be able to use at least 1000 watts xmit power in Bhutan (A5) during my trip there in early December 2000. At this moment, I do not have a 1Kw linear, but the permission is good news, at least. I want to try 160, 80 and 40 and am inquiring about 580 feet of straight line beverage installation. With Bhutan's wind (the thunder dragon!), a balloon vertical is likely out of the question. Antenna suggestions are welcome. I have already purchased my airline ticket for this trip, so if you know my thrift-iness, you know I am going! I will have more details to release soon... watch this space..." Charly's E-mail address is: k4vud@hotmail.com

FO, FRENCH POLYNESIA (IOTA Activity).....
Look for Joel, F5JJW, to be active as FO0SUC or FO/F5JJW from Mangareva (OC-063) October 10-18th, Moorea (OC-046) October 18-22nd and Tikehau (OC-066) October 22-26th.

Look for Eric, F5SIH, to be active as FO/F5SIH from Tahiti (OC-046) October 9-11th, Moorea (OC-046) October 12-15th, Huahine (OC-067) October 16-18th, Raiatea (OC-067) October 18-20th, Bora Bora (OC-067) October 20-24th and Rangiroa (OC-066) October 24-27th.

By the time you read this, Marcel, ON4QM, should be active. He will be staying with Patrick/FO5QS and Guy/FO5NL for a few days. No callsign was given/mention at press time. Marcel, however, will be active mostly on CW on the high bands. He plans to go to Hereheretue Island (OC-052) and possibly be active for one month starting around September 25th. He will then return to Tahiti and may then activate Maupihaa (OC-057) until November 25th. QSL via ON4QM.

GM, SCOTLAND. On his way to the RSGB/IOTA meeting in Windsor, Don, W9DC, will be visiting the beautiful Outer Hebrides. The purpose of the trip is to identiy future island operations and to operate when possible from various islands when the weather and opportunity arises. Don will focus on trying to give North American stations a few Scottish islands from EU-10. He will use the callsign MM/W9DC when he visits the Outer Hebrides from October 5-7th. Don states that he hopes to be on Scalpay (OH-25) during the evening of October 5th. He also plans to operate from 2 private islands, Oronsay (SC16) and Carna (SC-17) in the Sugart Loch, sometime between October 8-11th depending on the weather. MM/W9DC will use the IOTA frequencies. QSL via home call direct or via bureau.

HQ, HONDURAS (Correction). Slight mistake in OPDX.477. The HQ0R Web page should be: http://www.ure.es/honduras/honduras.htm (not ending .html as reported in last week's OPDX.)

IOTA NEWS.................
AS-049. Takeshi, JI3DST, will activate the Takara Islands (Kuchinoshima Tosima-Mura, Kagoshima-Gun, Kagoshima, JAPAN) between November 23-25th, as JI3DST/8. Activity will be on 17/15/12/10/6 meters. QSL via the JARL Bureau (BUREAU is Best) or direct to (Please don't send USD): Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho, Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN

AS-137. Zheng, BA4EG, reports that BT20OO will be active again from Zhoushan Archipelago, October 1-4th. QSL via through the bureau or direct to the following two addresses:
Zheng Feng, 552-39-502 Zhao Zhuang Road, Shanghai,200135, China
Zheng Feng, P.O.BOX 122-001, Shanghai,200122, China

AS-147. Takeshi, JI3DST, activated the Hokkaido's Coastal Islands (Okushiri Is., Hokkaido) this past weekend as JI3DST/8. QSL to the same address above under AS-049.

EU-063. A group under the leadership of Mat, JW5NM, is planning a trip to Axeloya in the Svalbard Archipelago. This is an extremly rare IOTA entity because most of the area is off limits due to environmental concerns. Because it is so remote, an expedition to this area will be expensive, so the team is looking for some financial support for this venture. Send E-mails to Rag (LA5HE, OZ8RO, JW5HE) at: la5he@yahoo.no

J8, ST. VINCENT. Look for Angel/WA2VUY, Peter/NO2R, and Douglas/W2EN to operate from "The Grenadines" (NA-025) October 23rd through October 31st. They will sign J8/homecall prior to CQWW SSB Contest; they hope to obtain a special callsign for the contest. Activity will be on all bands CW/SSB. ALL QSLs via W2EN.

KOREA DX CONVENTION 2000. Lee, HL1IWD, informs OPDX that the Korea DX Club plans to have the 2000 Korea DX Convention take place November 4-5th, at Chonan City, about 130km south of Seoul. They invite all countries to come and visit. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

QSL INFO AND NEWS.............
As announced earlier, two groups of operators (DF2UU/DK9IP and I4UFH/IK4UPB) have visited the ISAJC Club Station 3V8BB between September 6th and 13th, participating together in the Worked All Europe Contest (SSB). Some 8000 QSOs were made during that one week activity. All QSLs ONLY for this period go via DK9IP (bureau preferred). A online log search plus more information on QSLing and some pictures are now available at: http://www.dk9ip.de

9M0F BUREAU QSLS. Nao Mashita, JA1HGY, reports that you can receive a QSL via the bureau (he does not need your QSL) if you send him your QSO data via E-mail at: ja1hgy@jarl.com

Gil, F5NOD, reports that they have already received many QSL requests for the FR/F6KDF/T Tromelin DXpedition (around 6000). The QSL cards are not printed yet. He also states to "Please don't forget to send

with your QSL a "Self Addressed Envelope" (SAE). They have received a lot of QSL already without it, and it takes a long time to write addresses etc... They report that they will confirm only requested QSOs. If you have sent a QSL during the DXpedition and you made some other afterwards, and if you want these QSOs confirmed, send them another card. You can also check your QSO on the online log at the FR/F6KDF/T Web page at: http://perso.easynet.fr/~f6jjx/menu.htm

BI2J QSLs. Mac, W3HC, reports that he is currently awaiting for info and a photograph from Alan, BA1DU, for the BI2J operation. The cards will be printed after receiving this information. Any and all cards (any station) handled by Mac, W3HC, will be delayed for a while due to the recent death of his daughter (SK on September 16,2000). Mac adds, all mail received is being stored in boxes until he can get to them. OPDX and subscribers would like to send out our deepest sympathy to him and his family.

Zheng, BA4EG, the QSL Manager of BI4CM (AS-136), BI5X (AS-137) and BT20OO (AS-137), reports that all QSLs sent for BI5X have been replied to.

Patrick, FR5FD, has the logs for TO150 and FR5FC. QSL via Patrick Lebeaume, 40 rue Louis Desjardines, Bois de Nefles, F-97411 Saint Paul, Reunion Island via France.

Andy, G4ZVJ, made 15083 CW QSOs (including over 1000 QSOs on 80m) as 5V7VJ during his 7 day operation from Lome, Togo. He also made 1140 CW QSOs as 9G5VJ from Accra, Ghana. QSL via G4ZVJ: Andy Chadwick, 5 Thorpe Chase, Ripon, HG4 1UA UK or via RSGB. Check out his Web page at: http://www.g4zvj.demon.co.uk

NOT THE QSL MANGER. Tom, K4NA, reports that he is receiving dozens of QSL requests for KH2/K4NA. He thinks this is KH2/K4ANA. So, Tom is not the manager. KH2/K4ANA should be QSLed via W2PS.

Eduardo, CO8LY, active in this past weekend's RTTY contest, should be QSLed via EA7ADH.

Tim Totten, N4GN, made a serious single operator, all-band effort from EA8BH in last weekend's CQ/RJ World Wide RTTY Contest. QSL EA8BH via OH2BH. He was also active as EA8/N4GN before and after the contest. QSL EA8/N4GN via N4GN.

Jean/F6FYA and his wife Genevieve/F5SQM are back in France. The QSLs for OD5/F5SQM will be printed soon.

As always, Baldur, DJ6SI, surprised everyone on the air and became active from Guinea-Bissau as J5X (on CW) with Franz, DJ9ZB, as J5Z (on SSB). Their operation will be QRT by the time you read this. QSL via their homecall direct or via the bureau.

TX0DX, 4W/N5KO AND 4W/W3UR QSL STATUS. Many OPDX InterNet Subscribers received the special bulletin (OPDX.477.1) and have made inquires about

when these cards are good to send in for credit. Again, these cards cannot be sent in for credit until the submission date of October 1st.

XW1UD QSL STATUS. Charly, K4VUD, has informed everyone that he has submitted a translation of his Laos operating permission papers (which took place last December) to the head of DXCC at the W9DXCC event last week. Charly states, "I still do not know if all the papers I have submitted will be deemed 'enough' but I have jumped thru my last hoop regarding this. I am in the process of sending my XW1UD QSL to everyone I worked via the bureau, but if you want a card fast, send the usual SASE to me at K4VUD address..."

RSGB 21/28 MHZ CONTESTS. Lee, G0MTN, is reminding everyone that the 2000 RSGB 21/28 MHz Contests will be occurring soon. Here's a brief summary of the rules and dates/times: SSB - Sunday, October 1st (0700-1900z)
CW - Sunday, October 15th (0700-1900z)
UK stations contact overseas stations only, and vice versa.
UK stations send RS(T) + Serial Number + UK District Code
Overseas stations send RS(T) + Serial Number
Open / Restricted / QRP / SWL sections, with awards to be won.
Full rules, with details of exact frequencies, scoring etc. are on the Internet on the HF Contests Committee website at:
http://www.g4tsh.demon.co.uk/HFCC/Rules-2000/28.htm

SLIM REPORT. Jean Michel, F6AJA, reports that a station signing 5R8O is very active and is stating that 5R8FL is his QSL Manager, but unfortunately 5R8FL knows nothing about this station.

SPECIAL EVENT. The Hampden County (Massachusetts) Radio Association will operate the special event station, WB1HOF (Hall of Fame), at the Basketball Hall of Fame in Springfield, Massachusetts. The operation will be on October 14-15th as the Hall of Fame receives its latest crop of honorees. Operation will be from 10 AM until 4 PM (EDT) on October 14th and 10 AM until 2 PM (EDT) on October 15th. Two stations will operate in the 40 and 15 meter phone bands. A special QSL is available by sending an SASE to Hampden County Radio Association WB1HOF, PO Box 562, Agawam, MA. 01001.

SV9, CRETE. Geza, HA4XG, will be active from EU-015 between September 28th and October 12th as SV9/HA4XG/p. He will work mainly on the WARC bands. QSL via HA QSL bureau or direct to CBA.

TI8, COSTA RICA. A group of hams from the Atlanta area will operate from Quepos, Costa Rica (EJ79) for a week beginning October 7th as K4QFF/TI8. Satellite operations will include UO-14, AO-27, SO-35 and RS-13. QSL to K4QFF.

V5, NAMIBIA. Frank, V51AS, can usually be found on 30/20/17/15 meters CW between 1930 and 2130z. Also, check 10 meters after 1530z. It was also reported by "The 59(9) DX Report" that he was heard on 80 meters between 0200-0400z.

YJ, VANUATU. The Prairie DX Group is pleased to announce their 2nd DX-pedition to take place between November 18-28th, from Vanuatu and Efate

Island (OC-035). They will be operating at least two stations around the clock (24/7) and possibly more on 160-6 meters SSB, CW, RTTY, SSTV and PSK31. During the DXpedition, they are planning a sub-trip to one or more of the rarer YJ IOTAs. In addition to operating from the other islands, they will be participating in the CQ World Wide CW Contest from Vanuatu. The six members of the traveling team are: Rick/KF9ZZ, Todd/W9YK, Fred/ KF9YL, Mike/N9WM, Bill/W8LVN and Tim/KB9QYL. As in their previous DX -pedition (FP/N9PD September 1998), one of their main goals is to give every amateur the opportunity of working them at least once (and hopefully more often). The callsigns for the DXpedition is to be announced (TBA) later. Their QSL route is via N9PD direct (The Prairie DX Group, 1206 Somerset Ave., Deerfield, IL 60035 USA) or via bureau. Please include SASE with postage, IRC or greenstamp. Direct QSL cards received without return postage will be returned via bureau. For further info, check the Web page at: http://www.n9pd.com
Or send E-mail to Rick, KF9ZZ at: kf9zz@arrl.net

YJ, VANUATU. Alan/VK4BKM and Graeme/VK4FI will be active between October 8-16th as YJ0DX. Activity will be on all bands, especially 6 meters. QSL direct only via VK4JSR.

ZK1, NORTH COOK ISLANDS. Look for operators Yu/JR2KDN (also KD1N, XW8KPL/ CSN, 3W5KDN, 8Q7US etc) and Yasu/JI1NJC (also A35CC, C21/YI, T20CC, T30CC, ZK1NJC,8Q7CC, 3D2YI, S79CC, KH0/JI1NJC, FW/JI1NJC etc) to be active from Penrhyn Island (IOTA OC-082; Grid Locator BI11) from October 28th through November 4th, as ZK1NDK and ZK1NJC (callsigns being requested. The license will be issued upon arrival.). Operations will be on CW/SSB/RTTY with activity on 160-6 meters. Suggested 160 meters frequency is 1832.5 kHz (QSX 1837.5 kHz and UP, QSX 1815 kHz for JA). Six meter activity will be on 50.100 MHz (QSX 50.140 MHz and UP) and a 6m beacon (BREAKABLE) will be running on 50.100 MHz (send CQ CQ de ZK1NJC ZK1NJC QSX 50.140 K). QSL via JR2KDN (SASE, SAE+sufficient return postage or Bureau) to: Yuichi Yoshida, 4th Floor Kato Building, 529 Rokugaike-cho, Kita-ku, Nagoya, Japan 462-1112. QSL requests via E-mail are welcome (returns via the bureau) at: jr2kdn@pluto.dti.ne.jp
OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

Nobody could be so dumb as not to realize that you have advertised your
web page about a hundred times in the past two weeks and you chastise
Charles for advertising his one time? Your one line per post has
taken up twenty times as much bandwidth as his single post.

There's A61AJ on the air, on RTTY, more or less as I type this.
I've not heard them directly (I think), but have been trying.
QSL for this one is through W3UR, so you should be able to find out
more there. I don't recall details, soryy.

Hi Folks !

Near as good as ... a shorted antenna with some matching system! :-)

Perhaps better than a "ZX-TRUC not realy magnetic - not realy balun
miraculous system" with a short piece of wire!

But it's always possible to do the DXCC 100 with ... what you want and what
you can, if you have some time and some propagation :-)

See You Soon,

Your explanation is flawed though. It explains that lots of ads and
search engine entries generates lots of web traffic, but doesn't explain
why lots of web traffic is important to you. Let people find you if
you have information they need! No need to advertise.

Cross-posted to: alt.ham-radio.marketplace,alt.ham-radio.packet,alt.ham-radio.vhf-uhf,alt.radio.scanner,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homeb

I have two handheld radios for sale. Both are Alinco DJ-195 handhelds and transmit on amateur radio two-meter frequencies, which is 144 to 148 MHz. They transmit at 5 watts, and have worked on simplex at a little over five miles. Using a repeater you gain substantially more range. Both come with speaker microphones as well as surveillance microphones. They come with two wall chargers, one car charger and a suction cup antenna mount for use inside your car. Keep in mind you need an amateur radio license to transmit on two-meter frequencies. I'll sell the whole package for $300 plus shipping.

You can view the radio and specs at:

http://www.alinco.com/Products/DJ-195

Also have a Radio Shack scanner for sale. Works with trunked systems, and scans from 29 MHz to 900Mhz. Cellular frequencies are blocked. Will sell it, plus two rechargable battery packs, for $100 plus shipping.

If you're interested, please e-mail me at wellsa@conceptsnet.com or call (206) 222-7521.

Thanks.

One of the Navy's (older) finest ship board receivers 4 through 28 mHZ with
power supply and power supply and speaker connectors.
The agc meter has the range to allow the receiver to be used as a tuned
voltmeter.
We are moving from the area and this and other lab equipment and components
must go.
It's yours for a (non-profit institution) contribution statement.
FOB Northern New Jersey.

Charles,

The search engine will lead them to you when they have
the information you need. By all means keep hitting the search engines.
Otherwise, why do you they to find you?

3079. Printer for QSL info

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-26 00:00:00 UTC
From: Larry Benko <benko@aztek-eng.com>
Message-ID: <39D0AFD2.4D99EBC7@aztek-eng.com>
Source record: 19415

I receive several DX QSL cards that were preprinted commercially
but the DX station has used a printer to put the QSO info directly
onto the card. I like this approach better than a stick-on label
which may dry out over time. I have a 2 sided card and would want
to print the info on the back which is flat card stock. However
both of my laser printers really do not like printing on a 3.5"x5.5"
card. Could anyone recommend a printer that works well for QSL size
stock and black is the only color needed. I would like relatively
permanent ink.

Thanks for any ideas,
Larry Benko, W0QE

3080. For Sale: Kenwood TM-241A 2 Meter Mobile Radio

Newsgroup: rec.radio.amateur.dx

Yes it probably does and almost everybody does it.. With Most people
it is a URL at the bottom of the showing where to look if they want..

It is NOT as in AB7SL's case where the whole dam message was SPAM.
Their was NO body to the message. ALL WEBPAGE SPAM.

Just my opinion..

HI DXers !

Five operators successfully finished last weekend's expedition to the caribbean rock Faralli¿½n Centinela (YW5FC). IOTA SA-058

It was our second try, after last year's "desaster".

I just published the WEB-pages of this adventure and invite you to take a look at:

http://www.qsl.net/dl2gg

or

http://kilohertz.de

or

http://dldx.net

It was the biggest challenge of all our expeditions so far, and I am sure, you want to know, how the life on a rock is all about.
The pictures speak for themselves.

Minor changes and additions will be made within the next days.

Depends on what you call a "DXpedition". This last weekend a visitor
operating from A61AJ on RTTY made about 3000 QSOs. Granted, it was a
contest, not a DXpedition, but the QSL card still counts.

I do not have a problem with this, 40 or so characters at the end of
the message. not as much bandwith as a PDP signature.
I do not have a webpage myself, but I find no problems with it...
OR putting it in a line at the bottom of the message.

Bob

3099. December DX Forum in 73 Magazine

Newsgroup: rec.radio.amateur.dx
Date: 2000-09-28 00:00:00 UTC
From: N6NR <n6nr@home.com>
Message-ID: <ViQA5.124851$Ur3.1556139@news1.sttls1.wa.home.com>
Source record: 19436

I am a week away from completing the December issue of the DX Forum for 73 Magazine. If you have any newsworthy items concerning upcoming events, or some photos and anecdotes from recent gatherings and operations, you still have time to pass them along. The DX Forum is focused on the personal side of DXing, so lots of pictures and stories that provide a focus human interests and experiences are welcome.

The Vox Populi (voice of the people) section will FINALLY debut in the December issue. Two topics have risen to the top: a) so-called "slow-coders" in the bottom 25, and b) the excellent contributions made by Eastern European DXers in recent years. If you desire to have your voice heard, or your opinions recorded for posterity, please drop me a line at n6nr@arrl.net.

Here's looking for your contributions!

Have Two Eimac 3-400Z tubes for sale. Both have full
output.. They came out of a Henry 2K2. They were 3 years
old when I replaced them with a new set of 3-500Z, the
3-400Z have almost the same output.

$175.00 shipped & Insured "lower 48"

Use a search engine META tag in your HTML code, then you save
the trouble of having to manually enter your website URL
to every single search engine out there. While your at it,
if you haven't already, put it in your web address information
on the online callsign databases, such as QRZ.

With the META tag inserted into your HTML code you don't have to go
to great lengths to cover all your bases. The META tag alone
does all the work for you.

If I want to find your website, let the search engines do the
work for you.

Keep advertising and people will eventually ignore you, as if
most haven't already.

Care to explain this more? What is a META tag, and how do I use it?
Can you provide example html code for this - something I could copy to
my site with minor modification?

My counter only counts visits that are unique and at least 30 minutes apart. It keeps a separate count for 'page views'. So my average numbers are not affected by page refreshes as you speculated. Thanks for posting.

Heck yes. It just isn't every day that we run into some guy who admits to being mentally ill and has the history on the net to back it up.

And once you announce that he's a "slim," anyone who continues to
work him will knowingly be in QSO with an unlicensed operator.
Maybe that's why they're upset?

Err, once WHO announces that it's a "slim"? How do you know that the
information given has any validity? How do you know that the person
making the annoucement is who THEY claim to be? Suppose someone came
on using your call and QRMed by saying that a legitimate operation was
a pirate?

It's still deliberate QRM, also.

73, doug

The Ohio/Penn DX PacketCluster
DX Bulletin No. 479
BID: $OPDX.479
October 2, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, KL7JR/1, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4VUD, KM6HB, N4ZC, K6RO, N6DCD, NI6T, AA7KE, W7TVF, WC7N, K8AV, K8YSE, 4L1BR, 4X6UO, BG1HZF, CT1END, DJ5AV & DX News Letter, DK9IP, G3SWH, G3VMW, JA1ELY, OH3RM, RU4SS, VE3XAP, VK5FV and ZS5BBO for the following DX information.

3B6, AGALEGA. Just a reminder that the 3B6RF operation starts next weekend (October 8-24th), and a frequency chart will be sent to all OPDX InterNet Subscribers as an additional bulletin.

4S, SRI LANKA. Phil, G3SWH, and his XYL will be here (IOTA AS-003) from November 9-22nd, and Phil has been allocated the callsign 4S7WHG. They will be travelling extensively during their stay, and he hopes to be active on CW only, all bands from 40-10 meters, for a few hours at least on most days, circumstances permitting. This will be a holiday type operation with limited activity, although they will spend the last few days relaxing on the beach at Unawatuna in the south part of the island, where he hopes to be a little more active. Phil will have his IC-706 and R-7000 antenna with him. QSLs will be via G3SWH, either direct or via the RSGB bureau.

4W, EAST TIMOR. Rod, WC7N, the East Timor Pilot Station, reports that all things are going according to plan for next weekend's 4W/K7BV operation (Refer to OPDX.475). There are some problems with flight schedules and weight limitations, but they are being worked on and all should arrive near to schedule. For up-to-date info, check Web page: http://www.qth.com/k7bv/timor

8Q, MALEDIVES. Just a reminder to look for Adam, W7MP, to be active as 8Q7AB from now until October 9th. His activity will be mostly on 40 meters CW and 20 meters CW/SSB. QSL via W7MP. (Refer to OPDX.475)

9X, RWANDA. "THE 59(9) DX REPORT" reports that Charlie, N4XT, will be working at the U.S. Embassy in Kigali in the year 2001 between January 12th through March 12th. He hopes to be active from this African nation.

A5, BHUTAN. It is official! The Bhutanese Dept. of Communications has given the go-ahead to Charly, K4VUD, to utilize 1000 watts transmit power in Bhutan in December 2000 for the three low bands. Charly states, "It will be cheaper per person if four people go at once... are there three more folks out there who want to be in Bhutan in early December 2000???" E-mail him at: k4vud@hotmail.com

BT4, CHINA. Look for the special amateur radio station during the 10th ARDF World Championships, BT4ARDF. The station will be located in the New Century Hotel. Reportedly, QSL cards are printed.

D44, CAPE VERDE (IOTA DXpedition Update to OPDX.475). Jose, EA8EE, informs OPDX that he and Maneul/EA8BYG's plans for their November 1-8th operation from the Island of Sao Vicente (IOTA AF-86, new IOTA as of June) near the capital of Mindelo continue. The two will be active from Carlos', D44AC, QTH and use his callsign. Activity will be on all modes and bands. Please refer to OPDX.475. They now announce that their logs will be updated daily, as long as they are able to, on the Web page:
http://www.qsl.net/dxgrancanaria

DXCC STATUS. Wayne Mills, N7NG/1, from Membership Services Department reports that the current turn-around for DXCC applications is about 8 weeks. They are working overtime to reduce this figure. The ARRL will be installing a new computer platform. This will allow them to make some improvements in the way the DXCC program works. By the end of the year 2001, they should be able to generate an E-mail receipt automatically for each DXCC application received. OPDX InterNet Subscribers will receive a message that Jim, AD1C, received from Wayne, N7NG/1, on this status as an additional bulletin.

EP, IRAN (New Iranian Stations). Mac, W3HC, informs OPDX that he received an E-mail from Iran which indicates that there will be 7 stations set up for the "Civilization Talks". Look for the old timers EP2FM, EP2CM and EP2ES, along with 4 new novices to be active with most of the activity from EP3PTT (the club station). They will notify Mac as soon as they have the callsigns of the new stations.

FS & PJ8, ST. MARTIN AND ST. MAARTEN. Rodger/N4ZC and Don/K4ZA will be active from both the French and Dutch sides of this island. Rodger informs OPDX that he will fly down to St. Maarten on October 16th. His activity will be on 160-6 meters CW/SSB before the CQWW SSB Contest. He states that he will try to operate around .025 kHz on CW for the non-Extra class guys when he is on 80-10 meters. Rodger will operate as both FS/N4ZC and PJ8/N4ZC before the contest. Don, K4ZA, will fly down on October 21st. He will also operate FS/K4ZA and PJ8/K4ZA before the contest. Each side (of the island) has a C4 beam. Rodger will be PJ8/N4ZC during the contest. QSL vis his home callsign. Don will be FS/K4ZA during the contest. QSL via his home callsign. Rodger states that the FS location is the highest point on the island at 424m, so the blue Caribbean can be seen for 360

deg. They will both fly home the morning after the contest.

IOTA NEWS.....
EU-012. Look for GS2MP to be active during the CQ WW Phone Contest (October 28/29th). GS2MP will be a separate multiplier for the CQWW scoring. The operators of this Multi-Multi entry will be Chris/GM3WOJ, Stewart/GM4AFF (GM0F), Jim/GM4TXX, and Keith/GM4YXI. The Shetland Islands have the reference number: IOTA EU-012, IOSA reference SH1, WAB HU27 and locator IP90. This island can be reached by a 14 hour, 220 mile sea crossing from Aberdeen to Lerwick. The GS2MP QSL cards will be via their QSL Manager: Edwin Musto ZS5BBO, PO Box 211032, Bluff 4036, South Africa. For a few days before the contest some HF CW only operation may take place, and GM4AFF/P will be active on the 50 and 7 MHz bands. For more information, contact Chris, GM3WOJ, via E-mail at: gm3woj@talk21.com
Or from his Web page at: http://www.gm7v.com

NA-055. John, KL7JR/1, will be on from Mt. Desert Island (USI ME-021S) on October 8th (possibly 7th too) starting around 1400z on 28460 kHz (primary) and 14260 kHz (secondary). QSL CBA only.

KH0, MARIANA ISLANDS. Hide, JF1VXB, will be operating from Saipan Island (OC-086) from Octover 5-10th as KH0M. Activity will be on 80-6 meters SSB/CW/RTTY/PSK31 with a KW amp. He hopes to participate in the Oceania DX Conetst. QSL to homecall via JARL bureau or direct to CBA:
Hidenobu Nakamura: 23-139 Chojabara, Kasuya, 811-2311 JAPAN

KH0, MARIANA ISLANDS. Look for Tsutomu, JA1VND, to be active from Saipan Island (OC-086) as KH0/JA1VND from October 13-16th. Activity will be on CW/SSB on all bands. He hopes to see big pileups from either Europe and/or East Coast of N.A. QSL to JA1VND via JARL bureau or direct to:
Tsutomu HorikoshiI, 656 Yoshii, Yoshii, 370-2132 JAPAN

KH0, MARIANA ISLANDS. Look for operators JQ1UKK, JF2SKV, JG3VEI and JH5OXF to be active in the CQWW CW Contest as NH0S in a Multi/Single/High Power Category effort. Outside the contest, between November 23-27th, they will be operating on all bands 160-6 meters SSB/FM/CW/RTTY/PSK31 with a FL7000 and HL1KGX amplifier. Operators (with callsign/QSL info) are: KH2F (QSL via JF2SKV), NH0V (via JG3VEI), KH0/KD6CJF (via JH5OXF) and KH0/JQ1UKK (via JQ1UKK). QSL NH0S via JF2SKV to JARL bureau or direct to:
Hisashi Matsushita, 14-1 Ugasemae Iwakura, Toyota, 444-2225 JAPAN
Any questions can be direct to Hisashi, JF2SKV, via E-mail:
8877@hm.aitai.ne.jp

KH2, GUAM ISLAND. A group from the Nagoya area will be active from Guam Island (OC-026) on November 10-15th. They will have two IC-736, IC-706, FT-100 and a 500W Linear Amplifier for 160-10 meters, SSB/CW/RTTY. The following antennas will be used:
160m - Inverted L 40-10m - Cushcraft R-7000 Vertical
80m - Inverted L 6m - 5 element Yagi @ 25m up
The operators will be active as: KH2F (QSL via JA2TBS), KR6CZ/KH2 (via

JA2VFW), AB8EW/KH2 (via JH2SON), K1HP/KH2 (via JE2EHP), KH2/JH2ABL (via JH2ABL), KH2/JH2KDP (via JH2KDP), KH2/JJ2MST (via JJ2MST), KH2/JL2WNA (via JL2WNA) and KH2/JQ2PTN (via JQ2PTN). If you have any questions or requests, contact Masao, JA2TBS/KH2F via E-mail at: ja2tbs@jarl.com

KH5K, KINGMAN REEF (Update). The latest press release by the Kingman Reef/Palmyra DX Group and Garry Shapiro, NI6T, states preparations continue at an accelerating pace for the Kingman Reef DXpedition in mid-October. Some equipment has arrived in Honolulu with antennas, amplifiers and cables on their way. The motor schooner Machias is being prepared for the journey. Site planning is almost complete. Financial support is coming in from foundations, clubs and individuals (more is still needed). Contributions should be sent to Tom Harrell, N4XP, 2011 New High Shoals Rd., Watkinsville, GA 30677. For more updates, check out the Web site at: http://www.qsl.net/krpdxg
OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

KP2, ST. CROIX (U.S. Virgin Islands). Look for Larry/K6RO and Herb/KG6OK to be active from October 25-31st. They will be active on CW, RTTY and SSB and possibly PSK-31. They will concentration on the WARC bands before and after the CQWW Contest. Larry, K6RO, will participate in CQWW SSB Contest as a SO/AB/HP effort using WP2Z. QSL WP2Z via KU9C. QSL KP2/K6RO and KP2/KG6OK via their home callsign.

OH0, ALAND ISLAND. A group of OH3 operators will be active from here (IOTA EU-002, OH County 008) until October 7th. Look for operators Mikko, OH0/OH3FM (QSL via OH3FM); Jussi, OH0/OH3YM (via OH3YM); Pertti, OH0LQK (via OH3LQK); Alpo, OH0MFP (via OH3MFP); and Markus, OH0KCB (via OH3RM) to be active on 80-10 meters, mainly on CW and RTTY.

PJ2, NETHERLANDS ANTILLES. Joeke, PA0VDV, will once again be active from here as PJ2/PA0VDV, October 26th through November 16th. Activity is expected to be CW only. QSL via homecall.

QSL INFO AND NEWS.....
4L0JAZZ was activated by Shale, 4L1BR, in Georgia on RTTY this past week. Shale told OPDX to QSL via his address on "QRZ.COM".

A52JS QSLs. Reports have surfaced that modified A52JS QSL cards are being sent out by Jim, VK9NS, with a note attached. It's actually a A51JS card from Jim's previous operation to Bhutan. It seems that the A52JS cards are missing in transit between EU and VK9NS. Jim sent out this modified card so that many can summit them in time for the DXCC September deadline submission. Notices will be sent out through the proper DX channels when the new A52JS card have arrived. Those who would like to receive a card should resend a SAE and IRC. We are sure that many would like to thank Jim for his thoughtfulness.

QSL QSOs for A61AJ in the RTTY DX Contest last weekend go to W3UR: Bernie McClenny, 3025 Hobbs Road, Glenwood, MD 21738 (no bureau E-mail requests!). Bernie is the QSL Manager for all QSOs with A61AJ (what

ever date, mode or band). By the way, the operator was Walter, DJ6QT.

All stations needing a card from BI2J are to send them direct to Mac, W3HC, and not to China. If you send them to China, Mac will have to mail a supply of cards to Alan so he can answer them. This takes more time and creates a greater expense. This mistake was made on the BI3H, BI4C, BI5Z and the BI5P cards. Mac will place an order for the BI2J cards as soon as he receives the photograph and the details from Alan.

QSLs for EZ8CW and EZ3A. Vit, EZ8CW, states that he doesn't have a QSL Manager and QSLs for him (EZ8CW) and the club station EZ3A should be sent direct only to: Vitaly Dotsenko, P.O.Box 73, Ashgabat, 744020, Turkmenistan.

By the time you read this, the YP1W DXpedition will be over. Activity was from Sacalinu Mare Island (IOTA EU-183) in the Black Sea close to the Danube Delta. OPDX was told that this "island is a virgin and a wildlife Romanian territory, part of the Biosphere Reservation "Danube Delta". The DXpedition was organized by the Romanian Radio Amateur Federation (FRR) and by Pit, YO3JW. Operators were YO3JW/Pit, YO3FWC/ Ciprian, YO9FJW/Ionut, YO3FLR/Cristi and possibly others. QSL via YO3JW. For more info about previous trips on the island, check the Web pages: http://www.qsl.net/yo3kaa http://www.qsl.net/yo3jw

Mark, KM6HB, reports that he has received an E-mail from Bill, NC1L, at the DXCC desk stating that his documentation for his ZK1AHB operation to South Cook Island (July 10-18th, 2000) has been accepted by the ARRL for DXCC credit. QSLs have been received from the printer and are being mailed out daily. Bureau requests will be handled as they are received.

SPECIAL CANADIAN PREFIXES AND ACTIVITY.....
Look for a special prefix to be activated to commemorate the 250th anniversary of the end of the British and French capitals of Nova Scotia. The Industry Canada approved the prefix XM1 for VE1's and XL1 for VA1's, and is also available for all Canadian Radio Amateur operators residing within the boundaries of Annapolis County. Their operation was authorized and will be valid from October 27th through November 27, 2000.

The special callsign VC5C has been assigned to Todd Bendtsen, VE5MX, to commemorate the 125th Anniversary of the Supreme Court of Canada. This callsign is valid between October 27-30th, 2000 only.

The special event callsign VB2R as been authorized to be used by Carleton Styan, VE3BY, to commemorate the 100th Anniversary birth of Mr. E.S. Rogers Sr. inventor and creator of "Rogers Batteryless Radio". This operation is valid from October 21st through November 5th, 2000. The station will be active in the CQ WW SSB Contest (Zone 2).

SPECIAL EVENT. Look for the special event callsign MB2HFC to be used during the International HF and IOTA Convention, October 13-15th.

SPECIAL EVENT. During the year 2000 the "Signal Corps of the Australian Army (Royal Australian Signals)" celebrates their 75th anniversary of its formation. To mark the occasion, former and current members of the corps will operate VI5RAS throughout November from various locations within Australia. QSL direct with SASE to VK5FV or via the Bureau.

SLIM ALERTS!!!!
A station being active as 3W1A on 28495 kHz this past week stating to QSL via N6HK is a SLIM. Steve, N6HK, states, "The guy's a phoney. I'm not the manager for any station."

Gene, TZ6YV, reported hearing a station using the callsign TZ1GH who was advising people to QSL via the Bureau! According to Gene, the call TZ1GH has not been issued, and additionally Mali has no QSL Bureau.

V4, NEVIS ISLAND. Doc, W9NY, will be active again as V47NS, October 26-30th. He will be in the CQWW SSB Contest as a 10 meter Single Band entry (or possible 20/15 meters single band entry). QSL via W9NY.

V6, MICRONESIA. Due to freight schedules, the V63DX operation date was shifted a little. Shoji, JA7HMZ, will operate from Pohpei Island from October 27th through November 2nd. He will be Single Operator/All Band/ High Power entry in the CQWW DX SSB Contest. He received the callsign V6A for the contest. QSL V6A via JA7AO: Tokro Matsumoto, 3-62 Okachimachi, Yuzawa, 012-0856 JAPAN. Outside the contest, Shoji, V63DX/JA7HMZ, and Koh, V63DQ/JA7KAC, will operate mainly on CW and the WARC bands. QSL via their homecall either the JARL bureau or direct to:
JA7HMZ Shoji Igawa - 17 Shirogane, Yokobori, Ogachi, 019-0204 JAPAN
JA7KAC Kosaku Sasaki - 3800-42, Shimotsuruma, Yamato, 242-0001 JAPAN

ZD9, TRISTAN DA CUNHA. Bob's, G3ZEM, activity as ZD9ZM has ended. On Saturday, September 23rd, Bob and Karen finally left the island and are headed to Capetown. All the equipment was safely loaded onto the ship, including the slightly bent Titanex vertical. Bob E-mailed the final ZD9ZM log by satellite from the Agulhas today as promised. The final tally is 20,538 QSOs, and the full log has now been uploaded to the ZD9ZM log search page available at: http://www.dxtechnology.com/zd9zm
OPDX InterNet Subscribers will receive the complete final press release by Steve, G3VMW, as an additional bulletin.

ZK2, NIUE. Bill, W7TVF, will be active again from November 19th through December 10th as ZK2VF. Operations will be on 160-6 meters. Priority will be given to Europe, Africa, and South America on 160 and 80 meters during their grayline. Plenty of time will be spent on all bands for anyone who needs a QSO. A 847 will be used as a beacon on six meters all the time that he is active, so if six opens he will be QRT on HF until six meters closes. The six meter beacon will be on 50.115 MHz. Bill will be operating from the "Beautiful Namukulu Motel" with Alpha power and good antennas. QSL info is the same as last time. QSL direct with a SASE and return postage to: Bill Dawson "W7TVF", P.O. Box 4049, Pahrump, Nevada 89061. Bill states, "No donations are needed. Again, I would like to thank all of you for the extremely courteous operating by almost everyone and that made it a pleasure for me also. The pile ups were big but easy for me to operate because of

your help. I will try to create some even bigger pile-ups this time. Thanks and CU from Niue Island in November." Bill's Web site is at: http://coyote.accessnv.com/ad7k/w7tvf

Heard on 28.495 around 2100Z last week...Thursday, I believe. A
probable bogie pirating 3W1A, but guess who's on frequency
playing "frequency cop..."...??

AB7SL. Yep. Mr. Webpage DX Guru Himself, chiding everyone
calling the bogie. Intentional QRM by any definition.

If your "statistics" are going up, I can only imagine its from
morbid curiosity wondering if the on-the-air aggitator AB7SL is the
same on the web.

Hot flash, Hot Rod...."DO AS I SAY, NOT AS I DO" is neither
sportsmanlike, DXCC rule, nor FCC regulation.

Try it.

Your concerns are all addressed in the FAQ on his web page. I think that is the standard reply. I have seen something similar any way on a couple of news groups. :-)

It won't be on the countries list because it's part of Malaysia (9M).
Doesn't mean nobody has operated from there. I heard there's a resort
on the other side of the island.

Yes, you DID identify...good for you.

And yes, there is something wrong with your conduct, regardless of your motives. FCC regulations and DXCC rules are very clear. It is both ILLEGAL and unsportsmanlike to wilfully interfer in the otherwise lawful operation of other Amatuer Radio Service communications.

It's NOT up to YOU to determine what is valid and what is not.

As for being a frequency cop, YOU are. That wasn't ME trying to force myself on the pileup, it was you. It was YOU heckling the pile-up.

I think a recording of your behaviour would be of interest at the DXCC desk. This type of conduct is defintely frowned upon by those who encourage sportsmanlike conduct and adherence to rules.

You are NOT the type of operator that is (supposedly) exemplified by DXCC rules.

Carry on, Charles. You are your own worst enemy. The REAL problem is that it's people like YOU who act the way YOU do on the air that give Hams in general and DXers in particular a bad name.

Bullshit, Herman.

AB7SL is not a licensing authority for "3W" so he has no authorative
knowledge of the fellows license status. He is simply QRM, like all
the other "frequency cops" who show up for every DX pileup. Lower
than whaleshit in other words.

Hello Hans,
The Daily DX had the day before confirmed 3W1A was a pirate. Also the QSL manager that 3W1A was using also had been quoted as saying he did not know 3W1A. So I - DID - have authoritative reference for declaring 3W1A a pirate. It had already been determined to be so in the DX community and since I keep myself up-to-date I was aware of this consensus.

Evidently you were not. Thanks for posting. 73 / DX

Hello Steven,
You are entitled to your opinion but please don't start speaking for the FCC. They have already made their position very clear it is impossible to QRM a pirate station. IMHO I was certainly not heckling the pileup. I was giving them up-to-date info they obviously did not have or they would not be wasting their time and $$$ in working and QSL'ing a slim. Thanks for posting 73 / DX

Aware of "concensus" or not, to transmit over other Amateur
stations in ANY circumstance other than a bonafide declared EMERGENCY
is ILLEGAL.

> Evidently you were not

YOU seem to be the one who is NOT AWARE...of the LAW, that is.

Do YOU have a problem with Part 97 or DXCC rules, Charles?

Seems to me you are probably first cousin to the creeps of the
60's who used to "reign" on CB as "Channel Masters". A little bit more
civilized, but not by much.

And certainly NOT a sportsman by ANY definition.

It wasn't the "pirate" you were QRMing. It was everyone ELSE on
frequency.

wasting their time and $$$ in working and QSL'ing a slim.

Yes, you were. You were snidely insulting anyone who tried to
call the alleged pirate by calling them foolish and stupid. I heard it.

That's sportsman like? That's polite? And let's not even ask if
it's MATURE...?!?!

Survey says.....BZZZZZZT.

Who are you trying to convince, us or yourself...?!?! Because if
it's US, you just wasted a lot of bandwidth. If it's yourself, you're
in a battle of wits with a fool.

No 73 for you. You're in the "Lennie Pile"

Hello Steven,

Not that your opinion matters to me but I do take exception when I am misquoted. Just for the record I did not call anyone foolish or stupid during the 3W1A pileup.

You evidently are making that up to bolster your flimsy allegations. I think it's time I put you in the kill file. " plonk "

Thank you for posting. 73 / DX

What do you disagree with Charles.

Are YOU the judge and jury?

Do YOU have enforcement power to enforce Federal Rule and Regulations
granted by Congress?

--
de Vic, AE5DX

Logging and station control
at AE5DX is accomplished using
DX4WIN version 5.01

First off, in the general case, even Bernie isn't perfect and could
make a mistake.

Secondly, given your known propensity for anti-social behavior, that
is your repeated postings, I could easily conceive of your doing other
ant-social acts, like deliberatley telling a lie on the air. You
might even do it when you're not in complete control of yourself due to
your mental illness.

Thirdly, even if your record were totally clean, what's the guarantee
that the person using your call is you? I could again easily conceive
of someone intentionally using your call or Herman's call on the air
to make you look even worse than you already are, and perhaps bring
the FCC down on you.

Hans has got the right of it here. Only the licensing authority for
3W is authorative on this, and even they can make mistakes.

Hello Keith,
Many have taken it upon themselves and totally outside of my control to perpetuate some of the threads that are related to www.ab7sl.com .
Occasionally some of them merit a response from me. More often though I let them go with no response. I believe if you examine the threads you'll see this is the case.

Thanks for posting. 73 / DX

3146. www.ab7sl.com - 1 YEAR OLD !!

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-02 00:00:00 UTC
From: Charles <charles@ab7sl.com>
Message-ID: <8ratv9$782$1@nnrp2.phx.gblx.net>

Greetings to all,

As of October 5 ,2000 www.ab7sl.com will have been on the web for a full year. This is a real milestone in the site's existence. www.ab7sl.com started out this time last year with 0 (zero) visitors and now has almost 16,500 visitors on the counter. The average visitor count per day is now at 55 visitors daily . There are nearly 100 entries in the guestbook now and several dozen user-added links on the Free-for-all-Links Page.

Many features have been added since the basic site went up last year. One of the most popular is The DX Page with the active and clickable DX Cluster Telnet links. I have received a lot of positive feedback on that. Another recent feature is the addition of the AB7SL Monthly DX Online Logbook. This page receives several updates - each day - depending on my activity and band conditions. It lists chronologically all the DX stations I have worked for the current month.

The most recently added page is the 3D-Art Gallery which showcases 3D art I have created with Bryce 3D graphics application. Besides the thumbnail for each image there are two popular resolutions available for download that can be used as desktop wallpaper.

www.ab7sl.com has grown tremendously over it's first year and I look forward to sustained and increased growth over the years to come. Thank you all for making www.ab7sl.com a great success for me and all it's users.

73 / DX

>Bullshit, Herman.

Easy there, Hans. No need to burst an artery. This is all supposed
to be in fun.

As I said before, it amounts to voice recognition and point of view:
If I personally knew ZZ1ZZZ and heard someone else using that call,
I'd know for certain that the user was a pirate. And from my point
of view, anyone in QSO with him would be working an unlicensed
operator.

Now go eat some prunes to loosen up a bit.

This, besides being meaningless, doesn't answer the question put forth to you.
What part of the statement do you disagree with?
"Are YOU the judge and jury?

Do YOU have enforcement power to enforce Federal Rule and Regulations
granted by Congress?"

These are the questions being asked. An inability or unwillingness to answer
would seem to me to be an admission of guilt.

Voice recognition and point of view. If I personally knew ZZ1ZZZ
and heard someone else using that call, I'd be 100% certain the
person was a pirate. From my point of view, anyone working the
pirate would be working an unlicensed station.

>It's still deliberate QRM, also.

The FCC has responded to the "deliberate QRM" question when
asked if transmitting on top of ten-meter bootleggers could
be considered intentional interference: "It's impossible to
interfere with an unauthorized signal" was the FCC's reply.

09/26/00: Giant Sunspot May Mean Large Magnetic Storms

Scientists say that magnetic fields above the largest sunspot group to appear on the surface of the sun in the past nine years are becoming unstable, and could lead to a coronal mass ejection from the sun within a few days. If this happens, the resulting magnetic storm could be exceptional. Given the right weather conditions, auroral displays could be visible as far south as the Gulf of Mexico.

While disruptions of radio communications, power blackouts and satellite transmission are unlikely, they are always possible during a solar magnetic event.

Source record: 19316

Hi DXer!

A very useful tool for DXing comes from Fabrizio, IK4VYX: DXTelnet 4.9. The purpose of it is to connect to dx-cluster via internet-access. It is easy to configure and provides alarm-function which rings the bell when a new country is spottet. It works well together with many logging-programms, such as DX4WIN and WL32.

A remarkable "extra" is a tool called "Emailert": This small programm allows to transmit eMails to a pager/GSM-phone/eMail-adress when a spot is received on the cluster. Further it can be configured so that only alerts (wanted dxcc-countries, iota, locators...) are sent to your pager/gsm. I made the following configuration to receive SMS free-of-charge: Applied for an free eMail-account with my gsm-provider (e-Plus). Arranged SMS-notification when a new mail is received. That's all!

Here in DL we have some older pager-systems like "skyper". Every pager has it's own eMail adress, (your_number@skyper.de). These pagers are very cheap as SMS via GSM-phones is more comfortable. The disadvantage of the pager is: It receives max. 20 eMails per day.

To download DXTelnet visit http://www.qsl.net/wd4ngb/telnet.htm

73, Max. DL4MDQ.

Hi Hamish...

You are right, I don't need a weekly reminder about the site as I have it bookmarked. However, there are new people subscribing to this and other newsgroups on a daily basis who may have never seen one of the posts before. I suspect that is the precise reason why the posts show up frequently. I am always on the lookout for good ham sites, and there are many new ones appearing every day. This is one resource for finding out about new sites or existing sites that I wasn't aware of. Therefore the weekly posts (or whatever frequency they are, I don't count them) don't bother me. My cursor keys work well, so I can choose to scroll right on by any post I don't want to bother with. Included in the posts that usually get this treatment are the VERY frequent childish exchanges of insults and name-calling from people who obviously only like to practice their typing skills. This is a ham dx newsgroup...If someone has a site that will point me to a good new source of information about ham/dx, then I look forward to hearing about them. I don't mind repitition once a week... I DO mind 10 posts daily about how once a week is too much though.

73 and gd DX from Canada

Scott, VE1OP

Hello all,

Alan G0JNJ has informed me that GB0RBL will be active :-

Friday 6 / 10 / 2000 from 09.30 (local UK)
Monday 9 / 10 / 2000 from 09.30 (local UK)
Tuesday 10 / 10 / 2000 - 19.00 to 22:30 (local UK)
Saturday 14 / 10 / 2000 from 09.30 (local UK)
Sunday 15 / 10 / 2000 from 09.30 (local UK)
Tuesday 17 / 10 / 2000 - 19.00 to 22:30 (local UK)
Saturday 21 / 10 / 2000 from 09.30 (local UK)
Sunday 22 / 10 / 2000 from 09.30 (local UK)
Tuesday 31 / 10 / 2000 - 19.00 to 22:30 (local UK)

Additional operation periods may be possible

Operation will be on Bands from 80M - 10M you will have to
have a look round for him calling as we can not predict which
will be the best band on the day

73 and give a call if you hear him

>Cute trick; about as useful as your "citation" of FCC statements.

You're the one calling it a "citation." Whether the FCC states it over the phone, by email, or via a press release, it carries the same weight: "It's impossibly to interfere with an unauthorized transmission." That's the exact statement the FCC gave. If you don't care for it, take it up with them.

>I guess you couldn't come up with anything better than defaming me,
>personally, instead refuting the statements I actually made.

You defamed yourself; making the suggestion that someone should illegally use Charles or my callsign because they disagree with either him or I is just "newsgroup rage" on your part. Is that how you "get even"? You should be ashamed of yourself.

Jeff

I have a 4 element, full size 20 meter bean for sale.

It's a Telex (Hy-gain) 204BA-S. 8.2 dB gain. The bean is build like a tank so it will withstand very high winds. If you want to put out a killer DX signal on 20 meters, this is what you need. Instrudtion manual included.

The beam is on the ground and ready for you to pick up.

The price is $175. It is in great shape.

The beam is located in the Denver area.

73,
Bill

"Royal"???

Monarchy is indistinguishable from Masturbation.

Wherever you see the word, "Royal", try substituting in your
own mind the word, "Masturbating". I can assure you that you'll
not perceive any difference.

Put it another way....
Income taxes (including all National Insurance "Contributions"
stand at 45%.
You pay in addition 12.5% as VAT.
On fuel you pay something like 75%.

All this tax goes to support your Monarchy and the
various hangers-on on the gravy train.

When you go out to work, you're effectively in slavery until
Thursday lunch-time each week, because it's not till then that you're
earning any money from yourself.

So, are you that in favour of supporting a bunch of eyelid-twitchers
(sorry, winkers) who are parasitising at your expense?

In addition, the British Legion is an organisation to sanitise a
group of people who unashamedly went about killing their
fellow men.

SHAME ON THEM!

Uh? Shall we try a few examples, Gareth?

Name a dark blue colour? Masturbating blue? No I don't think so.

Name a kind of writing paper 19" by 24"? A Masturbating? WRONG!

Name the jelly produced by worker bees? K-Y? No I don't think so.

Ah, one must beware of sellers on eBay! I am sorry for youur unfortunate experience. ("But for the grace of God, there go I!")

Another item to watch for is the seller with a Sunglasses Icon. This means that the seller has a new "ID." While s/he may be a newbie to eBay, it may also mean that there were too many negative feedbacks! Therefore, I never bid on a seller with the sunglasses icon, or a seller with NO previous sales.

Sonic Organism Infects Web

Salt Lake City, Utah - A new sonic organism, Tapegerm, is infecting the world wide web. In only 4 short months, Tapegerm has grown to include 20 diverse artists and been featured on the main page of FranceMP3.com. A musical collective of 20 artists, Tapegerm creates original music using loops and sounds contributed by fellow Tapegerm members and visitors to their web site. Tapegerm is a cohesive, but somehow anarchic collective focused exclusively on crafting collaborated music entirely in cyberspace.

Tapegerm began as an experiment with re-mixing hometaper music at homemademusic.com and quickly evolved to embrace and infect the Web. Like a living organism, there is no central organization, no founder, the membership is continually evolving and each member is equally important to the life of the whole. Tapegerm artists create 'Germs", musical loops that spread, multiply, and mutate, and assemble them into musical collages. Available on the internet, the music runs the gamut of electronic genres, from ambient electronic to techno to noise to experimental.

Internet based reconstructive music is in the embryotic stages of becoming a long lasting artform and Tapegerm is at the forefront of this movement. We've all seen what the mp3 format has done to change the world of music, but we've only begun to see the potential that the internet affords to creative individuals who are banded together in ideas, but separated by geographies. A sonic organism such as Tapegerm exemplifies the democracy and "creative frontier" hype that the internet has been billed as being, but often falls short of.

Visit tapegerm.com for a look at the group's progress, listen to new mixes happening nearly daily, upload your own sounds for the group to manipulate and employ in new recordings, and get hold of three exceptional CD's exploding from the combined creativity of 20 artists.

I had never seen aurora before but last night (4 Oct to 5 Oct) I was treated to a spectacular display above Spokane, WA. We had shimmering curtains, columns, brilliant luminescent glowing areas, even red columns! The sky was covered from East to West up past the zenith - at one point dropping to about 45 degrees above the SOUTHERN horizon. The K-Index was running at 7. I also tried my hand at some astrophotography. With no experience in that, I actually succeeded inspite of having only ISO 100 film. (I shot f2.8, 24mm lens, ISO 100 film, generally 40 to 120 second exposures). Now I have some ISO 400 film and will be ready for the next opportunity. When I saw the sky glowing at 10:15pm I knew it was going to be the night for aurora - forget sleep. I stood out in the cold and was up until 1:30am. And I can't wait until I can do it again.

3189. To Break The First Commandment...Trinity 4893

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-07 04:15:29 UTC
From: unityNO-SPAM@cfl.rr.com
Message-ID: <BrxD5.48171$1H2.3528899@typhoon.tampabay.rr.com>
Source record: 19225

Mark 12:29 And Jesus Answered Him, The First Of All The Commandments Is, Hear, O Israel; The Lord OUR God Is One Lord:

This is the first commandment that Jesus gave and that is "The Lord OUR God Is One Lord". If Jesus only said: "The Lord YOUR God Is One Lord" ,there would have been some ambiguity as to whether Jesus was God. But Jesus said ♦The Lord OUR God Is One Lord♦ therefore he removed all ambiguity by his utterance so that no one can ever rightly say that Jesus was God. Someone who has a God can never be your God. This is the first commandment of Jesus yet we see that the majority of Christiandom break this very first commandment by making Jesus their God and then they think they are saved and will inherit paradise. Such a belief is totally unbiblical and against the teachings of Jesus.

Jesus said:

Mt 19:17 And He Said Unto Him, Why Callest Thou Me Good? There Is None Good But One, That Is, God: But If Thou Wilt Enter Into Life, Keep The Commandments.

Jesus didn't say "take me as your personal savior and you will go to heaven" he said "Keep The Commandments", yet most Christians break the very first commandment of Jesus in the Bible let alone other commandments, by taking Jesus as a God and then they expect to go to heaven! It is one of the strangest religious phenomenon in existence.

Jesus said:

Mt 5:20 For I say unto you, That except your righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no case enter into the kingdom of heaven.

Righteousness is not defined by faith alone but through faith and deeds, and Jesus is saying that heaven is not for you if your righteousness is not better than the practicing jew. Now we shall look at other biblical verses that make the picture more clear, though the above is quite sufficient for those that are truthful to themselves:

Num 23:19 God Is Not A Man, That He Should Lie; Neither The Son Of Man, That He Should Repent: Hath He Said, And Shall He Not Do It? Or Hath He Spoken, And Shall He Not Make It Good?

This verse is in the Old Testament and it is quite explicit and clear. No man can be God. Not only that but no son of man can be God. The New Testament did not come to contradict the Old Testament; it came to fulfill it so it is obvious that Jesus was not God.

John 9:11 He Answered And Said, A MAN That Is Called Jesus Made Clay, And Anointed Mine Eyes, And Said Unto Me, Go To The Pool Of Siloam, And Wash: And I Went And Washed, And I Received Sight.

Mt 8:20 And Jesus Saith Unto Him, The Foxes Have Holes, And The Birds Of The Air Have Nests; But The SON OF MAN Hath Not Where To Lay His Head.

Jesus is called both a man and the son of man in the New Testament so many times.

Job 25:4-6 How Then Can Man Be Justified With God? Or How Can He Be Clean That Is Born Of A Woman? Behold Even To The Moon, And It Shineth Not; Yea, The Stars Are Not Pure In His Sight. How Much Less Man, That Is A Worm? And The Son Of Man, Which Is A Worm?

This verse shows that man can not even be rightly compared to God (let alone be God). Nothing is pure or clean compared to God. We are all like worms compared to God. Even the son of man is like a worm compared to God (there is no comparison). It is very interesting that the verse states that "How Can He Be Clean That Is Born Of A Woman". Jesus was born of a women, though Mary was the holiest of women but she was still a woman. So in the biblical terminology even Jesus is not pure compared to God so how in heaven or earth can anyone call him God? This reminds me of the well recorded statement of Jesus recorded in the New Testament so many times:

Luke 18:19 And Jesus Said Unto Him, Why Callest Thou Me Good? None Is Good, Save One, That Is, God.

Mark 10:18 And Jesus Said Unto Him, Why Callest Thou Me Good? There Is None Good But One, That Is, God.

Mt 19:17 And He Said Unto Him, Why Callest Thou Me Good? There Is None Good But One, That Is, God: But If Thou Wilt Enter Into Life, Keep The Commandments.

Jesus is repeatedly saying, "I am not good, only God is good, I am not pure, only God is Absolutely Pure and Holy and glorious is His name. If you want to go to heaven KEEP THE COMMANDMENTS. " But what do we say? We say "If you want to go to heaven call Jesus GOD and believe he died for you!" It is so unbiblical let alone against common sense.

Jesus says:

John 20:17 Jesus Saith Unto Her, Touch Me Not; For I Am Not Yet Ascended To My Father: But Go To My Brethren, And Say Unto Them, I Ascend Unto My Father, And Your Father; And To My God, And Your God.

Jesus is calling God both my God and your God, my Father and your Father. If Jesus has a God Jesus can't be God. It is simple common sense. If Jesus was God who did Jesus pray to, himself? Imagine Jesus (if he was God) falling on his face praying to himself? God does not pray, but his servants pray to Him.

John 11:42 And I Knew That Thou Hearest Me Always: But Because Of The People Which Stand By I Said It, That They May Believe That Thou Hast Sent Me.

Mt 26:39 And He Went A Little Farther, And Fell On His Face, And Prayed, Saying, O My Father, If It Be Possible, Let This Cup Pass From Me: Nevertheless Not As I Will, But As Thou Wilt.

Heb 5:7 Who In The Days Of His Flesh, When He Had Offered Up Prayers And Supplications With Strong Crying And Tears Unto Him That Was Able To Save Him From Death, And Was Heard In That He Feared;

Mt 27:46 And about the ninth hour Jesus cried with a loud voice, saying, Eli, Eli, lama sabachthani? that is to say, My God, my God, why hast thou forsaken me?

Mark 15:34 And at the ninth hour Jesus cried with a loud voice, saying, Eloi, Eloi, lama sabachthani? which is, being interpreted, My God, my God, why hast thou forsaken me?

Luke 5:16 And he withdrew himself into the wilderness, and prayed.

Luke 22:44 And being in an agony he prayed more earnestly: and his sweat was as it were great drops of blood falling down to the ground.

Mt 26:36 Then cometh Jesus with them unto a place called Gethsemane, and saith unto the disciples, Sit ye here, while I go and pray yonder.

Mt 4:10 Then saith Jesus unto him, Get thee hence, Satan: for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve.

Lu 4:8 And Jesus answered and said unto him, Get thee behind me, Satan: for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve.

We all know that only God is omnipotent. God can do anything He wills. He has full power over all of His creation. If somone admits that he/she is not omnipotent it is obvious as the sun that that person can never be God. So what did Jesus say about this?

John 5:30 I Can OF MINE Own Self DO NOTHING: As I Hear, I Judge: And My Judgment Is Just; Because I Seek Not Mine Own Will, But The Will Of The Father Which Hath Sent Me.

John 12:49 For I have not spoken of myself; but the Father which sent me, he gave me a commandment, what I should say, and what I should speak.

John 7:16 Jesus Answered Them, And Said, My Doctrine Is Not Mine, But His That Sent Me.

John 8:42 Jesus Said Unto Them, If God Were Your Father, Ye Would Love Me: For I Proceeded Forth And Came From God; NEITHER CAME I OF MYSELF, But He Sent Me.

John 17:3 And This Is Life Eternal, That They Might Know Thee The Only True God, And Jesus Christ, Whom Thou Hast Sent.

John 6:29 Jesus Answered And Said Unto Them, This Is The Work Of God, That Ye Believe On Him Whom HE Hath Sent.

Let alone claiming to be omnipotent, not only does Jesus admit that he is not but he says that he is capable of doing absolutely nothing on his own. That is how humble he is before his Creator. He furthermore admits that there is a difference between his will and the will of God but that which makes him special is that he seeks the will of God and not his own will. He furthermore clarifies that God sent him. If Jesus was God he wouldn't say God sent him, he would say I came on my own power and leave. Imagine someone saying "I sent myself"! It doesn't make any sense at all to say that Jesus is God.

Joh 13:16 Verily, verily, I say unto you, The servant is not greater than his lord; neither he that is sent greater than he that sent him.

Joh 14:28 Ye have heard how I said unto you, I go away, and come again unto you. If ye loved me, ye would rejoice, because I said, I go unto the Father: for my Father is greater than I.

We all know that only God knows everything. God is omniscient. If someone admits that they don't know everything that person can never be God. It is very obvious. So what did Jesus say about knowing everything?

Mr 13:32 But of that day and that hour knoweth no man, no, not the angels which are in heaven, neither the Son, but the Father.

Mt 24:36 But of that day and hour knoweth no man, no, not the angels of heaven, but my Father only.

Jesus admits that he does not have knowledge of the hour (the day of Judgement). Only God knows that. Therefore it is clear that Jesus is not God. A lot of poor christians take the words of Jesus out of context and interpret it the way they want to believe but Jesus himself makes the meanings of his words quite clear for those that want to listen. Some take the words of Jesus "I and my father are one" to mean that Jesus is God. Such poor christians are unfair only to themselves. Jesus explains the meaning of biblical oneness:

John 17:21 That They All May Be One; As Thou, Father, Art In Me, And I In Thee, That They Also May Be One In Us: That The World May Believe That Thou Hast Sent Me.

So looking at the above verse do you ever hear anyone saying that all of us are also God because Jesus is one with the Father and we are all one with the Father and Jesus? Of course not, so why deliberately misinterpret the words of Jesus? The &#65533;oneness&#65533; that Jesus talks about is oneness in purpose.

Lastly I will quote something that alone makes the truth clear for those that want to see:

1Jo 4:12 No man hath seen God at any time. If we love one another, God dwelleth in us, and his love is perfected in us.

1Ti 1:17 Now unto the King eternal, immortal, invisible, the only wise God, be honour and glory for ever and ever. Amen.

1Ti 6:16 Who only hath immortality, dwelling in the light which no man can approach unto; whom no man hath seen, nor can see: to whom be honour and power everlasting. Amen.

No man can see God. Jesus was seen therefore Jesus is not God. It is simple as 1+1=2 but for those that have been indoctrinated (brain-washed) since childhood that 1+1+1=1, no wonder so many people can't see straight!

peace,

rdqvnhlbjmthwjegyuivmpzrknhrymxsfv

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KF2TI, WA2VUY, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4VUD, N4CT, NA5G, NI6T, K7AR, WC7N, K8YSE, NE8Z, N0KV, 9M2TO, DJ5AV & DX News Letter, DF4RD, EA4DX, G4ZVJ, G0IAS, IT9BLB, LX1NO, OH1EH, SP5EWY, SV/OK1YM, VE3SRE, VE5MX, VK2RD, VK6APK and XE1J for the following DX information.

3B6, AGALEGA (POSTPONED). If you are not an OPDX InterNet Subscriber, you may have missed the special bulletin announcing that the 3B6RF operation was postponed (Click on the links below to SUBSCRIBE). Basically, officials of the newly elected Mauritius Government have asked the team to postpone the expedition for 2-3 weeks for security reasons. Since there are only two regular ships per year heading to 3B6 they have to postpone their activity for six months until May 2001. For more details and updates, check their Web page at: http://www.agalega2000.ch

3W/DU/XU, SOUTHEAST ASIAN TRIP. Andy, G4ZVJ, will be on vacation in South East Asia between October 13th and November 11th. There may be some CW activity from the following countries:
3W (Vietnam) - October 15-22nd, callsign assigned upon arrival.
XU (Cambodia) - October 23-26th, callsign XU7AAV
DU (Philippines) - October 29th- November 10th, callsign DU3/G4ZVJ
QSL via G4ZVJ: Andy Chadwick, 5 Thorpe Chase Ripon, North Yorkshire, HG4 1UA England, U.K. His Web page is at: http://www.qsl.net/g4zvj

4W, EAST TIMOR. Dennis/K7BV, Made/YB9BV and Dick/N6FF are now active. As of of publication, the only station spotted so far is 4W/K7BV on 40/30/20/17 meters CW. Two stations are expected to be active. Keep a lookout for 4W/N6FF. According to one of the press releases, a big decision was made that 4W/N6FF will be the callsign used on 160 and 80 meters. The 4W/K7BV callsign will be used on all other bands. QSL via KU9C. Also, check their Web site at:
http://www.qth.com/k7bv/timor

5R, MADAGASCAR (SLIM NOT!). A few weeks ago OPDX received a report on a possible SLIM operation by 5R8O. This station continues to be active on 20 meter CW signing with the callsign 5R8O, giving his name as Albert and his QTH as Tananarive, Madagascar. He also is saying QSL via 5R8FL. However, thanks to Ed, NA5G, who has been in contact with 5R8FL the following status report was given on 5R8O. Andreas, 5R8FL, states that the station "is legal, his callsign is a bit special because he operates inside the Gendarmerie county. So to simplify the QSL reception, he ask me to be his QSL manager." WFWL!

IRANIAN WEB PAGE. Mac, W3HC, reports that for those who are interested, he has a Web page for Iran up and running. Any news he receives from Iran will be posted on: http://www.ep3sp.homestead.com/index.html

8R, GUYANA. "THE 59(9) DX REPORT" reports that Arliss, W7XU, will be active from here (after the FY operation, see below) October 30th through November 7th as 8R/W7XU. Activity will be on 50.110 MHz CW and SSB, coordinating on 28885 kHz. QSL via W7XU.

9G. GHANA. A group from the Netherlands will be active from here October 6-24th. They plan to use the callsign 9G1AA plus their own 9G5 callsigns. Activity will be on 80/40/20 meters CW and 6 meter SSB. Also, there may be some activity on 160 meters.

9M STATIONS ON 6 METERS. Tex, 9M2TO, reports that this season 9M2 6 meter stations (9M2NK, 9M2KE, 9M2KT, 9M2TO, 9M2XA and 9M2/JI1ETU) are looking for EUs, NAs and SAs on 6 meters. They know that they have a "SHORT-PASS-OPENINGS-EUs" at 0700z (+/-) in November, but they do not know the other passes for the areas. Please watch for the 9M2TO/B beacon on 50.005 MHz running 24 hours and inform them. The 9M2 station check the DX-SUMMIT cluster for QSNs. You can also send E-mail to Tex at: izumo@pc.jaring.my

9M6, EAST MALAYSIA. The Cinco Nueve Contest Group will be active from the Hillview Gardens Resort from October 21st through November 2nd. The operators include Al/K7AR, Lee/N7NU, Bob/W7YAQ, Bob/W7RR and Dave/N6NZ. The group will be a Multi-Single operation using the callsign 9M6AAC during the CQWW SSB Contest. Outside the contest the group will be using their own callsigns, still waiting to be issued. Check the group web site at: http://www.qsl.net/k7ar
Web site will have photos and log searches during the expedition.

A5, BHUTAN (Update). Charly, K4VUD, reported this past week that he has applied for the callsign A52UD for his operation in December. He also states the following: "As of today (October 4th), two hams are slated to arrive in A5 on December 1, 2000. The 1KW xmit power is ok-ed (with an extra fee!!!). If we can get a third ham on this trip, all three of us will save some money on Bhutan's tourist fees for groups of 3 or more. Come on, just need one more daring adventurer for this trip!" Charly's E-mail address is: k4vud@hotmail.com

E30, ERITREA. Chris/DL5NAM and Dieter/DF4RD are going to be active and have confirmed the date of October 17th through November 1st. Callsigns are still unknown and will be issued after their arrival in Asmara. Activity

will be on 160-6 meters on SSB, CW, RTTY and PSK31 including participation in the CQWW DX SSB Contest. They will operate from the Nyala Hotel (QTH of E30GA). QSL via home callsigns. OPDX InterNet Subscribers will receive the press release as an additional bulletin.

FS, ST. MARTIN. A report indicates that members of the NJDXA will be active from here soon or possibly during the CQWW DX Contest. Operators mentioned are K2CO, N2BIM and possibly others.

FY, FRENCH GUYANA. "THE 59(9) DX REPORT" reports that Arliss, W7XU, will be active as FY/W7XU October 27-30th on the same plan as 8R (above).

GD, ISLE OF MAN. Joe/K1JB and Mike/K1EU are expected to sign GD6IA from October 26-29th. Activity will include an entry in the CQWW SSB Contest with operations on 160-6 meters CW/SSB.

GJ, JERSEY (Update to OPDX.473). Barry, N0KV (M0CQS), provides OPDX with the following update concerning the upcoming operation from the Jersey Amateur Radio Society club station, October 23-30th. The group of operators is finalized now and includes members of the Mile High DX Association (Denver, CO) and the Darley Amateur Radio Club (UK). The callsigns are:
GJ1Y (CQWW contest only) GJ0HHY (outside contest)
MJ/N0KV (outside contest) MJ/KU4CG (outside contest)
MJ/W0DM (outside contest)
The group of operators will be active from LaMoye, Jersey, Channel Islands, UK (Zone 14), as a Multi/Single entry in the CQWW SSB Contest. Operation outside the contest will be CW, SSB, and possibly PSK31, starting Monday, October 23rd, and ending after the contest. Activity will take place largely day/evening hours (local) before the contest. The station is located in "Worked All Britain" square WV64, and Jersey is IOTA EU-013. There will be two stations:
Station 1: IC-756PRO, Alpha amp (400W), A3 tri-bander, R7000(WARC), bandpass filter
Station 2: IC-756, club tri-bander, 40/80M dipoles, bandpass filter
QSL via N0KV (CBA: 12200 Boothill Dr., Parker, CO 80138), except MJ/KU4CG goes via KU4CG CBA.

HC, ECUADOR. Once again Doctor Rick, NE8Z, will be operating as HC1MD from here, November 25th through December 11th. Activity will be on 40-10 meters CW/SSB (500 watts) and 6 meters (10 watts). He will travel to different areas in Ecuador and will sign: HC1MD, HC1MD/HC2, HC3, HC6 and HC7. Rick will also be looking for the following new DXCC entities for his HC1MD DXCC: East Timor, Austral Islands and Laos (any assistance/ideas will be appreciated, send E-mail to: ne8z@yahoo.com). QSL via K8LJG: John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. Also, please view the HC-DX AWARDS at: http://www.octavia.com/qsl/awards.htm

IOTA NEWS.....
AF-018. The Pantelleria Contest Team, IH9P, will once again travel to Pantelleria Island (CQWW zone 33, African Italy, IIA:TP-01) for this year's CQWW SSB contest at the end of October. The Pantel-leria's Team's goal will be to be more competitive than in 1999's

effort, with the addition of a few new operators, new antenna systems and a new site located just few meters far from salt water. The team will be arriving on the island on October 22nd and should be testing the station installations by Thursday. This year's team members include KR7X, W1NA, W7ZB, OL5Y, I2IFT, IK2ANI, IK2CIO, IK2HKT, IK2RZP, IK2YCN, IN3QBR, I8QLS, IK8ETA, IT9BLB, IT9VDQ, IT9WPO, IT9ZGY and IT9ZMX. This year's operation looks again to be an all FT-1000 MP effort with assorted amplifiers. Team Pantelleria (IH9P) looks forward to being your zone 33 multiplier for the contest and working all of you in the contest. QSL via KR7X (CBA). Their Web site is at: http://www.qsl.net/ih9p2k

OC-140. The VK6 DX Chasers Club will be active from Direction Island November 5-13th. Direction Island is part of the Mackerel Islands of which Thevenard Island has been activated previously by Mal, VK6LC. The Island is located 12 Km offshore from the small West Australian town of Onslow in the state's North West and some 1400 Km by road from the capital city, Perth. A group of 10 operators will activate the island with 4 HF stations. Six meter operations will also be included. This is the same group that activated Woody Island (OC-170) in March 1999. The callsign to be used will be VK6DIR and operation will be on 40-6 meters, including the WARC bands. 75/80 meter operations will be at-tempted but hopes are not high for any great success on that band due to the latitude and time of year. QSL via Neil, VK6NE. Inquiries will also be handled by Neil at: vk6ne@upnaway.com For a look at the Mackerel Islands, go to the Web page: http://www.mackerelislands.com.au News of the expedition will also be posted from time to time at the VK6ANC Web site at: http://www.ncrg.org.au

OC-212. Look for Broughton Island to be on the air now through October 15th. Activity will be on all bands 80-6 meters, CW, SSB, PSK31 and 29 MHz FM if band is open. The callsign is VI2BI, and the operators are: SSB - VK2EO, VK2NP, VK2PB and VK2JV CW - Frank/VK2ZL, Ray/VK2ARY and Don/VK2ADM QSL via VK2EO or via Bureau.

J8, ST. VINCENT AND THE GRENADINES (Update). Angel, WA2VUY, informs OPDX that their team of operators have received the special callsign J80WW (J8 Zero WW) to be used during the CQWW SSB Contest. Please refer to OPDX.478 for other details.

KH2, GUAM ISLAND. Look for Masanori/AA9WZ, JA1OBY, Hiroshi/JA1XHE, JH1FUD, Hiroshi/JL1LOW and JR1XIM to be active on IOTA OC-026 from October 26-30th. They will be active on HF bands including WARC bands SSB, CW and digital modes. QSL via the bureau to each home callsign or direct to each Callbook address. QSL AA9WZ/KH2 via JA1OZK.

KH5/KH5K, PALMYRA & KINGMAN REEF. By the time you read this, the KRPDXG team should be on their way to Palmyra. The Hawaii operators KH7U, NH6UY,

WB4JTT and KH6ND, along with Captain Bill Austin and his crew on the motor schooner Machias, should have departed from Christmas Island this past weekend to pick up Mike, KH6ND, from Palmyra to head to Kingman Reef. Activity is to begin on October 18th. Suggested frequencies are:
CW - 1826.5, 3503, 7003, 10103, 14023, 18073, 21023, 24893, 28023, 50105
SSB - 1826.5, 3795, 7065, 14195, 18145, 21295, 24945, 28465, 50105
RTTY - 7043, 14083, 28083 kHz
Other suggested frequencies: U.S. General operators are to look on 20 meters SSB on 14245 kHz and on 40 meters CW on 7023 kHz. JA stations are to look for them on an alternate 160 meters frequency on 1824 kHz. Look on 6 meters for a breakable beacon (TX 50105/RX 50115) and also listen to 28885 kHz.

OD, LEBANON. Pavel, OD5/OK1MU, has confirmed that he is now active also on 50 MHz and 144 MHz. He is using the following equipment: for 50 MHz 100W + 5 el. Yagi; for 144 MHz 100W + 10 el. DL6WU. His on-line log is available at both: http://www.qsl.net/ok1mu
http://www.okdxf.cz
QSL cards are still via OK DX Foundation, P.O.Box 73, Bradlec, 29306 Czech Republic.

OH0, ALAND ISLAND. Ari, OH1EH, informs OPDX that after several antenna parties, the Aland Islands contest station is ready to hit the airwaves with several new antennas, including a 3 element full-sized 80m delta-loop. For more info on the new antenna system, check out the Web page:
http://www.qsl.net/oh0z
OH0Z will be active in the CQ WW DX Contests, 160-10 meters, operated by OH1EH (SSB) and OH1JT (CW). QSL via OH1EH: Ari Korhonen, Kreetalank. 9, FIN29200 Harjavalta, Finland.

OOOPPPSS DEPARTMENT. In last week's bulletin, OPDX.479, under "9X, RWANDA" Charlie's callsign should have been N4CT not N4XT. Also, under "KH0, MARIANA ISLAND", the callsign "KH2F" was inserted instead of NH0S for one of the operators.

QSL INFO AND NEWS.....
Tex, 9M2TO, reports that all the September QSOs QSLs including the WAE and RTTY contests have been sent out to the JARL Bureau on October 2nd.

New Address. Beginning October 1, 2000, the QSL Manager for 3W7CW has a new address. ONLY QSL to Adam, SP5JTF, new address as follows:
Adam Perz, P.O.Box 12, 01-323 Warszawa 83, POLAND. The previous SP5AUC address (P.O.BOX 11 Warszawa 93) is open only until the end of the year. That post office has been relocated quite a distance away from SP5JTF, and it has been quite complicated to check POB there regularly. Additionally, a lot of IRCs and green stamps have been stolen from SASEs in that place. Also, SP5JTF has an E-mail address, so you can ask him directly for QSLs:
sp5jtf@radio.org.pl
The 3W7CW QSLs should be back from the printer probably early November and all request should be answered by the end of this year.

Roberto, EA4DX, is glad to announce that 8Q7XX cards will be hitting your mailboxes this week. All cards received with postage up to September 30th, have been answered. More than 1200 envelopes received in the last two weeks have been carefully processed since his return from the Maldives. Some of you will have a turnaround of less than one week for your QSL. Cards received from now on will be answered on a weekly basis. Roberto states, "Thank you all and especially NCDXF for their continuous support." Logs, guestbook and QSL info available at: http://www.qsl.net/ea4dx/

7Q7TB and VP2MDC QSLs. Send DIRECT cards to G0IAS. However, Dave, G3TBK, is handling the bureau QSLs. Dave is sorry about the length of time taken to answer the cards, but his work schedule is large and his time in the UK is very limited, so PLEASE BE PATIENT... A couple of weeks should see ALL direct cards answered. Bureau cards should be complete by the month's end. Dave will be back in J3-land at the end of the month and perhaps G0IAS will handle the cards (more about that when the picture unfolds....).

BI2J QSL Update. Mac, W3HC, reports that all photos and information for the BI2J cards have been received from Alan, BA1DU. Mac will send them to the printers this week.

Norby, LX1NO, reports that QSL requests for OZ1AA should be answered soon. He hopes to receive the cards from the printer by the end of this month. Your requests will then be answered as soon as possible.

R2, KALININGRAD (Attention Award and Prefix Hunters). Ben, OZ5AAH, will again be active from late afternoon October 30th through November 5th around midnight from the club station in Kaliningrad as R2/OZ5IPA. Activity will be on CW/SSB and also on the WARC band, but no 6 meter operations. Ben will, of course, participate in the International Police Associations Contest November 4-5th. QSL direct via his home callsign only: Ben Jakobsen, 9 Knoldager, DK-2670 Greve, Denmark (will be OK for most POLICE awards). Contest info can be found on both:
http://www.ipa-rc.de or http://www.iparc.com

SV9, CRETE. Roby, IZ3CYN, will be active as SV9/IZ3CYN from October 10-15th. Activity will be on 20/15/10 meters SSB. QSL via homecall.

SV/A, MOUNT ATHOS. "The DX News Letter" reports that Monk Apollo hits the airwaves with the special callsign SY2A now through the end of the year. QSL via the CBA of SV2ASP. OPDX spotted Monk Apollo on RTTY this past week on 14086 kHz around 2045z.

TI, COSTA RICA. Look for a group of stateside operators to be active from Quepos as K4QFF/TI8, October 7-14th. Activity will be on the satellites UO-14, AO-27, SO-35 and RS-13. QSL via K4QFF.

VB2, CANADA (Additional info to OPDX.479). Bob, VE3SRE, provides OPDX with the following additional info on the upcoming VB2R operation. A team of VE operators will be active from Zone 2 during the CQ World-Wide SSB Contest and a few days before and after the contest. The operation will be totally conducted under generator power from the James Bay Region in northwest Quebec. Operators at this point are: VE3BY, VE3DXE, VE3SRE,

VE3VFT, VA3KO, VA3MFE, VE3VAM, VE3TV, VE3RMF, VE3DBF, VA3IX, NB1B, VE3KJS, and VE3HAE. There is a special QSL card available commemorating the 100th anniversary of the birth of E.S. (Ted) Rogers, pioneer Canadian amateur, inventor of the "batteryless radio" and Canadian broadcasting pioneer. QSL via VE3BY. A Web site is available at: http://www.fortunecity.com/marina/westindia/597/zone2

VC5, CANADA (Update). Todd, VE5MX, informed OPDX that the special callsign VC5C assigned to him to be used between October 27-30th, is to commemorate the 125th anniversary of the Supreme Court of Canada. Also, look for VC5C in the CQWW SSB Contest as a Multi/Single entry. Sam, VE5SF, will be handling the QSLing chores.

XF2, MEXICO (Attention Prefix Hunters!). Jose Levy, XE1J, informs OPDX that he will activate the prefix XF2 on the air for the first time. Look for the callsign XF2UQZ to be active from the Isla de Sacrificios (Veracruz, Mexico) from 2300z October 11th through 0300z October 13th. Activity will be on 80-10 meters CW/SSB. QSL to XE1UQZ.

XU, CAMBODIA. You have only a few more days to work Toni/EA5RM and Pedro/ EA7DBO as XU7ABD. They will leave October 13th. Activity over the weekend has been on 20/15/12/10 meters. QSL via EA4URE. The XU7ABD logs are available via Web site at: http://www.qsl.net/xu7abd

XW, LAOS. It has been reported that Toni, Z21KD, managed to get a license, apparently valid until October 30th. The assigned callsign is XW4XJ. He is expected to be active mainly on 20 and 10 meters SSB (w/100 watts) presently. However, Toni will try other higher bands when he gets time to set up more antennas. Keep in mind that he is not in Laos for a holiday, so his operating schedule may vary. He was spotted on 10 meters over the past weekend on 28460 kHz around 1345z. QSL via Z21KD, direct only: Toni Latz, P.O.Box 2081, Bulawayo, Zimbabwe.

-=-=-=

(NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

Hi Tedd,
Excellent job on the DX Bulletin. The addition of the URLs are first
class. Thank you for your unselfish and voluntary contributions to
the Amateur Radio DX community and to those who contribute to the
bulletin, gratis. 73 Murray, K3BEQ

> GJ, JERSEY (Update to OPDX.473). Barry, N0KV (M0CQS), provides OPDX with
> the following update concerning the upcoming operation from the Jersey
> Amateur Radio Society club station, October 23-30th. The group of operators
> is finalized now and includes members of the Mile High DX Association
> (Denver, CO) and the Darley Amateur Radio Club (UK). The callsigns are:
> GJ1Y (CQWW contest only) GJ0HHY (outside contest)
> MJ/N0KV (outside contest) MJ/KU4CG (outside contest)
> MJ/W0DM (outside contest)
> The group of operators will be active from LaMoye, Jersey, Channel
> Islands, UK (Zone 14), as a Multi/Single entry in the CQWW SSB Contest.
> Operation outside the contest will be CW, SSB, and possibly PSK31,
> starting Monday, October 23rd, and ending after the contest. Activity
> will take place largely day/evening hours (local) before the contest.
> The station is located in "Worked All Britain" square WV64, and Jersey
> is IOTA EU-013. There will be two stations:
> Station 1: IC-756PRO, Alpha amp (400W), A3 tri-bander, R7000(WARC),
> bandpass filter
> Station 2: IC-756, club tri-bander, 40/80M dipoles, bandpass filter
> QSL via N0KV (CBA: 12200 Boothill Dr., Parker, CO 80138), except MJ/KU4CG
> goes via KU4CG CBA.
>
> HC, ECUADOR. Once again Doctor Rick, NE8Z, will be operating as HC1MD

> from here, November 25th through December 11th. Activity will be on 40-10
> meters CW/SSB (500 watts) and 6 meters (10 watts). He will travel to
> different areas in Ecuador and will sign: HC1MD, HC1MD/HC2, HC3, HC6 and
> HC7. Rick will also be looking for the following new DXCC entities for
> his HC1MD DXCC: East Timor, Austral Islands and Laos (any assistance/ideas
> will be appreciated, send E-mail to: ne8z@yahoo.com). QSL via K8LJG:
> John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. Also, please view the
> HC-DX AWARDS at: http://www.octavia.com/qsl/awards.htm
>
> IOTA NEWS.....................
> AF-018. The Pantelleria Contest Team, IH9P, will once again travel to
> Pantelleria Island (CQWW zone 33, African Italy, IIA:TP-01) for
> this year's CQWW SSB contest at the end of October. The Pantel-
> leria's Team's goal will be to be more competitive than in 1999's
> effort, with the addition of a few new operators, new antenna
> systems and a new site located just few meters far from salt
> water. The team will be arriving on the island on October 22nd
> and should be testing the station installations by Thursday. This
> year's team members include KR7X, W1NA, W7ZB, OL5Y, I2IFT, IK2ANI,
> IK2CIO, IK2HKT, IK2RZP, IK2YCN, IN3QBR, I8QLS, IK8ETA, IT9BLB,
> IT9VDQ, IT9WPO, IT9ZGY and IT9ZMX. This year's operation looks
> again to be an all FT-1000 MP effort with assorted amplifiers.
> Team Pantelleria (IH9P) looks forward to being your zone 33
> multiplier for the contest and working all of you in the contest.
> QSL via KR7X (CBA). Their Web site is at:
> http://www.qsl.net/ih9p2k
>
> OC-140. The VK6 DX Chasers Club will be active from Direction Island
> November 5-13th. Direction Island is part of the Mackerel Islands
> of which Thevenard Island has been activated previously by Mal,
> VK6LC. The Island is located 12 Km offshore from the small West
> Australian town of Onslow in the state's North West and some
> 1400 Km by road from the capital city, Perth. A group of 10
> operators will activate the island with 4 HF stations. Six meter
> operations will also be included. This is the same group that
> activated Woody Island (OC-170) in March 1999. The callsign to
> be used will be VK6DIR and operation will be on 40-6 meters,
> including the WARC bands. 75/80 meter operations will be at-
> tempted but hopes are not high for any great success on that
> band due to the latitude and time of year. QSL via Neil, VK6NE.

Has anybody heard of any Dxpeditions using psk-31? The mode is great for weak signal work but I wonder how it would hold up to pile-ups.

Probably work GREAT in pileups. Everybody turns NET and AFC on, and then the whole gang will be dead nuts on the right frequency... More fun than RTTY pileups I'd bet....

If you look at QSO numbers from DXpeditions and compare RTTY contacts vs. SSB/CW, you'll see that the digital percentage is normally very low. So I wouldn't hold my breath for too many PSK-31 DXpeditions.

Correct me if I'm wrong, but I think the gentleman over there on Walter's side of the pond who started this PSK-31 stuff intended it to be a low power, keyboard to keyboard rag chew mode. I'm not sure why, but not many hams seem to be very good at ragchewing anymore, everybody just want's that 59 DXCC click. Seems like no matter what comes along anymore we immediatly turn it into a Contest/DXCC mess....

3204. Re: DX and psk-31

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-09 00:00:00 UTC
From: Keith Beebe <keith.beebe@verizon.net>
Message-ID: <m%lE5.12863$4i5.650905@typhoon2.ba-dsg.net>
Source record: 19242

My first reaction after using the mode is that it would be very difficult
(but not impossible) for two reasons:

First, the mode is really designed for keyboard to keyboard conversations.
That means both stations are dead on each others frequency and communicating
one-on-one. Multiple stations calling on the DX frequency would get
virtually no where for the particular technical nature of this mode and just
plain QRM reasons. (It's bad enough now with the other modes!!)

Second, it MIGHT work if the DX station would use split. However, as you
know, it is diffcult at best to tune a PSK31 signal, especially in the "heat
of battle" of a typical pileup. There would be contacts, but the rate would
be nothing compared to RTTY.

In the case of PSK31 DX'ing, it would take a very good operator at the DX
end to do this right.

Keith Beebe W3KB
(currently with 276 confirmed on RTTY)

I made all of three PSK31 contacts from Clipperton, partly due to the designated PSK31 computer dying on the boat there, but strongly believe that PSK31 will become a prime DX, including DXpeditions, mode. It works very well at low power, and should cause less interference to the other stations, which are both useful characteristics. I don't think it'll turn out to be any worse then RTTY in a pileup.

I think it's just that we haven't quite figured out how to do it yet.

73, doug

115 confirmed, 130 worked, all on RTTY, in just over two years.

3206. new radio forum

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-09 00:00:00 UTC
From: "Express Electronics Inc." <exports@exportradios.com>
Message-ID: <2_pE5.103$Aa6.45145@nnrp3.sbc.net>
Source record: 19244

At Express Electronics Incorporated, we have just started our own radio forum. In the past 6 months, we have been kicked off or threatened by most radio forums and Newsgroups. Why, you may ask? The answer is very simple. We want the truth to be known. We do not sell products with problems, nor do we sell merchandise that has been refurbished, we even refuse to sell anything that won't stand up to our one year warranty. When these points are brought up, it seems to aggravate our "so called" competition, as well as the many radio enterprises out there. Then there are people who tend to nearly hyperventilate at the idea of selling something that can be used illegally. As we sell radio equipment worldwide, the same laws may or may not apply to one radio operator as they do with another. We have met many people that are wanting simple answers to simple questions, but are afraid of or are intimidated by snobbish American radio enthusiasts. We feel this is wrong, and for this purpose have started our own radio forum. We want radio enthusiast to be able to discuss Radio for the sake of radio, without censorship. This will not be the place to discuss laws or consequences of breaking laws in your country. This will simply be a place for questions to be asked and answers to be given. You can even tell some of your radio stories people have heard for years, and will not have to worry about your message being edited or deleted. Feel free to discuss Export Radios, FreeBanding, Linear Amplifiers, and even modifications. This is an open forum where you and our staff can give information and talk about everything radio. This forum is for radio enthusiast, not politicians, or lawyers. If you would like to enter this forum, just click on the link below. Opening topics are still being entered, new suggestions for new sub-forums are welcome.

3207. Michigan Hams

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-09 00:00:00 UTC
From: helmsman <>
Message-ID: <34k4usk94hijaie66cugp8omtn0u58od4m@4ax.com>
Source record: 19245

This is a call for action for all Hams that want to continue using their MOBILE radios, or even wish to transport their PORTABLE/HANDHELD radios in their vehicles without obtaining a special permit from the Michigan State Police.

On Sept. 27, 2000, Michigan Rep. Mike Kowall sponsored House Bill HB-6012 that amends sec. 508 of 1931 PA 328 (MCL 750.508). Co-sponsors to this amendment are Reps. Cassis, Julian, Shackleton, Birkholz, Howell, Scranton, and Tabor and has been referred to the Committee on Transportation.

Sec. 508 has been completely rewritten.

Subsection (1) states ...shall not either equip a vehicle with a radio receiver, or possess in a vehicle a portable radio receiver that receives...

Subsection (2) does not exempt Hams from the permit requirement as the non-amended sec. 508 did.
Subsection (2) states ...does not apply to a vehicle owned or used by an individual who has obtained a valid permit...
This permit requirement applies to Law Enforcement Officers and Amateur Radio Operators.

This is a bad Bill for Amateur Radio in Michigan on the whole, and especially for those attempting to provide a service to our communities. This is another hurdle which should not have to be jumped by the volunteers that give so much already.

Call or e-mail your State Representative today and let's put a stop to this foolishness. You can find your Representatives number in the phone book or by going to http://www.michiganlegislature.org/ and then scrolling to the "Links to Other Sites" "State House".

HB 6012 reads as follows:

(1) Except as provided in Subsection (2), A person shall not either equip a vehicle with a radio receiver, or POSSESS in a vehicle a portable radio receiver, that receives radio frequencies assigned by the federal communications commission for police purposes.

(2) Subsection (1) does not apply to a vehicle owned or used by an individual who has obtained a valid permit from the director of the department of the State Police on a form prescribed by the director and who is either of the following:

(A) a law enforcement officer certified pursuant to the commission on law enforcement standards act, 1965 PA 203, MCL 28.601 to 28.616.

(B) An amateur radio operator licensed by the Federal communications commission in 1 of the following classes:

(i) technician class
(ii)Tech Plus class
(iii)general class
(iv) advanced operator class
(v)Amateur extra operator class

(3) this section does not restrict or prohibit equipping a vehicle with or using a radar detector.

Violations of this law carry a 1 yr jail sentence and a $500.00 fine.

3213. Stop missing DX, with Emailert!

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-10 00:00:00 UTC
From: fabsartoni@usa.net
Message-ID: <8rvlp5fso1@nnrp1.deja.com>
Source record: 19103

Hello All,
This is IK4VYX, Fabrizio.

If your pager or cellular phone supports SMS messages
via email, then the new "Emailert" service is a MUST
for you.
Emailert (TM) is a new embedded service provided by
the new DXTelnet ham software package (version 4.9):

http://www.qsl.net/wd4ngb/telnet.htm

You can set your own alerts on incoming DX Spots and
instantly get alert strings on the display of your cell
phone or pager.

Alerted spots are reduced in size to fit any existing
display, without any loss of information.
The "DX de " spot header is removed and multiple blank
characters are trimmed to reduce wasted space.

You can even set Emailert to send it's alerts to different
email addresses, simultaneously.

You're invited to download it from the above URL.
Please email me any feedback:

fabsartoni@usa.net

Bye for now.

Best (((73))) de Fabrizio (IK4VYX)

Why are you people so anal retentive about the FCC. We are an international company that ships equipment all over the planet. Your precious FCC has no authority over 95% of Earth's land mass. We sell equipment to amateur radio operators, CB users, police, fire departments, the US Government, and 18 foreign militaries. Everyone in our facility has a HAM ticket, big deal man, a 30 minute multiple choice test does not give you any special authority to tell a multinational corporation how to operate. If we want to discuss Crack Whores and Machine Guns then that's our thing, and we have every right to do so. And last time I check, the FCC had no authority to jail anyone, in any country, they pass out tickets and fines. We won't likely get one at our office in Dublin. This is supposed to be America "Home of the Free", yet you tight asses get your panties in a wad every time you think someone might step outside your precious conformity. Do you need Authoritative Leadership? Does everything have to be regulated, governed, and restricted? Is that for the good of the people, your country, or just you tight asses? Maybe all you "Captain Americas" should go out on the street put an end to crime and poverty instead of hiding behind your little radio. Or do you not a have license to do that? Gee, you better call your local politician and ask for a license for that, get a "License to have a Life" license while your at it.

Your IP address has been banned from a Class B Subnet Mask and down, we won't have to worry about your whining on our site, thanks but no thanks.

Yes, we have a retail store there in Marshall Texas, and a corporate office in Longview Texas, and shipping facilities in Indiana, Florida, Texas, Louisiana, California, and Dublin Ireland. We ship most everything to or from the US through Ireland, because it is a cheap trip; the closest European Union Country. We are a part of a larger corporation that imports consumer electronics for wholesale . We also maintain three high traffic web sites, a mail-order catalog business, an import/export firm, and we manufacture security products in Asia. You have probably bought many products that we imported, especially if it was a car audio item, security product, or of course radio equipment. We import everything from Stun Guns to Cordless Razors.

How is that funny, Rick?

HF0POL ---> Marek, SP3GVX/HF0POL sends us a resume of his activity from
King
George Island, South Shetlands. He has been at Arctowski Base since
December
1999 and will be there through December 2000. He also operated as
R1/HF0POL
from Bellingshausen Base (12-13 February and 4-13 August), as
LU1ZI/HF0POL
from Jubany Base (3-7 June) and as KC4/HF0POL from Peter J. Lenie Base,
aka
Copacabana (21-23 July). The QSL manager for all QSOs is SP3WVL, either
direct or through the bureau. Marek reports both the following addresses
for
SP3WVL are all right:
Tomasz Lipinski,
ul. Wodna 7 A / 6,
69-100 Slubice, Poland

or Tomasz Lipinski,
P.O.Box 78,
69-100 Slubice Poland

Marek was also active between December 1996 and December 1997; please
note that cards for contacts made with HF0POL during this time frame
should be sent to
SP3FYM.

Henry, SP9-3021

Andrew, try going to the "QSL Corner" at QRZ.COM. From there you can
"Search the QSL Mgr", which usually finds the correct manager (I've had a
few that I just couldn't locate - there or anywhere else).

I was also flyin' high last night - I was very surprised to hear Antartica!
I hope his QSL mgr comes through with that card!

don

If you click on "more information on HF0POL" at qrz, the name and address of the manager will appear.

Another good site for getting names and addresses of manager is the K4UTE site,

http://users.southeast.net/~rhicks/k4ute.htm

and you will find the same information there. The station you worked is manned by a group from Poland.

E5 doesn't appear to be assigned to any country according to the
International Callsign Prefix Allocations at
http://www.arrl.org/awards/dxcc/itucalls.html. My guess is that you may have
copied the call incorrectly.

The cluster sez:

E55U via ut2ub 1823 23 Oct 1999
E55IG specal event mgr ux3fw 0938 25 Oct 1999
E55WL QSL VIA UT1WA 1229 28 Oct 1999

But no E55's lately. So maybe it's a special event Russian
prefix, not really sure.

A little more research (using the Spot History on the OH2AQ webcluster)
shows that E5 has been used in the last year for one or more operations from
Kosovo. Since the callsign was obviously self-assigned, I'd imagine that it
would count for nothing for DXCC. There were also some operations of an E55
station in the last year, but it's unclear if these were in Kosovo or
elsewhere. Again, if they were from Kosovo, none of them would meet DXCC
requirements.

Hi Andrew,

Your enthusiasm is great to see and reminded me of my first DX contact back in 1981 when my General class ticket was three days old. It was 15 meters at night and I ran 100 watts into a 5 band trapped dipole; had Hallicrafter "twins," separate transmitter and receiver. The old man had an English accent so I figured I was talking to England. I was so new I didn't know the prefixes yet. He said his QTH was Palmerston, sounded English to me. I nearly fell off my chair at the end of the QSO when he said "Good evening to you from New Zealand."

DX is like that, it can really get you cranked! Sounds to me like you've been bitten by the DX bug! Welcome to the club!

3237. The search for a gene...

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-12 00:00:00 UTC
From: analog24@webtv.net
Message-ID: <13102-39E67A7F-16@storefull-177.iap.bryant.webtv.net>
Source record: 19124

GENETIC
FACTOR EYED

Biofeedback Systems in Los Angeles, is looking for
volunteers with a rare genetic inheritance, to participate in a
proprietary study.
At present, it is believed that fewer than one person in 400
carries a rare genetic makeup that predisposes them to having better
health than most, a strong immune system, and an unusually high energy
level. Aside from behavioral manifestations such as a generally positive
outlook on life, the principal evidence that this genetic factor is
present, is mirrored in the shape of the eyes.
It should come as no surprise then, that the eyes themselves
would be used to select the people who are nost likely to have this
elusive gene. Individuals selected for this study will be white,
Caucasian, of either gender, and between the ages of 25 and 50.
Compensation will be determined by a collective evaluation of the total
number of applicants selected. Drugs will not be administered as a part
of the study.
The eye contour that embodies the required genetic trait,
has been roughly described as "almond shaped," but this is not an
adequate definition. Exact specifications follow.
Looking in the mirror with the head level, the qualified
applicant will see that the lower half of their eyelid is CONVEX UPWARD,
from the bottom on either corner. The bottom part of the iris will be
partially covered by the lower eyelid (this is important), and there
will be a reasonable symmetry between the eyes on the left and right
side of the face.
Applicants must submit a close-up facial photograph for
evaluation. Since no risk or disease factors have been associated with
this gene, any risk to volunteers in the study is contraindicated.
Interestingly, it is apparent that the "energy gene" as it has been
called, may be dormant in one or both parents, yet it may be actively
transmitted to their children; but it is only infrequently active among
two or more siblings.
If you know of a person, or happen to notice one whose eyes
might qualify them for this study (preferrably among those employed in
the technical community), you may want to share this data with them.
Since so few people are fortunate enough to carry this gene, your only
encounter with one of them may be in a fleeting moment. It would be
wonderful if you had a copy of this announcement with you, and could
share it with a prospect in passing. Alternatively, you could specify
this website and posting date, or perhaps my email address.
They may then contact Mr. Norman Swartz at this

[virus-proof] email address: analog24@webtv.net (It is not generally realized that, because webtv has no hard drive, it is immune to destructive computer viruses.) Or, they may write to: Biofeedback Systems, Post Office Box 8501, La Crescenta, CA 91214. No telephone calls please. Depending upon the number of volunteers selected, applications will be accepted through the end of December 2000, with a possible extension through 31 January 2001. The duration of the study will be a minimum of two years.

None yet. Expect that if any new ITU recognized countries are created such Kosovo or East Timor (yes they currently have 4W but that is a UN prefix) that E5 might be issued. E4 was only recently (last year) issued for Palestine. However, they could also look at the available prefixes J9, O2-O9 (Oscar 2 to Oscar 9), V9, X2-X9 and Z4-Z9 (I won't even try to figure out the numerically based prefixes).

Current allocations can be viewed on the ITU website at http://www.itu.int/radioclub/rr/aps42.htm.

Easy, all HAMS boycott the state, and let the and all travel and recreational organizations know and have them tell the governor. All Michigan HAMS inform FEMA and other disaster agencies that they not be allowed legally to assist them anymore, and have THEM tell the governor.

Hi Morten,
A great antenna. I purchased and put mine up in 1982 and have had absolutely no problems in the 18 years. Still punches a hole thru the pileups at 70 feet.

Gain statistics from Telex/Hy-Gain operating/construction booklet that came with the antenna are:

Maximum gain (dbi): 20m (8.0) 15m (8.7) 10m (9.6)
Front-to-back ratio
(db) (22 +-5) (22 +-5) (18 +-5)

I have been completely satisfied with the antenna and highly recommend it. Good luck. 73 Murray, K3BEQ

You don't need to tell me, I already know. When you've
seen one Junior G-Man with a handy talkie and a ham license,
you've seen them all.

The bill is obviously intended to keep criminals from
listening to police frequencies in a car, with provisions
made for licensed amateurs to be exempt.

So quit bitchin', go get your exemption, and continue
with your 'public service' already......

73, Jim KH2D

Hi! I am trying to find a good dx/contesting headset. All I have found are the ones from Heil and another company called Warren Gregoire. Does anyone have any experience with either of these? Are there any other headsets out there not commonly known about? Any info will be greatly appreciated! Please email direct to: NZ8C@aol.com

3253. NEW Chipswitch manual! - And HR2510 Owners manual. BOTH PDF VERSIONS!!! FREE DOWNLOAD!

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-15 00:00:00 UTC
From: Karl Vesterling <kjv@adelphia.net>
Message-ID: <mreG5.523$%J6.50450@news1.news.adelphia.net>
Source record: 19139
Cross-posted to: alt.radio.cb.skip,rec.radio.amateur.dx,rec.radio.amateur.misc,uk.rec.radio.cb

Hi all!

Just thought I'd let you know that there is a new Chipswitch manual out. The one you get/have gotten with the Chipswitch is a bit difficult to read the programming tables. Well, PROBLEM SOLVED! The new manual is designed to look like the Original HR2510, HR2600 owners manual. The programming tables are also very nicely laid out without any confusion.

The manual is indexed, and searchable. If you have a chipswitch, by all means download it!

http://kjv.homeip.net/~hr2510

Click on the chipswitch information link on the left hand side.

If you go to the Radio Service section you can go to the HR2510 model in the Uniden section and download a PDF of the HR2510 owners manual as well. This one isn't indexed as it's basically a lows res scan of the original document. Also worthy of note is that the front cover WAS a tri-fold with the Schematic printed on the folding. This schematic was much too small to scan in. So, don't download it and expect to get it as part of the manual.

The HR2510 PDF manual was laid out in such a way that it can be printed, then folded, and aside from being a little larger than the original you should have a manual that is pretty close to the original.

Enjoy!

SB DX @ WW < KB8NW $OPDX.481
Ohio/Penn DX Bulletin No. 481

The Ohio/Penn DX PacketCluster
DX Bulletin No. 481
BID: $OPDX.480
October 16, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4UTE, K6GNX, N6RT, NI6T, WC7N, W7TSQ, AC8G, AC8W, K8YSE, 4S7RO/6Y5, DJ5AV & DX News Letter, DJ8FR, DF3CB, DU6/K9AW, EY8MM, FK8HC, G4CXT, G0PSE, HA0HW, IV3TAN, IZ1DFI, JA1ELY, JI3ERV, PA0VDV, RA9AC, SM6CAS, VK4FW, YS1RR and YT1AD for the following DX information.

3A, MONACO. Look for Tony/IK1QBT and Gianni/IZ1DFI to be active from here between October 21-22nd signing as 3A/homecalls. They will be using a Kenwood TS570, 100 watt (maximum legal power in 3A) to a vertical antenna multiband "Multicres". The only CW activity will be on all bands (emphasis on the WARC bands). QSL via the bureau or direct to their respective home callsigns:
IK1QBT - Tony Gallo, Via Capo S.Spirito 1/16, 17052 Borghetto Santo Spirito (SV) Italy
IZ1DFI - Gianni Pastorino , Via Clavesana 68 17051 Andora (SV) Italy.

3D2, CONWAY REEF. Mats/5X1Z (SM7PKK) and Nils/SM6CAS have announced a DXpedition here in 2001. Operators Nils/SM6CAS, Mats/SM7PKK, Janne/SM0DJZ, Pekka/OH1RY, Siggi/TF3CW and Steve/G4EDG will be active between April 5-24th. Three of the operators have already been on Conway Reef once or twice, and the majority of team are well seasoned DX-peditioners. Please note that they are looking for 2 more operators to join the team! The DXpedition will feature 4 complete stations running 24 hours a day. All stations will have their own generators, amplifiers and Force 12 antennas. No callsign/callsigns were mentioned in the press release. They have secured a suitable yacht for the undertaking of this DXpedition. The estimated cost of the DXpeditioon is approximately 45,000 (USD). Any support from clubs and individuals are greatly appreciated. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

3D2, CONWAY REEF. Hrane, YT1AD, reports that he has organized an operation to Conway Reef from February 5-15th, 2001. The following operators have been mentioned: YT1AD, YU1RL, YT6A, YU1NR, Z32AU (YU1AU), Z32ZM and possibly one more operator from Central America. There will be three stations active at the same time, each with 1KW amp. Each station will have two 3 element multiband beam antennas, one vertical and wires for Top Band. The callsign will be publisized on February 5th, 2001. The licence was issued on October 5th, 2000.

4W, EAST TIMOR. The operation by Dennis/K7BV, Dick/N6FF and Made/YB9BV as 4W/K7BV and 4W/N6FF should be coming to an end by the time you read this. OPDX InterNet Subscribers will receive the latest press release by Rod, WC7N, as an additional bulletin, however, a log search is available on the Web at: http://www.xcvr.com/4w/logsearch.asp

6Y, JAMAICA. Ron, 4S7RO, will be active on the air signing 4S7RO/6Y5. He has moved to Kingston, Jamaica, and expects to be here for the next two years. Meanwhile, Ron is not yet fully set up from 6Y5-land due to various shortcomings and inadequate equipment. However, he is working on it and hopefully will be back on the air very soon. He states that the local 6Y5 ham community has been VERY hospitable and generous. Ron plans to be active mainly on 20 meters CW/SSB (due to space restrictions). Unlike 4S7, Ron will sadly be unable to get on 160/80 meters. However, he may also try 6 meters and hopes to be able to work into the US! Also, his XYL, VU2MAB, will also be on the air from there shortly. So, YL award hunters...watch out! Those who worked him as 4S7RO on the various bands over the years and still need cards, please send them to Franz, DJ9ZB. However, when Ron does show up on the bands, please do not send cards to DJ9ZB as he is only aware of his 4S7 operations. QSL info is still not set. Stay tune.

9M6, WESTERN MALAYSIA. "The DX News Letter" reports that Peter, G4MJS, will be on the air as 9M6BAA on 6 meters and all HF bands from October 17-31st. QSL via G4SHF.

AH2, GUAM. Aki, JI3ERV/NH2C, Chairman of Guam Contest Club (GCC), informs OPDX that GCC will be active in the CQ World Wide DX Contest (phone) at the end of the month. The GCC, which was the Oceanic leader as a Multi-Single category in 1996, 1997 and 1999 (1998 won second place in the Oceania, as a Multi-Multi category), will try again this year to build on their Oceanic record as a Muliti-Single category using the callsign AH2R from Guam Island (KH2 - Zone 27, IOTA OC-26). Operators will be Aki, JI3ERV/NH2C; Kaz, JG3RPL/N1BJ; Seo, JR3RVO/WX8M; Toshi, JR7OMD/WI3O; Sam, JR8VSE; Koh, JH7QXJ and Noz, JE8KKX. QSL via JH7QXJ (direct or JA bureau, NOT KH2 bureau). PLEASE NOTE: The QSL Manager has changed. Their Sunrise/Sunset will be 2015/0755z. Also listen carefully for them between 7075-7100 kHz.

C6, BAHAMAS. Look for Gary/KI6T and Salvatore/KA6WHA to be active from October 25-30th using their homecall/C6A. They will also use C6AGS in the CQWW SSB Contest. QSL via home callsigns and C6AGS via KI6T.

D4, CAPE VERDE ISLAND. Alberto, IV3TAN, will be active from Sao Tiago (AF-005) from D44BS's QTH, October 22nd through November 1st. He will

participate in the CQWW DX SSB Contest as a Single Op/All Band entry with the special callsign D4A. For all QSOs with D44BS callsign, the QSL route is via Angelo Mendes, P.O. Box 308, Praia - Cape Verde. For all Contest QSOs with the D4A callsign, QSL is via I2MQP.

EP, IRAN. On October 10th, Hamid/EP3HR and his friend Yar/EP3SP opened their club station EP4PTT. This club is working with a license from Ministry of Post and Telephone of Iran. This club will only be active on 14 MHz as their equipment is home-made. Their antenna is a dipole and the output power is only 20 watts. QSL via the Iranian Bureau.

EY, TAJIKISTAN. Nodir, EY8MM, reports that an International group will participate in the CQWW SSB Contest as EY2A as a Multi/Multi entry. This is the first ever M/M attempt from Tajikistan. QSL EY2A via K6VNX.

FK, NEW CALEDONIA. Franck, FK8HC, informed OPDX in the middle of last week that he would be active during the weekend on 160/80 meters SSB between 0700 and 1900z. Reportedly, Franck and Eric/FK8GN have put up new antennas for the low bands 2 miles away from Eric's house on a mountain for the CQWW contests and are trying them out. Since the weekend has past, you may want to keep a listen for possible future weekends for another operation to take place.

FO, FRENCH POLYNESIA. Joel, F5JJW, is currently active as FO0/F5JJW from Gambier Island (OC-063) until October 18th. Activity has been on 15/20 meters SSB. Look for him to move onto Moorea Island (OC-046) on October 18th through the 22nd and then from Tikehau Island (OC-066) on October 22-26th. QSLs via F5JJW.

FO, MARQUESAS ISLAND. Toshi/JA1ELY and Mako/JA1OEM are going to Nuku Hiva Island (OC-027) October 18th through 23rd. The two will operate as FO0ELY and FO0TOH. They will operate on all bands 160-6 meters and SSB/CW/RTTY. Because of heavy pileups for the KH5K DXpedition, they will use lower frequencies like: 14010/14145 etc... 160m 1832.5, 6m 50100, RTTY 14077 21077. QSL via their homecall.

FO0, MARQUESAS ISLANDS. "The 59(9) DX Report" reports that Phillippe, FO3BM, will be active from Nuku Hiva for at least a week between October 25-29th as FO0SIX, 6 meters only. He is planning activity for the Australs in March 2001.

FO0AAA VIDEO. You may have missed the info that James, 9V1YC, has finished the Clipperton Island Video because you are not an OPDX Subscriber. Details on how to receive the video can be found on the Web page:
http://home.pacific.net.sg/~jamesb
By the way, James states that the A52A Bhutan video is just being worked on now. Stay tuned!

FP, ST. PIERRE AND MIQUELON. Stan/AC8W, Henry/K8DD, Ken/N8KR and Kurt/W8IQ will operate from St. Pierre, October 23rd through October 30th. Wire antennas and four 100w transceivers will be used with an emphasis on CW and RTTY prior to a Multi-Single entry in the CQ World Wide DX SSB Contest using FP/N8KR. QSL via home callsigns.

HB0, LIECHTENSTEIN. There will be another Hungarian-German DXpedition to HB0-land which will take place between October 28th and November 4th. The QTH will be at a rented house on a mountain near Triesenberg at about 1300m above sea level. Participants are Kazik/DL2SBY, Tamas/HA4DX (ex-HA4GDO), Geza/HA4XG Geza and Laci/HA0HW. Three stations will be set up and two will work 24 hours a day, one with amplifier, on CW, SSB and RTTY on nine HF bands. Some satellite operations are also expected by HA4DX. They will have several monoband and trap verticals, yagi for 12 meters and dipoles for 80 and 160 meters with a 240m long bevarage for reception. Each operator will use his own callsign after HB0/ prefix, followed by /p. All QSL requests will be answered the same way as they arrive to the operators (either via DL and HA bureaus or direct to operators CBA). They state that they will be happy to give you a new one on any band or mode.

IOTA NEWS.....
NOT OC-125. Gary, DU6/K9AW, has informed OPDX that he and his QSL Manager Paul/WF5T have been getting queries questioning his IOTA number. Gary has only operated from Negros Island (his home) in the Visayan Island group OC-129. Someone has mistakenly spotted him on a DX PacketCluster as being on OC-125 in the Semirara Island group (also a DU6 prefix). He is sorry for someone else's spotting error. The widest dissemination of this information is greatly appreciated.

KH5/KH5K, PALMYRA & KINGMAN REEF (Update). Garry, NI6T, reports that the motor schooner "Machias" departed Honolulu (not Christmas Island as reported last week) on October 10th, bound for Christmas Island in the Kiribati Republic with most of the DXpedition's equipment. The departure was a bit later than planned and will cause a delay in the planned rendezvous with the operator group which flies to Christmas Island on the 15th. They have updated their itinerary to minimize the impact on their stay at Kingman Reef. For updates, check their Web page at:
http://www.qsl.net/krpdxg
OPDX InterNet Subscribers will receive the latest press release on Palmyra as an additional bulletin.

P4, ARUBA. Look for John, W2GD, to be active as P40W October 25-30th. This activity will include an entry in the CQWW SSB Contest. QSL via N2MM.

PJ2, NETHERLAND ANTILLES. Joeke, PA0VDV, is expect to be active from October 26th through November 15th as PJ2/PA0VDV from Curacao. This will be a CW only operation on all HF bands. QSL direct to: Joeke van der Velde, Delleburen 1, 8421 RP Oldeberkoop, Netherlands; or QSL via the bureau (please mention "via QSL Regio R14"); or QSL requests can be made by E-mail after November 30th to: pa0vdv@planet.nl (Replies will go via the bureau.)

QSL INFO AND NEWS.....
QSL KH2F ONLY TO JA2TBS. Ken, N4UK, states that he is receiving QSL cards for KH2F which was his old callsign. Only send cards to the JA address.

GB0SM LOG ON-LINE. Tom, G0PSE, reports that the log for recent GB0SM St. Mary's, Isles of Scilly (IOTA EU-011) operation (September 29th

through October 9th) is now available at: http://www.qsl.net/g0pse
Thanks to Doug/N6RT the LogMaster. The log contains all the QSOs of
the three DXpeditions (1998, 1999 and 2000). The log can be accessed
for all three years by testing it with the callsign G0UKX. Who is in
the log for each of the three years.

Ruslan, RK9AD, reports that he is the QSL Manager for RA9AC, RN9AA
and UA9APA. He also helps to receive cards for UE9AAR/P (not IOTA) and
any other stations from UA9A-land. If you have a contact with these
stations and want to receive a QSL card, please send (with any request)
to: Ruslan Verichev, P.O. Box 9696, Chelyabinsk, 454081 Russia (or send
via bureau). Also send E-mail to: rk9ad@mail.ru

Bernd, DF3CB, reports the following: The callsigns 5V7VJ and XT2OW have
been reissued to the current German DXpedition by DL7DF and crew.
QSLs for QSOs with 5V7VJ between September 12-20th, 2000, go via G4ZVJ
QSLs for QSOs with 5V7VJ between October 4-9th, 2000, go via DL7DF.
QSLs for QSOs with XT2OW in February 1999 go via F5RLE
QSLs for QSOs with XT2OW after October 11, 2000 go via DL7DF.
Online logs and news can be found at http://www.qsl.net/dl7df

SV9, CRETE. Juergen, DJ8FR, will be taking part in the CQWW DX SSB Contest
as SV9/OH4FR as a Single Op/Single Band (10m, possible qrg: 28580 kHz)
entry. QSL via DJ8FR.

T88, PALAU. Hiro/JA1WSX and Toku/JA1QGT are going to be active from Palau
(OC-009) October 27th through 31st. Hiro holds T88WX, but Toku will be
issued a callsign after his arrival in Palau. Their activity will be on
80-10 meters SSB, CW, RTTY and PSK31. Hiro hopes to participate in the
CQWW DX SSB Contest as Single Op/All Band. Toku will operate other bands
and modes during the contest. QSL to their homecall via bureau or direct
to CBA.

TI5, COSTA RICA. Carlos/TI5KD and his two Japanese friends Hiro/JA6WFM
and Naomi/JM6EBU (YL) will participate in the CQWW DX SSB Contest as TI5WFM
as a Multi Op/Single TX entry. Before the contest Hiro and Naomi will be
active as TI5/homecall. QSL TI5WFM via JA6WFM and others via homecall.

TZ, MALI. Mac, TZ6JA, will be active again from Bamako. Mac will stay
for one month beginning October 20th for a government mission. Mac will be
active during the mornings (his time) on weekdays, but on weekends he will
be on all time. Activities will be on 40/20/15/10 meters only. QSL via
JA3EMU.

UA0, ASIATIC RUSSIA. Yuri, UA0SJ, reports that he will once again be
active in the CQWW SSB DX Contest as a Single Op/All Band entry from
Bratsk city (this 600 kilometers on the north side from Lake Baikal)
QSL via direct only to: Yuri A. Maltsev, P.O. Box 2304, Bratsk-City,
665700, Russia / Asiatic /.

UK JOTA INFO. Malcolm, G4CXT, reports that a full list of all special
callsigns being used by UK Scout stations taking part in the "Jamboree
on the Air", October 21-22nd, can be found under JOTA at the following

Web site: http://www.radio-scouting.org.uk
Where available this list includes links to home pages and E-mail addresses active during the event.

V6, MICRONESIA. Don't be surprised when you hear V6T1A during the CQWW DX SSB Contest. JA7HMZ and JA7KAC just received a notice from Micronesia Telecomm that their contest callsign V6A had been changed to V6T1A. QSL via JA7AO.

VK9C, COCOS-KEELING ISLAND (6 meters!). Wal/VK6KZ and Don/VK6HK will operate as VK9CZ and VK9CK, respectively, next weekend from October 21st through November 4th. They plan to activate 50 MHz which will be their main interest with 28885 kHz available for liaison. General HF operation will be available, (50 MHz conditions permitting). If HF is used, look for them on 28485, 21285 and 14185 kHz. Other HF bands may be tried if time and antennas are available.

VK0, MACQUARIE ISLAND. Alan, VK0MM, announced this past week that he will try to be active on CW/SSB only on "20 and 30 meters as realistically possible over the final few weeks". He states, "please bear in mind that, as with all the other personnel on the station, I am VERY busy with my work programme here. My website will be updated with schedtimes regularly." The ANARE 2000 crew is due to leave on November 12th for home (via a 3 week voyage via Casey Station in Antarctica). There will not be an amateur radio operator on Macquarie Island for the year 2001.

VP2, ANGUILLA. Three members of the Southwest Ohio DX Association will visit Anguilla from October 26th through November 2nd. They will be an entry in the CQWW SSB Contest, most likely in the Multi/Multi class. The contest callsign has not yet been determined. The operators are: Harry/AC8G (ex W8KKF) as VP2EH, Joe/W8GEX as VP2EP and Ron/W8ILC as VP2ER. QSL to home callsigns; best direct with a SASE. Before and after the contest, they will be on all bands 160-6 meters, SSB and CW.

VP5, TURKS & CAICOS ISLANDS. The North Florida DX Association will be active during the CQWW SSB and CW Contests this year using the callsign VP5DX. Operators will be Steven/AB4UF, Dick/K4UTE, Ron/N4KE, Mike /N4EPD, Mike/NF4L and Jim/NU4Y. QSL is now via NU4Y. Before and after contest, operators will sign VP5/homecall. QSL to their home callsigns.

XU, CAMBODIA. Hitoshi, JE8XRF, is going to be active from here October 26th trough 30th. His callsign will be issued after his arrival in Cambodia. His activity will be mostly on 15 and 10 meters SSB. He hopes to participate in the CQWW DX SSB Contest on 10 meters Single Band. QSL via JA1ELY.

ZK1, SOUTH COOK ISLANDS. Jim, ZK1JD, reports that the Cook Island scouts will be operating during "Jamboree on the Air" the third weekend of October as ZK1BS. In spite of callbook or other info, the QSL address is ONLY: c/o J. Ditchburn, Box 491, Rarotonga Cook Islands. There is no QSL manager! It was also mentioned that "There is no longer an operating QSL bureau in the Cooks, so do not bother sending bureau cards for any ZK1 callsign." We hope to have more details on the status of the ZK1 Bureau next week.

#CQDX HAS MOVED. Doug, N6RT, reports that the #CQDX chat channel is being moved from Othernet to the WorldIRC network at: http://irc.worldirc.org Everything is exactly the same, you will just have to reconfigure the address you connect to in your DX-Telnet, mIRC, or other IRC software. Please visit http://dx.qsl.net/cqdx for information and instructions on how to plug the new address into your software. Complete press release will be sent to all OPDX InterNet Subscribers.

See if you can find a set of Labtec C-324's. (sold for computer use)
Comfortable, good sound, nice transmit audio too. And cheap. (I bought
mine for ***$2*** at a computer surplus store!) You will need to wire a
little adaptor for the transmit side; 10K resistor to +8V (not critical)
for bias, and 0.1uF (also not critical) to keep the bias out of the
radio. If you find small parts, they'll fit inside the mike plug.

From: "Leo B." <leob@erols.com>
Message-ID: <39EAE689.16FC@erols.com>
Source record: 19144

MM0LEO, SCOTLAND - 24 October - 16 November 2000.
Leo, W3LEO, will once again be active from Portpatrick in southwest Scotland from about 24 October - 16 November 2000. However, Leo states that this is again a vacation and not a DXpedition and "time on the air will depend on the antennas, on propagation, and on when the nearby pubs are open, HI..." He will use his new Scottish callsign MM0LEO and plans to be in the CQWW SSB Contest. He will use an Icom 706 (100 watts]), an R-5 vertical [10, 12, 15, 17, 20 meters], and a Cheltenham Communications HFV-1 helical wound vertical for 40 & 80 with Slinky radials. He "may" try and get on PSK-31. QSL to W3LEO via his CBA (with SASE) or via the U.S. bureau.

IOTA: EU-005 [Great Britain]; CQ Zone: 14; ITU Zone: 27; Grid Square: IO-74ku; Worked All Britain [WAB] Square: NW-95.

Notes: The nearby pub is 27 steps from the front door of the cottage.
Some URLs to check:
Cheltenham Communications: http://www.chelcom.com/html/hfv1.html

I find them way too heavy and painful to wear for more than a few
minutes.

> Are there any other headsets out there not
> commonly known about?

I use the KOSS PortaPro (Jr., www.koss.com), a leightweight portable
headphone that has an adjustable headband and a set of softpads attached
to them in order to take away pressure from your ears.

Unless you need a headphone for SSB M/M operation with other operators
in the same room, you won't find any better than these. I showed them to
a couple of hams, most of them DXers and Contesters and every one of
them bought them immediately.

Ask operators like N4TY and W3MC for their opinion.

I disagree. The system could have been handled better, i.e. vanity calls could have been required to reflect call area of the licensee and the Extra Class could have retained a high speed cw requirement. But, I do not think that these changes will spell the demise of amateur radio. I belive that without the most recent changes HF would have been a senior citizens club in few decades.

Mark, K1MKF

yes, it's a vanity callsign
and yes, I'm a 5 wpm General

Well, after people have written many letters to the Michigan House
about Bill 6012, they have adjusted the wording which makes Amateurs
completely exempt!!!!!

The wording in the original writing of the bill stated that permits
were required AND the operator of the vehicle had to be a police
officer or amateur. Now with a simple change of AND -> OR, we are
exempt!!

Thanks for all your support..

In case ya'll haven't heard, on July 12th
the FCC created the Multi-Use Radio Service.
It's for people who want to be on the radio
but don't want to have to learn all the rules and
stuff for the amateur service. The difference between
MURS and CB is that MURS will have repeaters, packet,
data, imaging and, like CB, won't have any regulations.
Oh, there is one regulation, you can only transmit up to 2
watts of power. (I got this info from QRZ.com, the like to
the article below).

The full article is here:

http://www.qrz.com/articles/00/10/15/1215251.shtml

My personal opinion (which probably doesn't mean much
to anyone but me), is that the FCC isn't going to stop at the MURS service.
They're just going to continue on, and eventually, the entire amateur
service
will be regulation free.

What's your opinion?

Anyway, the reason for this posting is because most people don't
know about the MURS service.

(I'm probably gonna get tons of spam from this, too.)

Rally The Sheep,
Do you really see MURS as being threatening at all
to amateur radio? I don't. Seems more like the manufacturors
trying to revilalize their 'color dot frequency' radios.
I can see where there could be lots of interest in this.
As I read the proposal, it allows voice, and digital modes,
repeaters, and paging. By the way, it's 2 watts ERP, so
that opens up a bunch of antenna options. Interesting
options...
'Doc

Lance,

Some logging software automatically calculates beam heading for you as you enter the callsign of the station. In fact, it will even turn the rotor for you in that direction.

Although I do not use the "turn my rotor" feature, DX4WIN (my logging software of choice) calculates beam headings from your QTH and displays distance and direction to the callsign you are working. It can also display a world map with short path and long path indicated in different colors.

www.dx4win.com

I have a Radio Shack Pro 2050 Trunktracker and was trying to directly punch in the Talk group IDs with the frequencies I have.Could some explain to me in a email in the most simplest term how I can do this ? And also I have tried to searches for ID numbers and unable to understand why I am not hearing anything ,I have gone through all the different trunking levels,i.e., E2 800, E2 900, E2 Hi, E2 UHF, Ed,E1 and still I have not heard a thing . When go out of trunking mode I can hear all the activity going on. What am I doing wrong ? I am trying isolate some of the radio traffic that I do not want to hear like EMS ,but not the towing services that use the same frequencies. PLEASE HELP!!! Send all replies to me directly ,not through the newsgroup Thanks!!

What does this have to do with dx? Why is this posted to every newsgroup?

Cross-posted to: alabama.birmingham.radio.amateur,alt.ham-radio.packet,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy

apparently, when i posted this message, many thought that i
was saying that murs is a competitor with amateur radio.
that is NOT the impression i meant to send.
at this time, i do not think that murs is a serious threat to ham
radio. and rememeber, when i gave my personal opinion, that's
just what it was. my personal opinion. i'm not saying that's what's
going to happen, that's just what i THINK might happen eventually.

so go ahead call me a pessimist. it's my PERSONAL opinion, for
the amusment of me.

After spamming six different newsgroups, five of which do not deal with scanning, I can see why you dont have the time or inclination to revisit each one to look for replies. You just do your spamming and run.

Next time, post your question to the appropriate newsgroup (rec.radio.scanning only) and be prepared to return to it to read replies and maybe even participate in the activities of that newsgroup.

Try to be a good netcitizen.

3280. Re: MURS

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-17 00:00:00 UTC
From: k5dh@raytheon.com
Message-ID: <Y24H5.5$W94.1159@dfw-service2.ext.raytheon.com>
Source record: 19067
Cross-posted to: alabama.birmingham.radio.amateur,alt.ham-radio.packet,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy

I have bad feelings about this MURS thing...

What I can see happening on MURS is the same thing that happened on 11m CB. MURS'ers will buy inexpensive 2-meter FM amplifiers at hamfests and connect them between their MURS radios and their antennas. So much for the 2 Watt limit! No one pays attention to the 5 Watt limit on 11m CB either... they use 10 meter amps. With 2m amplifiers so commonly available for such little money, I think this will happen virtually overnight. MURS also allows external antennas. Soon, there will be MURS'ers using modified 2m directional antenna arrays and high-power amplifiers to work bootleg VHF DX.

Someone else has already pointed out that the MURS radios will be merely the existing "color dot" type radios re-hashed (including some of the frequencies that were once "color dot" frequencies, such as 154.600 MHz). This could pose a problem too. Many of your favorite fast food joints, such as McDonald's, Wendy's, and so on, use some of those same frequencies for the two-way radios in their drive-up lanes. Can't you just picture the MURS CB'ers, running high-power amplifiers, giving fits to the people working the drive-up lanes? It's gonna happen, folks!

There are countless thousands of "color dot" radios wasting away in closets and drawers since the advent of cheap and effective FRS radios. FRS offers 14 channels vs. one or two channels, PL tones for a degree of privacy, they cost half or less what the "color dot" radios cost, they offer similar range but the UHF signal seems to pass through buildings better than the VHF does, and FRS radios run on common household batteries instead of the usual NiCd packs. I guess the only big draw for MURS is going to be the ability to (illegally) use big amplifiers and to use powerful antenna systems. MURS will be a boon to the bootlegger, but of no value to the intended users. The FCC has bungled again!

Flame away, folks. I'm wearing my Nomex firesuit...

K5DH,
I agree, MURS is going to be subject to all the abuse that
other bands are subject to. It's a shame too, it could be a
fantastic oportunity, if everybody 'played' fair. There's
one 'happy' thought, though. Since it's VHF, it should be
easy to 'DF'.

Dr. (X)YL/OM,

For the first time since 1978 I probably won't be participating in the JOTA this year. Since the end of last year, I live in Dubai, United Arab Emirates. Unfortunately amateur radio licences are strictly issued ONLY to U.E.A. Nationals. No guest licenses are issued. VERY frustrating, especially when you thought finally to be at the fun side of a pile-up.

In every imaginable way (including this, please bear with me) I'm desperately trying to gather information on possible A61../J stations, but I'm reaching the conclusion that this year there isn't any JOTA activity in A61. Only remaining possibility for me is the JOTI, although I don't have any previous experience.

Nevertheless I'm also very interested in any A61 callsigns that might have signed /J in previous years. Do you still have your old logbooks? You would do me a big favor if you checked for A61../J and sent me the info.

If during or around the upcoming JOTA you see or hear the following (quasi) callsign:

PA5UL/A61/QRT/J

that will be me, Paul with a 5 in the middle, in Dubai, not QRV, portable JOTA!

I won't be alone, my children are also scouts and might try their hand at the keyboard or the internet microphone.

Warm(39C, 105F) regards from Dubai,

Hi all, I am new to low band DXing and am wondering what freqs on the 80M band CW or SSB are best. This is in relation to antenna tuning to a particular band segment.

As a start, I am considering a Gap Antenna Challenger DX. There is apparently a capacitor one needs to choose to center freq the unit for a particular part of the band.

Also, looking for comments on the Gap Voyager antenna, in terms of how it plays on 40 and 80M. It is my understanding for what it is, it works quite well. Probably good enough for a beginner to the low bands for DXing. Also, this antenna is good enough for a presence on 160M I am told.

Any comments appreciated.

It wouldn't have made any sense to require that vanity calls reflect
the actual venue of the licensee when that hasn't applied to non-vanity
calls since 1978. In recent years, even systematic call sign assignment
hasn't reflected the actual venue of the licensee, but only that of
their mailing address which can obviously be quite different from the
physical venue. When the FCC implemented the current vanity system,
they did attemp to protect non-CONUS calls from being sucked dry
by only granting requests for non-CONUS calls to those with non-CONUS
mailing addresses. I don't think it was much of factor anyway because
non-CONUS "group A" calls typically had 2 letter prefixes anyway and
even at this late date 2 letter prefixed "group A" calls are still
available in all CONUS regions. "W" and "K" prefixed 1X2 calls may
be short supply in many CONUS regions, but many "N" 1X2 calls are
still available plus a good assortment of CONUS 2X1 calls with various
prefixes.

I bought a ramsey PA-10 2m amp for my HT when I go mobile.A few years ago I bought the pre-amp when I used a
7el yagi for 2m ssb.
I'm looking for a copy of the schamatic so i can put the pre-amp in line any help?
I will cover photo coping and mailing expenses.
de dave-n2rhl

p/s ramseyelectronics.com doesn't have thes on-line.

tnx in advance.

3295. Anybody on 12M today?

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-19 00:00:00 UTC
From: cathexis@erols.com
Message-ID: <39ef5d55.55201469@news.erols.com>
Source record: 19081

Greetings,

The AM started out with the usual Brit Hams like G4YIT.
But the band just seemed to really open up, despite noticable
noise. Managed QSO's with Costa Rica, France, Italy, Hungary
and Lithuania. And most of these gave me 5/9's running a Yaesu
FT-980 thru MFJ versa-tuner into 250ft.+ random. So no super
rig here. 100W PEP. Also, Maine, Missouri, Minnesota, Texas,
and Fla. in the good ole USofA. Maybe I just lucked out being
off work. Anyone else have a good time on 12meters today?

73,

Andrew

Saw plenty of 12M spots on the DX cluster but didn't chase any of them down. I was really enjoying myself on 10M. Man..the band was actually crowded! Great time was had by all.

My monthly DX logbook is online and updated daily at my website listed below.

3300. Re: 80M DX Freqs

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-20 02:52:24 UTC
From: Dave Goodwin <ve2zp@rac.ca>
Message-ID: <IrOH5.364073$1h3.9610761@news20.bellglobal.com>
Source record: 19085

Mike:

The best places to lok for DX on 80m are as follows:

3500-3525kHz CW - usually transceive, sometime with narrow splits
3640-3650kHz SSB (some Europeans will transmit here and listen above
3800kHz)
3690-3700kHz SSB (some Europeans will transmit here and listen above
3800kHz)
3790-3800kHz SSB - usually transceive

I suggest one great time to look for DX is during the CQ WW DX SSB and CQ WW
DX CW contests on the last full weekends of October and November each year.

Good luck.

73,

Dave VE2ZP

3301. EZNEC: Warning of Copyright Violation

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-21 00:00:00 UTC
From: fractenna@aol.com
Message-ID: <20001021084036.21694.00000828@ng-cd1.aol.com>
Source record: 19087

NOTICE:

Roy Lewallen, W7EL, d/b/a/ 'EZNEC' is in copyright violation for unauthorized distribution and publication of the antenna file marked 'MI2'. Lewallen has publicly made and advertised this file on his http://www.eznec,com web site. Furthermore he has publicly advertised its availability on USENET.

This MI2 file was first produced by me in 1994, with a revision in 1995. It's copyright was assigned to Fractal Antenna Systems, Inc. in 1995. The MI2 file posted by Lewallen is either an exact or "substantially recognizable" derivative of my copyright file. Lewallen has neither sought nor received permission to use this file in any way.

Mr. Lewallen's commercial publication and distribution of the MI2 file does not constitute "fair use" and he has been so advised.

On 20 October, 2000, the copyright for MI2 was transferred back to me, the author. I am the sole holder of said copyright and have not authorized any copies to be published or distributed by Mr. Lewallen. The file is not in the public domain.

I urge fellow amateurs to actively discourage Mr. Lewallen from unuathorized use of copyrighted material. To do so undermines the edifice of creativity which much of the software used by hams is built upon. Not only is it stealing, but it is an insult to those who try best to educate and help others.

Mr. Lewallen has been sent a certified letter formally asking him to cease and desist. If he does not remove the material he will be sued d/b/a EZNEC.

Please let Lewallen know how you feel about stealing someone else's property. His e-mail is:

W7el@eznec.com

Thank you!

Nathan Cohen, Ph.D. N1IR

And I urge you to have a lawyer take care of this kinda crap,
instead of trying to get off cheap by making Usenet threats
and inviting the kids to join you in harassing someone via email.

Next thing you know Mr. Lewallen will be sueing the kids for
harrassing him.... Fight your own battles. Let us know what
the judge says.

> Oh great.....now this antenna copyright bullshit is being posted to the DX
> newsgroup. How wonderful. Time for a filter I see.......

Yep, time for a filter.

By the way, have you ever encountered an individual who was just a little
bit of an asshole? Why is it that when anindividual is an asshole, he is a
REALLY BIG one, never just an occasional one?

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AA1AC, KF2HC, N2OO, W2GR, WB2YQH/WB2RAJ & The 59(9) DX Report, W3LEO, W3UR & The Daily DX, K4VUD, KJ4UY, W4SO, KG6AR/4, W1HIJ/6, K8YSE, 9K2HN, BA1DU, BD7NQ, CE6TBN, CO8LY, CT1EWA, DF6EX, DJ5AV & DX News Letter, DJ5JH, DL5XL, ER1LW, F6AJA & Les Nouvelles DX, FK8GM, FK8HC, G3XTT, GM3WOJ, HA0HW, I4UFH, RN3RQ, RN6AH, SQ9LR, TA3YJ, UK9AA, UR7GG, YO3FWC, YS1RR, ZL1DD and ZS5BBO for the following DX information.

EDITOR'S NOTES: WOW! What a week for DXing. A lot of exciting activity is expected in the coming week and weekend due to the CQ World-Wide DX Phone Contest, October 28-29th. Also, do not forget about the Kingman Reef DXpedition and the German DXpedition to Eritrea. Have fun! P.S. If someone wants to put together a nice CQWW SSB Contest List of all the operations for me (ASCII format, no graphics, keep it under 80 characters wide), I will send it out before next weekend to all OPDX InterNet Subscribers.

3D, FIJI. "The DX News Letter" reports that Ron, ZL1AMO/3D2RW, is once again active until October 30th. He is expected to activate Mana (OC-121) for one week, but this may be over with by the time you read this. QSL via ZL1AMO.

3D2, CONWAY REEF (Update). Another press release by Hrane, YT1AD, was sent out with more details on their DXpedition. The list of operators are as follows so far: Hrane/YT1AD, Rasa/YU1RL, Miki/YU1AU (or Ratko/YU1NR), Rale/YT6A, Dragan/Z32AU, Mome/Z32ZM and Ray/YS1RR (still not confirmed). Earlier in the week there were some concerns raised on the group's operation during the hurricane season. Hrane reported the following: "This year the huricane season will be starting 10 to 15 of Nov. 2000 and will finish at about 1 Jan. 2001 so later on, in the middle of January the sea is in calm again. The captain told me that after the Christmas season the weather is ok for dx epedition." Anyway, the press release states that the team will fly from LA to Fiji in the first days of February and expect to arrive in Fiji earlier in the morning. They

will depart in their boat from the Fiji Port "Pacifik Harbour" on the afternoon of February 5th. The team will all join together at the airport Nanadi. They will then take a boat trip at sea, which is quite long, for about 40 hours. They expect to arrive on Conway about 4:00 to 6:00 AM (local time) on February 7th in the morning. Hrane states that the boat "is big, 20 meters long and has 10 sleeping places, and we will have profesional kitchen." They will then start to assemble antennas, towers, tents, generators..etc... etc., and will try very quickly to have the first station on the air. They plan to have all 3 stations active and working at all times around the clock until February 15th. After the operation, they will return to Fiji where they will stay for 3 days on the island to operate. They will return to L.A. on February 19th. All the operators, with exception of YU1RL and YT1AD, will go back to Europe from L.A., and YU1RL and YT1AD will go to El Salvador to operate in the ARRL Contest from YS1RR QTH.

4M, VENEZUELA. Scott, W4SO, will be active from here as 4M5X for the CQWW CW Contest as a Single Band 20 meter entry. Hhowever, he states there is a slight chance that it will be a Single Band entry on 15 meters, but he is leaning towards 20. QSL via W4SO.

4U1VIC, VIENNA INTERNATIONAL CENTRE (Austria). In the CQ World Wide DX Contest 2000 (SSB), the Rhein Ruhr DX Association (RRDXA) will again join the competition from 4U1VIC in Vienna, Austria, with a multi-operator team. 4U1VIC is a separate country on the DARC's WAE list, and thus a multiplier in the CQ's contests. QSL cards will be sent via the OE bureau. If you need a direct reply, please send your card with SAE and return postage to: Vienna International Amateur Radio Club (VIARC), Vienna International Centre, P.O. Box 200, A-1400 Vienna, Austria.

9K, KUWAIT. Hamad, 9K2HN, will be signing 9K9X in the CQWW SSB Contest as a Single Op/All Band entry. QSLs are "OK" via Bureau.

9M6, EAST MALAYSIA (Update). Peter, G4MJS, will be active as 9M6BAA from October 17-31st, from Hillview Gardens Amateur Radio Club, Keningau, Sabah, East Malaysia. IOTA Reference is OC-088, Island of Borneo. The QTH Locator (Grid) is OJ85CH. Operation will be mostly on 50 MHz with occasional activity on HF as time allows. The 50 MHz operating frequency will be 50.115 MHz, with a CW beacon running when not in QSO. QSL 9M6BAA via G4SHF. More info can be found on the 9M6BAA Web page at: http://www.9m6baa.com

A5, BHUTAN (Update). Both Yani (9M6US, YB0US) and Charly (K4VUD, HS0ZCW, 9N7UD, V26V, XW1UD) have paid all their fees and airplane tickets in advance to travel to and stay in Thimphu, Bhutan, arriving December 1st and departing about December 9th. Charly states that he has paid the extra fee for permission to run 1 kw on all bands. The two operators will have a tribander (and maybe 2 more and a WARC-bander depending on repairs) and wire antennas. Charly states, "These are totally self-financed trips, so no web site, no huge 160 meters antennas, no E-mail, and so on, but we plan to have a lot of fun." Charly's callsign will be A52UD (Yani's was not mentioned). Charly will be on SSB and CW, emphasizing the low bands, and Jani plans RTTY.

QSL requests for A52UD go to K4VUD (direct with SASE is faster, bureau replies will be very slow); Jani will announce his separate QSL address and policy. Anyone still wanting to join the group must act very fast as a month lead time is likely needed for this kind of trip. OPDX InterNet Subscribers will receive Charly's complete press release as an additional bulletin.

A6, U.A.E. Frank, DL2CC, will be active from the United Arab Emirates as A61AJ from October 24th through November 1st. Activity will include an entry in the CQWW SSB Contest on all bands. Activity before and after the contest will include 6 and 160 meters. QSL only via W3UR.

B1, CHINA. A group of hams from "The Beijing DX Club" will participate in this upcoming CQWW SSB Contest as Multi-Single category. Their callsign will be B1Z. QSL via JA4HCK.

B7, CHINA. A groups of Hams in the Guangdong Province will be active in the CQWW SSB/CW Contests using the special callsign B7K. QSL via BD7NQ: P.O.Box 599, Foshan GD 58000, P.R. CHINA.

CE0X, SAN AMBROSIO ISLAND. Marco, CE6TBN, Team Leader for the San Ambrosio Island DXpedition 2001, informs OPDX that the following operators will be active from here: CE6NE, CE6SAX, CE3AQI/NP4IW, OH1EB, OH2BH, OH2RF, DJ9ZB, K0EU and himself CE6TBN. They will be on the air as CE0XT from San Ambrosio (IOTA SA-013). CE0X is ranked #34 on the ARRL DXCC Most Needed List. Activity will begin the second full week of Februry 2001 on 160, 80, 40, 30, 20, 17, 15, 12 and 10 meters on SSB, CW, RTTY and PSK. There will be three or four 1kw stations. QSL Managers is CE6TBN: Marco A. Quijada, P.O.Box 1234, Temuco, Chile. Any support is welcome. Please visit the DXpedition's Web site at: http://www.qsl.net/ce0xt

CO8, CUBA. Eduardo, CO8LY, will participate in the CQWW SSB Contest as Single Op/Multi Band/Low Power entry. QSL direct to his Manager EA7ADH.

CS7, PORTUGAL. Paulo, CT1EWA, states that he will be active in the CQWW DX SSB Contest with the special callsign CS7EWA. QSL via CT1EWA by bureau or direct.

D68, COMOROS. Another bulletin was released this past week on the forthcoming D68C DXpedition to the Comoros. OPDX InterNet Subscribers will receive the complete release as an additional bulletin. In short, you will have heard Don, G3OZF, operating as D68/G3OZF while on a survey trip for the D68C operation doing some invaluable work in getting everything lined up for the upcoming operation. Also announced was the D68C Web Page which is now up and running at: http://www.dxbands.com/comoros
Yaesu was announced as the a major sponsor, however, further sponsorship is being sought, especially from DX groups and foundations, to help with the high cost of shipping some 3 tons of equipment to D68. Since their last bulletin, the following have joined the DXpedition team: Tim/G4VXE (a technology wizz), Yoichi/JP1NWZ (an all-rounder), and Rob/PE9PE. Rob will be especially welcomed to 6 meters, VHF and satellite operators. He will be ensuring that D68C is available via the current range of amateur

satellites. The expedition itself will take place over the period of roughly 8th to 28th February 2001.

E3, ERITREA. Chris/DL5NAM and Dieter/DF4RD are now active as E30TA through November 1st. Activity is all over the bands with nice signals. QSL to DL5NAM.

EA8, CANARY ISLANDS. Look for Pekka, OH1RY, to be active from the EA8AH/ EA8BH contest station through the CQWW SSB Contest.

EM3/EN5, UKRAINE. OPDX was informed that the following stations will be active in next weeks CQWW DX SSB Contest. Look for EM3J to be active as a Single-Op operation and EN5J will be activated by the Crimea Contest Club as a Multi-Single operation. QSL both to KG6AR/4: Chris Williams, 220 Woods Landing Ln., Callaway, VA. 24067.

ER, MOLDOVA. Slawa, ER1LW, will be using the callsign ER6A in the CQWW SSB/CW/RTTY Contests. Please send QSL cards to his home address at: P.O.Box 112, Chisinau, MD-2012, Moldova.

EZ, TURKMENISTAN. Alex, EZ8CQ, will start being active on RTTY in early November. He has also begun to be active on 160 meters. Look for him around 1830 kHz at 2000z. Skeds are welcome, send E-mail to: ez8cq@qsl.net QSL via W0FS (USA only) or I2JSB (rest of the world, direct only).

FK, NEW CALEDONIA. Franck, FK8HC, informs OPDX that he will be active in the CQWW DX SSB Contest this month on 80 meters and a Mono Operator/Mono Band as FK8HC. He hopes this band will run well during this contest weekend. QSL via VK4FW, P.O. Box 929, Gympie 4570 QLD, AUSTRALIA. Also, look for Eric, FK8GM, to be active on 40 meters as a Single Op/Single band entry in next week's CQWW SSB DX Contest.

FM, MARTINIQUE. The "Les Nouvelles DX" reports that after some delay, Gerard, F2JD, is in Martinique. He will stay there for 6 months, at least. Look for him to be active as FM/F2JD.

FO0, AUSTRAL ISLAND. Look for FO0WEG to be operated by Janusz/SP9FIH and Rafai/SQ9LR who are active from Tubuai Island in the Austral Island group (IOTA OC-152) from now until November 4th. Activity will be on 80-6 meters. They will be active on SSB and probably RTTY near the usual DXpedition and IOTA frequencies or 10 kHz down, for example (14185, 21285, 28485) using two 100w transceivers and vertical + 3 element tribander + 5 element on 6 meters. Their minimum plan is 20000 QSOs. A longer operation or an operation on another country is possible if they receive additional donations. For donations and QSLs, send to SP9FIH: Box 480, 44-100 Gliwice, Poland.

FO0, FRENCH POLYNESIA. Bill, W1HIJ/6, will be active as FO0SCH from the Mai Moana Resort at Bora Bora (OC-067) between October 31st and November 8th. Plans are for mostly CW operations with some phone and PSK31/MFSK, assuming that the computer stays in operation. There will definitely be activity on 20/15/10 meters, but he will try 40 meters if the wire gods cooperate (he hopes to be on 80/75 meters as well). QSL via W6UFT either

CBA or via the bureau.

FS, FRENCH ST. MARTIN. Members of the North Jersey DX Association (NJDXA), Brass Pounders Club of Bucks County, and the West Essex Amateur Radio Club (WEARC) will be on the air from French St. Martin December 5-12th. They will operate Multi-Op/Mixed Mode in the ARRL 10 Meter Contest using the call sign FS/W2JJ. Operators Mike/WA2VUN, Jay/WB2BHC, Gene/K2KJI, Maryann/K2RVH, Bob/W5GJ, Ann/W2AZK, and Brian/KF2HC should be on the air by 2300z on December 5th. Plans are to have 2 stations covering SSB and CW on all HF bands as well as a station for 2 and 6 meters. A 6 meter beacon and satellite activity may also be part of the operation if conditions at their QTH allow. Efforts will be made to operate in the U.S. general bands as pileups and conditions permit. Individual callsigns may be used at times, but the majority of the operating will be with the callsign FS/W2JJ. QSL via the callsign worked.

GZ, SHETLAND ISLAND (SCOTLAND). The North of Scotland Contest Group is proud to announce that they will be using a new prefix in next weekend's CQWW SSB Contest. They will be signing GZ7V (not GS2MP as previously announced). Thanks to the RSGB and the UK Licensing Authority, the R.A., holders of UK Special Contest Callsigns, they can now use the prefix GZ or MZ when operating from Shetland in major contests. The 'Z' refers to the old name for Shetland which is "Zetland". For more information, send E-mail to: gm3woj@talk21.com
Or visit their Web site at: http://www.gm7v.com

HB0, LIECHTENSTEIN (QRP). A group HA ops will be active from here from November 1-8th and take part in the HA-QRP Contest which is organized by "The RADIOTECHNIKA and its publisher The RADIOVILAG Ltd." The members of the group are Laci/HA6NL, Zsolt/HA6PS, Csaba/HA6PX and Tibor/HA6ZV. The operators will work on all other bands, CW and SSB with their own HBo callsigns, however, during the contest they will use HB0/HA5RT/p. Look for them to be on 3511 kHz (+/- QRM) with a QRP transmitter. QSL HB0/HA5RT/p via HA6NL, all others, please send via the operator's own callsign via HA bureau or direct.

IG9, ITALY. Fabio, I4UFH, states that the IG9A crew will be active from Italian (African Island group, IOTA AF-019) in next week's contest, but BEFORE and AFTER the contest the IG9A crew will be reading their E-mail at the following address: ig9a2000@libero.it For any information, update please check their Web site at: http://www.mcc-italy.it/ig9y2k.htm

IOTA NEWS.....
EU-179. Mykola, UR3GA, will again be active from the Island of Orlov, October 24-27th. Activity is expected on or about 14260, 21260 and 28460 kHz. QSL via UR7GG: Victor Tkachenko, P.O.Box 73, Kherson 73000, UKRAINE

OC-201. Dr. Barry, ZL1DD, will be active on 80-10 meters from his home on Waiheke Island in the New Zealand North Island Coastal Island Group. He states that he is willing to make skeds via E-mail for island hunters at: bjk@ihug.co.nz

QSL via Barry Kirkwood PhD ZL1DD, Signal Hill Homestay, 66 Cory
Road, Palm Beach, Waiheke Island 1240, NEW ZEALAND.
Check the Web page at: http://www.waiheke.co.nz/signal.htm/

J2, DJBOUTI. The "Les Nouvelles DX" reports that David, F5THR, is signing
J28EX and has been here since May 2000. He will be there for 2 years. We
could not find any QSNs on this station to report.

J4, GREECE. Wolff, DJ5JH, informs OPDX that he will once again be active
from here during the CQWW SSB Contest using the special callsign J43J.

KH5K, KINGMAN REEF. As this was being written Sunday morning, the KRPDXG
team is active as "K5K". The team arrived on Palmyra October 19th to
pick up Mike, KH6ND, and some equipment that was left from visits by various
team members earlier this year.. They decided to stay a few hours and
operate on Palmyra before heading to Kingman Reef on October 20th. The
team arrived at Kingman Reef, have transferred all equipment safely to
the reef, but high winds did hampered their efforts. Look for them to be
active until November 1st.

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in
southwest Scotland from about October 24th through November 16th. However,
Leo states that this is again a vacation and not a DXpedition and "time
on the air will depend on the antennas, on propagation, and on when the
nearby pubs are open, HI..." He will use his new Scottish callsign MM0LEO
and plans to be in the CQWW SSB Contest. He will use an Icom 706 (100
watts), an R-5 vertical [10, 12, 15, 17, 20 meters], and a Cheltenham
Communications HFV-1 helical wound vertical for 40 & 80 with Slinky
radials. He "may" try and get on PSK-31. QSL to W3LEO via his CBA (with
SASE) or via the U.S. bureau. ADDED NOTES BY W3LEO: IOTA: EU-005 [Great
Britain]; CQ Zone: 14; ITU Zone: 27; Grid Square: IO-74ku; Worked All
Britain [WAB] Square: NW-95. WEB NOTES: The nearby pub is 27 steps from
the front door of the cottage. Some URLs to check:
Cheltenham Communications - http://www.chelcom.com/html/hfv1.html

Harbour House [the pub's location] - http://www.harbourhouse.co.uk/

OH2BH CQWW SSB DX CONTEST NEWS.....
An excerpt of a press release from Martti, OH2BH, provided/sent out by
Tim, N4GN, reports a lot of activity will take place by OH operators
during next week's contest. (OPDX InterNet Subscribers will receive the
complete OH2BH press release as an additional bulletin.) Martti is
calling this year's operators approach to the CQWW DX Contest as a
"FINLAND FORMULA ONE RACING TEAM". The team has been working hard to
build competitive sites for the current racing season. Ilkka Korpela,
OH1WZ, will be piloting the OH0BH site on Aland Islands, targeting a
new European all-band record, while Timo Klimoff, OH1NOA is going to
be at the controls at OH2BH, aiming for an all-time high from mainland
Finland. However, due to a cancelled Far East operations, both Martti,
OH2BH, and Pekka, OH2TA, will be participating in the CQWW SSB contest
by joining the JW5E team on Svalbard and making a double multiplier
available for this year's event together with Mathias, LA5NM/JW5NM,

and Ragnar, LA7FD/JW7FD, and their team.

OH0, ALAND ISLAND. Jukka, OH6LI, will be active in both the CW and SSB CQWW DX Contests as OH0V on 10 meters. QSL via Jukka Klemola, Aarontie 5, 31400 Somero, FINLAND.

QSL INFO AND NEWS.....
Fred, DF6EX, reports to OPDX that the "Online Manager Database" was updated October 16th. The file is available at:
http://www.winqsl.de -or- http://www.qrz.com/qsl.html

Ciprian, YO3FWC, reports that nice pictures, a searchable log and the story about the recently DXpedition on IOTA EU-183 (YP1W), Sacalinu Mare Island is available at the Romanian Amateur Radio Federation Web site at: http://www.qsl.net/yo3kaa

4W/K7BV and 4W/N6FF logs are now updated and posted on the following Web page: http://www.xcvr.com/4w/logsearch.asp

RW3, EUROPEAN RUSSIA. Andy, RW3RQ, will be active as a Single OP/All Band entry in the CQWW SSB Contest from Zone 16. All stations who work RW3RQ on 6 bands (Europe) or 5 bands (DX) will be presented by the "Michurinsk Contest Groupe" a medal/trophy free of charge. However, please, send 2 IRCs for postal expenses. Other information is available via E-mail: mcg@pub.tmb.ru
Send QSLs via Jack Yatskiv, RN3RQ, P.O.Box 30, Michurinsk 393760, Russia

SPECIAL EVENT (Extinguishing of "Last Oil Well"). On August 2, 1990, the Iraqi forces brutally occupied the state of Kuwait. Baghdad refused all worldwide appeals to withdraw. Consequently, the world waged a just war against Iraq. Upon their overwhelming defeat and retreating from Kuwait, the Iraqi forces set fire intentionally to over 600 Kuwaiti oil wells. After several months of firefighting, day and night, the catastrophe came to an end leaving behind an environmental devastation from which Kuwait is still suffering. The extinguinshing of the last oil well marked a great event for which the nation celebrated in November 1991. On November 4-6th, the State of Kuwait will celebrate in commemoration of this national event. KARS will participate by operating actively during these three days and it is pleased to invite all licensed radio amateurs around the world to take part. The callsign allocated for this event is 9K2LOW (LOW: Last Oil Well). Contacts will be made on any band and any mode. There will be special QSL cards, the requests of which should be addressed directly to 9K2RA.

SPECIAL EVENT. Look for special event station from Yugoslavia using the callsign YU130Z to be active until November 20th to celebrate the 130th Anniversary of Fire Brigade "Matica". QSL via YU1AVQ.

TA, TURKEY. There will be plently of activity from here durin the CQWW SSB Contest. Look the following station on the following bands:
TA3D - From Asiatic Turkey, CQ Zone 20, SOSB on 160 meters low power. QSL via TA3D to the Bureau or Direct to: Yasar GOCET, P.O. Box 963, 35214 Izmir-TURKEY. QTH is Fokai-IZMIR (KM38OG) using a

Delta Loop and dipole antennas for 160 meters. E-Mail is:
ta3d@yahoo.com
TA3J - From Asiatic Turkey, CQ Zone 20, SOSB on 40 meters low power.
QSL via TA3J to the Bureau or Direct to: Berkin Aydogmus,
P.O. Box 987, 35214 Izmir-TURKEY. QTH is Manisa, Spylious
Mountain, Turgutalp Village (1,000 Meters above sea-level)
(KM38OG) using a Delta Loop, Dipole and Vertical for 40 meters.
Web-Site: http://clubs.yahoo.com/cubs/contestclub
E-Mail: ta3j@yahoo.com
TA3YJ - Asiatic Turkey, CQ Zone 20, SOSB on 15 meters low power.
QSL via TA3YJ to the Bureau or Direct to: Nilay Mine Aydogmus,
P.O. Box 876, 35214 Izmir-TURKEY. QTH: Manisa, Spylious
Mountain, Turgutalp Village (1,000 Meters above sea-level)
using Mini Beam Yagi for 15 Meters.
Web-Site: http://clubs.yahoo.com/cubs/contestclub=20
E-Mail: ta3yj@yahoo.com

TT8, CHAD. Christian (ex-6W1QV, D2SA, FH/TU5AX, TT8SA, TR8SA etc...) is
now active for the next 16 months as TT8DX from Moundou (south of the
country) close to Cameroun and Centrafrique. Activity will be
80-6 meters SSB. He will use a TS690s (all bands HF w/6m) with a 1500 watts
linear for HF and 400 watts for 6m, HF2V and 7 element beam for the upper
bands. QSL via F5OGL bureau or direct.

UK0, UZBEKISTAN. Fedor, UK9AA, states that he may be the only station active
from Uzbekistan in the CQWW SSB Contest. He will use the callsign UK0A
as a Single Op/All bands entry in the contest. QSL via UK9AA: P.O. Box 58,
Tashkent, 700000, Uzbekistan.

V47, ST. KITTS. Larry, KJ4UY, will be going to St. Kitts. His daughter will
be going to Ross Vet. School in St. Kitts starting next year. He will be
arriving December 10th in the afternoon and leaving the afternoon of the
18th. Karl, V44NK is loaning Larry an A3 tribander and he is taking a R-7
vertical with an Icom IC-706. His callsign will be V47UY. QSL via KJ4UY.

V7, MARSHALL ISLANDS. Look for Bruce, AC4G, to sign V73CW once again
from Kwajalein Island, the club station, from Oct 23-28th. The QSL via
AC4G.

VP2, BERMUDA. Mark, AA1AC, will operate as AA1AC/VP9 from Hamilton Parish,
Bermuda, from December 8-12th. Operations will include 10-80 meters CW/SSB,
with an emphasis on the ARRL 10-meter Contest. QSL to CBA: 15 Coral Lane,
Tiverton, RI 02878.

XE, MEXICO. Doug, W0AH, will be operating the CQWW Phone Contest as
XE3/W0AH as a Single Op/All Band entry, either QRP or LP. He will use
an IC-706 and old Hygain 18AVQ on a small dock over the Carribean Sea
plus some loop antennas for 10 and 15 meters. There will be some 6 and
2 meters operations as time permits. QSL via W2GR direct or Bureau. Send
direct with SASE or SAE and GS or IRC to: Mike Benjamin, 1064-99th Street,
Niagara Falls NY 14304.

ZF2, CAYMAN ISLANDS. Steve, K3SA will be active as ZF2SA for the CQWW CW Contest and the ARRL 160 Meter Contests. Also, look for him (on CW) on all bands between contests. QSL via homecall.

Which callbook CD would you folks recommend (QRZ, HamCall, RAC)? I'll be using it to link up with my DXbase logging program. Primarily looking for international callsigns. Other feature would be nice, but I want something that works smoothly and is up-to-date.

Opinions please?

David, K4ZZR

3323. K5K DXpedition

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-23 00:00:00 UTC
From: jimmy john <jj@sandwitch.org>
Message-ID: <4A8A59F2BDCDD311BFC800508BA36AC8050E86AD@www.indianarep.com>
Source record: 19263

Being fairly new to the ham radio thing, I have not had the opportunity to work a DXpedition until K5K went on the air over the weekend.

Actually, I have NOT worked them.

I've been wondering, though, if the stuff about "good amatuer practice" applys to these events? After two nights, it seems not.
The endless calling, calling, calling without a break when the dx station is trying to exchange a signal report, calling on the wrong side of the "split", calling from "0" when the station specifically only wants "2"s, bickering about how slow they are taking QSOs (again screwing up the split), whistling, tuning up, etc. - is absolutely apalling.

At least I have learned about the term "lid", having "met" them first-hand. I'm not sure that's a good thing, though.

3324. Re: K5K DXpedition

Newsgroup: rec.radio.amateur.dx

It's indeed pretty bad.

Calling on the wrong side of the split is usually unintentional. (he says after making that embarrassing mistake last night on 80 CW :( )

I find the continuous calling particularly frustrating. Used to be you could find the guy the DX was working, figure out which direction the DX was tuning, and call just a little further in that direction & stand a fair chance of landing the DX. Today, because of continuous callers your chances of finding the guy the DX is working are rather small.

Don't these lids realize they're slowing it down for *everyone* (including themselves!)?

I have to agree. What really ' gets me ' is when the DX says " delta sierra -only- " and hundreds of ops that do not have - any - of those letters in their call come back as if the DX had called them. Fortunately I was one of the lucky few that snagged Kingman last May when Chuck was out there for about 12 hours between down pours. I have worked K5K on 10M phone last night as well. It was easy pickings last night on 10M.

Doug, I have found that often works to my advantage, and should for a
FB CW op like you, too. It's harder to find the pattern, but certainly
not impossible. I listen on the second VFO with the filter opened up
wide. That makes it a bit easier to find amongst the endless callers.
.
I've worked them pretty quickly on 6 bands already, and on two bands
even before the amp had warmed up. On two of those bands (17 and 12)
I don't even have resonant antennas!

>Don't these lids realize they're slowing it down for *everyone* (including

Obviously not. Good thing I'm not a DXpeditioner. There would be a
long blacklist :.)

>What time were they on 80?

I worked them at 0849z on 3509.2, QSX up 3-5 or so. They were LOUD. (10dB over S9 at times) Heard them work several other 4's, don't remember hearing any W1/W2/W3 QSOs but that may not mean anything.

>(following the guys the DX is working)

Yes, that's how I got them on 80. It can still be done, but it's a lot harder than it was when people actually paid attention... Unfortunately I don't have a second receiver (that I dare use while transmitting at high power but I can swap VFOs. Hadn't thought about going to a wide filter. Certainly makes sense.

I haven't been trying all that hard but I do have them on 12m as well. Will try 160 if they show up at a time that I'm awake <g>, and anywhere else I happen to stumble across them.

>Good think I'm not a DXpeditioner. There would be a long blacklist :.)

No kidding!

Welcome to the world of working DX!!! Unfortunately, there are those who ruin it for everyone, IF YOU LET THEM. I put out my IOTA # NA 010 once in awhile and get large pile-ups on me with the same problem. The way I fix it is to identify the culprit and tell him he may as well QSY as I will not be giving him a report. The others on frequency usually get the message after two or three "expulsions". Biggest problem I get is people calling when I am in the middle of another QSO. Really irritates me and I get ugly at them. Usually works. Some of the problems you mention (ex. tx on the wrong split freq) are common unintentional mistakes (I have done that a few times), but the others are just plain rude and selfish. PATIENCE is the name of the game when trying to work these guys. There will always be the idiots who try to screw things up, but ignore them and they usually go away...Have fun and good DX !!

I'm a newbie to all this having gotten my general ticket just 2 months ago. I was shocked at most behavior, but have 1 criticism for DX callers too. Last week (didn't log it as I didn't make contact) someone was calling DX from europe(?) and I was shocked that some guy in the background actually was breaking into QSO's saying, " You suck, you suck!" Cripes. Also heard a lot of stuff along the lines of, " Hey, JOE. Call my numbers." (Joe fictional of course).

The only criticism I've had is that sometimes it seems that the best way to get called is to have a 1X3 call or shorter. I know we've got vanity calls these days, but as a newbie (KG4JBM) it irked me that so often 1X2's, 2X1's,etc. really seemed to get the lion's share. Maybe I'm just a crying young pup and don't have the right to gripe among you old hound dogs.<grin>

Anyway, been away from my rig for a week (I tell you, supporting a family sure gets in the way of the important things in life). Can anyone clue me as to who K5K is, their QTH, freqs, etc ?. I've got tonite and tuesday daytime if they're still active.

This is a great help! I was unable to copy any details from the ops and
this callsign was not listed in the latest QST I have (Oct 2000) as a
Special Event. They probably could do more help things, too, by tightening
down their procedure.

But hey, they're stuck on a sandbar in mid-Pacific so we can have some fun.
Kudos to them.

I agree completely.

Calling when you're not called is second only to tuning up on frequency in my book of lid habits. It can happen by mistake but I heard a CT3 last night who paid no attention to instructions for well over an hour. Don't know if he ever got through but he sure made a lot of QRM for the rest of us.

Mr. Lewallen has publicly used USENET to promulgate the availability he has made --illegally-- of the file. Thus USENET will be used to make public notice of the violation.

Hi,

IT's easy to criticise.... But with a DXped to one of the most wanted places
it WILL be busy.
It is soo easy to call on the wrong freq - forget the split button (most of
us have done that and cringed....)

Generally I think K5K is doing pretty well.

I do agree the lids spoil things to some extent - but we need fewer
policemen as well!!
The golden rule of course is to IGNORE them....

FINALLY - wouldn't it be so much worse if they got there, set up and
called - and NO ONE wanted to work them!!
At least it shows people still do want to do Ham Radio. I don't condone the
bad manners - but half of it is the policemen anyway.

Cheers, Bill G0VDE.

You're right, Bill, it's best to ignore the LIDS. But the problem is
the ratio of LIDS to decent operators is getting worse all the time.

Last nite I was listening to K5K on 20 meter CW. The operator
wasn't KH6ND, so he was sending slow - about 20 WPM.

He said "PSE W1 W2 W3 ONLY PSE" about 4 times, because
he was smart enuff to know it was close to east coast sunrise,
I guess, and each of the four requests were followed by 100
JA's and a bunch of Europeans calling him - half of whom were
on his transmit frequency.

When we've reached the point that half the people on CW
trying to work DX can't copy "PSE W1 W2 W3 ONLY PSE" at
20 words a minute, we have a much bigger problem than LIDS.

I have no idea how to fix it on a global scale. I fix it at my house
by turning the radio off.

Things were much more civilized last night - actually made a contact on
24mhz.

Maybe "opening night jitters?" 'twas awfully hard not to jump in Sun night
and yell "SPLIT", although I really was tempted.

It's been the same since I've been licensed (30+ years)... it only takes
a very small proportion of lids to screw things up. I just ignore them,
or do something else. There really isn't much riding on whether you work
one more or not!

Cheers and good DX...

Well, I'm glad I've managed to avoid being a lid so far but
I could use your advice since I'm a newbie. First thx. to those who
came back with the web-site info. Doesn't give times, but not too
hard to track down the roar of hungry ops.<grin> What I wanted ask
was anyone having trouble hearing the K5K crew? That is, could
always hear the callers but rarely and faintly heard the K5K ops.
I'm not running any kind of big gun rig, but reception is never a problem
in normal conditions. I heard stations from all over calling but often
could only tell K5K was on because of the lull in the roar. Any
thoughts?

Andrew,

Listen at the right time and they are LOUD! Being surrounded by saltwater can do that for you. They have been sticking to the listed transmit frequencies, so scan those to find out which band has the best propagation. Have managed to work them on 40, 30, 20, and 10 so far. Be patient and you'll get 'em.

Hi Dxs men! I here by inform you about an expedition to The Island of
Cape
Verde, that will take place from November 1-7.We will EA8BYG,SM0JHF,SM0JQX
and the one
that signs this message, EA8EE.We will broadcast from the Island of Sao
Vicente, IOTA AF-86, new reference abt June 2000, on all HF bands around
iota frecuencies incluinding 12-17m, VHF 50mhz , our grid locator HK76MK,
near the capital Mindelo, modes CW,SSB,RTTY,PSK31,HELL, MFSK16/32, MT63,SSTV
and
PACTOR.Equipmente and installations IC-706 MKIIG,ic-746 with vertical
antenna,
directional antenna A4S to be built on a mast.We also have a 5elm
for 6 meters , and TS44O Kenwood .The callsign will be D44AC.We will at he
qth of Carlos, the owner of this callsign.The qsl cards will be send by
EA8URL a Gran Canaria DX GROUP :The logs will be put/lited daily as far as
we will be able to do so www.qsl.net/dxgrancanaria/d4.htm and it will be
possible to exhange electronic qsl card on www.eqsl.org. for any
appointments
please write before or on the days the expeditions will be take place
d44ac@ea8ee.zzn.com o gsm-email 696081358@correo.movistar.net
or via dxcluster ED3ZAG-5 clx telnet access 147.83.4.88 :5081
Greeting from Canary Island

Bill, in my book the biggest lids of all are the policemen trying to
"patrol" the other lids.

Andy,

I'll second the other reply to you. I have heard
them on 10,15, and 20 pretty well, with my
80 meter dipole fed with ladder line. But, I'm on
the west coast and you're on the east.

Conditions and geography sometimes play a
sizable part in what we can hear and work, that is
if we assume all other conditions are equal. Some day,
the shoe will be on the other foot when there is a
DXpedition to Africa or an island in the Indian Ocean.

Be patient and keep trying!

Hello !
20 wpm is not slow ! Maybe for a very experienced DX or to a
contest operator (like me) it is not so fast. But remember that
there are many DXers who are not so active on CW except for
working the new ones and they know where they are because they saw
the spot on the DX cluster.
I believe that the problems is that nobody teaches the newcomers
how to operate.(and some dont want to learn either !).

73 de CT1ELP Pedro Pedroso
ps: I still didnt work K5K.

3375. ZK1/North Cook DX-pedition INFO

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-25 00:00:00 UTC
From: Yosi <7q7ja@mub.biglobe.ne.jp>
Message-ID: <8t6ffn$h3p$2@bgsv5905.tk.mesh.ad.jp>
Source record: 19166

<<<<<<ZK1/North Cook DX-pedition 2000>>>>>>

Yasu/JI1NJC has activated several small entities in the Pacific and
Indian Ocean with his company at least once a year in the past
since 1989(KH0, C2, T30, T2, ZK1/S, 3D2, A35, FW, 8Q7, S79, 3B8 etc.).

This Y2K as a peak of Cycle 23 Yasu will make another DX-citing trip
with Yu/JR2KDN who activated one of rare entities in SE Asia, Lao in 1998.
Of course the target is to work stations in everywhere as many as possible
on ALL BANDS and also SPECIAL attention to 6m will be paid and various
propagations (e.g. Scatter, Skew path, Short path, Long path) will be
tried.

Now we are very pleased to announce our upcoming DX-citing/pedition
for all of those who love DXing as follows:

Destination: Penrhyn Island (ZK1/North Cook)
IOTA OC-082
Grid Locator: BI11

Call Sign: ZK1NJC, ZK1NDK (are being requested. The license will
be collected upon arrival.)

Date: Oct 28 to Nov 4 2000

Operator: Yu/JR2KDN
(also KD1N, XW8KPL/CSN, 3W5KDN, 8Q7US etc)

Yasu/JI1NJC
(also A35CC, C21/YI, T20CC, T30CC, ZK1NJC,8Q7CC, 3D2YI,
S79CC, KH0/JI1NJC, FW/JI1NJC etc)

Frequency: 160m - 6m
160m 1.832.5MHz QSX 1837.5MHz and UP
QSX 1.815.0MHz for JA

6m 50.100MHz QSX 50.140MHz and UP
6m Beacon: BREAKABLE beacon will be run on 50.100MHz.
(6m Beacon: CQ CQ de ZK1NJC ZK1NJC QSX 50.140 K)
* If you hear 6m beacon, give your call on 50.140MHz
since we will NOT (again NOT) listen on 50.100MHz at any
time to prevent QRM.
* We will show up on usual DX frequencies or close other
than the above two bands.

Mode: SSB/CW/RTTY

Equipment: 2 x IC-706, TS-50, IC-PW1 (160m- 6m KW Linear Amplifier)
160m : Inverted L
80m : Inverted L
40-10m : Cushcraft R-7000 Vertical
20/15/10 : Tri Band Yagi Beam @ 15m up
6m : 5 ele Yagi Beam @ 15m up

QSL: via JR2KDN (SASE, SAE+sufficient return postage, Buro)
Yuichi Yoshida
4th Floor Kato Building
529 Rokugaike-cho, Kita-ku,
Nagoya, Japan 462-1112

QSL REQUEST via email:

QSL request via email will be welcome to
jr2kdn@pluto.dti.ne.jp and our QSL will be sent out via
BURO after all direct request are processed.
Please write up your QSL request in the body as follows:

YOUR CALL
DATE / UTC / FREQ / MODE / RS(T)

We appreciate Warwick/ZK1WL for his great support and Harry/JH0HQP for his
generous contribution of 6m 5ele Yagi beam.

73 & See you on many bands.

de Nob/JF2MBF (wk3d@arrl.net)
(also WK3D,VK4FBM, A35JJ, C21/MI, T22JJ, T24JJ, T28RR, ZK1AJJ,
ZK1AJJ/ZK1N, 3D2GG, T30JJ, VR6BB, VR6JJ, 8Q7BB, 8Q7JJ)

Does anyone know Art Bell's callsign?
You know, the former host of Coast-to-Coast AM.

thx,

andrew

3384. Re: K5K DXpedition

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-25 00:08:12 UTC
From: Steve <ai7w@NoSpam.com>
Message-ID: <39f6247f_3@huge.aa.net>
Source record: 19156

This discussion is as old as DXpeditions. I remember sitting through a
couple of hours
of ranting about this at a So. Cal. DX meeting in the early 70's (I think
it was a DXpedtion
to Kingman that time too).
A lot of the QRM is a result of either poor equipment or inexperience. An
operator with
a simple vertical or dipole in a large metropolitan area just can't hear
well enough to tell
what's going on all the time. A lot of new DXers just don't have the timing
down and miss
a lot because they don't know when to listen.
Some of it is just the result of simple error. It's pretty easy to use the
wrong VFO or miss
the DX station's response to someone else.

The things that get me are the 'out of area calls'. (I think most of these
guys think that they
might be able to overpower someone from another call area and get through),
The DX Cops
(nuff said about them) and the "tuneup on the DX stations frequency" lids.
(I once knew a
DXer that always tuned up on the DX frequency to slow down the pileup before
he got on).

What're ya gonna do? That's the world of DXpedtions so just work-em if you
can and get
the card if you're lucky.

Steve .. AI7W

You'll find many headset reviews at http://www.eham.net Look for the "
Product Reviews " selection in the left column of their homepage. Quite
frankly there were quite a few negative reviews of the Heil Pro headset.

SB DX @ WW < KB8NW $OPDX.482.1
OPDX Special Bulletin No. 482.1

The Ohio/Penn DX PacketCluster
Special DX Bulletin No. 482.1
BID: $OPDX.482.1
October 26, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, Dave/4L1DA, Alex/AI2Q, Juan/CO8TW, Andy/ES2NA, Mike/KA2AEV, and John/K8YSE for the following special DX information. Also a special thanks to Bill, NG3K, for the "CQWW Announced Operations" chart.

LAST MINUTE ANNOUNCEMENTS FOR THE CQ WORLD-WIDE DX SSB CONTEST!

4L0, GEORGIA. Look for 4L0Gto be active in the CQWW DX SSB Contest. The operaors will be 4L1DA/David, 4L2M/Mamuka, DL7BO/Thomas and 4L4CR/Micke. QSL via 4L1DA: David Devdariani, Shartava st.7, 380122 Tbilisi Georgia.

CO8, CUBA. Look for Juan, CO8TW, to be active in CQWW DX SSB Contest as a Single Op/Low Power/Single Band (28 Mhz) entry. QSL via direct to: Juan Carlos Veranes Ferrer, PO Box 8, Santiago de Cuba, CP 90100, Cuba. The log will be available after the contest on: http://www.qsl.net/co8tw/

ES9, ESTONIA. A serious Multi-Multi operation is planned from Estonia in the upcoming CQWW Contets. Arvo, ES5MC, Chairman of the ERAU, reports that this effort will be done mainly by the team of ES5Q and ES2X, but a surprise "guest star" should/will also participate... The contest site is located in South-Estonia (QTH of ES5Q). Some new antenna systems were just recently put up in preparation of the contest. The callsign for this operation will be ES9C. The prefix ES9 is not too common and is exclusively used in connection with the Estonian Radioamateurs Union (ERAU). This operation was put together with a lot of teamwork and also has international participation.

FP, SAINT PIERRE ISLAND (QRP operation, Not a contest Op). Hank, K8DD, left Toronto Monday morning and was expected to be here in the afternoon. He states to look for QRP contacts around, or below 7040 kHz:
(Eastern Time zone) October 26 from about 8 PM till 10 PM
(UTC) October 27 from about 0000 till 0200
We will try to keep it on one frequency (not much of a RIT and no split).

The radio will be 5 watts into a dipole or a vertical. The weather is expected to be cold, wet and foggy.

IR3, ITALY. Walter, IN3XUG, reports that he will be active in the contest as IR3Z as a Multi-Single entry. QSL via IN3XUG. A special thanks and QSL for QSOs on 4 bands or more! (Walter's E-mail address: mfronch@tin.it)

V26B - TEAM ANTIGUA Y2K OPERATION (Edited Press Release).....
Team Antigua will once again activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the Y2K running of the CQWW SSB Contest on October 28th & 29th 2000. Their plans are to enter the Multioperator/Multi-transmitter category. For a complete station description, complete with photographs and rate charts of "The Team Antigua, V26B, Superstation, please visit their Web page at:
http://www.frc-contest.org
(Click on the Dxpeditions page and then the Team Antigua, V26B Link!)
Their Grid Square is FK-97 and IOTA Number is NA-100. The Special Collectors Edition (Worked 5 Band & 6 Band) Certificate Program from V26B is continuing this year. In the past there have been quite a few certificates mailed. Therefore, due to the extreme cost of mailing, they are now requesting everyone who has worked them on all 5 & 6 bands, and would like a certificate, to please send them send them a Self Addressed Stamped Envelope (Business Size) along with $1 or IRC equalivant (to assist with printing costs) with your Log Information to W2UDT for processing.
"SPECIAL TOP GUN PLAQUE CONTINUES FOR THE 2000 CQWW SSB EVENT"
Congratulations to Bill Hider, N3RR on winning the 1999 V26B Top Gun Plaque! The team is sure that he will be defending his title for the Y2K Event! Starting on October 28th through the end of the 2000 CQWW SSB Contest, a "Special Plaque" is available to the FIRST operator to work V26B on all 6 Bands during the Contest. This Plaque is being sponsored by their very own Mr. Douglas Priest, W3CF/V26DX. So Ladies and Gentlemen, the very first person to work V26B on all 6 bands during the CQWW SSB will have this beautiful plaque awarded to them by Doug and the members of "Team Antigua".
Members of "Team Antigua" will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC Bands a few days both before and after the contest. There is also a possibility of some 6 meter and Satellite operations with conditions permitting! Most likely their operators will make their presence felt on all bands starting on or about October 25th until about November 1st. The members of "Team Antigua: and their Callsigns are as follows:
V26A Dale, N3BNA QSL Via WB3DNA
V26AK Tony, N2TK QSL Via N2TK
V26AU Carsten, DL6LAU QSL Via DL6LAU
V26B Sam, WT3Q QSL Via WT3Q
V26EW Ed, N2ED QSL Via N2ED
V26J Jay, WX0B QSL Via W3LT
V26O Bob, N5NJ QSL Via N5NJ
V26OC Brian, N3OC QSL Via N3OC
V26SZ Sharon, N5CK QSL Via N5CK

V26TZ Tom, ZP5AZL QSL Via W3HNK
V26U Bill, W2UDT QSL Via W2UDT
V26YR John, W2YR QSL Via W2YR

CQWW SSB 2000 Announced Operations (Final Version)

The following list of announced operations for the CQWW SSB 2000 Contest was derived from the NG3K "CQWW SSB Announced Operations" Web page. For updates and fuller details (including many QSL addresses and operational specifics) refer to:

I keep forgetting to reset to split whenever I check another band. I am usually quickly reminded with cries of "he's listening up you idiot" & similar stuff. It does get my attention that I need to push the button.

>I do agree the lids spoil things to some extent - but we need fewer
>policemen as well!!
>The golden rule of course is to IGNORE them....
>

One of the reasons for hams stepping on the station the DX is trying to work are the police. Many times I can't here the DX.

The K5K has a bunch of great operators. So far I've only worked them on 12 meter phone, but their calling by propagation instead of numerical order is a model for all DXpeditions. I hope others follow suit in the future.

3394. Antenna Question

Newsgroup: rec.radio.amateur.dx
Date: 2000-10-28 02:22:05 UTC
From: Adam <radar_radio@yahoo.com>
Message-ID: <svkds86f2oolfa@corp.supernews.com>
Source record: 19180
Cross-posted to: alt.ham-radio.dxing,alt.ham-radio.hf,alt.ham-radio.ssb,rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

Hello everyone. I'm fairly new to HF and have a few questions about my antenna setup.

1. I have a G5RV Dipole up about 40' set up as an inverted "v", and use it on 10-80 meters with an external tuner. I just got a new rig with a built-in autotuner. My question is: will the autotuner handle the SWR of the G5RV as well as my manual tuner does, or will I be better off to continue using the manual tuner? II have heard that autotuners have a low tolerance to high SWR, and in some spots, the SWR on the G5RV is very high (3.1+).

2. How far should the ladderline and coax be from the leg of my tower? Do the "arms" of the antenna have to be in a V shape, or can I string them to fit my lot (If I do a V config., one arm hangs about 10' above my telephone line, and I don't want to do that).

3. I notice that on 40 and especially 80 meters, I get RFI on our TV's and phones as well as radios, but only on occasion. Would installing a good low-pass filter help to resolve this situation, or should I look into installing line and high-pass filters on the effected equipment?

Any information would be greatly appreciated!

Thanks
Adam

Yes, I agree with what Walt here says...I have a G5RV and use it with an FT-990 which has an autotuner and it works fine, my ant has several spots with swr over 3:1 and the tuner handles it fine...just for your info...

Greetings,

I had a great QSO with TI2HMG, "Henry",
a german ham living in Costa Rica. He'll be coming to
Sarasota in december. My QTH is in Virginia and we'd
like to set up a sked for that time. Does anyone know
if the FCC will ok some sort of "guest license" so he
could get on-air from fla. ?? He doen't know any hams
in fla. so would bring his radio and put up a wire from
down there. Your help is most appreciated.

73,

Andrew

Adam, As you well know, opinions on antennas are a dime a dozen, everybody has his favorite. I tell you from first hand experience (been there, done that, got the T-shirt to prove it) throw that G5RV away and just put you up an inverted V or a flattop for 80 mtrs feed it with coax (rg8x is light and will handle up to 600 watts and is inexpensive) Your'e autotuner will love the Vor strait dipole, and I will bet you will hear better and receive better signal reports.

> or a flattop for 80 mtrs feed it with coax ...

Opinions are one thing - physics is another. Your above configuration (with coax all the way to the dipole) is much worse advice than the G5RV on the bands where the G5RV performs well, i.e. 80m, 40m, 20m, 15m, and 12m. According to EZNEC, the 300 ohm series section transformer (matching section) lowers the 50 ohm SWR from 69:1 to 3.4:1 on 80m, from 64:1 to 4.3:1 on 40m, from 74:1 to 7.8:1 on 15m, and from 15:1 to 2.2:1 on 12m. Take a few minutes to calculate the relative losses in the coax due to SWR and you will see that the G5RV beats your antidotal advice all to heck. A good rule of thumb is not to run more than 50 ft of coax with an SWR higher than 10:1.

Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH/WB2RAJ & The 59(9) DX Report, K3MLA, K3TEJ, W3UR & The Daily DX, WB4PVT, K8IW, K8YSE, N9PD, K0RX, NU0Q, BD7NQ, CT1BWW, DJ5AV & DX News Letter, EA5RM, F5NOD, G3SWH, HK3JJH, HR1ERL, IZ1DFI, JA3MZB, JF2MBF, JF6OJX, LA9XGA, PS7AB, PY2YP, VK2GJH and VK4AAR for the following DX information.

1SL1A, SEALAND (Interesting report of the week! DX IS...). OPDX received a report this week from a person named Jon stating that he along with some other hams are going to be operating from the "Principality of Sealand" sometime next month or in December. The callsign that they will be using is 1SL1A. Sealand is currently being disputed worldwide as being its own entity. More details on this operation is forthcoming soon. You may have heard of Sealand, if not, here are some links you may find useful for research:
http://www.sealandgov.com/
http://www.fruitsofthesea.demon.co.uk/sealand/index.html
Here is an ABC News article on Sealand.. Click on the picture for a video news story using realplayer video.
http://more.abcnews.go.com/sections/tech/dailynews/sealand000606.html

5T, MAURITANIA (possibly S0). Eight members of the "International Amateur Radio Volunteers" (IARV) led by Yoshi, JA1UT, will visit 5T-land for their NGO project. They will operate as 5T5U, same as last December. In addition, if allowed, they will try to enter the land of Sahara Occidental and operate S07CRS. QSL for their operation will be handled by JA1UT.

9M6, EAST MALAYSIA. Members of the Borneo ARC will be signing with the special callsign 9M6C from November 3-5th. Activity is expected to only be on 14195 and 21195 kHz.

C21, NAURU. Jack Haden, VK2GJH, will be active as C21JH (RI-39) during the period December 10-22nd, inclusive. A special focus will be on 50 MHz band with HF activity on a limited basis. He will be monitoring 50.110

and 28.885 MHz using an IC-736 (100w) to a five element at 45 feet. Jack states, "Any donations from the 50 MHz fans for this operation would be appreciated due to travel costs incurred in the HIGH SEASON." QSL via VK2GJH direct only.

C6, BAHAMAS. John, K3TEJ, will be active from Treasure Cay (NA-080) from November 21-28th as K3TEJ/C6A. Activity will be on 160-10 meters including the WARC bands. He will participate in the CQWW CW Contest as C6AKW. QSL via K3TEJ

CQ2, PORTUGAL. Look for operators CT1BWW and CT1DGK to activate CQ2K in comemorating the year 2000 on November 10-12th. Activity will be on all bands (no 160m), including the WARC bands and an entry in the JIDXC Contest. A special QSL card will be available via QSL Manager CT1BWW.

E30TA, ERITREA OPERATION. There are only a few days left for this operation. Operations are expected to end November 1st. This station was very active during last weekend's contest. QSL via DL5NAM.

EIDXA 2001 OFFICERS. The Easter Iowa DX Association is pleased to announce its officers for the 2001 calendar year:
President - Heinz Blankenhagen, NR0X
Vice President - Rick Heinrich, N0YY
Secretary/Treasurer - Tom Kueny, K0DX
Congratulations and best of luck to these fine amateurs.

GD, ISLE OF MAN. Steve, G4UOL, is expected to be active November 17th through December 1st as GD4UOL. Activity will be on 160-10 meters CW only with an entry in the CQWW CW Contest. QSL via G4UOL.

IOTA NEWS.....
AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) several times during the next few months: November 14-24th, Decemeber 15-25th, January 5-16th, February 6-16th and March 20-30th. However, this is not a DXpedition and Masa will only be active during his spare time. Suggested frequencies are: 14260 (+/- 10 kHz) or 21260 (+/- 10 kHz). QSL only via the Bureau.

OC-129. John, G3IZM, will depart the UK for Manila on December 17th, and will be operational as DU7/G3IZM from Guimeras Island in the Visayan Group between December 19th and January 5th, as swimming and other holiday pursuits permit! His activity will be done with an IC706 MK2G with dipoles over the sea on 20/15 meters CW/SSB. QSL to home callsign.

JW, SVALBARD. Tor, LA9XGA, will be operating with the callsign JW9XGA from the JW5E Club hut in Longyearbyen Spitsbergen Island, Svalbard. He will be active from November 2-8th. Activity will be on all bands, CW/SSB /RTTY/PSK31. QSL via LA9XGA to the bureau or direct to: Tor-Atle Sandal, Hamnaflot 6, N-4200 Sauda Norway. For more info, check the Web site at: http://www.qsl.net/jw9xga

KP2/WP2, U.S. VIRGIN ISLANDS. Bill, NU0Q, will operate WP2Z from St. Croix during the ARRL CW Sweepstakes Contest November 4-6th. Before and after the contest, he will sign KP2/NU0Q. IMPORTANT: QSL WP2Z via KU9C. QSL KP2/NU0Q via NU0Q.

K5K, KINGMAN REEF OPERATION. There are only a few days left for this operation. Operations are expected to end November 1st. K5K was heard during the CQWW DX SSB Contest begging for QSOs on 20 meters.

P5, NORTH KOREA. Rumors continue to be pass around about a possible P5 operation to take place at the end of October. However, according to "The Daily DX" a multi-national team of operators who meet in Seoul, South Korea "in preparation for trip and possible demonstration operation of amateur Radio in North Korea", were informed by authorites "that permission to operate Amateur Radio would not be granted." The group was, however, given a new date of January 7, 2001, for a possible Amateur Radio operations. Only a few details are available because of the sensitive nature of this operation. More details are to follow. Let's hope that this operation can take place, KYFC and stay tuned.

PV3, BRAZIL (Special Operation). Look for PV3DC to be active from "Fort Duque de Caxias" from November 2-5th. The will be valid for the "Brazilian Historical Fortifications Award" (DFH) as RS-01. Activity will be on CW/SSB on all bands 80-10 meters. QSL Manager is Ruy Brasil (CBA/QRZ). E-mail address is: py3afe@sgnet-rs.com.br

QSL INFO AND NEWS.....
Logs for 3A/IZ1DFI (Gianni) and 3A/IK1QBT (Tony) for their October 21-22nd operation are now available at:
http://www.qsl.net/iz1dfi
http://www.qsl.net/ik1qbt
If you are missing from the log file, send E-mails to:
IK1QBT/Tony - k1qbt@amsat.org or Gianni/IZ1DFI iz1dfi@libero.it
with your callsign and log information, and they will do a search for you.

Terry Liang, BD7NQ, informs OPDX that QSLs for B7K go via W2AY, NOT BD7NQ.

Charlie, WB4PVT, has talked to Georgi, LZ1ZF, and he reports that Georgi is the QSL Manager for BT4ARDF. Georgi has just returned from China where he took part in The 10th Amateur Radio Direction Finding World Championship (were he took 4th on 2 meters band and 5th on 80 meters). He states that all logs (over 4000 QSO's) are at his disposal, and he is the QSL Manager for all contacts regardless of the operator of BT4ARDF. QSL cards will be printed in two weeks. Georgi will QSL 100% via the bureau, but states that the LZ QSL bureau is quite slow, so he will also confirm directly (please SASE) via CBA or to: LZ1ZF, P.O.Box 11, 4300 KARLOVO, BULGARIA.

Gil, F5NOD, reports that the FO0/F5JJW log is now available on his Web site: http://f5nod.waika9.com/
Pictures will also be available soon. The operation was from Mangareva Island (Gambier). Reference number: OC-063 (IOTA) and FO-108 (DIFO).

Gil states, unfortunatly, the operation from Tikeau Island was cancelled and Joel (F5JJW) is back home.
Gil, F5NOD, also reports that the FK-DX Group Wep page is now on-line at: http://www.multimania.com/fk8hc/

Two members of the Radio Club GRAPA (Grupo de Radioaficionaodoa al Packet) HR1AAB/Alberto and Antonio/HR1ERL were active in this past weekend's CQWW DX SSB Contest as HR1AAB. QSL via: P.O. BOX 1734, Tegucigalpa Honduras, Central America, Zip Code 11101.

SV9/K7BV QSLS. Mike, K8IW, informed OPDX that he talked to Steve, KU9C, and was told that the QSLs would be ready in about a month. They are having a full colored QSL card printed, but had some problems with the picture. The picture was sent to the printer just recently, and Steve thinks the turn around will be pretty quick. He is sorry for the delay, but wanted to do a nice card for this operaiton.

VK6BM QSLs. Alan, VK4AAR, advises that after several unexpected holdups at the printer's, he has been advised that he should be receiving the VK6BM (OC-234) QSL cards very soon. All the envelopes are ready with stamps on them, so as soon as he receives the cards, they will be on their way to the DXers, progressively over the following days. Alan will make sure such delays do NOT occur on future operations. He thanks all for your patience.

Toni, EA5RM, informs OPDX that the XU7ABD log is now available at the Web site: http://www.qsl.net/xu7abd

Cesar, PY2YP, Chairman of the Grupo de CW de Sao Paulo (CWSP), informs OPDX that the Grupo de CW de Sao Paulo (Sao Paulo CW Group) has a new URL address: http://www.cwsp.org.br
The CWSP site hosts the logs for AX0LD (Macquarie Island) and PS0S (Peter & Paul Rocks).

QSL cards for YC3ZMI (IOTA OC-237 operation) should be sent to IK8CCW at: Antonio Cannataro, PO Box 360, 87100 Cosenza ITALY (he is not member of ARI).

SPECIAL EVENT. Look for UA4SKW to operate the special event station to commemorate 80th Anniversary of Mariy-El Republic. The special event callsign UE4SMA will be used now through November 30th. QSL to:
80 years of Mariy-El, P.O.Box 145, Yoshkar-Ola, 424000, Mariy-El, Russia.
A "Special Commemorative QSL" card will be available. A donation of a USD to defray printing would be appreciated. For more information, contact Tom UA4SKW at: toms@mail.ru
There will be a special award certificate "Mariy-El 80" for those who made QSOs with Russian stations from "UA4S"-oblast during year 2000 (foreign stations need 2 QSOs, CIS - 3, Russia - 5 QSO`s). UE4SMA counts for 2 QSOs for everyone. The certificate fee is 4USD or 10 IRCs.

VK6, AUSTRALIA. Larry, K3MLA/KG4ML, will be in Geraldton, Western Australia, from November 5-17th. However, he states this will be a business trip and has been issued the callsign VK6BRP. He will be taking his FT-100, along

with a rigblaster interface and laptop, and will be trying to hand out some PSK31 contacts from Zone 29. Larry plans on operating 40-10 meters, including the WARC bands, operating CW and SSB. He is hoping that the "Best Western" motel will be "HAM Friendly" to antennas (this may be a problem). As a backup, Larry is taking an ATAS-100 mobile HF antenna just in case he can only operate from the rental car. Like his KG4 operations, if he is not working, he will be operating the radio! QSL via his home callsign, K3MLA.

VK9L, LORD HOWE ISLAND. "The 59(9) DX Report" reports that Ed, AA4EH, will be active from October 31st through November 6th as VK9LEH, His activity will be on 20/15/10 meters and the WARC bands. QSL via AA4EH.

VQ9, CHAGOS ISLANDS. "The DX News Letter" reports that Patrick, W3PO (ex F6DWY), will be active as VQ9PO beginning October 30th. Activity will last until next March. Look for him to be mostly on CW and on all bands. QSL via W3PO.

YJ, VANUATU (DXpedition Update). "The Prairie DX Group" has provided more details to their DXpedition to Vanuatu November 19-29th. The group plans to not only have real-time on-line logging, but also a live Web cam active during the operation. They expect to be assigned the callsigns YJ0PD for their general operating and YJ0V for the CQWW CW Contest. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin. The QSL route for the DXpedition (including CQWW CW Contest) is via N9PD, direct (please include SASE, IRC or USD) or via bureau. DO NOT SEND QSL CARDS VIA "YJ VANUATU BUREAU". For further information, please check their Web page: http://www.n9pd.com
Or contact them at: kf9zz@arrl.net

ZK1, NORTH AND SOUTH COOK ISLANDS. Remember to look for operators Yasu/ JI1NJC and Yu/JR2KDN to be active from Penrhyn Island (IOTA OC-082, Grid Locator BI11) now through November 4th as ZK1NJC and ZK1NDK, respectively. Both are veteran DXpeditioners. However, as this bulletin was being prepared during the CQWW DX Contest Sunday morning, PacketCluster spots show the duo is currently active from the South Cook. Hopefully the team will be able to travel to the North Cook Islands. Activity is expected to be on CW/SSB/RTTY on 160-6 meters. Please refer to OPDX.478 for further details and QSL routes.

Hello again, and thanks for the advice so far. I wanted to make a few clarifications about my setup though. I intend to use my G5RV on ALL HF bands (10-80, including WARC). The antenna has 102' of "flat-top" to it, and about 30 feet or so of 400 ohm laddeline which is connected to a balun, after which there is about 70 feet or so of rg-8x. If precise measurements are needed, I can provide some. I am aware that certain lengths of coax can increase the SWR, but if memory serves, the length I have is one shown to be within an acceptable SWR range (although the SWR is still really high in spots).

My main concern was that my new rig's autotuner would fail if too great of an SWR is shown to it.

Thanks for your patience on this matter...I am slowly but surely learning the "HF ropes", as I am more experianced with VHF antenna systems.

Adam

So what you do about that is run PARALLEL dipoles, such that one of
them always presents a modest SWR on all bands of interest. 80,40, and
twenty meter dipoles paralleled on a single coax run do a quite good job
of covering the HF bands here.

But for crissake don't try to trim the individual flattops for low swr on their own bands because they all interact and trimming one will make some other dipole too long/short etc and you'll drive yourself nuts. BTW, don't try using what cable companies and telcos use for 'lashing wire' to make antennas out of, the manufacturers build a little resistance into the material in them and you just cannot get the swr down. (drove myself nuts trying to once).

The standard G5RV does not work well on 30m, 17m, and 10m. However,
slight variations have a big effect on 10m. If you really want an
all HF band antenna, take a look at mine on my web page. Also follow
the G5RV web page selection to find out all about the G5RV.

I cut them for center band, separate them as much as possible,
avoiding close parallel installations and tune them with a tuner. It
has always worked for me.

That "carrier wire" is stainlss steel of high strength, and I never
pass an opportunity to grab it when available. I don't use it for
antennas but there are many other excellent uses for it.

IMO Nothing beats Copperweld for antennas. A few years ago I boubht a
spool of some new stuff called "Silky Smooth" or somethbing like that
from The Wireman. It was many small strands of plated steel and looked
like a good thing, and I repaced all my old copperweld with it. Turns
out it was NOT a good thing at all. I climbed the tower last week and in
looking things over and I see that ALL the entire length of each wire
element on all my antennas are now RUSTING! The plating is coming off
the small strands and over the entire length of every wire element small
points of rust are appearing. I'll have to replace every element on
every wire antenna, 160, 80, 40 and 30 meter dipoles. So much for
another "technological" advance! It's copperweld exclusively for me from
here on.

Try http://www.nrcdxas.org . It's the website of a North American club for
AM DXers - and also has links to a variety of other related sites.

I managed to work the K5K DXpedition on several bands and modes, and was feeling so good about the 10 M SSB QSO that I failed to enter the time into my log (READ: walked away from the computer without pressing the <enter> key - duh!) I know the time within about an hour... but probably not good enough to get a QSL out of them.

Does anyone know if they plan to post on-line logs for dummies like me to check their QSOs against? And the web site URL?

I also agree that these folks were a great bunch of - very patient - operators.

1SL1A is the club station for the Radio Amateur Association of Sealand.
1SL1A is planning HF and VHF operation December 9-12, 2000. Activity will be
on SSB and CW. Bands activated will be 10,15,20,40,80 and possibly WARC and
160. An APRS Packet station will also be set up and a packet digipeater.

Yeah, we've all done that one once or twice! I recall that they said on their web site that they would post the logs after the operation was over. I don't, however, recall the URL of the web site. (I am a VERY casual DXer (except on 6m)). Based on past experience, however, I think that if you submit a valid QSL for any band, their computer is going to spit out a label containing ALL the contacts they logged for your call sign. I recently got a card for a 6m contact which also had a 40m contact on it. I wonder who he really worked on 40m? It wasn't me.

I need urgently a RFDS [australia] 10+ channel 100watt radio. EITHER of the big brands CODAN / BARRETT will be just fine.Would prefer multimode [USB / LSB / AM etc] but straight USB is enough to get me through.
Must excellent condition AND reasonable price please.PREFER AUSTRALIAN deal but will talk with ANYONE. PLEASE E MAIL me with details rredbeak@hotmail.com I KNOW there are dozens of them laying round garages eberywhere.MOST are in great condition.PLEASE consider.ROD

I suspect that he wants to buy them below face value, a common occurence in ham radio circles. QSL managers get large numbers of IRCs which can only be redeemed for the current level of airmail postage ($0.60). Yet, the cost at the post office is around $1.10. Many managers sell the IRCs at cost or slightly above to other hams ($0.60-$0.75 has been typical). I've bought many in this way over the years.

I'm relatively new to the world of ham radio (got my general ticket about 4 months ago) but I've already started collecting a nice set of QSL cards and from time to time I take some into a nearby elementary school where I'm a mentor. I'd like to show the cards off but don't want lots of greasy (I go there after lunch) little fingers smearing them.

My question is this. Is there a commercially available QSL card holder or is there something that you old timers use to show off your cards other than your wall? Thanks in advance and

Source record: 18980

Symptomatic of today's society - an increasing number of "flakes" who (for whatever reason) are compelled to annoy or even harm the rest of us. There seems to be a growing number of people who are angry, insecure, immature or just plain malicious who sieze upon any and all ways to take out their frustrations by creating havoc. Call them mini-terrorists, for that's what they are.

The defense against this sort of thing is really two-fold: (1) incorporating the analysis and rules Jim documents into the cluster software and (2) improving upon the basic user interface. Not having a whole lot of experience with the DX clusters (I really only have looked at them since K5K went on the air, and through the CQWW), I assume that the basic telnet window is the "norm", which left me with lots to be desired.

I'm starting to think about a "smart" front end that collects and processes spots - not just filtering, but applying some guidance from me as to how to report the spots. I do find it bothersome to see lots of 6M spots from Japan and similarly they wouldn't care about any from the US. I'd really like to generate several "queue" lists that track (by age) to/from specific QTHs and maybe display them on a map or globe for better visual cues. I think that a lot more info would be gleaned from the basic spots through a bit of analysis and interpretation on the client side. This would lend itself to detecting when bogus spots are occurring and ignoring them. At any rate, a high rate of "trash" could be processed without degrading the information we get out of the datastream - DSP, in essence, for the spotting data.

Maybe my idea exists already. I've just not seen anything along these lines.

There is a shareware program called DXTelnet that has most all of the
features you list above. It was written by a ham in Italy and used
widely from what I hear. The shareware fee is about $30. I have been
using it for about 6 months and it works seamlessly with my logging
program, Prolog2K.

Another good shareware program I use is called 'DX Monitor'. I picked it up off of the internet somewhere. Lots of filters and it will spot onto a Great Circle Map at the click of the mouse. When you click on one of the spots, it automatically opens QRZ.COM and gives you the QSL info etc. You can also get WWV bulletins, numbers etc at the click of a mouse. I like it a lot and recommend it fully.

Scott, VE1OP

Yep. That domain name isn't far off the mark.

Just another bunch of crackpots like the Republic of Texas idiots that
tried to shoot it out with the cops a couple of years ago.

Or locally, the Republic of Florida idiots who refused to file tax
returns for several years and are now not only not employed as
firefighters for the village of Hallandale, but are going to get the
opportunity to make some new friends in the big house.

Try

www.hamstuff.com they market a storage box (cardboard shoe box like box)
and a set of index cards pre indexed with all the prefixes that are
available. If you are a dx card collector it is a very effective way to
catalog and keep track of qsl cards. Not very good for show-and-tell but
good for filing.

Visit http://dx.qsl.net/cqdx for info on #CQDX the only IRC channel
(that I'm aware of) that has DX spots. Or configure your IRC client to
connect to irc.worldirc.org and join #CQDX.

Message-ID: <NILM5.3095$925.99867@news.direcpc.com>
Source record: 19006

I worked this station on 28.470 yesterday so did one of my friends. We both heard him give his QSL manager as JR6KND. I listened again and concluded he was saying JR6KDN. I searched every qsl data base I know of and could not find a mailing address for his QSL manager. I did some more investigation through DAILY DX ARCHIVES and saw references to the ZK1NDK North Cook Islands dxpedition with JR2KDN as the QSL manager.

My question is has anyone else heard who the qsl manager is for ZK1NDK, I would like to conclude that my friend and I heard the QSL MANAGER call wrong, would seem that way from the info on DAILY DX buttttttt I would appreciate some one confirming the info from another source

3473. RF generator

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-04 00:00:00 UTC
From: Erik Sies <e.sies@mailned.nl>
Message-ID: <3A03E7E5.B6C63D32@mailned.nl>
Source record: 19015

Hello,
My name is Erik Sies, I am looking for an RF generator up to 1000 MHz,
preferrably higher (e.g. 1500 MHz).

I am on track for a Marconi TF2022 (80 kHz - 1010 MHz synthesized).

Is there anyone with experience on this type rf generator, especially
its phase noise characteristic.

Regards Erik

This information from one of the DX newsletters (I forget which, sorry)

I have HEARD him give QSL manager as JR2KDN several times.

Also look in Buckmaster.

But good luck in working him!!

Cheers, Bill

ZK1 - NORTH COOK
Yasu, JI1NJC, and Yu, JR2KDN, are on the air from Penrhyn (OC-082)
signing ZK1NJC and ZK1NDK between Oct 28 and Nov 4. Operation takes
place in SSB/CW/RTTY on all bands (6m->50.100 MHz, QSX 50.140+).
QSL via JR2KDN (CBA or JA bureau). Bureau QSLs may be requested by
sending an e-mail to: jr2kdn@pluto.dti.ne.jp

Not really a 'DX' question, Erik, but...

The TF2022 is a really good generator. I used to use them frequently. I
believe that the phase noise is low (OK for must measurements on NBFM,
but I can not give you a figure).

Be careful with old second hand units. From my experience, old units
sometimes suffer from sticking attenuators and dead memory backup
batteries. However, I wish that I still had one to use.

Ian.

Jim.

This Newsgroup is concerned with amateur radio and DX.

I would suggest that one facet of amateur radio is 'shortwave listening'
and, in this context, it includes all of the electromagnetic radio
spectrum, and also transmissions from both licensed radio amateurs and
from broadcasting stations.

Surely the anomalous long-distance reception of any transmission ranks
literally as 'DX' (even though, in amateur useage, 'DX' is also used to
mean 'rare').

So....
I would have thought that Philip's query about the unusual reception of
VHF signals was PERFECTLY appropriate to this NG.

Or....
Am I mistaken? Is this NG only interested in HF, people on private
incomes operating expensive equipment from exotic locations, and
exchanging pieces of cardboard?

Ian.

PS. Do you actually still have SWLs in the USA? From some of the questions asked on the various NGs, I sometimes have my doubts!

PPS. The phenomenon which Philip experienced could well engender an interest in radio, and maybe lead to someone becoming a licenced amateur.

PPPS. It isn't only FM which is 'F***ing Magic'. ALL radio is 'FM'!!

>Philip Broad
>

This is a fairly common phenomenon, Philip. It's usually caused by what is called 'Sporadic E' propagation. This often occurs in early summer, usually in late morning and early evening. My understanding of it is that the electromagnetic radiation from the sun ionises patches of the 'E-layer' (one of the layers of the ionosphere which reflect radio waves). This layer is particularly efficient in reflecting radio signals between (say) 25 and 150MHz (which includes FM radio, which is between 87.5 and 108MHz).

I always imagine these reflective patches as being similar to small mirrors floating way up in the sky. If the 'mirror' happens to be in the right place, you will get a strong signal from those transmitters which you can 'see' in the mirror. Usually, the transmitters are between 500 and 1200 miles away (nothing more, nothing less). Also, signals often come from a fairly small area. You may get signals only from a small part of Spain, and nowhere else. A few minutes later, it may be Southern Italy. These 'mirrors' may appear and disappear very rapidly - hence the 'sporadic' in 'Sporadic-E'.

In the UK, in the olden days of black-and-white, 405-line, VHF TV, Sporadic-E signals from Europe frequently wiped out reception on those long, warm summer evenings, especially in July. I come from N.E. England (Northumberland), and I vividly remember watching motor racing from Monaco, on the south coast of France (as transmitted by the British BBC on Channel 5 (~65MHz) on 405 lines). The transmission was frequently interspersed with the same picture on 819-lines from Lille in France. However, on my TV set, the French signal appeared on the screen as TWO tall, thin, identical images, side-by-side. This is because 819 lines is almost exactly twice 405 lines!

To sum up...
In July, reception at a distance of around 1000 miles of strong FM radio and other VHF radio signals is VERY common. It's what the radio broadcasters HATE (they don't want their broadcasts to be interfered with), and the radio amateurs LOVE (we always welcome the opportunity to make contact with other radio amateurs in unusual circumstances).

Ian.

If you're talking about contest logging software I'd recommend K1EA's CT log, it's pretty much a matter of a standard today. But it cost a lot of money ! Way too much, in my opinion.

On the other hand if you're looking for logging software for general use try Logger, it's free (download at http://www.ve9dx.com/logger.html) it works on the windows 9x/ME machines and I like it very much.

On the same site above you'll find a link to Writelog, windows based contest log, which apparently is a bloody good thing but I haven't seen it "live" yet so I can't tell you how good/bad it is. And it cost about US$ 75- which is not cheap either.

The best log however (for me) is LogPlus of N7XR (ex KD7P) it's a DOS based program, works on any 486 and higher computer and cost about US$ 50- or so. The problem is that Bob (N7XR) has some problems in his life and he's giving up on it (for the time being ?) so the future / support / rights are all questionable.

I've used DXTelnet - and paid the fee....
and found it a very good programme. Occasionally (once a week!)
I think it crashes my computer but that could be me and not the programme.

Has all sorts of useful links, sorts the DX spots into one window and all
the other garbage (announcements, WWVx etc)
into another.

WELL worth the fee.

The guy will even accept foreign cheques (I paid in a £ sterling cheque
drawn on a UK bank!!)

It will also look for selected countries, tell you where to point a beam
given you location and the DX country etc etc.

Good luck, Bill G0VDE.

Heh - just think about the size of a QSL card - size of a PHOTO....

A Ham friend of mine gave me this super tip.

Use a cheapo photo album - I even have some free with petrol coupons etc.

Even expensive ones are cheaper than 'proper' holders..

Cheers, Bill

We said that you shouldn't crosspost to newsgroups of which you don't
even understand the language? Because if you do, and you have, you
wouldn't understand a thing, so stop whining you don't know what we're
talking about or stop crossposting to a dutch newsgroup.

When you send a message to a Dutch newsgroup (nl.radio.scanners) you can
aspect in answer in Dutch.

3497. Wanted Philips DC-77 SW car radio

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-05 00:00:00 UTC
From: Hirsch <isaac@hirsch.screaming.net>
Message-ID: <3A062B34.C21902F3@hirsch.screaming.net>
Source record: 19033

Hello,

I am looking for a Philips DC-777 Short Wave car radio, or any other short wave car radio with the 16 METER BAND, in good working order and its manual if possible. Can anybody help, please?

Email: isaac@hirsch.screaming.net

Many thanks,

Isaac

Try the latest DXTelnet version (4.91):
http://www.qsl.net/wd4ngb/telnet.htm
it uses less resources than previous
versions and this proved to be healthy
for the systems, especially when running
many applications simultaneously.

Best (((73))) de Fabrizio (IK4VYX)

1SL1A, SEALAND (More on this interesting upcoming operation. DX IS...). Jon "JT" Utley, K7CO (1SL1J), has informed OPDX that the 1SL1A operation will take place between December 9-12th. Activity will be on 80-10 meters. The WARC bands and 160 meters are being considered. The 1SL1A operation will be active during the ARRL 10 Meter Contest. Jon mentions that the license from the government has been issued. He also states the following: "For those that are wondering about using the prefix 1SL... As some of you know in the past 1S has been used for Spratly. This prefix bloc is not reserved for Spratly but used because the area is in dispute over who owns the area. Sealand is also in dispute. I will list links below that touch on the international debate over Sealand's claim. Any comments regarding your research of Sealand are welcome. We have created the Radio Amateur Association of the Principality of Sealand and our goals are to become a member of the IARU and eventually the ITU." Again, for more information and details, check the following Web sites:
http://www.sealandgov.com/
http://www.fruitsofthesea.demon.co.uk/sealand/index.html
http://www.nielsen.net/1sl
Here is an ABC News article on Sealand.. Click on the picture for a video news story using realplayer video.
http://more.abcnews.go.com/sections/tech/dailynews/sealand000606.html

ADDED NOTE: OPDX has learned that an operation took place from Sealand in 1982 by four German ham operators (DF8AO, DK8KW, DL6PE and DL2NO). They used the callsigns S1AH, S1AB, S1AS and S1AD.

3B8, MAURITIUS. Sigi, DL7DF, will be active as 3B8/DL7DF between now through November 16th. Please note that this is only a vacation, NOT a DXpedition! Expect only some occasional activity. Sigi will have a TS-50, a linear as well as Titanex V80 low band vertical. QSL via the bureau to DL7DF or direct to: Sigi Presch, DL7DF, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany. The DL7DF homepage is at: http://www.qsl.net/dl7df

3W, VIETNAM. The Uruguay DX Group/Cram will make a new joint DXpedition this year. This time they will operate from Southern Vietnam. Activity will be from November 22nd through November 26th, from Kimdo Hotel in downtown Ho Chi Minh (formerly Saigon). The station will be able to use 500 watts into a 3 element yagi. The lisence has been issued, but the callsign will not be announced until their arrival due to the possibility of a pirate operation. A well know operator who will be there is, Bert, CX3AN (formerly: CX0XY, VP8BUH, C91BV, P40AN, HR6XX, VP5/CX3AN, ZK1AAN, ZK1CRR, 3D2HA and FO0ALE). QSL Manager is Antoine, F6FNU.

4J, AZERBAIJAN. "The 59(9) DX Report" reports that Bob, N3NGC (ex-EL2RF, A92GD), has left Liberia and is on his way to Baku and hopes to obtain a license.

4W6GH QSLS AND MORE. Antonio, CT1EGH/4W6GH, reportedly is very busy processing the thousands of QSL cards that he has received and continues to receive. Some have received their QSL, but please be patient. He currently is unsure when he will go back to 4W, but he does state everything indicates that it should be in February of 2001. Antonoi hopes to be active from Guinea-Bissau (J5) during November sometime. His Web page is at: http://www.qsl.net/ct1egh

4S, SRI LANKA. Just a quick reminder that Phil, G3SWH, and his XYL will be in Sri Lanka (IOTA AS-003) from November 9-22nd. Phil has received the licence and callsign 4S7WHG. They will be travelling extensively during their stay, and Phil hopes to be active on CW only, all bands from 40-10 meters for a few hours at least on most days, circumstances permitting. This will be a holiday type operation with limited activity, although they will spend the last few days relaxing on the beach at Unawatuna in the south of the island where Phil hopes to be a little more active. He will have his IC-706 and R-7000 antenna with him. QSLs will be via G3SWH, either direct or via the RSGB bureau.

9M6, EAST MALAYNSIA. Timo, OH1NOA, will operate as 9M6AAC from the Hillview Gardens, Keningau, Sabah, during the CQWW CW Contest as a Single Op/All Band/High Power entry on November 25-26th. QSL via N2OO. Before and after the contest he will try to monitor 6 meters and work some WARC band QSOs. For more details, check the Web site: http://www.qsl.net/oh1noa/9m6/9m6aac.htm

A5, BHUTAN. The JA group that was active this past week is now QRT. However, there has been some confusion on the QSL routes. The original annoncement stated to QSL all contacts to JH1NBN. However, this seems to have changed. Before leaving Yuki, JH1NBN, sent out a report and stated that each operator will receive their own callsign and be their own QSL Manager. QSL to the following A5 callsigns and operators:
A52B via JR7TEQ A52JA via JK1AFI A52XX via JA1PCY
A52DX via JF1PJK A52W via JH1NBN

AT0, INDIA. In connection with the Ham Radio 2000 Convention to be held at Hyderabad, India, in December 2000, the special event station AT0JH will be active during some CW and Phone contests. This station was heard this past weekend and is expected to be active again (on SSB) from 1830z November 10th to 1830z November 12th. QSL via Box 15, Secunderabad 500003, India.

CONVENTION PHOTOS. Jean Michel, F6AJA, reports that he has put some photos from the IOTA/RSGB Convention in Windsor last October on the Yves, F6CYV's, web site at: http://home.nordnet.fr/~yverbeke/iotaconv.shtml

DXCC NEWS (GOOD AND BAD NEWS).....
7O1YGF QSL STATUS. There was a report that came out this week from Bill Moore, NC1L, DXCC Manager, stating, "I wish I had better news but we still have not received documentation so it is on hold right now."

DXCC APPLICATIONS. It was announced this past week that DXCC applicants no longer have to wonder if their cards and applications made it to the DXCC Desk at ARRL HQ for processing. You can now visit the ARRL Web and look under the "List of DXCC Applications Received" page at: http://www.arrl.org/awards/dxcc/appstatus.html This page lists the pending DXCC applications by callsign. OPDX InterNet Subscribers will receive a press release by Wayne Mills, N7NG/1, of Membership Services, on the details about this new Web feature.

DXCC FAQ #8. Bill Moore, NC1L, DXCC Manager, has released another informative FAQ which also deals with the new "DXCC Applications Received" Web page as well as TX0 and 4W cards submissions, DXCC backlog, DXCC Card Checking Program, DXCC Annual List and the status of the DXCC's computer upgrade. This press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

E3, ERITREA (Operation QRT). Chris/DL5NAM (E30NA) and Dieter/DF4RD (E30TA) arrived back home on Saturday, November 4th. According to Dieter's press release, they closed the operation down on October 31st, making close to 25,000 QSOs. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin. Suggested Web sites for more information on this operation are:
http://www.qsl.net/e30ta
http://www.bavarian-contest-club.de
http://www.uni-erlangen.de/~unrz45/BCC/act/2000/e30

IOTA NEWS.....
AS-047. Takeshi, JI3DST, will be active as JI3DST/6 from Daitou Island (Minamidaitou Mura [Minamidaitoujima], Okinawa-ken) December 30th through January 7th. Activity will be on 40/17/15/12/10/6 meters SSB. QSL via the JARL (Bureau is Best) or direct to JI3DST: Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN

AS-049. Takeshi, JI3DST, will be active as JI3DST/6 from Tokara Archipelago (Kuchinoshima, Kogashima-ken) November 23-25th. Activity will be on 40/17/15/12/10/6 meters SSB. He states that he will use two stations: one for NA and SA on 15/10 meters only; one for EU, AS, AF and OC. QSL via the JARL (Bureau is Best) or direct to JI3DST: Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN

OC-169. By the time you read this, the following operation will be over. However, you may have missed the location that Babs/A35YL and Lot/A35ZG were active from. They were expected to be active from Haapai-Island until November 4th.

KH5K, KINGMAN REEF. The K5K operation ended on October 31st at 1700z. QSL via K4TSJ. For further details and information, and also look for online logs, check the Web site at: http://www.qsl.net/krpdxg

PC50, THE NETHERLANDS (Attention Prefix Hunters - Special Event). The following is an excerpt from a press release (the complete release will be sent to all OPDX InterNet Subscribers as an additional bulletin): On December 15th, the Radio Agency of The Netherlands will celebrate the 50th anniversary of former intercontinental radio reception station "NERA". During the celebrations, amateur radio will be part of it. Besides, the weekend before the official celebrations, on Saturday/Sunday December 9th and 10th, a special event station will be operated by employees of the Radio Agency. The callsign PC-50-N has been applied for. The callblock PC has not been issued to radio amateurs before. Activity will be around the clock, propagation permitting, on CW, SSB or PSK31 on 70cm, 2, 10, 15, 20, 40, 80 and 160 meters. A special QSL card will be awarded to all contacting stations and will be sent by the bureau automatically. SWL reports will be answered too. Please send your reports via bureau, direct or via Email (please keep message size small). Send direct to: Ben Witvliet, PA5BW c/o NERA, Radioweg 3, Nederhorst-den-Berg, The Netherlands Send E-mail to: ben.witvliet@rdr.nl

QSL INFO AND NEWS.....
There is a correction to OPDX.482.1 on a QSL route. Joe, W3HNK, states that he is NOT the QSL Manager for KH7R and ALL cards should go direct via his (KH7R) callbook address.

The QSL route for HB0/DK7ZL is via HB0/DK7ZL Bureau or Direct. He is NOT the QSL Manager of any other HB0/callsign.

QSL II3A via IV3RAV: Michele Corvino, via San Giacomo, 20, 33034 Fagagna - Udine - Italy.

QSL IQ7J via IK7JWX to the bureau or direct (CBA on qrz.com):
P.O. Box 218, 73100 Lecce Italy.

Jara, DL1YD, states his operation during the CQWW SSB Contest as OK8YD should be QSLed to DL1YD (his home callsign). All the QSLs will be QSLed via the bureau anyway. Sending QSLs via the OK bureau is "OK" too, but it will take a little bit more time to receive them.

QSL PW7Z via PY7BEL: Jolibel Alves Andrade, rua. Martinho Fransisco 67, Carpina - Pernambuco - Brasil, cep.55813-541.

The CWSP - Grupo de CW de Sao Paulo (Sao Paulo CW Group) now hosts the Brazilian ham address search engine. It can be found on the Web page at: http://www.cwsp.org.br/indexen.htm

Tom, SP5UAF, informs OPDX that there has been some delay with printing the QSL cards for their last special event operation as SP0ZCC (March/ April 2000) by the Scouts Radio Club (SP5ZCC - http://www.sp5zcc.waw.pl). However, all QSLs were sent out at the beginning of October. QSL via SP5ZCC (OK via the bureau).

Marcel, SP9XWD, informs OPDX that QSL cards for their last special event station operation SN600UJ (Sierra November Six Zero Zero United Juliett) have all been sent out via the bureau. QSL via SP9PKZ.

QSL T88QG via JA1QGT. The QSL Manager/Operator for T88QG is Toku, JA1QGT, and he states that he operated from Palau Island. Cards are currently being printed, so please QRX!

Nilay/TA3YJ and Berkin/TA3J report that on November 3rd the QSL cards for TA3J, TA3YJ and YM3LZ were sent to the following QSL bureaus: Bulgaria, Russia, Spain, Poland, France, Czech Rebuplic, Switzerland, Greece, Austria, Netherlands, Belgium, United Kingdom, Lithuania, Romania, Portugal, Estonia, Israel, Croatia, Belarus, Luxembourg, Slovakia, Finland, Sweden, Slovenia, Hungary, Ukraine, Norway, Monaco, Andorra, Argentina, Uzbekistan, U.S.A,, Canada, Turkey, New Zealand, Brazil, South Korea, Kazakhstan, Japan, Latvia, Colombia, Lebanon, Denmark, Germany and Italy to be given to their radio amateurs.

Dave, VA3RJ, informs OPDX that the following Web site now contains links to 1700+ on-line logs, and is still growing. Most are searchable logs, while others are text (also searchable with CTRL-F), and a few downloadable logs. It is updated daily. Check out:
http://www.qsl.net/va3rj/frame_logs.html
Also, check the following Web page for a list (by date) of present, and upcoming, Island (IOTA & NonIOTA), Lighthouse, Castle, and other portable operations. This list is updated daily. Check out:
http://www.qsl.net/va3rj/icpo.html

SIX METER BEACON UPDATE. Tex, 9M6TO, reports that the 9M2TO/B has been improved (QRO). The frequency: 50.005 MHz. Power is: 50 watts (as of November 1st at 0000z). The antenna is a GP. All equipment donated by: TX - TS660 by JA1PCM, KEY - AEA MM3 by JA1PCM, AMP - HL66V Tokyo HiPower 50w by 9M2/JI1ETU, ANT - 5/8 GP by 9M2TO, POWER SUPPLY by 9M2KT and COOLING

SYSTEM by 9M2KT. It was the MARTS Penang group who made the decision for improvements to the system.

SPECIAL EVENT FROM PLOAND.....
Look for SN2000C (Sugar-November-Two-Zero-Zero-Zero-Charlie) to be active from now until December 31st. This millenium station hopes to attract activity and will be interesting, especially for prefix hunters. Look for them on all bands (160-2 meters) on CW, SSB, FM, RTTY, PSK31 and SSTV. QSL via SP9PKZ.

Look for SP2000S (Sugar-Papa-Two-Zero-Zero-Zero-Sugar) to be active from November 10th to December 31st. This operation will be held to celebrate the 82nd anniversary of regaining independencce by Poland. This is also called the millenium station. They hope their activity will be interesting especially for prefix hunters. Look for them on all bands (160-6 meters) on CW, SSB, FM, RTTY, PSK31, MFSK and SSTV. QSL via SP5ZCC (OK via the bureau).

ZL8, KERMADEC ISLAND. Jacky, ZL3CW (aka F2CW), is now active and is operating as ZM8CW from Raoul Island (OC-039) now through November 12th or possibly until November 23rd. Mostly his activity is on CW 20/17/15/12/10 meters. However, he has also been heard on 15/12 meters SSB.

I didn't like to say what you said, Walt, but I'm glad that YOU did!

I suspect that many so-called 'DX-ers' have no interest in, or knowledge
of, how the radio signals get from A to B.

For 'DX-ing', read 'stamp collecting' (not that there's anything wrong
with philately).

Ian.

Just worked Amir on 10. Did I understand him to say So. America 26?
What is the name of the island? Is this an entity I can use for DXCC?

Thanks,
ke1lg@qsilver.net (Steve)

3503. FK1UH address

I have tried to get a qsl from FK1UH for a 1994 qso. A card was gotten
but it arrived damaged beyond reading. I had an address of:

Petitjean Franck- FK1UH
Po Box 7636
DUCOS (NOUMEA) 98801
NEW-CALEDONIA

I have not been able to get a response from this address since. If
anyone has recent info, I would appreciate it. Thanks.

I am trying to organise a Portland on the air weekend and would like to hear from interested parties from all "Portland's" around the world. I know that there are quite a few in North America so please get in touch if interested so I can organising. I live on Portland in Dorset, England and think it would be a good event to get us all on air for a weekend friendly contest with certificates for working all of them etc.

Thanks Daniel...

Unfortunately, the Callbook address (and what I typo'd as "QRX"...meant "QRZ"!!!) is not correct...I QSL'd to that address and the Postal Service returned my card as undeliverable, no forwarding address. Searches of switchboard.com, whowhere.com, etc., also turn up no Peter Hubber.

And....I can find no Mozambique address for C91PH (Peter's initials?). Is there a C91 Bureau you're aware of?

Thanks and 73

IRC's are like Xmas fruitcakes. They last forever. I have used IRC's
that were dated from the late 80's and they were still accepted. As long
as they are stamped on the left side and not the right. Right side
indicated they have been redeemed at the post office

Message-ID: <8u6trkqjc1@reznor.larc.nasa.gov>
Source record: 19049

According to the USPS International Mail Manual (IMM), IRCs are valid indefinitely. However, coupons issued by non-US post offices prior to 1/1/75 are no longer redeemable in the US. The IMM has a lot of information on exactly how the US processes IRCs and dispels a lot of "urban myths" on where IRCs must be stamped to be valid. Further, it makes no difference if the older IRC says "surface mail". It's still redeemable (in the US) for one unit of airmail (currently, $0.60) postage.

Here is a small snip from the Oct 4,2000 Daily DX email newsletter..

< snip >

The following stations have been active recently and are known
pirates: 3A2DX, 3A3A, 3W1A, 5R8O, A92V, CE0Z/LU7FOM and TZ1GH.

< snip >

There are also similar blurbs about 3W1A in some older Daily DX email
newsletters from the third quarter of 2000.
They refer to bogus bean headings for Vietnam (3W1A) and a statement from
his so-called qsl mgr saying he doesn't know 3W1A.

You can get a FREE 2 week (10 issues) subscription to The Daily DX. Drop by
Bernie's website for all the details

Source record: 18913

This guy was on a few months back. Propagation to 3W at that time of day on 10m makes absolutely no sense. While 10m propagation can really surprise you sometimes, this path simply isn't viable at that time of day, particularly with conditions so disturbed (as they've been the last day).

K2WE, who knows a lot of about Vietnam, says the 1 call area in his call doesn't go in the Saigan area. His "manager," N6NK, says he never heard of the guy. When confronted on the air by N4AA the other month, he disappeared when he was unable to answer Carl's questions.

The guy is a fake, probably located somewhere in the western states. Sorry.

Hi Bob I found your request for DL5WM on Buckmaster. I have pathfinder
on my web site and you input the calsign and click on which server you
want to search the info for you. Go to www.qsl.net/swlham and go down
the page till you see where you can input a callsign. I will check on
the 9X0A and see what I can find. 73's Mike

Your description of the term 'shortwave listening' is flawed, as SWLing
encompasses more than just hams and broadcast stations.

I also think your description of what is appropriate for this newsgroup
is flawed. Take another look at our name: rec.radio.amateur.dx. IMHO,
if it's not about "amateur radio dx" it doesn't belong here. Just being
about "amateurs" or "radios" or "dxing" or "amateur dxing" or "radio
dxing" or "amateur radio" doesn't cut it. (And maybe it needs to be
about "recreation" too, but I'll leave that fun argument for others.
:-)

None of this means that I think it is appropriate to piss on Philip
Broad for posting here, afterall he did preface his post with "Hope this
is the right place to ask this one (if not, please redirect me) ...".
That seems to me to be a genuinely polite request for help from someone
who understands that he might have wandered into the wrong place. That
being the case, I'd say that the appropriate response is to suggest that
he try rec.radio.shortwave or alt.rec.radio.shortwave (or whatever), or
just email him in private if you want to answer the specific question he
asked.

I appreciate your comments, Michael, but I (as essentially an observer
of this NG, rather than a contributor) still think that the title of the
NG should not exclude the occasional excursion into a world other than
that of HF operation from exotic places. The name of the NG is not

'rec.onlyhfradio.onlylicencedamateur.dxmeaningexoticonlyandnot longdistance', is it? The explanation of the strange phenomenon which Philip experienced should have a certain interest for operators on 10m and 6m (which is just outside the realm of HF). I do wonder how many of the contributers to this NG have any knowledge of how radio signals are propagated. However, I'm certainly not suggesting that the NG should turn into a technical forum!

Ian.

'Severe' solar storm zaps Earth
By LEE BOWMAN
Scripps Howard News Service
November 09, 2000

- The sun has welcomed the crew of the International Space Station Alpha to the neighborhood with one of the most powerful solar radiation storms in a quarter-century, but NASA officials say the men are in no danger.

The storm, rated "severe" on the government's space weather scales, produced radiation levels Wednesday and Thursday that could rise to more than the equivalent of 10 chest X-rays for passengers on jets flying nearer Earth's poles, and higher still for astronauts orbiting beyond Earth's protective atmosphere.

The event, which is expected to gradually subside over the weekend, could also adversely affect some satellite operations and will likely disrupt radio communication at high latitudes.

"This is a pretty dramatic event, with some very high fluxes at very high energies. It's what we'd call a 'hard' event in terms of these energy levels,'' said Joe Kunches, a senior forecaster at the Space Environment Center in Boulder, Colo., part of the National Oceanic and Atmospheric Administration.

Russian flight controllers for Alpha have asked station commander Bill Shepherd to set up a radiation-monitoring device inside Russian-built crew modules as a precaution.

Rob Navias, a spokesman for the National Aeronautics and Space Administration, said similar devices are used during each space shuttle mission and will sound an audible alarm if radiation reaches a preset level.

Were that to happen, the crew would move to the end of the Zvezda service module near where the Soyuz spacecraft is docked, since that part of the space station offers the most protection.

"Even if it reaches levels that would trigger that alarm, the flare would have no impact to crew health or crew safety," Navias said.

Kunches said only three other storms of this strength have been logged since instruments started recording space weather data in 1976. NASA records indicate that a space mission with a human crew was under way during only one of these storms, an October 1989 flight of the Space Shuttle Atlantis, which caused no ill effects for the crew.

The event, caused by a group of sunspots that are now near the sun's horizon, is expected to also increase geomagnetic activity and boost the visibility of the northern lights to high intensity, making them visible over much of the northern United States by Saturday.

Scientists expect only three storms of this strength to take place during each 11-year solar cycle. Another, slightly stronger storm, already erupted in July. The current cycle of solar activity is now near its peak.

Info here---> http://www.sec.noaa.gov.

SPACE WEATHER BULLETIN #00- 11
2000 November 09 at 12:20 a.m. MST (2000 November 09 0720 UT)

**** SEVERE SOLAR RADIATION STORM ****

A severe solar radiation storm began today, 8 November, at 4:50 p.m. MST (2350 UT), and has reached a level of S4 on the NOAA Space Weather Scales. The storm, which currently ranks as the fourth largest since 1976, is expected to peak over the course of the next several hours and then slowly diminish over the next three to four days.

This severe radiation storm could pose a hazard to the astronauts on the International Space Station as well as passengers on commercial airlines flying at high latitudes. The storm could also adversely effect the operation of satellites.

Thomas Edison describes in his patent application for the wireless telegraph in May of 1885 as follows;
For receiving signals I locate in said circuit between condensing surface and the ground a diaphragm sounder which is preferably one of my electro motograph telephone receivers.

The first wireless telegraph picked up the telegraph signals with a loud speaking telephone. De Forest patented his triode in 1907 twenty two years later. For his first radio he used an Edison loud speaking telephone.

Edison's Patent and an essay about wireless transmission can be seen on my site at www.geocities.com/starapex Click on the radio

Cheers
Ken McKenzie

vy 73 and best DX!

3551. CQWW 2000 CW Announced Operations updated

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-12 00:00:00 UTC
From: wfeidt@cpcug.org
Message-ID: <8FEA5E86Fwfeidthiscom@207.126.101.97>
Source record: 18937

The NG3K "Announced Operation" table for the 2000 CW CQ World
Wide DX Contest has been substantially updated. It can be found at
the following URL:

http://www.ng3k.com/Misc/cqc2000.html

The operations may be viewed sorted by any of: Call; DXCC Entity;
or CQ Zone. The tables at the above URL is sorted by callsign. If
you want to see the data sorted by DXCC Entity, just click on "DXCC"
in the table header. Likewise, click on "CQZ" in the table header to view
the operations arranged by CQ Zone. If you're viewing either the DXCC or
CQZ view and want to return to "By Callsign" listing, simply click "Call" in
the table header.

New listings for significant (M/M, less common DXCC entities and
CQ Zones, etc.) operations are welcomed. Just send full particulars to:

Bill@ng3k.com

Please include:

1. Callsign to be used in the operation
2. DXCC Entity
3. CQ Zone
4. Intended class of entry
5. QSL route
6. Any other operation details likely to be of interest
to other DXers and Contesters (e.g. operator's callsign(s),
specific station location, QSL address if not commonly
available, power level, antennas, etc.)

73,

Probably not that rare, but you don't hear everyday. On ten meters
UA0EX in Sakalin(sp) island (just north of Japan). In the 23:00
hour Zulu. Also Argentina on 15 meters a little earlier.

Im looking for a dual band 2 / 70 HT. I originally wanted a IC T7A , BUT
,im told there are much better DUAL banders with MORE easy mods available
than is the ICOM IC T7A !!!
Can anyone help with brands,mods etc. AGE is not a consideration BUT
availability & condition IS!!!
Ive got sufficent funds to buy once so i need to know which is best
,IRRESPECTIVE if you have one for sale or not.

THANKYOU i appreciate any/all assistance

3563. How do I count my countries

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-14 00:00:00 UTC
From: Gilbert Baron <gbaron@home.com>
Message-ID: <1v9Q5.49659$a7.925792@news1.rdc1.il.home.com>
Source record: 18946

I am confused.
Many years ago I got my DXCC award at 102 entities, mixed mode.

Today, many of those entities are not on the current list. For example KZ5 (Canal Zone)% and others. Let us assume 10 countries are deleted or now longer are a DX entity as defined by the current list.

1.How many entities am I now credited with, (92 or still 102)?
2.To get endorsements can I use only current entities.
3.Is it the NAME of the entity or the PREFIX of the entity that determines if it is a separate entity. I assume it is the name. There are ambiguous prefixes, TRUE?

ALSO, let us say I have 10 cards form entities no longer on the list but they were on the list when I made the contact. Are these good or not good to use for endorsements? Do they count or not count when totaling how many entities I have confirmed.

In other words, is my CURRENT entity count ONLY form entities on the current list or does it include ALL entities that were valid WHEN CONTACTED.
The rules are NOT clear.

There are a number of active hams on Sakhalin Island. It's actually not particularly rare to hear them. From the east coast, one can often hear folks like UA0FF, UA0FZ, and UA0EX on 10 meters around sunset (i.e., 2300 UTC) whenever conditions are open to the far east. When the Japanese are audible on 10m, Sakhalin is certainly possible.

A: You are credited with 102 but only 92 count towards Honor Roll.

> 2.To get endorsements can I use only current entities.

A: If you worked a Deleted country BEFORE it's deletion date it would
be counted in the total credit and endorsements, but not for Honor Roll.

> 3.Is it the NAME of the entity or the PREFIX of the entity that determines
> if it is a separate entity. I assume it is the name. There are ambiguous
> prefixes, TRUE?

A: There are many prefixes for a given country. Determination of a DXCC
entity is made by the DXAC/DXCC at ARRL Hqs so the name by itself is not
a criteria for it being declared a DXCC entity. Im trying to stretch my
memory banks if there is a country (entity) out there that does not
enjoy
DXCC entity status, and Im hard pressed to come up with one. (Im sure
someone on the Newsgroup will.)
>

I still have a lot of uncertainty. It involves prefix identification. If yo
look at the DXCC list it seems that you can have the situation below.
> With the break up of the USSR, the following prefixes were assigned. Now

> bear in mind, that while a portion of these prefixes may be identical

> for different entities, the "entire prefix" is not. For example UA1 is

> European Russia while UA8 is Asiatic Russia. The same would apply for

> UC.

>

> It would be a good idea to get hold of the latest DXCC Countries List.

> Or go to the ARRL WEB page and look at the DXCC Countries list there.

>

I have the list but part of the problem is knowing where to break it. I
think it would be a very good thing if the list had EVERY combination of
prefixes that are unique listed separately.

> (Break out of the prefixes assigned after the breakup of the USSR.))

>

> UA-UI1,2,3,4, 6 AND RA1,2,3,4 6-RZ are assigned to European Russia

>

So UA2, UB3 are in the European Russia group? In other words does that line
above say UA1 UB1 UA2 UB2 etc are the same entity. What is RA5?

It sure looks to me like it says above that UA2 is part of the above list.
After all, UB is between UA and UI isn't it. This is why I think the list is
REALLY POORLY done.

Similar ambiguities exist throughout. I see no definition of how to read
these.

> UA2 is Kaliningrad

NAHHHH, it fits above ,certainly UA2 is between UA and UI isn't it?

CAN YOU SEE WHY I WILL NEVER BE A CARD CHECKER, NOT WITH THESE AMBIGUOUS
RULES.

WE NEED AN ALGORITHM THAT A COMPUTER CAN USE!

Sorry to seem so dense and I really appreciate your attempt to explain it
but after downloading the entire list I am still stumped as you can see..

This does not even begin to tell me how to interpret and where to find the
list for say 10 years ago when I made the earlier contacts.

Also, I assume ARRL has a list of what I am credited with, is there a way to
get that? It seems those records truly belong on the web site.

If I read things correctly the following is true.

UK0ABA is UZBEKISTAN

UD60014A (yup that is what the card says) is AZERBAIJAN (QTH on card but you could maybe think it should be EU Russia?

Below are accepted on my original DXCC submission as separate

UA1KAN is European Russia

UL7KAR is UZBEKISTAN

UC2AR is KALININGRAD all calls with 2 in them should be ? although no UC2 is on the list.

I was a ham 30 years ago and recently rejoined the hobby. When I called ARRL, they sent me my old DXCC scorecard in just a few days. I was impressed.

The good news is the Russian countries are easy to work. I just wait till I get the card to see what country "they" put on it.

3575. Re: How do I count my countries

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-16 00:00:00 UTC
From: Arno <A.Polinsky@alcatel.de>
Message-ID: <3A13D780.3104A0C8@alcatel.de>
Source record: 18811

Hi Gil,

I have followed the discussion within the newsgroup for several days.

I can not solve your problem, but I will try to explain a little bit the situation in former USSR countries.

The DXCC list is showing the actual valid prefix assignment for the follow on contries of former USSR Area.
Like: UA ... UJ, UL ... UO, UR ... UZ for Ukrain
R for Russia
4F for Georgia
4J,4K for Aserbaidyan
ES for Estonia a.s.o.

The Problem is, that during the last 15 years the prefix assignment in the former USSR has changes two times:
1. Change beginning of the eighties, where a mor clear identification has been reached. Before that time all club stations had UK as prefix and the combination of digit and first letter of suffix gave you the country. Examples: UK2FAZ = Kaliningrad, UK6FAA = Georgia, UK2CAA = White Russia...
After this change the prefix identified clearly the country for all stations. During this period a club station was identified by a 3 letter suffix where the second letter was in the range of W ... Z. In Russia clubs used to have RZ and UZ as prefix. Examples: UC2CXA = Club in White Russia, RZ9CWW Club in Asiatic Russia. They needed many prefixes due to the fact that the first letter of the suffix identifies the county within a country (like it is still today) and the second letter of the suffix is used to identify is it a club station or not. There is only one letter remaining to keep unique identification of a club station.

2. In 1995 the assignment of the new prefix assignment tooks place, due to the fact that the separation into several (political) countries has been started.

Unfortunately the exchange of calls within RUSSIA is not finished yet!
As fas as I know they have an agreement with the UKRAINE to finalize it until end of year 2005!
Up to this date the UKRAINE has blocked the prefix blocks which has been taken over from RUSSIA!

Summary: All former USSR counties have switched to the official assignment (like it is mentioned in the DXCC list) EXCEPT RUSSIA!
Until the mentioned date we have to live whith the mixture of old and

new assigned calls between UKRAINE and RUSSIA.

Verry specific calls are verry few of OMs which are using a
ONE-LETTER-Prefix in honor of ther activity durind WW II. All of them
have the prefix U! The numbers 1...4 and 6...0 are in the related areas
of RUSSIA and the number 5 is from UKRAINA.

Examples: U2FZ, U4GA or U9WG are from Russia, U5SG is from UKRAINE.

Here I try to explain your examples:
> UK0ABA is UZBEKISTAN (today) OR Club station in Far East Russia between 1983 and 1995
(UK=Club station, 0A=area, A=Unique part)
> UD6-0014-A SWL card from Azerbideyan until 1995, After 2005 sothing similar will comes
from UKRAINE
> UA1KAN Clubstation from St. Petersburg before 1983 (UA1=area, K=Club station, AN= unique
prefix part)
> UL7KAR is UZBEKISTAN in the past, After 2005 it will be UKRAINE
> UC2AR was WHITE RUSSIA until 1995, Will be UKRAINE after 2005.
> UA2FA was and is still KALININGRAD until 2005 after that point it will be UKRAINE
UQ2,UR2 and UP2 was the assignment for YL,LY and ES until 1995, UP2
today is KAZAKSTAN (former UL7)

That explanation should finish the confusion about the russian callsign
system?

DXCC check is easy except the part of Russain area!

See you soon on the band with an easy call, de Arno - DL1CW.

3576. Re: Antenna Question

hi adam
a G5RV dipole is a very picky antenna it has to be installed just so or it will
not tune properly and since your telephone line is so close to your antenna
thats why you have RFI the phone line is not a sheiled line and a auto tuner
will handle a 2.1 swr but not much higher
what i would suggest is since it sounds like you live on a very small lot is to
buy an HF vertical like the GAP or the butternut or the cushcraft R7 or R8 these
are all multiband HF verts and are ground mounted so you wouldnt need much for
ground radials
good luck

Adam wrote:

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1OLO, K2WR, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, K4AVQ, K4IA, N4GN, W5UE, NH6D, NI6T, K7CO, WN7T, K8YSE, 4X4NJ, DF4SA, DJ5AV & DX News Letter, DL2CC, EA3BT, EA3KU, F5NOD, F6AJA & Les Nouvelles DX, F6JSZ, HR1ERL, JI3ERV, JF2SKV, JH8KYU, OH1EB, OH2BH, OH5BM, RA0FF, ZL1DD and ZS5BBO for the following DX information.

1SL1A, SEALAND. Jon Utley, K7CO, now also known as 1SL1J, informs OPDX that this operation is still planned to take place in December, even after last week's statements by the UK Radiocommunications Agency calling this operation "ILLEGAL". He states that his team will be made up of Americans, British, and, of course, Sealanders. However, he states, each amateur has to choose whether or not to participate in this operation. Jon has been issued a license from the goverment of Sealand, and he intends to operate using this license. He reports that he has "personally seen that the British courts have ruled that Sealand is out of its jurisdiction, therefore Sealand's claims to independence have validity." OPDX InterNet Subscribers will receive Jon's press release as an additional bulletin.

3A, MONACO. Operator Laura, 3A2MD, was heard by stateside station on long path this past weekend on 28035 kHz between 1430 and 1515z.

3W, VIETNAM. Hans, WA1LWS, is still very active as 3W2LWS. Activity this past week was mainly on 15 meters CW between 0030z and 0230z. QSL via WA1LWS. Also, active this past week was 3W8LI from Saigon on 10 meters SSB between 0130 and 0230z.

4X3, ISRAEL. Look for Riki, 4X4NJ, to be active as 4X3A as a Single Op Single Band (160m) entry during the CQWW CW Contest. This is Zone 20. QSLs via WA4WTG.

5R, MADAGASCAR. There was plenty of activity from here last week. 5R8FL kept the SSB folks happy on 20 meters between 14190 and 14200 kHz after

0230z. Albert, 5R8O, was also active on 20 meters but on CW around 14014 kHz after 0300z. QSL via 5R8FL. 5R8FU was busy on 10 meters around 28497 kHz between 1530 and 1830z. QSL via SM0DJZ. Lastly, 5R8GT was active on both 10 and 15 meters CW/SSB. Check 28008, 21003 and 28442 kHz around 1300z and 1800z.

5T, MAURITANIA. The "Les Nouvelles DX" reports that Yannick, F6FYD, has received the callsign 5T5YD. He will be active on all bands on SSB with a FT-847. He will also try to activate some islands for the IOTA. Look for him to sign 5T5YD/P on November 22nd, from Banc d'Arguins (AF-050). QSL via F6FYD.

5X, UGANDA. Tapani, OH5BM, plans to activate the 5X1Z station in Uganda in the CQWW DX CW Contest as a Single Op/Single Band (15m or 10m) entry on November 24-26th. Before the contest he will operate on 10 and 15 meters SSB/CW. He thanks Mats, SM7PKK, for this nice opportunity. QSL to SM6CAS.

9H3, MALTA. Con (Cornelius), DF4SA, will be active from here in the CQWW CW Contest as a Single Op/All Band/Low Power entry. His callsign is not known as this was being prepared. All QSOs will be confirmed via bureau (via DF4SA).

9M6, EAST MALAYSIA. Hide/JH8KYU and Sei/JF1SQC will be active from here during the period of November 23-27th. They will take part in the upcoming CQWW CW Contest as a Multi-Operators/Single Transmitter entry. Their QTH will be the newest YAESU rental shack at Tang Dynasty Hotel in Kota Kinabalu. Sunrise/sunset times there are at 2208/0957z. The callsign used in this contest will be 9M6SMT. Another callsign, 9M6HTT, will also be used outside the contest. QSL route for both 9M6SMT and 9M6HTT via JF1SQC.

AH2, GUAM. Aki, JI3ERV/NH2C, Chairman of Guam Contest Club (GCC), informs OPDX that GCC members/operators Toshi/JR7OMD/WI3O, Noz/JE8KKX, Aki/JP1OGL and himself will be active again during CQWW CW Contest as AH2R at the end of this month. This time, they set a target as the Oceanic leader in the Multi-Single category that will be very competitive due to the fact that there are many planned to be active. Also, they are trying to build an Oceanic record in Muliti-Single category. Guam Island's (KH2, Zone 27, IOTA OC-26) sunrise/sunset is 2026/0751z. QSL via JH7QXJ direct or the JA bureau, NOT the KH2 bureau (Please Note: QSL Manager is changed!) Lastly, Aki, JI3ERV/NH2C, states, "Thanks for stopping your radio's VFO and gave us a precious point during CQWW SSB."

ASIAN DX WINDOW. Eugene, RA0FF, reports that the "Asia (((DX))) Window" (ADXW) InterNet Web Cluster (http://dx.bgtelecom.ru) now has an open special notice board for the purpose of a meeting times for on the air (SKEDs) for the 160/80 meters bands. "ADXW" hopes that this idea gets the support of radio amateurs and will render an aid in getting new entites for DXCC.

CQ9, MADEIRA ISLAND. Frank, DL2CC, will be active from here as CT3/DL2CC from November 23-28th. He will sign as CQ9K in the CQ Worldwide DX CW

Contest as a Single Op/All Bands entry.

D6, COMOROS. Josep/EA3BT and Nuria/EA3WL are pleased to announce their annual DXpedition. This year's destiny will be to Comoros, and their operation will be between January 13-28th (2001). The callsigns that will be used are: D68BT, issued to Josep, EA3BT; D68WL, issued to Nuria, EA3WL. They will operate on 80-10 meters, included WARC bands, using SSB, RTTY and some CW. They will have two stations on the air, one on 10/15/20 meters, and the another on the WARC bands or 40/80 meters. The QSL information is via EA3BT at: Josep Gibert, Col-legi, 1, 08800 Vilanova i la Geltru, SPAIN. You can find more information at their Web page at: http://www.qsl.net/ea3bt
They will try to have daily logs online.

DIFO WEB SITE. Gil, F5NOD, reports that information on the DIFO Award and DIFO Award scores can be found at: http://f5nod.waika9.com/difo.html
The DIFO Award is the "French Overseas Island Award".

EA6, BALEARIC ISLANDS. Operators EA3AIR/Julio, EA3AJW/Jaume, EA3ALV/Xavier (the grandfather of the crew - near 69 years old), EA3KU/Fernando, EA5BM/ Juan, EA6ACC/Josep and EA6FB/Pepe will activate the station EA6IB in CQWW CW Contest from Ibiza Island as a Multi-single operation. Technical support will be provided by EA5ZF/Javier, EB6AOK/Enric, EA6FO/Vicent and his family, and the cooking by EA3AIR's XYL Patro. Look for them during the contest as EA6IB, before and after the contest as EA6/homecalls.

EP, IRAN. Ali, EP2MKO, was heard this past week on 10 meters CW on 28006 kHz around 1330z. He was also heard on 12 meters around 24890 kHz after 1230z. QSL via UA6HCW.

FO, FRENCH POLYNESIA. Look for Bruno, TK5PB, to be active as FO/TK5PB now through November 27th. He will concentrate mainly on the WARC bands. Activity will be on Hao Atoll (OC-066). QSL via TK5PB.

FO & FO/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS. Alain, F2HE, will once again head back to French Polynesia in early December and be active as FO0CLA from Rangiroa, Tuamotu Island (OC-066). There is a possibility for him to be active from Rurutu Island (OC-050) in the Austral Island group. He plans to be in the area for at least 8 months and he will be active on SSB and CW.

FRENCH ACTIVITIES.....
The "Les Nouvelles DX" reports that F6BFH, F5TYY, F5JY, F6AOI, F5LGQ are currently (or were currently) signing TG4/homecall from Guatemala. But look for F6BFH, F5TYY and F5JY to become active as V31FH, V31WY and V31BI. Also, look for F6AOI and F5LGQ from Honduras (no callsigns mentioned) until November 24th.

Andre, F6GQO, will be in Australes Sea between December 2-30th. He will sign F6GQO/MM from the "Marion Dufresnes" vessel. Andre will be active as FR/F6GQO from Reunion Island, however, if he can land he will also be active as FT/F6GQO/X from Kerguelen, FT/F6GQO/W from Crozet and may be FT/F6GQO/Z from Amsterdam. Look for him on 10135, 14035, 18075, 21035,

24900 and 28035 kHz CW only with an IC-706MKII and vertical antenna.

GJ, JERSEY. Look for GJ2A to operate as a Multi-Single from the Jersey Amateur Radio Society club station by K2WR, OH2BC, OH2BH, and OH2TA. QSL to MJ0BJU.

HR1, HONDURAS. Ernesto, HR1ERL, will be active in the CQWW CW Contest and will operate on 10/15/20/40 meters. Please send QSLs direct for any contact with this station via P.O. BOX 1734, Tegucigalpa Honduras, Central America, Zip Code 11101.

IOTA NEWS.....
AS-117. Kazu, JH4TEW/4, was heard to be very active from Tashima Island on 21260 kHz this past week. Begin looking for him after 2330z.

OC-201. Dr. Barry Kirkwood, ZL1DD, informs OPDX that he is temporarily QRT while his rig is being serviced. He states that he intends to be active for most of the CQWW CW Contest. Please note that Barry is a permanent resident on Waiheke Island and will be active mainly on HF CW as time permits. He will do his best to help anyone needing OC-201. SM0TLG is expected to be active from Barry's QTH during the first week in December. Barry states that he runs a small guest house there and will allow any visiting hams to use his radio. QSL via the Bureau or direct to: Barry Kirkwood PhD, Signal Hill, 66 Cory Road, Palm Beach, Waiheke Island 1240, NEW ZEALAND. Check the Web page at: http://www.waiheke.co.nz/signal.htm

OC-239. NEW IOTA! YC9WZJ/P was active from Batanta Island on all IOTA frequencies. Activity is expected to end before you read this. QSL via YC9BU.

JW0, SVALBARD. Vlad, JW0HR, was very active this past week on 20/15/10 meters SSB. Most of the activity begins after 1630z or 0000z. QSL direct to: Box 224, Barentsburg 9178, Svalbard Island, Norway. Also, active was Joe, JW5DW, mainly on 10 meters CW around 28018 kHz +/- 5 kHz after 1930z. QSL via LA5DW.

KH4, MIDWAY ISLAND. Bill, KH4/NH6D, is now QRT from Midway and reports that he hasn't any plans to return in the foreseeable future. He wants to thank everyone for the fun he had while he was on KH4 the past 6 1/2 months. QSL requests go to N6FF/Dick.

KH6ND/KH5 NOW QRT. A press release by Garry, NI6T, reports that Mike, KH6ND, has left Palmyra Atoll and has returned to Honolulu. The Nature Conservancy's (TNC) acitivities on Palmyra have ceased for the winter. Given the imminent change in ownership, they do not know what operating opportunities will be available in the future. However, Mike and the Kingman Reef/Palmyra DX Group (KRPDXG) hope to be involved in future amateur activity from Palmyra. A complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

LION'S CONTEST. The 30th annual "Hunting Lions on the Air Contest" will take place on January 13-14th. This year's contest will commemorate the birth of Melvin Jones, the founder of Lionism, who was born on January 13, 1879. The rules were sent to OPDX by Edwin, ZS5BBO, but because of their length, we could not put them in the additional bulletins section this week for subscribers. We will try to send them to all OPDX InterNet Subscribers next week or before the contest takes place. If you want the rules now, you can download them from the Web at: http://www.sarl.org.za/contests/lionita.htm

MU, GUERNSEY. Look for MU2K to operate in the CQWW CW Contest as a Multi-Single from the Guernsey Amateur Radio Society club station by GU3HFN, GU0SUP, OH1RX, OH3RB, OH8SR,and OH9MM. QSL (this contest only) to OH3LQK.

NH0, MARIANA ISLANDS. Just a reminder to look for JQ1UKK, JF2SKV, JG3VEI and JH5OXF to participate in the CQWW DX CW Contest as NH0S (Multi-Single High Power entry) from the Northern Marianas (OC-086). QSL via JF2SKV, either direct (Hisashi Matsushita, 14-1 Ugasemae Iwakura, Toyota, 444-2225 Japan) or through the JARL bureau. Look for them to be active before and after the contest, between November 23-27th. They will operate on all bands (160-6 meters) and modes (SSB, CW, RTTY, PSK31 and FM) as NH0S (QSL via JF2SKV), NH0V (QSL via JG3VEI), KH0/KD6CJF (QSL via JH5OXF) and KH0/JQ1UKK (QSL via JQ1UKK).

OH2BH PRESS RELEASE! OPDX InterNet Subscribers will receive a press release by Martti, OH2BH (provided by Tim, N4GN) on the following stations to be active in the upcoming CQWW CW Contest:
1) EA8BH, CANARY ISLANDS, ZONE 33 - New engines supplied to Finnish Formula Team. A new Yaesu FT1000MP Mark V radio at EA8BH.
2) OH0R, ALAND ISLANDS, ZONE 15.
3) JERSEY (GJ2A) AND GUERNSEY (MU2K), ZONE 14.

P4, ARUBA. Alan, K4AVQ, will be active as P40AV from here January 13-21st (2001). Activity will be on all bands from AI6V DX QTH. QSL via K4AVQ (SASE) to: Alan B Caplan, 14020 140th Court, Apple Valley, MN 55124-9422.

PJ4, NETHERLANDS ANTILLES. Dennis/NX7D, Karen/KA7EJO and Paul/WN7T will be on the Island of Bonaire in the Netherlands Antilles now through November 28th. They plan to operate as a Single Operator/All Band/Low Power entry in the CQWW CW Contest. They will operate under the CEPT rules as PJ4/WN7T. Please QSL to Paul's CURRENT address in the FCC database (his home address in Bellingham - not his old PO Box in Seattle).

QSL INFO AND NEWS.....
John, N1OLO, GNARC Special Event Co-ordinator, informs OPDX that "Hams waiting for the K1V Special Event certificates and QSL are asked to please be patient. The certificate design is finished and awaits approval of an outside committee. We had to wait until after the the event to design the certificate as we wanted to include photos taken on site. We anticipate a mailing to take place by 11-25-2000. Thanks again for your patience."

CORRECTION: Garry, NI6T, reports that in his earlier release, he mentioned that the Kingman Reef DXpedition logged almost 82,000 QSOs. He states that he should have said "almost 81,000." The total is around 80,800.

Jean Michel, F6AJA, reports that he has received the first part of the FM/F2JD logs. He will prepare a QSL and will try to print them as soon as possible. Please be patient.

HC8N Bureau Cards. Anyone who has sent cards via the bureau for any of N5KO's operations from HC8N and is still waiting, help is on the way. Trey's manager for HC8N, AA5BT, had fallen behind with answering bureau cards due to the high volume, and Randy, W5UE, has agreed to help get them out. Any cards sent via the bureau will be returned via the bureau system. Randy has begun processing the almost 8,000 card backlog, and they will begin going out soon. It will take a while to get caught up, since the W5 Incoming Bureau is receiving 400-500 new cards per month for HC8N. Cards sent direct to AA5BT with SASE will be returned direct as normal. "So, as with any bureau QSL request, patience is required.... 73 es DX", Randy/W5UE

NOT THE QSL MANAGER. Jari, OH1EB, reports that he was NOT the QSL Manager for the XZ1A operation in 1995. The manager is (and has been) Kan, JA1BK. He states that he has received many cards especially this year for this operation.

NOT THE QSL MANAGER. It was brought to your editor's (KB8NW) attention that I was listed on the Buckmaster Web page as 5R8O's QSL Manager. This is NOT correct, and I hope I corrected it on the Web page. I have not received any QSL cards yet, but I hope I caught the mistake early enough to correct it. The correct QSL Manager for 5R8O is 5R8FL.

S2, BANGLADESH. Two stations were active this past week. S21YH was heard on 15 meters CW/SSB. Check 21005 kHz around 0200z and 21241 kHz around 1230z. QSL via 7M4PTE. Also look for Stig, S21YJ, on 20 meters SSB around 14178 kHz after 0215z. QSL via SM4AIO.

SILENT KEY. News from "The Daily DX" reports that Mario, 5X1C, became a Silent Key "SK" this week. Mario and his Betty joined UNWFP in Kampala as radio operators four years ago. Mario joined the UNWFP team as telecom-munications technician in the fast intervention team earlier this year. He was one of the first licensed 5X hams who was active mostly on phone, the satellites and digital modes. He was also the chairman for the "Uganda Radio Amateur Society" for a year. He was also a very good friend of Mats/SM7PKK/5X1Z, Joe/G3MRC/5X1P and Peter/ON6TT/5X1T. OPDX (along with its readers) would like to send out to his family and friends our deepest sympathy.

TS7, TUNISIA (Rare IOTA and New Prefix operation). The Kerkennah Island DXpedition (please refer to OPDX.453) is now active as TS7N through November 28th. This group is the first to obtain operating permission for the prefix TS7 and to be active on 6 meters and the WARC bands. The team has been very active on all bands CW/SSB. QSL via DL6BCF. Check out their Web

page at: http://www.qsl.net/ts7n

V8, BRUNEI. Paul, N4PN, is now active as V8PNA. He has been very active on CW on all bands including the WARC bands. Most activity begins after 0000z. QSL via N4PN.

ZF, CAYMAN ISLANDS. Look for Jim, K4BI, to continue to be active as ZF2MU until November 23rd. Most of his activity so far has been on 10 meters CW. QSL via homecall.

ZK1, SOUTH COOK ISLANDS. Roger, W7VV, will be active for two weeks and be an entry in the CQWW CW Contest as ZK1VVV. Activity will last until December 3rd with operations on the WARC bands outside the contest.

Maybe off topic a bit, but who knows amps better than DXers!

Finally ran out of parts to keep my NCL-2K running and
I'm shopping for new (or almost new) "full legal limit"
amplifier. Spending limit probably around $2.5K.

Of the current crop, what would you recommend?

Hi and thanks for reading this post

I recently acquired a General Electric 40ch CB radio Model A3-5825B (twin board model) with the view of putting it on 10m.

Has anyone got the schematic diagram for this radio as I don't have one and the rig has been tampered with by someone. Currently the lights come on but there is no-one at home (no RX/TX). It appears that components have been added and subtracted but I don't know what the correct ones should be.

Any help would be appreciated. Scanned schematics are OK but please email me direct and don't forget to remove the SPAMJAM

Thanks in advance

First, get rid of the MFJ tuner. They don't call it Mighty Fine Junk
for nothin'...

Never mind your antenna sucks on 160. 160 sucks. The lower the band,
the more power you'll need. And 100 watts is all you gots. So forget
about 160. Matter of fact, if you get a 2KW amplifier, unless you
really develop a passion for listening to static crashes, forget about
160.

Second, with 100 watts and a dipole, don't plan on your first 100
coutnries being really rare stuff. They don't need to be. When
everything you work is a new country, you don't need to sit in a P5
pileup for three days - you can go work a PY and get a click.
P5 counts one click. PY counts one click. Never mind P5.

You definitly don't need an extra class license to work 100 countries.
But everybody else has one now, so you might as well get one too.

If you wanna work DX, the most important half of your radio is the RECEIVER half. If you wanna work DX, you gotta LISTEN, LISTEN, LISTEN.

I know phone is much more FUN than CW, and I know if I tell you what I'm gonna tell you next about 100 people (all of whom can't COPY Morse code) will immediatly reply saying how full of crap I am, but it's much easier to work DX with low power/lousy antenna combos (like yours) on CW than it is to work it on phone. Think about it this way:

10 times the power is 10db.

So if you run 100 watts and somebody else runs a KW, they are 10 db louder than you are.

Your antenna has no gain. Lots of yagis people are using today have 8 or 10db gain.

So now the guy with the KW and the beam is 20db louder than you are.

In a phone pileup, if you are 20db weaker than the great majority of the other people who are screaming, then it's pretty unlikely you are going to get heard.

CW offers the opportunity to be heard thru the use of finese, as opposed to the brute force/get lucky method of SSB.

Get used to being "piss weak". Don't waste hours trying to work some DXpedition. Go tune around and work something else. Know when it's time to give up....

Set much loftier goals for yourself than DXCC. DXCC is easy. Anybody can do it in a week, or on a weekend during a contest. Go for Honor Roll. Or seven band RTTY DXCC.

Or maybe even TALK to somebody else you hear on the radio. Actually having interesting converstations with other hams on the HF bands is a lost art - if you can figure out how to do that, you'll be in an elite class of hams who rank much higher in the pecking order than those DXCC guys do.... Maybe you could be the first guy to get the TALK To 100 Countries Award, who knows.

Don't forget to send in for your DXCC starter kit:

http://www.kh2d.net/opinions/dxcc.html

Don't wait till Jan, start now :-).

<snip>

> I also plan to make Extra by about Febuary figuring those extra slivers
> of bandwidth will help my odds.

Under the new license structure, you get a LOT of bandwidth getting the Extra. An awful lot of the DX shows up in what used to be called the Advanced portion of the band on phone, especially DXpeditions: e.g., calling on 14195 and listening 5 to 10 up.

All my QSO's have been phono, but willing to
> warm up to CW if it'll make a diff. My question to the group , I guess, would
> be: How best to succeed ? Tips ? Wisdom gained from experience ?
> I would welcome your advice and will keep the group posted on my progress
> if you like.

General Stuff:
1. Contests are a good way to pick up a lot of countries quickly. [The CQWW CW is this weekend, the ARRL 10 Meter contest is the 2nd weekend in Dec, and the ARRL International DX Contest is the 1st [??] weekend in March. In the 10 Meter contest, the states are also multipliers, so they will be lloking for you. In the ARRL Int DX, the DX can only work U.S. or Canada, so the DX is really looking for you].
2. Don't forget 12, 17, & 30 meters: great bands, not as crowded, and lots of DX
3. QSLs: this will take the longest --- waiting for QSLs. If possible, work DX with U.S. managers. But, work 'em first and then see where the QSL goes.
4. Don't forget that a U.S. QSO counts, HI [amazing how some forget to work their own country].
4. Get on and have fun.

Observations:
1. I run 100 watts to a Cushcraft R-7 vertical [my 80-meter antenna is down at present]. I had over 100 countries worked by late March of this year [was working on the ARRL DXCC Millennium Award]. Also, I like SSB, so all my contacts have been on phone.
2. My local DX club has been running a variation on the ARRL's award. It is to work band-countries [i.e., for us, we can work a country on each band]. Since the first of the year, I have 527 band-countries and 177

overall countries.

Final Observation: HAVE FUN..... :-)

I love Dxing and always have.

Cheers

Leo - W3LEO & MM0LEO

Andrew,
I agree with Leo's comments, particularly about contests. These are a
tremendous way of working a lot of countries in a weekend. If conditions
cooperate, anyone with a modest setup should have little difficulty working
100+ DXCC entities during the ARRL 10m contest in a few weeks time. In
March, the ARRL International DX contest and CQ WW WPX contest also provide
opportunities for working lots of countries.
Given where we are in the sunspot cycle (at or near the peak), this is an
excellent time to go for DXCC.

Best of luck.

Richard Eckman

Yikes. I thought I was going to have trouble blocking off the weekend for the contest, now you tell me it's a few weeks long? (<grin!>)

Seriously, that's good advice. Work the DX contests and the 10-meter test. If you still need Alaska, Hawaii, Puerto Rico, Canada, or the Virgin Islands, then work the domestic contests too. (Sweepstakes is over, but there are North American QSO Parties early next year) If you don't have the time to work the entire contest (who does?!), spend your time at the *end*. The "big guns" will have already worked all the more active DX, and it won't be unusual for that DX to be "begging" for USA QSOs.

Do work on your CW. KH2D is absolutely right, it's MUCH easier to work DX on CW with low power.

Don't go to too much trouble to get on PacketCluster. Once a DX station is "spotted", an instant pileup will ensue & you're likely to suffer more frustration than anything else. Checking the cluster (on http://oh2aq.kolumbus.com/dxs , unless you already have packet gear) can be helpful for knowing what interesting DX is on the bands though.

Don't waste too much time calling someone under a big pileup. More than once, I've found a rare country calling CQ without response while everyone else is yelling at another DX station down the band.

On phone, You might try some of the DX nets where at least you may get a shot at a clear channel to the DX. Many people look down on these nets, but you do get DX into your logs.

Otherwise, CW helps on any band that is open. Also, you might try PSK31 which is good with weak signals.

Not a problem with your set-up, I've done it and more with 5 watts or less
and a G5RV at 20ft, phone and cw. In fact, I bet as you get more experience
working DX and find out just how easy those first 100 are you'll start
working on variations - single band, phone, etc.....Greg,W5KJ

I'll honk into the CW-horn as others did already. With 100 Watts and a dipole/vertical or piece of wire you'll do just fine. You will find it a lot easier to break through a pile up in CW than you will with SSB.

In CW your operating style is a lot more important than your signal strength. Given a good DX-operator on the other end you will even manage the QSO if you can barely hear him, provided he knows what he's doing.

And take Jim's advice as well: We all know that he is a grumpy, fat, old and mean bastard, but sometimes his advice can be trusted. So, don't concentrate on 5nn style QSOs, but try to talk to hams, communicate with them. That trains your operating skills a lot more than watching cluster spots and actually is a lot more fun to do. I have worked 263 DXCC countries in the last 2 1/2 years on CW with 100 watts and a tiny vertical. And I made a lot of friends by talking to them for hours and hours.

And the funny thing is - DX and ragchewing are not mutually exclusive: I remember the A52A expedition when it first hit the airwaves. I made my first QSO on 17 meters and instead of receiving the usual 5nn tu report I was greeted with my name and the operator told me about about the fantastic experience the guys had in Bhutan, being the first hams in a long time to visit this country.

Turned out the operator was someone I had a couple of long ragchews with under his home call. Now *that* was fun ;-)

Most of the posted advice is useful but the prejudice against MFJ is not well deserved. If your MFJ tuner is working correctly, you have an excellent flexible antenna choice. Some of the MFJ tuners had quality problems a few years ago. It may pay to open the cover and inspect the solder joints. In one case I know of, a connector mounting screw was too close to a soldered joint. All problems I know of have been easily fixed. Some of other tuner brands (more expensive) may have slightly better factory quality control but work no better and sometimes not as well. MFJ has done an excellent job of providing reasonably priced, highly functional ham equipment.

I have used several MFJ tuners, and the MFJ antenna analyzer with good results.

It was recently announced that one man as worked 252 countries with the K2. So it definitely can be done with finesse at low power.

If you invest in more station equipment, a beam is the greatest improvement. The beam concentrates the signal toward your target and drastically reduces the noise you hear from the other directions. The improvement in ability to hear is worth a lot.

Oh, by the way, I accomplished DXCC with an ICOM 735 and a wire antenna similar to yours using an MFJ tuner in about a year of very intermittent operating and before the current sunspot cycle really picked up.

Good luck,
John KH7T

3611. CQWW Multi/Single question

Source record: 18850

We (DL7ANR, DL7AKC, DL7YS and DF5JT) will again take part in this year's CQWW CW and hope to improve last year's result by at least 23 million points. Or something like that ;-)

We have now worked on improving the low band section of the station and set up a vertical for 160 which should make a big difference in comparison to the Douple-Zepp we used last years. First tests we ran were very promising and it turned out that we are even able to use 160 and either 80 or 40 at the same time.

We need some advice as to the parallel use of the two bands. We can use two radios and two computers to do the logging, but we most certainly do not want to enter the Multi/Multi category of the contest.

The rules say that it is not permitted to have two signals on the air at the same time to qualify for a Multi/Single entry.

How do *you* go about achieving that.

We'd rather have a couple of QSOs less than being counted in the wrong class.

Any suggestions?

Hi!

I just wanted to start with that I am not a radio amateur, but I think this is the newsgroup to ask this kind of question.

I am swedish guy that lived for about 15 years ago in Liberia.
There was a radio station in Monrovia that was called ELWA.
When to civil war broke out it they ended the broadcast, but I have heard that they have started the station again. I do not think from Liberia,
maybe Cote D´vore (Ivory Coast).

Question: do any of you guys have ELWA logged recently? If soo: which fq´s do they send on and time. I have not found a ELWA site, its under SIM I think.

Okej, have a great life fellows and thanks in advance for an answer!

Greetings from Sweden, Stockholm,

Efraim Mostrom

3615. DXCC Advice Requested

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-22 04:02:44 UTC
From: cathexis@erols.com
Message-ID: <3a1b417f.219858669@news.erols.com>
Source record: 18838

Greetings,

Soon, probably beginning in January, I'm going after the mixed band DXCC. I'm writing to ask the ng's advice on how best to procede. I'm a fairly new Ham and have had my general ticket since sept. this year. My rig is a FT-980, 100W PEP running through a MFJ 941-E Versa-Tuner 2 into a dipole. The dipole was gonna be a compromise 160M as I could only get 250ft. total length (and bent to an open " C " shape to boot). It's fed with 450Ohm ladder line to aid in multi-banding. Height varies from 35ft. to well over 50ft. In reality, it's been a great performer so far on 12 to 80 and pretty okay on 10M. But sucks on 160M. So it goes. I also have a 250ft. very dog-legged random up about 40ft. Of course, there's always more toys to buy but I feel that this ought to be adequate.

I also plan to make Extra by about Febuary figuring those extra slivers of bandwidth will help my odds. All my QSO's have been phono, but willing to warm up to CW if it'll make a diff. My question to the group , I guess, would be: How best to succeed ? Tips ? Wisdom gained from experience ?
I would welcome your advice and will keep the group posted on my progress if you like.

TIA,

Andrew

Peter:

>We need some advice as to the parallel use of the two bands. We can use
>two radios and two computers to do the logging, but we most certainly do
>not want to enter the Multi/Multi category of the contest.

The MS category in CQ WW lets you do the following:
1. Operate one station continuously, collecting as many QSOs and multipliers as you can (a "run" station); and
2. Operate one additional station only to work new multipliers on one other band (a "multiplier" station).

Both of these stations are obliged to follow a "10-minute" rule, whereby once you start operating on a band, you may not move to some other band for at least ten minutes. Those "10-minute" clocks start running with the first QSO you make on a new band.

Let's say you start the contest with your "run" station on 40m. You must stay on 40m for at least ten minutes before moving to another band to "run".

During that ten-minute period you may operate on 20m only to work a new country or new zone. Once you work you first new country or zone on 20m, you may not move your multiplier station to 15m or 80m until ten minutes have passed since that first 20m QSO.

Most logging software will actually show a 10-minute countdown clock for each station and flash "QSY OK" when you can move either your run or multiplier station to a new band.

MS is a lot of fun. I have done many MS operations in the CQ WW, the most recent being the CQ WW SSB contest last month when I was at VO2CQ in Zone 2.

I hope that helps.

73,

Dave

It's only a hobby, but we have enuff basement bound introverted
electronics geeks already. We need to teach these new guys to
be REAL MEN ! Work that DX without some ego freak net control
nerd spoon feeding it to them.

We need the new guys to develop a sense of self worth, and
realize that they can do things on their own, even if it takes a
little effort. We also need to teach the new guys that DXCC isn't a
measure of their manhood, it's just an (ugly) piece of paper from
a radio club.

The guy wants to get DXCC or the guy wants somebody to get
DXCC for him ? Which is it ?

Hi Group
Just a comment
Nice to see a thread like this on a NG. Nice!!

In real life, you might want to try drugs or booze. A little
dependancy can go a long way if you apply yourself....

Like somebody once said:

Those who can DX. Those who can't DX on nets.

Hey, Jim, the guy wants to get DXCC with a gain challenged station. I know some ugly stations that have gotten countries in the log with 4 by 1 reports by resorting to those nets.

Actually, some nets are better than others. The Afrikaaners net on 15 meters is a cut or two above Alan's operation on 20.

Its only a hobby :^)

True, its better to do it on your own than have someone hand it to you.

I am presently fortunate to have one of the better DX stations in my local radio club. I once invited a "gain challenged" friend to come over to operate one night to see what it was like to operate with some decent antennas. He had a great time. He was amazed that he could work all continents in under an hour.

To my surprise, A few weeks later he called and asked if he could come over because he saw a rare one on the packet cluster, could even hear it on his station, and wanted to get it into his log. I said no. In my view, a DX contact is the total effort of building the station and then operating it. Getting something into your log by going over to someone else's station just isn't right.

Greetings,

Well,....At this point I've got a choice to make. Do I respond
to all those who've given me their advice or wait another day or two
and try to troll out a few more replies. It was tempting to see what else
might post since everything so far has been so fun and informative.
However, we've already started brandishing firearms and chainsaws;
Any further delay on my part may result in Clinton/Gore appointees
trying to impose a mandatory 3-Day waiting period on newsgroup posts.
Clearly unacceptable.

The first thing I'd like to say is a huge THX to all who responded.
Not one of you felt that this could end up a bust. That's re-assuring as I'm
a relatively new Ham. No, I won't be junking my Mighty fine Junk-- But if
you know something better get back to me. I'm more inclined to keep it and
make my next toy an analyzer to find out what my antennas are really doing.
Several of you made intriguing replies about how CW can be used to really
help my odds given my rig and antenna(s). Point taken and I think it'd be fun
to get into. Your posts (and links) have led to lots of great DX'ing tips I
plan to take to heart. I have no plans at this time to use DX-Nets. But, if I
understand correctly, "DX-Clusters" can sometimes give pointers to activity
and may use them. Frankly, I'd prefer a minimum of PC and a maximum of
ERP. Just feels more like " I did it ", though I realize I used a PC to get your
advice. You'll just have to beleive me that it's different. <grin>

So the plan seems to be:

1. Chase phono DX while,
2. Brushing up CW skills and,
3. Upgrading to Extra,
4.Consider new equipment.

My first follow-on question would be; When I upgrade I'll apply for a new
call in hopes of getting at least a 1x3, will this change of calls while using
QSL's from old and new calls muck things up??

>As an aside: How did you do logging? Use two computers and merge the
>logs afterwards?

Normally, I use CT, but NA, TRLog and SD will all handle MS operations.
Yes, we used two computers, networked through the serial ports. Each
computer had the full log, recording the contacts made by each station.
After the contest, it is a very good idea to merge the two logs, to make
sure no QSOs were lost between the two computers.

Only slightly. You will want to use the buro system for some contacts, and some dx will send you cards via the buro anyway, so you need to have a supply of stamped envelopes with the proper buro sorter. If you change your call, you will need to send a similar set of envelopes with the new call. Cards are sorted by the first letter of the suffix, so the new envelopes would likely gop to a different person anyway.

As far as the DXCC paperwork is concerned, the form includes a question for former callsigns, so this is no big deal at all. Go, work the dx, work on your code speed, upgrade, get a new call if you wish, and have fun.

======
Hi Craig -- neat old kenwood rig -- you'll like it. For the antenna -- maybe get a 20 ft collapsible pole -- they are available as a fishing rod, swimming pool cleaner, or a light bulb remover for high ceilings. Use this as a vertical radiator extended or collapsed to 1/4 wave length. For radials -- sprinkle out 1/4 wave lines made of zip cord or other cheap wire. Elevate the radials 6 or 8 feet if you can. This will get you started. Use a good antenna analyzer or vswr meter to resonate the antenna.. It is easy to make a single band vertical, multiband is a different story, maybe consider a used multiband commercial vertical, Cushcraft, Hy-Gain, Butternut, Hustler, etc

Good Radiating

3633. True "slashed-zero" font available - FREE

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-25 00:00:00 UTC
From: Charles Johnston <ctj92@earthlink.net>
Message-ID: <qtRT5.2270$nh5.218077@newsread1.prod.itd.earthlink.net>
Source record: 18870
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy

About once a month I post the availability of this font that I had
modified by a commercial font designer. It is a true slashed-zero Andale
Mono fixed-width font extremely suitable for DXBase 2000 / 2001 and really
any logging software. It's advantages are two-fold

1. It allows for easy discernment between O's and 0's with the slashed zero

2. Because it is a fixed width font it provides perfectly aligned columns in
the DX cluster windows.

Available as a 47K zip file download with installation instructions.
Last month there were over 230 downloads of this font.
It is on the Software Download Page of my site directly beneath the text
that describes DXBase 2001. Enjoy.....it's FREE.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AI2Q, KF2TI, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, KN4UG, N6RT, WC7N, K8YSE, NE8Z/HC1MD, W9RB, CO8TW, DJ5AV & DX News Letter, JF6OJX, LA4KQ, LA9GY, LU7EE, SM3TLG, UZ8RR and VK2GJH for the following DX information. Also a special thanks to Bill, NG3K, for the "CQWW Announced Operations" chart.

EARLY EDITION!!
FOR LAST MINUTE ANNOUNCEMENTS FOR THE CQ WORLD-WIDE DX CW CONTEST!!
THERE WERE PLENTY OF STATIONS WARMING UP FOR THE CONTEST THIS PAST WEEK!!!!!

5A, LIBYA. 5A1A was heard a few times this past week on 12 meters. Check around on 24915 or 24950 kHz. The station was also heard on 10 meters CW and 15 meters SSB (DX net 21355). All operations took place between 1500 and 1800z.

5C, MOROCCO. The Bavarian Contest Club has been on the air as 5C8M preparing to enter the CQWW CW Contest as CN8WW. Activity will last until November 27th. QSL via bureau to DL6FBL or direct to DL6FBL: Bernd Och, Chr.-Wirth-Str. 18, D-36043 Fulda, Germany.

8P9, BARBADOS. Look for John, K4BAI, to sign 8P9Z in the CQWW CW Contest and 8P9HT after the contest. He will be there until November 29th.

A3, TONGA. "The 59(9) DX Report" states that Paul, A35RK, will be active in the CQWW CW Contest as a Single Op/All Bands/Low Power entry. QSL via W7TSQ.

A6, U.A.E. Station A61AJ was quite active during the past week on the lower frequencies probably warming up for their Multi/Multi effort in the contest this weekend. QSL via W3UR.

AP, PAKISTAN. Bob, AP2JZB, was heard active on 12 and 10 meters. Some reports state he was begging for a QSO. Check 24955 and around 28527 kHz between 1330 and 1430z.

C2, NAURU. Jack Haden, VK2GJH, has announced that the final details concerning his December 10-22nd C21JH operation has been put in place. Emphasis will be placed on 50 MHz with limited activity on 80-10 meters and 29 MHz FM as time permits. If you want to learn more about this operation and Nauru in general, go to the following Web page, click on the "C21JH" box in the left hand column, at: http://web.one.net.au/~vk4cp QSLing is via VK2GJH direct only.

CO8, CUBA. Juan, CO8TW, reports that he will be in the CQWW DX CW Contest as a Single Operator/Low Power/Single Band (15 or 10 meters) entry. QSL via: Juan Carlos Veranes, CO8TW, Po Box 8, Santiago de Cuba, CP 90100, CUBA. He will have his contest log available online at: http://www.qsl.net/co8tw/

EA8, CANARY ISLAND. Look for Heijo, DJ1OJ, to be active as EA8/DJ1OJ. Heijo arrived there last week and will be active until he leaves Tenerife in March 2001. He said to QSL via his home callsign via the bureau.

EP, IRAN. Club station EP4PTT was heard active this past week on 28331 and 28341 kHz around 1400 to 1430z. According to "QRZ DX", the station is in Shiraz and operated by Hamid/EP3HR and Yar/EP3SP. QSL via: c/o Directorate of Telecommunications, Box 11365-931, Tehran, Iran. Also, Ali, EP2MKO, continues to be very active on 30/12/10 meters between 1300 and 1500z, but has been heard on 30 meters as late as 2330z. QSL via UA6HCW.

FO0/A/M, AUSTRALS AND MARQUSAS ISLAND OPERATION WRAP-UP. FO0WEG and FO0POM operated by SP9FIH and SQ9LR have returned home. During their 11 day operation from Tubuai (Australs OC-152) they made over 15000 QSOs. Their 4 days operation from Nuku Hiva (Marquesas OC-027) added 5300 QSOs to make their total 20300 QSOs for the whole DXpedition. Operations were on 80-6m only barefoot, using a 3 element tribander Cushcraft A3S, Butternut HF9V vertical and 5 element beam for 6m. QSL cards will be sent at the end of December. QSL route is via SP9FIH: Box 480, 44-100 Gliwice, Poland (other address with street name given by some DX services is OK, but not preferable).

HC, ECUADOR. Dr. Rick, NE8Z, will be operating from Tumbaco, Ecuador as HC1MD from November 25th through December 11th. Activity will be on 80-10 meters CW/SSB using a Kenwood TS680s/Collins 30L-1 amp (600 watts)/Carolina Windom antenna. He will also be on 6 meters CW/SSB (150 watts + 3 element yagi). Rick will travel to different areas in HC-land and will sign HC1MD/HC(?). He will be portable, operating from remote locations, including "INSIDE" the cones of different volcanos at very high altitudes. These operations will be mainly on 20 meters CW with 100w + 20m Inverted Vee. He states, "Working SSB pileups are very difficult to do at high altitudes and the lack of oxygen." He will also be looking for the following new DXCC entities for his HC1MD DXCC: East Timor (4W6MM, 4W6GH, 4W6UN), Austral Islands & Laos (any assistance/ideas will be appreciated -- Send E-mail at " ne8z@yahoo.com " while he is in HC-land.) QSL via K8LJG: John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. Also, please view the HC-DX AWARDS at: http://www.octavia.com/qsl/awards.htm

HS, THAILAND. Fred, K3ZO, was heard this past week operating from HS0ZAR on 40 and 20 meters SSB. Look for him to join the crew at HS0AC during the CQWW CW Contest as a Multi/Multi entry this weekend. Ray, HS0/G3NOM, states to look for HS station during the contest between 1834-1836 kHz and 3534-3536 kHz.

IOTA NEWS.....
OC-201. Hans, SM3TLG, will be active as ZL/SM3TLG from Waiheke Island, December 3-9th. Activity will be on CW/SSB. QSL to homecall direct or via the bureau.

JD1, MINAMI TORISHIMA. Katsumi, JD1BCK, has been active on 15 meters SSB. Check 21325 kHz after 2300z. He is expected to be here until August 2001. QSL direct only via JM1TUK.

JW, SVALBARD. Borge Holte, LA4KQ, informs OPDX that he will be active as JW5E, Zone 40, during the CQWW contest. Activity will be on all bands.

JW, SVALBARD. Morten, LA9GY, informs OPDX that he will be active as JW9GY (Longyearbyen) from December 1-4th. He hopes to take part in the ARRL 160-meter Contest with the call JW8G. For more information check the Web page at: http://home.online.no/~antonsen

LU, ARGENTINA. Arnoldo Jorge Corda (Tito), LU7EE, will be active in the CQ Contest as LU7EE/QRP as a Single Band entry on 15 meters. QSL via his QSL Manager EA5RD.

NEW OFFICERS. At the November 2000 meeting of the North Jersey DX Association, the following members were elected to the 2000-2001 Executive Committee: Ron Levy/K2CO President, Stefan Kurylko/N2TN Vice-President, Steven Adell/KF2TI Secretary and Gene Ingrahan/N2BIM Treasurer. Visit the North Jersey DX Association's Web page at: http://www.njdxa.org

NOT THE QSL MANAGER. Your editor (KB8NW) still continues to receive inquires about being QSL Manager for 5R8O because some databases list me as manager. I repeat, I AM NOT THE QSL MANAGER. Please pass the word and correct your QSL databases. The correct QSL Manager for 5R8O is 5R8FL.

P4, ARUBA. Rob, W9RB, told OPDX that he will be doing a little DXpeditioning soon as P40RB operating from the QTH of AI6V/P49V in Aruba, November 26th through December 3rd. Activity will be including the ARRL 160M Contest. His operations will be mainly CW, and probably mainly evenings except during the contest. QSL to W9RB CBA.

QSL INFO AND NEWS.....
Doug, N6RT, reports that the logs for the recent ZM8CW operation by Jacky, ZL3CW/F2CW, are now available at: http://dx.qsl.net/logs

Several have asked what the address for 7M4PTE, QSL Manager for S21YH is. If you have it, send it to the OPDX so we can publish it.

S07U/S07CRS AND 5T5U PIXS. Tad, JF6OJX, reports that he has uploaded pictures of S07U/S07CRS and 5T5U operations to his homepage. If you are interested in their operations, check the Web page at: http://www.qsl.net/ndxa/pedi/pedi.html

Be looking for a log search page coming soon.

SPECIAL EVENT. In connection with the closing of the Chernobyl Atomic Power Plant, a group of Ukraine operators UX1RY, UX2RV, UY2RA, UY2RO, UR0RR, US5RR, UT0RW and UZ8RR will be active from December 14-16th, using the special callsign EN23RW. QSL via direct to UX2RY: Andre Arsiyanz, P.O. Box 14, Slavutich-3, 07100 Kiev oblast UKRAINE.

VP5, TURKS AND CAICOS ISLANDS. Donald, KN4UG, will operate as VP5AZ from January 19-30th (2001), from Providenciales Island. He plans to be in the 160 Meter CW Contest and the NA QSO party. All QSLs go to KN4UG: Donald Namm, 103 Birkhaven Drive, Cary, NC 27511.

XT, BURKINA FASO. Harold, XT2AW, was very active on CW on the WARC bands (as well as 10 meters) this past week. He was heard on 7007, 10106, 14035, 18070, 24902 and 28028 kHz. Most of his activity was between 0030 and 0630z. QSL via DF2WO.

YI, IRAQ. A couple of stations were active this past week on 12 and 10 meters. YI9KU was heard on CW on 28026 kHz at 1530z. QSL via DL9KU. Peter, YI9OM, was active on 24894 kHz between 1330 and 1430z. QSL via OM6TX.

YJ, VANUATU (Update, refer to OPDX.483). "The Prairie DX Group" is now active as YJ0PD on all bands CW/SSB (especially the WARC bands). Look for them to be active in the CQWW CW Contest. They are expected to use the callsigns YJ0V. A press release by Rod, WC7N, reports their following planned schedule for YJ0PD:
0000z 20 meters RTTY
0300-0600z 50.110 MHz
0645-0715z 3789 kHz
0700z 40 Meters - either SSB or CW depending on activity
1000z 1830-1833 kHz
1330-1500z 3519 kHz
Their schedule depends on how long they stay on each one of the above bands. QSL route for YJ0PD and YJ0V is via N9PD. DO NOT send QSLs via the YJ bureau! For more information, check the Web page at: http://www.n9pd.com

ZA, ALBANIA. ZA1M was active on 17 and 12 meters this past week. Check around 18072, 24897 and 24908 kHz between 1230 and 1730z. QSL via IK2HTW. Also heard was Ben, ZA1K, on 28040 kHz at 1600z. QSL to: Box 7464, Tirana, Albania.

ZD8, ASCENSION ISLAND. Jim, N6TJ, is once again active as ZD8Z now through December 9th. Look for him to be a 10 meter Single Band entry in the CQWW DX CW Contest. QSL via VE3HO.

ZK2, NIUE (Update, refer to OPDX.479). Bill, W7TVF, is now active here as ZK2VF until December 10th. He has been very active on 40 and 30 meters between 0400 and 0630z, but is expected to be on 160-6 meters. He will listen especially for Europe, Africa or South America. QSL via W7TVF: Bill Dawson, P.O. Box 4049, Pahrump, NV 89061, USA.

The following list of announced operations for the CQWW CW 2000 Contest
as of 1411z, November 24th, 2000, was derived from the NG3K "CQWW CW
Announced Operations" Web page. For updates and fuller details (including
many QSL addresses, operational specifics, E-mail & Web page links)

Doesn't almost every font have a slashed zero (ï¿½) as one of the characters? I just checked a few of my fonts and all of the ones I checked did.

Years ago I tried Excel and it worked ok for a while, but it doesn't
do some things like report your country or WAS total. I gave it up
and bought LogWindows. Been very satisfied ever since, although with
31,000 Q's in the log, it is getting slow on some functions like
backup and especially restore. I'd recommend a real logging program -
you'll be happier in the long run.

Yep, but an Apple computer, for instance, won't display that zero
correctly if it was typed on an IBM/Microsoft machine.

Ya, but...

Just because _you_ can type a slashed zero with your font, and just
because _you_ can see it's rendering on _your_ screen, means *nothing*
for the hundreds of thousands of usenet users out here.

I suppose your font is proprietary to the operating system from
from the convicted monopolist from Redmond, Washington -- nicht wahr?

Saturday, November 25 2:05 PM SGT

Strong solar storms could wreak havoc in Northern Latitudes
WASHINGTON, Nov 25 (AFP) -

Across the United States this weekend, fire alarms and anti-theft devices may be triggered for no reason, pictures on television screens may flicker and fade to black, and entire communities could be plunged into sudden darkness.
Such unusual goings-on things could result from what scientists describe as a wave of major geomagnetic storms expected to strike beginning late Saturday and last for several days.

In an alert issued Friday, the US government's Space Environment Center said "a major solar flare from a large, active sunspot group" was observed on the Sun from Boulder, Colorado, last Thursday, at 8:13 am local time (1513 GMT), likely producing "additional major events."

The solar radiation storms and strong geomagnetic storms categorized by the center as a "G3 Event", officials said.
Under such storms "power system voltage corrections may be required, false alarms triggered on some protection devices, surface charging may occur on satellite components, drag may increase on low-Earth-orbit satellites, and corrections may be needed for orientation problems," the center pointed out.

The list of possible calamities doesn't end there, however. The storm wave could cause interruptions in navigation satellite communications and become a real headache for high-frequency ham radio operators, according to the center.
"In the worst case scenario, power can be lost," Norman Cohen, a space environment forecaster with the National Oceanic and Atmospheric Administration, told AFP. He said failures of power grids were more likely to occur "at higher latitudes in both hemispheres," but the geomagnetic storms -- to continue for at least several days -- would affect the whole planet.

"It will be global event. And we won't know the magnitude until it actually starts," Cohen stressed.
He said the flare observed on the surface of the Sun on Thursday has spawned a large cloud of plasma, which is heading towards the Earth. "From its appearance, we have been able to determine that it was Earth-directed," Cohen explained. "It will be a major event." The magnitude of the storms was expected to reach six or seven on a scale of nine, according to the forecaster.

As a result, orbiting satellites may experience "some orientation problems" and "will need correction from ground control," Cohen said. That may affect some communications, but television networks and cellular phones should be working normally, said the forecaster. If interruptions were to occur, they should be brief. Power grids, however, may be worst-equipped to withstand the geomagnetic onslaught from space. In 1989, most of the power grid in the Canadian province of Quebec went down for an expended period of time due to such a storm, Cohen reminded.

On the bright side, night-time skywatchers in areas far beyond the Arctic could be treated to a spectacle they have never seen before. Aurora Borealis, otherwise known as Northern Lights, could be seen in North America as far south as the US states of Oregon and Illinois, the center said. "Most of Europe will be able to see it too," added Cohen.

He said in Illinois and Oregon, the aurora will probably be visible starting at around midnight Saturday. In Europe, it is most likely to be detected on Sunday and following days after dark.

3641. Vanuatu freqs?

Didn't write down the freq. but I believe I worked them on 28495 SSB
listening 5-10 up where they have been consistently in the afternoons. That
was the only freq I had heard them on. Don't know if they will be there
during the contest though.

Good luck, Trav WX0Y

Is there anybody out there who cannot see the slashed zero in the parenthesis above, or in the parenthesis here (ï¿½)? I was under the impression that this character was included in standard ASCII, and therefore should be visible on all computers using western character sets. Perhaps I'm wrong.

> I suppose your font is proprietary to the

Nope, I have the Cupertino operating system, with a whole lot of fonts (some proprietary and some not).

Okay, it looked like a slashed zero to me. But, I suppose in a spreadsheet program it won't act like a slashed zero.

You're wrong. I see a question mark in the parenthesis when reading the
post, and backslash three three zero in writting this followup.

The default character set here is US-ASCII; I had to change it to
ISO-8859-1 to even get this thing to post.

3646. New HAM Antenna Question...

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-25 00:36:47 UTC
From: Craig <kc8poe@arrl.net>
Message-ID: <zQDT5.23978$JU.914278@typhoon.mw.mediaone.net>
Source record: 18868

I just recently became a HAM (technician) and am now studying for my General Class. I also just bought a beautiful Kenwood TS-530s that I don't think has been used since it was made. Anyway, my question is, I need an antenna that I can use on this rig, first to listen and figure out what bands I want to hang out on, and secondly an antenna that I can one day transmit on without blowing up my rig. I don't really have enough room for a huge dipole setup, some of the verticals I have seen cost more than my radio. Do any of you have any suggestions? I am dying to turn on my rig and hear someone talking. I need some sort of compact setup.
Thanks in advance,
73
Craig

That is not slashed zero, it is a vowel in at least Norwegian and
Danish, the uppercase ï¿½ is at U+00D8 and the lower case ï¿½ at U+00F8.

>Yep, but an Apple computer, for instance, won't display that zero
>correctly if it was typed on an IBM/Microsoft machine.

These characters are in the same positions in Unicode, ISO-8859-1 or
Latin1 (as used by most modern unixes), Windows code page 1252 etc.

MS-DOS and Apple have both their own incompatible code pages for
Western European languages. HP-UX had their own incompatible code
pages and of course all big IBM machines use EBCDIC, which is
completely incompatible with anything else.

According to the news headers, you are using linux and slrn and your character set is declared as iso-8859-1 and the original message also contained an explicit code page declaration of 8859-1. How on earth did you manage to display the original text in MS-DOS (OEM) US code page 437 :-). There is definitely some problems with your configuration.

Yep, so did the -35 series and probably others. My first "home computer"
had a KSR-35 as a console. Jeez that dates me...

This makes me curious. In the US, is it legal to operate a CB that has been converted to 10 meter Ham operation, assuming of course you are a legally licensed ham with privileges on 10m? I'm not sure how this would be different from building your own radio from scratch, which is legal.

If it is illegal, I'm wondering how other countries view this kind of thing.

Just curious,

Robert / KG4FGN

Never say never. Almost all of the older home PCs had the slashed zero. My trs-80 does. I just fired up my Commodore 64 and my 128, both of them have the zero slashed (heck they even have the zero slashed on the keyboard).

A slashed zero font with it really being the zero and not a special character is a cool addition. Being Monospace helps, there aren't that many monospace character sets out there that are easy to read.

Many early PCs displayed the ASCII zero with a slash on the screen.
The ASCII character however was 30 hex, the same character that
displays a non-slashed zero on most fonts. 30 hex is and always has
been the *only* valid ASCII code for zero. It is up to the receiving
terminal design to determine if the displayed zero character has a
slash or not. Any other character will fail in software analysis even
though it may "look" like a zero on the screen. The only proper way to
display a slashed zero is to have the receiving machine display a
special slashed zero font in response to receiving a 30 hex or to have
the receiving software send a slash zero "look alike" to the screen in
response to receiving a 30 hex.

Hello--
Also, IIRC many of the late-1970s-vintage "dumb terminals" (e.g., Televideo 910, ADM xx, etc.) either included a permanent slashed zero in their character-display ROMs or had a switchable option to display either a slashed zero (or one with a dot in the center?). Can anyone confirm this?

If it's a multi-band verticle like the GAP, I have a couple friends who have them. They mounted them on the ground on top a 5' pipe sticking in the ground and then at a latter date, put them on the roof. They both put them back on the ground because it worked better for both of them. I don't know the science behind all that, but the fact is it worked better.

Never expect a character typed using the Option key on a Mac to come out the same on a Windows machine. Never expect a character typed using the Alt key on a Windows machine to come out the same on a Mac.

> > I suppose your font is proprietary to the
> > operating system from from the convicted

> (some proprietary and some not).

The character in parentheses looked somewhat like a slashed zero on this Macintosh, but it really is not. It was typed by holding down both the Shift and Option keys while typing the letter "o". If a Windows user typed what looks like a slashed zero, when I looked at it on this Mac I have no idea what it would look like, but I'll bet it would look different (unless he typed an ordinary zero; then it _WOULD_ look like a slashed zero to me).

This is one reason why Mac users should never use the Option key in e-mail or newsgroup posts, and likewise Windows users should never use the Alt key. I figured out from context some time ago that the lower and upper case Pi characters I occasionally see on this newsgroup really were intended to be 1/4 and 1/2. I can get those Pi characters by using the Option key, or both the Shift and the Option keys, with the letter "p" (easy to remember) but I have no idea what they would look like to a Windows user. Let's find out: Here's the one with Option alone: ø. And here's the one with both Shift and Option: ø.

By the way, the current versions of the Monaco and Mishawaka fonts (both monospaced), and the Chicago font (not monospaced) on the Mac give a slashed zero just by typing the ordinary zero. Since I use Mishawaka as the screen font for my e-mail program (Eudora) and my newsreader (NewsWatcher) I see lots of those slashed zeros onscreen.

>sets. Perhaps I'm wrong.

Standard US-ASCII (ANSI_X3.4-1968) is that obsolete 7 bit character
encoding containing 0..9, A..Z, a..z and 24 punctuation characters
and 32 control characters. Standard US-ASCII and its international 7
versions (ISO-646, in which a few punctuation marks were replaced with
non-English vowels and consonants) were used in most non-IBM computers
into 1980's. For instance the mechanical Teletype or the VT-100
terminal supported only US-ASCII or other international 7 bit
variants.

The only way to display the (ï¿½) character on these systems is to use
a Danish or Norwegian terminal and send the 0x5C code to the terminal,
which on the US-ASCII terminal would be displayed as the backslash (\)
character.

In 1983 the VT-220 terminal supported an 8 bit with some modifications
became the ISO-8859-1 (Latin1) in 1987 supporting most Western
languages at the same time, includes the (ï¿½) character.

Thus, if you are using 7 bit devices, such as VT-100 terminals, you
will not see that character.

>> I suppose your font is proprietary to the
>> operating system from from the convicted
>> monopolist from Redmond, Washington
>> -- nicht wahr?

Western Windows variants use code page 1252, which is superset of
ISO-8859-1, so the ï¿½ is in exactly the same position.

However, in MS-DOS, the US code page 437 does not contain the ï¿½
character at all and the Western European code page 850 keeps it in a
different position, thus, some transcoding is required to display it.

The Mac Roman character set has the ï¿½ character in yet an other
position, so some transcoding is still required.

>The character in parentheses looked somewhat like a slashed zero on this >Macintosh, but it really is not.

As far as I can figure out, there has never been any slashed zero characters in any computer character sets. However, there has been a large number of font variations that displayed the ordinary digit zero in somewhat different ways. Some used a completely round glyph, other used an elongated glyph, some a truly elliptical glyph, some a zero with a right facing slash, some with a left facing slash, some used a centre dot and some even some kind of underscore to distinguish from the letter O. All these are simply glyph variations of the ordinary zero digit.

On hard copy devices you could use overprint by sending the digit 0, backspace and slash. In Unicode a slashed zero could even be constructed by using U+0030 U+0336 (digit zero and combining long stroke overlay).

All the talks about slashed zero appearing in all fonts is a misunderstanding, by people who think that Norwegian and Danish uppercase vowel (ï¿½) U+00D8 and lover case vowel (ï¿½) U+00F8 look like a slashed zero. I am writing this on a Norwegian keyboard layout and that vowel is immediately to the right of the L-key. This paragraph should be correctly displayed on any system supporting ISO-8859-1 (Latin1).

Yes, but it's *not* a zero...it's <Option><Shift><o> Hex 'AF' which
may not display the same in other fonts or operating systems. As far
as I know, codes above 127 are not part of the ASCII standard, which
is 7-bit, and they will vary from implentation to implementaion.

An ascii zero is 30 hex. Other codes will display what looks like a slashed zero on some machines. Software, such as logging programs and call sign capture functions in terminal programs, are not likely to recognize these other characters as a zero. Sending anything other than 30 hex should be avoided. If you want to see a slashed zero, the correct way to do it is to install a font that displays a slashed zero on the screen for 30 hex.

i was fortunate to be looking when the blast went at around 1600 yesterday.....
there were two reversed treble clefts in the southern area of 9236? that
blueshifted more intensly than any i had seen prior. simultaneously a vertical
and horizontal prominence formation appeared and went away in about 15 min.

Congratulation Graig and welcome to the hobby. It's pretty easy
to make simple antennas that work very well. There are lots of
books on the subject. (check the ARRL publications for a good
start) To listen, just hang 33' feet of wire someplace (it doesn't
have to be straight or very high, nor does the type of wire matter)
and connect one end to the rig. If you want to transmit, you'll have
to use an antenna tuner and have a good ground, but you'll be able
to hear pretty well.
(33' is 1/8 wavelength on 80 meters, 1/2 wavelength on 20 meters,
1/4 wavelength on 40 meters, 3/4 wavelength on 15 meters and
1 wavelength on 10 meters)

What I see is an equal sign ("=") with a vertical bar ("|").
It be one of the "IBM Graphical Characters" for drawing boxes: x'D8'.

>I was under the
>impression that this character was included in standard ASCII,

Standard ASCII !!! LOL !! At best ASCII is 'standard' up through
x'7F' -- and is wide open for (re)intrepretation from x'80' - x'FF'.

Come on guys, get REAL here..... What's wrong with TUNING AROUND
to find Deeeee-X ? Can't we still find and work some Deeeee-X without
a web page with frequencies and times ?

Ever heard of the DX Cluster ? Let somebody else find them for you...

21050.8 YJ0V 26-Nov-2000 0530Z cq..
28042.0 YJ0V 26-Nov-2000 0441Z Zone 32
28043.0 YJ0V 26-Nov-2000 0425Z CQ CQ CQ
21051.0 YJ0V 26-Nov-2000 0357Z BEGGING! CQ TEST

28042.0 YJ0V 26-Nov-2000 0343Z

I don't find it dumb that you guys are looking for frequencies on a
web page, I find it amazing..... This is ham RADIO, not ham INTERNET,
remember ??

Andrew:

If you are thinking of a Cushcraft R-7, remember that it has 7 radials at its base, each 4-foot long; so, you need an 8-foot clearance around it. I've done a temporary installation of an R-5 held by a rope over a tree limb. But, that was a temp situation. The R-series should be at least 8-10 feet above ground. The problem with the rope support is rain water "connecting" the rope to the antenna. [There's enough pollution around so that rain water isn't pure anymore]. You might want to consider ground mounting a small tripod with the center support pipe going into the ground. All depends on size/shape of your yard. I have an R-7 mounted on masting attached to the side of the house so that the base of the antenna is about 22 feet up and it has worked very well.

Good luck

Ann Arbor terminals had a slashed zero as did all of our competitors. The
IBM 3270 and compatibles had a dot in the center. The early computers did
not have video displays, they used ASR33's and other Teletype Corporation
products as I/O. The early computers that used Video terminals carried over
the slash zero as they were called "glass TTY's".

Both examples use the extended ASCII character sets associated with your particular code page. A true slash zero will display with the normal ASCII zero in the 128 character code set (030)

Amateurs have a very privileged status in the U.S. Every other service may only operate type accepted equipment. We can operate any piece of junk that we can buy, build, modify or cobble together, as long as it meets the technical standards of the service. As technically skilled operators, we are expected to understand that our equipment does meet those standards.

The only limitation applies to external power amplifiers below 144, and specifically between 24 and 35MHz, where there are some restrictions on what we can build/cobble together.

>> ... and you have a "lower case slashed zero".
>>
>>
>
>
On my machine you get a 'ï¿½' like this...
Turn on the 'num lock'.
While holding down 'alt' type 0, then 2, then 1, then 6 ON THE NUMERIC
KEYBOARD (or whatever you call it - you know what I mean - the one which
has the 'home', 'pg up', 'end' etc). After you have typed the '6',
release the 'alt' key.. and up pops the 'ï¿½'.

Note: the 'top row' numbers DO NOT work.

Cecil (W6RCA) did post (some time ago) a list of the interesting
characters which he had found between 'alt0130' and 'alt0255', although
I find that mine seem to start at 'alt0161' (I only get 'ï¿½' before
that). 'Alt0181' is a useful one - it's 'ï¿½'.

There are two problems...
1. I believe that everybody may not receive the 'correct' character -
eg, the 'alt0181' should be a Greek 'mu' - who didn't get this?
2. I haven't worked out how to do this on a laptop where there is no
numeric keyboard.

ï¿½ï¿½ï¿½ï¿½ï¿½ ï¿½ï¿½w!

Ian.

3687. Goofy Antenna question, but curious.

Greetings,

Just thought I'd ask.
Let's say you've got a "no gnd radials needed" vertical of
say 23ft. height. You can't afford masts/towers and the
XYL doesn't want guys all over her pretty roof. But you want
the max. elev. u can get. What would be so wrong with rigging
some kinda pulley and hauling it up between trees to get max
elev.? You'd need a way to tie it off to a few trees of course.
But whereas your roof mount willl give you maybe 23 + 18 ft.,
the tree hoist could bring you up 50 feet more easily. Realize
this is kinda goofy question AND that wind damage would be
a continuing hazard. Nonetheless, curious if "in theory" it'd
work-- and work better than your roof mount.

Andrew

>If I remember correctly, the ASR-33 had a slash through the zero.

Today we would call it a font or glyph variation. It was printed, when
0x30 was sent to the terminal (or 0xB0 if odd parity was used). There
was not a separate character code for slashed zero.

The print cylinder (or whatever it was called on ASR-33) did not
contain _both_ the ordinary zero and the slashed zero.

Thus, the slashed zero did not appear in the character set as a
separate entity but rather as a glyph variation. The same applies to
the early home computer character generators with _only_ the slashed
zero (but not ordinary zero) in the character set that others have
commented in this thread.

Today, would you considered a zero printed in italics to be a
different character when printed in boldface :-).

3711. MARS Stations question

Newsgroup: rec.radio.amateur.dx
Date: 2000-11-29 00:00:00 UTC
From: nannycam@iwvisp.com
Message-ID: <3a25583e.10710664@news.iwvisp.com>
Source record: 18650

I hjave asked this question several times on various forums, but have never gotten consistent answers.

What happened to the Navy MARS operations on board ships?
My info has it that they were all removed due to availability of the internet and email.
Can anyone tell me the straight story?

Thanx

Ron C. wb6gki

The other option is to bring up the Character Map application (in Accessories). You can then search for the character you want. Click on the character, then click on Select, then Copy. The character is now on the clipboard, and you can paste into your main application. Slower, but works fine.

Hi Thanks for reading my urgent post,

I just entered my paper log onto the pc using genlog software,the point
allocation is auto,and questionable as a P29 scored 3 points but ;
V73
V63
FK8
ZL
KH2
KH6
KH8
FO
DXI
KH4
PM8
3D2
all scored 1 point each ,
from what i read in the rules all other contacts outside my continent score
3 points each,so can someone please let me what is considered to be within
my continent,
i believe most of the contacts above should be 3 pointers any comments ,
i've just spent the last 6 hours at the pc ,not going to bed yet (3:50am)
will check for a response after next coffee,
thanks for your help,
Paul,,,,,vk3ddu

now i'm in vk land

Pure speculation, but maybe derived from "handling traffic" from a
"handler", who has a "handle"?

> That is not slashed zero, it is a vowel in at least Norwegian and
> Danish, the uppercase ï¿½ is at U+00D8 and the lower case ï¿½ at U+00F8.

I downloaded the font and installed it. Now my zero's are slashed!

Unfortunately, I have lost the ability to distinguish between

0 and ï¿½

They are exactly the same! I will never be able to read Norwegian
again! However, I couldn't read Norwegian before, so the impact
will probably be minimal.

Interestingly, some of the other programs I run that insist on using
fixed-width fonts, notably Not-GNU, don't recognize the font as having
that characteristic. I wonder if that's a Windows setup thing or is
there a bit set in the font file itself that tells everybody it is
is that way?

It's a property of the font, which a program has access to. For example, some of the outputs in EZNEC, like the tabular far field output, require a fixed font to be displayed properly. So when you open the "Set Font" dialog in this window, the program gives you only the fixed width fonts on your system to choose from. The property is surely embedded in the font file in some manner.

If this is the same as "morsematic", check
www.sarrio.com/sarrio/rsman1.html

also check www.w7fg.com if the MM1 manual might help.
Click 'catalog of manuals' then click on A (for AEA).

If it was really PV0E then it was either Brazil or more likely, Fernando de Noronha. (a Brazilian possession in the Atlantic that counts as a separate country)

But I'll bet it was actually P40E on Aruba.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 488
BID: $OPDX.488
December 4, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AA1AC, AI2Q, N2OO, WB2YQH/ WB2RAJ & The 59(9) DX Report, W3HC, W3UR & The Daily DX, K4QD, K4VUD, KD4EUH, W4DXX, W4ZYT, AI5P, K7BV, N7NG, AG8L, K8YSE, BA1DU, CE6TBN, DJ5AV & DX News Letter, DK9KX, DL7VYL, EA3BT, F5NOD, F6AJA & Les Nouvelles DX, JF1OCQ, JQ1SUO, JT1KAA, ON5FP, PY1NEZ, SQ4NR, VK4AAR, VK0MM, YS1RR, YT1AD and 9M2TO for the following DX information.

3D2, CONWAY REEF. Hrane, YT1AD, reports that their plans are firm for the upcoming DXpedition. The operation will take place February 18-27th in 2001. The operators will be YT1AD, YU1RL, YU1NR, YU7AV, YS1RR, Z32AU and Z32ZM. Activity will be on 160-6 meters as well as 2 meters. The modes to be used are: CW, SSB, RTTY, PSK and SSTV. The total costs of the DXpedition is 45000 USD. Any donation will be highly appreciated. More details will be forthcoming.

3DA0, SWAZILAND. Dan, W5AHC, is here currently installing a communications systems for church groups for an undetermined time. He has reportedly received the callsign 3DA0AA. So far no QSNs have been reported on any activity.

3Z, POLAND (Special Event). Look for special event station 3Z0KOR from Olsztyn to be active during the whole of December. The station is on the air to celebrate 25 years of Polish Reserve Officers' Club. If you work this station a special award is available. QSL via SP4KSY (bureau or direct). You can find additional information on this activity on the Web site: http://www.cqsp.republika.pl/3z0korenglish.htm

4S OPERATION WRAP-UP. Phil Whitchurch, G3SWH, informs OPDX that he had a rather disappointing operation from Sri Lanka. He reports, "The airline managed to lose my baggage containing the R-7000 antenna, the vibroplex, tools and headphones etc., not to mention all my clothes. I hand carried the IC-706, power supply, laptop etc. When the airline found and forwarded the bags, the Sri Lankan customs impounded the antenna, and all my other

equipment and refused to release it without documentation from the Sri Lankan Ministry of Defence. A copy of my Sri Lankan licence was not acceptable. I was very lucky to manage to negotiate the release of the equipment in time to load it aboard the homeward bound aircraft. I did manage a limited operation, mainly on 24 MHz CW and made 584 QSOs with 63 DXCC entities, but it was nowhere near the level of activity which I had planned..... 73 for now."

A4, OMAN. Murtadha, A41LZ, has been active around 14180 kHz (+/- 10 kHz) after 0330z. Chris, A45XR, was heard this past week on 28033 kHz around 1459z.

A5, BHUTAN (and XU, Combodia). By the time you read this, Charly/K4VUD and Yani/9M6US will be operating from Ham Center in Thimphu, Bhutan. They plan to run two stations. Charly will be operating from December 1-12th, signing A52UD on SSB/CW emphasizing the low bands. He was on this past weekend on/around 7048, 14260 and 28495 kHz. Jani will be using A52AP from December 1-7th, concentrating on SSB and RTTY on higher bands. He was heard this past weekend on 24936 kHz around 1145z. Jani will go to Cambodia (XU) from December 8-12th operating as XU7AAP including a participation in the ARRL 10m Contest. QSLs for A52UD go via K4VUD, while A52AP and XU7AAP go via N2OO.

BY/R1ANF. There has been some confusion on this station's activity. First this station is reportedly operating from the Chinese Antarctic Base "Great Wall" in the South Shetlands (King George Island), not China. The operator was Oleg, UA1PBA, visiting the Chinese base. This activity sparked a press release by Alan, BA1DU, stating "According to current radio regulation of China, it is impossible to issue such a BY/ callsign. The authorities never permit foreigners to operate amateur radio stations independently in China, and all holders of Chinese guest amateur radio operating license can only operate under a BY club callsign/guest's home call sign. Although there are no national boundaries in Antarctica, Chinese authorities never permit that callsign operation". QSL via RK1PWA: Nick Shapkin, P.O.Box 73, 164744 Amderma, Arkhangelskaja, Russia.

D6, COMOROS (Update to OPDX.486). Josep, EA3BT, sent out another short press release this past weekend requesting input from the DX community on what "bands and modes" he and his wife (Nuria/EA3WL) should be active on from Comoros. Their activity will be from January 13-28th. You can find information on their DXpedition and leave your input on what bands and modes they should operate on at: http://www.qsl.net/ea3bt

EP, IRAN (Update). Hamid, EP3HR, manager of the club station EP4PTT, reports that this station is now only working on 20 meters SSB. This is because their equipment is homemade and can only work on 20 meters, but they are planning to make a four band radio which will work on 40, 20, 15 and 10 meters. Unfortunately, a pirate station near their country of Iran and as been using the callsign EP4PTT asking for IRCs or green stamps. QSL information for EP4PTT is only via the bureau of Iran with this address: C/O Directorate of Telecommunications, Box 11365 - 931, Tehran, Iran.

ET, ETHIOPIA. Claudio, ET3VSC, was heard on 17/12 meters this past weekend. Activity was on 18076 kHz at 1958z and 24957 kHz beginning at 1300z.

FO/A & FO, AUSTRAL ISLANDS AND FRENCH POLYNESIA. Alain, F2HE, has left for the FO-lands via Los Angeles and hopes to be active on Rangiroa (OC-066) with his FO0CLA callsign. He will be there for at least 8 months and also hopes to be active from Rurutu (OC-050) in the Austral's, Mangareva (OC-063) in the Gambier Island group, and maybe from Pukapuka Atoll (OC-062). QSL via F6CTL.

FS, FRENCH ST. MARTIN. Just a reminder! Look for members from the North Jersey DX Association (NJDXA) to begin their activity December 5th (Refer to OPDX.482). The seven operators will be active until December 12th with two stations on the air on CW/SSB on all bands. They will be active during the ARRL 10M Contest as FS/W2JJ. Operators Mike/WA2VUN, Jay/WB2BHC, Gene/K2KJI, Maryann/K2RVH, Bob/W5GJ, Ann/W2AZK, and Brian/KF2HC will use their own individual callsigns outside of the contest. QSL via their home callsigns.

FT/W/X/Z, A NO GO. In OPDX.486 we mentioned that Andre, F6GQO, was going to travel on the vessel "Marion Dufresnes" and possibly be active from Crozet, Kerguelen and Amsterdam Islands. Unfortunatly, Andre, couldn't obtain the permission to be active.

IOTA NEWS.....
AF-050. The "LNDX" reports that Yannick F6FYD/5T5YD hopes to be active from Arguin Island soon, maybe during the coming week.

EU-038. Marc, ON5FP, and his YL Tine will make a short trip to Texel Island from December 28-30th. Marc informs OPDX that although this is primarily meant to be a relaxing trip, expect some activity from a nearby Texel lighthouse. Activity will most likely be on 20 and 40 meters, signing PA/ON5FP/P. QSL via his home callsign.

NA-079. Jan/K4QD and John/AF4WM will be active from the Dry Tortugas National Park for a few days starting about December 10th. The exact time of operation will depend upon weather because the team is sailing from North Florida. They will operate portable from Ft. Jefferson on Garden Key. QSL via CBA.

OC-NEW. Plans are well on the way for a trip to Breaksea Island by operators VK6YS/Wally (team coordinator), VK8AN/Dan, VK6CX/ Bruce, VK6KHD/Nigel and Jim, an interested party (not licenced), beginning January 18th or 19th through January 22nd or 23rd (2001), using the callsign VK6BSI. Alan, VK4AAR, reports that Breaksea Island is a Class "A" reserve and requires a special permit from the "Conservation and Land Management" (CALM) people in order to land and stay. Two of the operators are "survivors" of the ill-fated Browse Island expedition last September when their boat was driven up the beach by the sea. This island is in the "Western Australia State (South Coast)

West Group" and lies just south of Albany at 35 degrees
11.334 minutes South, and 118 degrees 03.703 minutes East.
It has never been activated before, and an IOTA Reference
Number will be allocated once operations are under way. QSL
via VK4AAR (direct only): Alan Roocroft, POB 421, Gatton 4343,
Australia. Alan states, "Remember, it is NOT a good idea to
send envelopes with Australian stamps as there is now a
special type of stamp for use on international mail. The
postal authorities assure me that using the wrong stamps WILL
incur a penalty. So please use Greenstamps (for preference)
or IRCs."

SA-024. A group of Brazilian operators will activate an island in the
Sao Paulo State West Group called Comprida Island. This island
is located near the city of Iguape, south coast of Sao Paulo
State (PY2). Operations will take place from December 13-18/19th.
This will be a full time operation, depending on propagation
conditions on 160-6 meters on CW/FM/SSB. Look for the following
callsigns/operators: PU1NEZ/2 (Carl), PY1LVF/2 (Zeca), PY1NEW/2
(Pete) and PY1NEZ/2 (Lima). QSL via their home callsigns
(addresses are correct in the QRZ Database/Buckmaster/Flying
Horse Callbook) or Bureau. Suggested frequencies are (+/- 10
kHz):
CW - 1835, 3530, 7030, 10115, 14040, 18098, 21040, 24895,
28040 and 50080 kHz.
SSB - 1850, 3755, 7055, 14190, 14260, 18128, 21260, 24950.
28360, 28460, 28560 and 50110.

JD1, OGASAWARA. Eiji, JQ1SUO, informs OPDX that he will be going to
Hahajima (AS-031) and will be active as JQ1SUO/JD1 from December 30th
through January 3rd (2001). Activity will be on 160-10 meters CW/SSB.

KH0, MARIANA ISLANDS. A group of JA operators will be active from December
8-11th on 40-10 meters SSB/CW, and possibly 6 meters. Look for the
callsigns W1VX/KH0, KZ5C/KH0 and KH0/JR1IBD from Saipan Island. QSL routes
are as follows: W1VX/KH0 via JF1OCQ, KZ5C/KH0 via JA0QBY and KH0/JR1IBD
via JR1IBD. Please do NOT send directly to the U.S. or the Bureau.

KP2/WP2, U.S. VIRGIN ISLAND. Dave, AG8L, will be active from the Windwood
contest station, WP2Z, from December 6-13th, including an entry in the
ARRL 10M Contest. The callsign KP2/AG8L will be used outside of the
contest. The station is located on the island of St. Croix in the U.S.
Virgin Islands. Dave states that there is no 6 meter activity possible,
but there may be some PSK-31 activity after the contest. QSL routes are:
KP2/AG8L via NN6C and WP2Z (contest callsign) via KU9C.

PY0F, FERNANDO DE NORONHA. Andre, PY0FF, has been very active on 6 meters
lately. Listen for him between 1330 and 1800z.

QSL INFO AND NEWS.....
JUST A REMINDER! If you are sending for stateside QSLs, the postal
rate will be going up "1 cent" in the beginning of the new year 2001.

Please be considerate and DO NOT stick the QSL Managers with the penny.

Tex, 9M2TO, reports that ALL the September and Ootober QSOS QSLs have been sent out to the JARL Bureau. Also, all the direct QSLs received for both JA0DMV and 9M2TO before November 18th have been replied to. He states that over the last 5 years he has made a total of 117,941 QSOs and has automatically sent to the QSL bureau 108,480 cards. He has also replied to 4,925 direct.

Several have asked what the address for 7M4PTE, QSL Manager for S21YH is. Well, here it is thanks to Eric/W4DXX: Kazunori Abe, 7-12, Kagura, Ashhikawa 070-8007, JAPAN

Mac, W3HC, reports that he is now the QSL Manager for BA2BI.

Rick, AI5P, reports that he is sorry to report that the CY9 QSL cards from the printers in Europe have not yet been received. The QSL cards for AI5P/CY9 were mailed from the Czech Republic October 6th, but have not yet been received in Arkansas. The other cards for KT1J/CY9, WA4RX/ CY9, and WV2B/CY9 are being printed in Bulgaria, and he has no status report on them. Please be patient and do not send second requests to any of the QSL managers. All will be confirmed in due course, and they are sorry for the extended delay.

Gerda, DL7VYL, informs OPDX that her husband Fritz, DL7VRO, QSL Manager for 7P8AA (and many others), states that he has been in the hospital. Fritz hopes to have the 7P8AA cards out by the end of December. ADDED NOTE: OPDX and the NODXA gang send out our best wishes and a get well quick for Fritz.

Jean Michel, F6AJA, reports that the FM/F2JD QSLs are not printed yet. However, if you are interested to see if you are in the log send an E-mail message to " log.f6kpo@eudil.fr " with the callsign as subject and "FM/F2JD" in the body message.

Gil, F5NOD, one of the FR/F6KDF/T Team, reports that they are currently working on the Tromelin Island QSLs. He states that the first QSLs will be sent out during the second part of this month (around 12000 QSLs).

JT1R Team. Operators were JT1BH, JT1BJ, JT1BL and JT1CD. QSL to: P.O.Box 602, Ulaanbaatar-44, Mongolia.

A few people have requested the QSL address for Monk Apollo, SV2ASP and SY2A, so here it is: Monk Apollo, Monastery Dochiariou, GR-63087 Mt. Athos, Greece.

Alan, VK0MM, reports that an "eQSL" for ONLY VK0LD is now available via the Web at the following URL: http://www.eQSL.cc/qslcard
He states, "Follow the instructions on the page and you can check whether you are 'in the log' AND obtain your QSL card at the same time. The log has been VERY carefully checked, however if a card is not available for you, and you are pretty certain that you had a bona

fide QSO with VK0LD, then Email me and I will double check the original log. VK0LD QSL cards via postal means are not available." Alan's E-mail address is: vk0mm@yahoo.com
ADDED NOTE: Currently, the ARRL's DXCC Desk will not accept eQSLs for their award. However, according to Wayne, N7NG, from the League, reports, "DXCC is not prepared to accept electronic confirmations from anyone at this time. The League is actively engaged in establishing a suitable program, but it won't even be beta-tested until (probably) next summer."

SPECIAL EVENT. The USS Wisconsin Radio Club will make its debut under the callsign N4WIS during a four day special event from the Nauticus National Maritime Museum in Norfolk, Virginia, December 7-10th. This event commemorates the 59th anniversary of the attack at Pearl Harbor, and marks the permanent berthing of the Wisconsin at the Nauticus Museum. Operations from the museum will be on CW and SSB 40-10 meters (7035, 10110, 14035, 18078, 21035, 28035, 7235, 14210, 18120, 21260) as well as 2 meter FM (146.970). Times are 1300-2200z (0800-1700 EST). Other off site operation by the club on additional ham bands during other hours using the N4WIS callsign are planned. A commemorative QSL or certificate will be available. The complete press release with more information about the battleship will be sent to all OPDX InterNet Subscribers as an additional bulletin.

TT8, CHAD. The "LNDX" reports that Christian, TT8DX, has started to be active on 6 meters. There were no QSNs provided. Also, he is installing 7 elements beam soon for all HF bands.

VP2M, MONTSERRAT. "The 59(9) DX Report" reports that Graham, M0AEP, will be active from here December 6-20th as VP2MDD. There was no mention of bands or modes of operation. QSL via M0AEP.

VP5, TURKS & CAICOS ISLANDS. Bruce, AA5B, is now active from North Caicos. He was active as VP5K during last weekend's ARRL 160m Contest. He is also expected to be in the upcoming 10 meter contest running full power, but will be on the air during the week as VP5/AA5B. Look for him around the QRP frequencies and on the WARC bands alot. He states that he will be happy to have a 2xQRP QSO with you!

VP9, BERMUDA. Just a quick reminder! Mark, AA1AC, will be active next week (December 8-12th) from Hamilton Parish, Bermuda, as AA1AC/VP9. His activity will be on 80-10 meters CW/SSB. QSL via home callsign.

VY, CANADA. Dennis, K7BV, will operate the ARRL 10 Meter Contest from the VY1 Yukon multiplier. He will use VY1/K7BV in and outside of the contest. He will operate mostly CW from VY1JA's Whitehorse QTH. His "Warm-up" activity (literally-considering the location...) will occur in the 24 hours before the contest. QSL via Steve, KU9C.

ZD8, ASCENSION (Did not happen!). Jim, N6TJ/ZD8Z, was not active from here as expected during the CQWW CW Contest, but changed his plans and was active from Hawaii instead as KH7R.

Greetings,

When counting countries will the ARRL consider the following as seperate
entities for DXCC purposes:

1. Multiple contacts with same DX-Ham but on different bands ?

2. Multiple contacts with same country but different bands and/or Hams?

Or, as I suspect, is it only country of origin counts and counts only once ?

TIA,

KG4JBM

Correct, your first submitted contact regardless of the band with a
particular "country (DXCC entity) will count once towards the total
country count. A country may be worked on any legal ham band including
the WARC bands.

Multiple contacts with the same ham/country on different bands will
count towards a separate DXCC Band count. Band awards currently
10/40/80, although I believe 20m will soon count towards an award of some
type--
A future fair,
affair for all and
no fair for anyone.

3748. LSB sigs on low end of WARC bands

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-04 00:00:00 UTC
From: rod_pruner@yahoo.com
Message-ID: <90gtsf$h2d$1@nnrp1.deja.com>
Source record: 18784

Has anyone else noticed the LSB activity on the low end of 17meters
and 12 meters ?
I know not all countries create the same subbands as the US, but,
with all the "roger beeps" and "echo effects" I'm hearing on these
signals, they sure sound alot like that stuff everyone hears on
10 meters and below.

The ARRL implemented a 20 mtr award at the beginning of 2000 and 15 mtr
award July 1st 2000. 12 or 17 will start next January 1st.

For the basic "mixed" DXCC award, multiple contacts (different bands or
modes) only count once.

But some DXCC awards are band or mode specific. Here are some examples:

Suppose I was KG6AQI (I once was) on Guam and you worked me 5 times:

1 - 3.505 MHz CW
2 - 7.075 MHz CW
3 - 10.124 MHz CW
4 - 14.004 MHz CW
5 - 21.300 MHz SSB

Any one of the above contacts would be valid for basic "Mixed" DXCC
credit.
Any one of the first 4 contacts would be valid for "CW" DXCC credit.
The fifth contact would valid for "Phone" DXCC credit.
All five contacts would be valid for "5BDXCC" ("Five Band") credit.

Also, the above would be equally true if each of the 5 contacts was
with a different station on Guam.

30M contacts count for DXCC Mixed and CW.
There isn't a 30m band award and it's extremely unlikely that there will
be one as long as the band isn't available world-wide.

Greetings,

I've asked Santa to bring me a new watch for Christmas.
Ideally, I would want a wrist watch that could keep 2 diff. times:
say EST and UTC. Most watches will do 12/24, but keep the same
time but just display in 2 formats. What I'm looking for is for it to
keep 2 DIFFERENT times. QSL ? Any pointers to brands/models
would be most appreciated. Ideas? Santa's helper (my XYL)
needs your help.

THX,

Andrew/KG4JBM

I've been using an inexpensive Timex Expedition watch for several years that has dual timezone (and 12/24 display option). I keep one on UTC and the other on local time. Check the Timex web page. The Expedition series includes a number of different models, not all of which are dual timezone.

> just logging my CW QSO's also to track awards etc.
>
> Are there any particularly good logging programs out there?

Find 10 people, get 12 opinions.

I followed Jim's suggestion and downloaded "Logger" last week and I am
very happy with it. It has got the complete digital data mode suite
built in and best of all it's free, no strings attached. Download the
full program and try it before you spend any money.

The download is here:

http://www.itis.net/golist/download.htm

What I found paticularly attractive is the fact that you can get
immediate support for the product via a mailing list. Give it a try,
it's worth it.

3773. New Guy's QSL Question

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-06 00:00:00 UTC
From: Dennis Hessler <spypoint@mindspring.com>
Message-ID: <90ln6l$9nt$1@slb0.atl.mindspring.net>
Source record: 18666

Hi DXers,

I'm a fairly new ham (licensed about 5 months now) and been having some success working CW and PSK-31 modes. My question has to do with QSL cards.

Every time I work a new state (which is about half the time I go on the air) I send a QSL card hoping for a reply. When I started, I simply sent the card with the "pse QSL" block checked. Then one guy sent me a stamped return envelope with his card. So I started sending stamped return envelopes with all QSL cards I sent (domestic and overseas) when I initiated the QSL. One classy guy actually sent me the stamped return envelope back to me and used his own stamp so I could recycle my return envelope.

Anyway, here's my question. For domestic (I would always send return postage overseas unless using a bureau), is it proper ham-etiquette to send self-addressed stamped envelope with outgoing QSL cards?

Hi Dennis,

Yes (presuming you want a return card) you should make it
easy for the station to respond, so always include an SASE.
I *always* respond when an SASE is included, *rarely*
respond if not, and *never* respond to QSL's sent bare
"post card" style.

I wear a Seiko "Chronograph" which keeps two independent times.

Also includes a number of stopwatch features, alarm, circular slide
rule, etc.

This particular model is aimed at aviators, so shop somewhere which
caters to them.

Thanks, Hans. That's what I needed to know.

Here's another one for you. Do the "old timers" send the fancier QSL cards ("just the facts, m'am") or more ornate -- and expensive -- cards with photos, maps, etc. I have to admit, I send the plain cards but I sure like getting the nicer ones. What's your experience?

Hey all,

So far I'm doing my QSO logging in a real paper book. Not bad.

But I'd like to get into the digital modes and was also thinking of
just logging my CW QSO's also to track awards etc.

Are there any particularly good logging programs out there?

Thanks, Don KB3DMA

Take a look at LOGIC-5 (http://www.hosenose.com), not the cheapest,
but it does everything, and very well.

Do yourself a favor go to http://members.aol.com/snkdavis/page1.html and
check out Amateur Contact Log 1.6

I am not connected to this guy except I use his logging and contest software
and I love it! Here are the features as stolen from his site.

Amateur Contact Log 1.6 Primary Features:

AC Log is a user friendly general logging program for Windows. Features
include:

* Tracking of Worked All States, Worked All Counties and Worked All
Countries progress. A database of counties and countries is included. You
can also query by band, mode or power level to easily track your
accomplishments by individual and multiple criteria.
* A call book look-up feature for all U.S. hams!

To utilize the AC Log callbook look-up function, click here to download the
"AC Log ready" callbook data. This file is over 18 meg, so you may want to
start this download before you go to bed. The callbook data was last
updated in July, 2000. The next planned update is January, 2001. The "AC
Log ready" callbook data is also available on CD ROM. Check the program or
the bottom of this page for details.

If you would like to download the call data file (which is updated weekly)
directly from the FCC, follow this link (be careful, even zipped it is over
40 meg!): http://www.fcc.gov/fcc-bin/wtbdatadump.pl#amat

* A bearing and distance calculator from your QTH.

* Easily import data from my contesting software.

* Full support for Amateur Data Interchange Format (ADIF) import and export.

I tell you, this guys stuff is good and CHEAP!!!!!!!!!! $10-$15 I have used his Sweepstakes, Field Day, 10 Meter Contest, VHF/UHF contestARRL DX contest and other contest software. Good stuff and its all I use now. Imports right into AC Log. Really cool!

Please tell him KB7PKC sent you. I have bugged him twice because I lost my registration code and his wife had to look me up and send it. Pay back time for a deserving programmer.

Glenn

I think you have that just exactly backwards. Because "W4-land"
(or W1, W2, W3, W5, W6, W7, W8, W9, or W0) cards are so numerous,
only the unusual and attractive "W#-land" will be appreciated.

To see an attractive card, check out the one at

http://members.delphi.com/hansk0hb/index.html

Returns on that card approach 95%. Returns on previous
cheapie cards were in the 30% range.

Uhmm, Steve, that's really interesting. Would you care to enlighten me? How exactly would a "Net" work in CW? Last two? Net control? Good contact?

Unless, of course, a CW net in your opinion consists of a bunch of cool CW-Ops who hang out on one frequency, run QSK at high speed and have a fluent conversation. But then, I don't really see, how a clueless DX-station together with a horde of equally clueless Wannabe-DXers fits in there.

You might have a small supply of 'nice' cards sitting around on the off chance that someone would send a request for YOUR card. The sad truth is that darned near every ham in the world has cards, lots of cards, from W4 land, so more often than not, they aren't going to care much about the appearance of your card. Send them cheapies.

I respond to all, no matter if I just get a card in the mail. I would like to think that everyone who wants a card will send a SAE with return postage. I always do, but not everyone does. I also had some real nice photo cards done last time and I seem to get a better response using them. You can spend a lot or a little. I had real nice cards done in the former USSR by Octavia Company. Reasonable and they have a huge photo library to choose from. Done all the viewing and ordering online. You can find them and others at http://www.ac6v.com

Listen to the [USA] County Hunters CW Net on 14.055 usually
running anytime the band is open.

If you run most of those on 7.000 as you state, your lower sideband would be out of the band, wouldn't it?

Or, being down under, perhaps your upper sideband? :-)

Dear OM's

My friend Kurt ON4BAI worked the Lybian station 5A6QE on 80m last week, he'd like to send the qsl card direct, but no qsl information can be found.

Is there someone who can give him the direct qsl information, or is the bureau the only way?

Thanks in advance to all who replies...

73's de Franki ON4CLN

Source record: 18697

How does one use a DX cluster website? I'm a no-code Ham of 1 yr, and want to know how to find more 6-meter band openings.

3810. Embarassed to ask: But need help (Working Split)

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-09 09:42:08 UTC
From: cathexis@erols.com
Message-ID: <3a31fd54.501695250@news.erols.com>
Source record: 18692

Greetings,

I'd like a little hand-holding regarding working Split.
My rig is FT-980 and yes, I have the manual and I've read
it several times. Still having trouble making it work, though
everything else about my rig seems top notch. Guess I'm
just too thick-headed to figure it out. Duh.

If you know the rig are willing to walk me through
by ng, e-mail, or by sked-- please let me know. Tried and
failed to work split yesterday and it cost me Brazil QSO.
So help appreciated.

TIA,

Andrew
KG4JBM

Message-ID: <3a3214e9.507733227@news.erols.com>
Source record: 18694

Okay,....

I think I got it.
Tune to DX.
Push "Write 1 " to enter RX freq. to Mem.
Push "VFO" tune to transmit freq.
Push "RX M" to recall RX freq.

You can now RX on "MEM" and TX on VFO.

Pushing "RX V " reverses process.
Push "Offset Freq" to display offset.

OKAY, think I got. Big thanks to Peter
for his patient advice.

73,

Andrew/KG4JBM

3824. HAM & SCANNER SOFTWARE

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-10 05:15:21 UTC
From: SETH <seth@mbox306.swipnet.se>
Message-ID: <wiEY5.2261$r42.4435@nntpserver.swip.net>
Source record: 18561
Cross-posted to: alt.ham-radio.vhf-uhf,alt.radio.scanner,rec.radio.amateur.dx,rec.radio.scanner,rec.radio.shortwave

Hello!!

I posted a message earlier this day about a program that I have developed. The adress that I wrote was wrong so I will put the one that works in this message.

Go to: http://home.swipnet.se/27mhz/ham.zip and download it. It's freeware with no adverts or so.

I promise, you won't regret it. Many very useful things for both scanner and HAM.
Best regards, Jonas

You are wrong about me not regreting it. The damned software downloads and unzips just fine. I installed it and when executing HAMUtil.exe it dials the internet, logs on and does nothing further apparently. When I bailed out of that a picture that looks like a calculator comes up on my screen. This picture has a window in it that lists all of my passwords that are installed on my system. What do my passwords have to do with a ham utility and why do you dial up the internet and what information has that dial up down loaded and or uploaded from my computer?

Please, Jonas can you explain what the hell is going on here?

No sh*t Sherlock! Anyway, you can sometimes spot
band openings on 6 by looking at TV channels 2 or 3
for out of band TV stations. Of course you need to
be on an antenna, and not CATV!

WHAT?!?!?!
I have tested the software several times and all of my friends too and I never noticed something like that you explain. It must be some kind of virus on your computer or the server that I have uploaded the zipfile to.
I haven't coded something to steal passwords. If I wanted to do that, the file would be much smaller that the one I uploaded. That file is suposed to be full of useful utilities that I have coded.
I'm sorry, but I don't know "what the hell is going on"...
All I can say is "Delete it" and I will have to look up what's happend.

Same thing happened here, though my firewall stopped it from actually logging on. It appears to be, indeed, a password-stealing utility. Come to think of it, coming from a address that contains "swipnet" should have been a bit of a tip-off. Stay away from this one, folks!!!

Hi Andrew,

Most will return a QSL but there will be some that won't. Of course you need to provide a self-addressed envelope with return postage - either an IRC or Greenstamp (some countries like Germany, Japan and others need two dollars for the operator to buy return air postage) You can use the bureau but that is VERY SLOOOOOOW!

I have had very good luck using mint stamps of the country on my "return envelope." There are two sources: William Plum out of NJ and James Mackey in CT. Let me know if you need their address/URL/email.

I'm not a contester either but when I was starting out chasing DX they were a great way to add to your country count! Most of the major contests end at 0000Z (Sunday night here in the States). There are "contest calendars" on the Net that will give you that info; let me know if you want those URLs.

73,
Tony, WF1N

It depends on the contester whether you will get a QSL or not. Some contesters are very conscientious about QSLing because they want you to work them next time too. Others don't much care. There - that was a lot of help, wasn't it? :-)

Hi

If you want to see 6 meter spots go to my Cluster site

http://ve9wh.weblink.nbtel.net/dxclusters.html

And select one of the 95 sites listed there. If you are running Windows 95 or 98, it will automatically pop open a telnet window and connect you to the site you selected. You then have to log in to the cluster. This is done in most cases by typing your call sign and using your name as a password (Login: VE9WH Password Jim). Once you have logged in and start to see some DX spots you can see what has been spotted on 6 by typing the following

sh/dx 6

This means SHow DX for 6 meters.

Most of these sites have built in help routines and you can get them by typing Help at the command prompt.

Hope this helps

Jim VE9WH / VE9TTY

Robert, after reading your message I d/l that file, but before I ran it I took the phone off hook and sure enough it came up with the what appears to be a picture of a phone and it had my passwords in it.

The name in the top window was passjacker@warez.com IIRC, but I have removed the program. To bad we can't channel our brains for something good, I mean the guy is still a turd, but it had to take some time and smarts to come up with this program. I wonder when we will see a world wide computer hostage program. Something like what this guy is sending but send in $10.00 or $100.00 ect and we'll give you a password to allow access to your system again.

Why's he gotta be a BUM ? Where does it say on his license
that he's required by law to answer QSL cards ?

And can we also assume that you sent his cards registered
mail and have a return receipt that he signed to prove he
got them ?

I assume since you are at MindSprung, you are in the U.S.
Are you not aware of the fact that mail all over the world
is not quite as reliable as U.S. mail and that it is stolen on
a regular basis in many places ?

A DX station can answer 50,000 QSL cards and nobody
calls him a hero. But if one numbnuts (like you) doesn't
get one back, everybody can call him a bum.

Another great example of how ham radio promotes international
good will.

Most of the third world countries forbid possession of US currency. If in
doubt, don't. The person who gets in trouble is the one you sent it to.

You want to watch all spots. If the band is open in 1, 2, 3, and 4 land, it well might walk it's way into 9 land. Watch for east coast and west coast, again it could move into your 9 land. The same with north and south. And it could open for 1/2 hour into your area so you really have to keep on top of it.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 489
BID: $OPDX.489
December 11, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, NB1B, AI2Q, WB2YQH/ WB2RAJ & The 59(9) DX Report, K3BEQ, W3UR & The Daily DX, WB3JFS, K4VUD, KJ4UY, W4WX, AI5P, WA5PAE, K6IPV, K8YSE, CX6VM, DF4SA, DJ2PJ, DJ5AV & DX News Letter, DJ7ZG, F5PBL, G3XTT, IN3QBR, JF2MBF, LA4LN, PA3AXU, SM7CRW, UT5RP, UX2RY and VU2JOS for the following DX information.

1S, SEALAND. As of press time, there is NO sign of 1SL1A on the air from the "Principality of Sealnd". Operation was to begin on December 9th and last until the 12th. Also, 1SL1A was going to be active in the 10 meter contest this past weekend. Stay tuned!

9M6, EAST MALAYSIA. Don/K6IPV and Dave/W6AQ will operate from the Hillview Gardens Resort club station, 9M6AAC, a few days before the ARRL CW DX Contest in February 2001. Their orginal plans were to be active from Layang-Layang in the Spratley Islands (9M0) for the ARRL CW DX Contest (February 17-18th). However, Don, K6IPV, informs OPDX that "Murphy's Law" has struck their operation. He states, "No sooner do we firm up our arrangements and announce our trip to the Spratleys (9M0) but we find that the island has 'been closed for repairs'! It will reopen on March 1st, too late for us. We're rapidly putting together another potential side trip from Hillview Gardens Resort and 9M6AAC. We still intend to operate from there and may operate the contest from there. Further details to follow in the next few days." Stay tuned!

A5, BHUTAN. By the time you read this, Charly's, K4VUD, A52UD operation will be coming to a close (December 12th). Yani, 9M6US, has QRTed his operation as A52AP last week. Earlier in the week Charly reported on some interesting details on his trip to A5. Here is an excerpt from his E-mail message: "Arrived Thimphu Bhutan Ham Center after airplane routing problems from Frankfurt to Bangkok. Someone in India is now using my laptop computer, Heil footswitch, and many other things stolen out of my suitcases while in transit via India! So, hand logging all the way. Also, bags were delayed (to give time to really steal all the good stuff) so I had no earphones for

a while... that made pileup management even more difficult. Now, I have my Heil and squeeze key so will be a little bit better for you guys. Was sending with the buttons on the ICOM mic for a while! The Sophun Ham Center in Bhutan is GREAT... several rigs, three linears, and A-3S up 30 ft along with dipoles. Jani (A52AP) and I strung a beverage south, and put up an inverted L resonated in 160m. The WARC A-3W goes up this afternoon. The hotel is supurb with lots of beautiful finished wood and Bhutanese decoration. Food is great, too. Recommended....5 stars!" Remember to QSL A52UD to K4VUD and A52AP to N2OO.

CARIBBEAN TRIP (J6/J7). Tom, LA4LN, will be operating as J6/LA4LN (or a separate J6 callsign) from St. Lucia, December 14-28th, and as J7/LA4LN (or separate J7 callsign) from Dominica, December 28th through January 4th (2001). He states that his licence applications were filed along time ago, but licences will have to be picked upon his arrivals. Tom will be on the radio when time permits, using an Icom IC-706MkII transceiver and wire antennas. He will be equipped to operate all HF bands from 160-10 meters, plus 6 meters. Activity will mainly be on CW with some RTTY possibly. His suggested CW frequencies are: 3505, 7005, 10105, 14025, 18073, 21025, 24895, 28025 and 50105 kHz (all +/- QRM). 160 meters will be tried if the noise conditions make it possible. There will be split frequency operation when needed. Please QSL DIRECT to LA4LN's home address at: Tom V. Segalstad, P.O. Box 15 Kjelsas, N-0411 OSLO, NORWAY.

CX, URUGUAY. Jorge, CX6VM, reports that he is active Monday through Friday on 12 meters (around 24897 kHz) and on 17 meters (around 18073 kHz) between 1030-1200z and between 2130-2330z. During the weekends he will be on more on these bands. Jorge's station uses a Cushcraft R7000 vertical and 100 watts. QSL ONLY DIRECT (please) to W3HNK because he is having trouble getting cards from the bureau. W3HNK's address is: Joseph Arcure Jr., P. O. Box 73, Edgemont, PA 19028 USA

D6, COMOROS. Don, G3XTT, sent out a press release this past week and an update on the forthcoming "Five Star DXers" D68C DXpedition to the Comoros to be active about Febraury 8-28th (Complete press release will be provided to all OPDX InterNet Subscribers as an additional bulletin). In short, they state that they will be the "biggest DXpeditions of all time". Some 3000kg (3 metric tons) of equipment has been shipped and 28 operators are signed up to participate (some will be there for the whole of the period, some for part of the time). Three new members have been added to the team: Jens/DL7AKC, John/N7CQQ and Victor/UT8LL. A container of equipment was shipped on the "Julius Oldendorff" ex-Felixstowe (UK) on November 30th. It's a 20 foot container and is about three-quarters full - there is around 20 cu. meters of kit with a total weight of over 3 tons (3,000 kgs). In the container there are 10 transceivers, 9 linears, 4000 meters of coax, 1600 meters of control cable, 6000 meters of radial wire, 9 Yagi antennas, 11 masts, Four-squares for 40m and 80m, Verticals for 30m and Top Band, 64+ heavy guy stakes, 11 lap-top computers and 1 generator etc etc... Their activity will be on all bands including the WARC bands and also an entry in the ARRL CW DX Contest (February 17-18th). For more details, check the D68C Web Page which continues to be updated

with the latest news. The Web address is: http://www.dxbands.com/comoros

EA8, CANARY ISLANDS. Look for Alan, G3XAQ, to be active as EA8/G3XAQ from December 21-28th. Hie activity will be mainly on CW.

EN23, UKRAINE (Special Event). Just a reminder that on December 15th, the Ukraine Unit-III of Chernobyl Nuclear Power Plant (CNPP) will be closing. During December 14-16th a group of Ukraine operators from the town of Slavutich will activate the special callsign EN23RW. A special full colored QSL card will be available for making contacts with EN23RW. QSL direct to UX2RY: Andre Asriyanz, P.O.Box 14, Slavutich-3, Kiev obl., 07100, Ukraine, or through bureau. The log will placed on the following Web page at: http://www.radio.cn.ua

EP, IRAN. Mohsen, EP3SMH, has been very active over the last week on 15 and 20 meters. Activity seems to take place between 1230 and 1800z (with some activity as late as 2000z on 40 meters SSB working JAs). QSL via Box 17665-411, Teheran, Iran.

HB, SWITZERLAND. George, N2APB, will be spending the next week here on business, but will also be bringing along some QRP gear. He will be signing as HB/N2APB. George will be working on the QRP frequencies on 20/30/40 meters. Also, he will be bringing his portable PSK station to work 20 meters PSK. He hopes to be operating on Mon, Tues, Wed and Fri during 0200-0400z. Here is the interesting part as George states, "On Thursday, I'll be taking a train up into the Swiss Alps which will end close to the top of Eiger Mountain. (Remember movie 'The Eiger Sanction' from years ago, starring a young Clint Eastwood?) There's a restaurant up there at 11,000 feet at which most normal people have lunch and look around for a couple of hours. I, however, being of not-quite sound mind and body, will be outside in the sub-sub-zero temperatures and low-oxygen air working my Portable PSK (controller & PSK-20 in a box, no computer) with a St. Louis Vest Pocket Vertical antenna (featured in recent QRPp and QHB). The time for this should be around 1200z on Thursday. Hope to work some of you guys! (Hope I make it back down, unfrozen.)"

IOTA NEWS.....
EU-098. Look for DH3ZK to be active now through Decemebr 17th from Poel Island. DX stations please listen on 14260 and 21260 kHz, and Europe on 7095 kHz. JA stations listen between 0900-1000z on 21260 kHz.

NA-140. Look for K3RE to be active from Smith Island, Maryland (in Cheasapeake Bay). The reference number for the USIA is MD-030S. This activity will be from December 16-17th, (1700-1700z, 24 hour operation). Suggested frequencies are: 7260, 3860, 14260, 21260 and 28460 on SSB and .040 on CW. QSL to K3RE (USA stations SASE and stations outside the USA - SAE, 1 Greenstamp or appropriate number of IRCs.).

JT, MONGOLIA. Naranbaatar (Naran), JT1BV, informs OPDX that he has been active around 28475 (+/-10 kHz) at about 0100-0300z for the USA and at

about 0800-1130z for Europe. QSL via direct only to: Mr. Naranbaatar T, C.P.O Box 820, Ulaanbaatar-13, MONGOLIA (via JAPAN).

KG4, GUANTANAMO BAY. Bill, W4WX, a member of the Florida DXPedition Group, will operate from GTMO as KG4GC from December 12-18th. Bill will concentrate on RTTY and 6 meters. QSL via bureau or direct to his home callsign W4WX.

QSL INFO AND NEWS.....
Dennis, NB1B, a USPS Postmaster, reported on some more postal increases this week. He was able to verify that the cost of IRCs will go from 1.05 USD to 1.75 USD on January 7th. The 1.05 USD sounds like a bargain right now! Dennis was also able to verify that, as of that date, IRCs can be exchanged for 80 cents worth of stamps or other postal products - no cash refunds. For an airmail letter, 1 ounce to anywhere in the world will be 80 cents (except Canada and Mexico which is 60 cents).
A 2 ounce airmail letter, however, will cost as follows:
1.60 USD for Rate Group 3 which is mainly Western Europe, but not totally.
1.70 USD for Rate Group 4 which is Japan, Australia, and New Zealand.
1.55 USD for Rate Group 5 which is the rest of the world.
More details on the U.S. postal increase can also be found on the web at: http://www.usps.gov/news/2001rate.htm
The rates are at the bottom of the page.

Manu/3DA0AE and Norby/3DA0AD are the callsigns that were granted for these two to be active from Swaziland. They participated in the ARRL 10 Meter Contest this past weekend. QSL to LX1NO.

John, SM7CRW, was active in the ARRL 10 Meters Contest this past weekend from Oland Island (EU-037 for IOTA awards) as 8S7A. The Island is new for the "World Heritage List" (001112). QSL via W3HNK.

Con, DF4SA, who was active as 9H3MM in Malta during the CQWW CW Contest informs OPDX that all QSOs will be confirmed through the bureau via DF4SA. If somebody still wants to send direct, please only QSL to the following address: Cornelius Paul, Adelberger Weg 3, D-73104 Breech, Germany. QSL cards will be printed next month (January/2001).

LOG STILL OPEN! Fred, K4MPI, who operated from Taiwan as BV1US from July 1959 and June 1961, and made about 20,000 QSOs, states that folks can still request QSLs from his current CBA address.

Please take note! There is a new QSL Manager for CO8DM. QSL now via DL9US. CO8DM's former QSL Manager, DL5DSH, has become a "Silent Key" last week at the age of 37 leaving behind a family with two young children... OPDX sends out our deepest sympathy to DL5DSH's family.

Rick, AI5P, announced this past week that the AI5P/CY9 and FP/AI5P QSLs have arrived, and he is currently sending out the direct cards. All bureau cards will be answered via the bureau.

The recent operation of GJ2A during the CQWW CW Contest should be QSLed to: JARS, PO Box 338, Jersey, United Kingdom, JE4 9YG. Some sources

are stating to QSL via MJ0BJU (Anne). This is OK, but may take longer due to Anne not being on the island for the next month.

Nob, JF2MBF, informs OPDX that the ZK1NDK (Penrhyn Atoll, N. Cook Island) log is now available on-line log at:
http://www.jm1szy.com/zk1n/index.htm
He also mentions that both ZK1NDK and ZK1NJC QSLs (5 kinds of full color QSLs) will be ready very soon.

T2, TUVALU (also possibly 3D2). The "DX Newletter" reports that Albert, HB9BCK, intends to be active as T20CK from December 28 through January 8th. Activity will be on 40-10 meters on CW/SSB (perhaps RTTY/PSK31) running an IC-706 into wire antennas. Perhaps he will show up also from Fiji operating as 3D2BCK two days prior/after the T2 operation. QSL via bureau to HB9BCK or CBA (Europe: 1USD/IRC, outside EU 2USD/IRC).

V4, ST. KITTS. Larry, KJ4UY, will be operating as V47UY from December 10-18th. Using an Icom IC-756 with an R-7 and A-3, he will be active on 10 meters through 40 meters. He states that he may use a dipole for 80 meters but NO 160 meter activity on this trip. The IOTA number for St. Kitts is NA-104. QSL to his home callsign, KJ4UY, at: Larry Wolf, 3528 Oak Grove Court, Haines City, Florida 33844-9298.

VK0, MACQUARIE ISLAND. This will be the last week to work Alan, VK0MM. He will be QRT on or around December 17th. Activity lately seems to be mainly on 30 meters CW and 20 meters CW/SSB. Check these bands after 0630z and again after 1100z. NO QSL ROUTE IS AVAILABLE YET.

VP8, FALKLAND ISLANDS. Rees, VP8DCD, has been quite active recently on 15 and 20 meters. He seems to frequent 21263 and 14260 kHz after or around 2300z. There seems to be some confusion on the QSL route for this one. Most sources say QSL via G0JLE, however, Rees has been stating on the air to QSL via P.O. Box 260, MPA, Falkland Islands.

VU, INDIA (Special Callsign). Jose, VU2JOS, mentioned this past week that the "Ham Radio 2000 Millenium" meeting is to be held in Hyderabad, India, on December 22, 23 and 24th. The station, using the special callsign VU2HR2000, will be operational during that time.

WHERE TO GO NEXT? Gerard, PA3AXU, states/informs OPDX the following: After my A3, 5W, ZK1/S and ZK1/N activities, I am looking for inputs from the DX community for my next years' stop in the South Pacific. Please submit your "wishes" through my home page at:
http://www.qsl.net/pa3axu/2001.htm

XW, LAOS (Also possibly XU). Mauro, IN3QBR, informs OPDX that he and Fabry, IN3ZNR, have received amateur radio licenses from the Laotian MPTC and will be active with the callsigns XW3QBR and XW3ZNR. Mauro will travel to Vientiane on December 18th and Fabry will follow him on the 24th. They plan to be on air the afternoon of the 27th. They will operate on CW and SSB mode, and possibly RTTY. Activity will be on all HF bands including the WARC bands. They will be looking for stateside stations, and will transmit in the "general class" portion of the bands. XW3ZNR will QRT

on January 5th and XW3QBR on the 8th. They hope to have a good signal on the air, but their power is limited at only 100 watts. Antennas are a tribander and dipoles. QSL cards are sure via direct or bureau via QSL Manager IN3ZNR: Fabrizio Vedovelli, Via Gramsci, 38100 Trento, ITALY. Mauro also informs us that he will travel to Phnom Pen after his Laos operation and will stay for four days. He states that he holds the XU7AAZ callsign, and it is possible that he will be on the air January 10th or 11th. More details are forthcoming about the first few days of the new year.

Am I wasting my time on the radio this weekend?
If I QSO with a contester can I expect a QSL?
Obviously, I'm very new and haven't done and
contests and don't intend to start today. Ending
time/date for contest?

Andrew

I have a TH22E for sale or if anyone can get me 2 handheld cb radios for it
I would be pleased. They should at least be at 4W
The TH22E is fully functional and looks like new. Almost never used it.
The reason for selling is that I already have 3 TH22E's and I realy dont
need more.. =)
If your'e interested, please send me an email

I would like to buy a relatively inexpensive (less than $200) radio to tune around on listening to shortwave transmissions. I don't even know enough to know what I need yet (do I want SSB, for instance?) but would like to pick up something to start learning on.
I have some old AM/FM/SW tube radios that will pick up the Coordinated Universal Time stations, but don't seem to pull in much else. I think I want something with a digital readout.
Any ideas, folks??

Thanks!!

I am limited in the hobbies I can do now because of my age and heart problems. Years ago I was a Radioman on a Tincan during the Korean War. I would love to listen to foreign countries on the Shortwave bands, The other day I picked up an old Hallicrafters SX-99 Receiver and speaker. I replaced the power cord which was rat eaten, and replaced the connection from speaker to receiver which was missing. Then I plugged it in with great anticipation. Unfortunately I did not get a peep. It lights up, but no sound. What do I do now? I dont have a lot of money as I am a Senior Citizen on fixed income.
All Suggestions will be greatly appreciated.

Here they are:

William J. Plum
12 Glenn Rd.
Flemington, NJ 08822-3322

Send Bill a note and he will mail you his "package" of stamp prices, how he accepts payments, etc. He does not have a presence on the Net. I REALLY recommend his European Air Mail "Cover (send out to the DX)" and "Return (the envelope with your address)" Envelopes. The return envelope fits in the "Cover" without folding and also puts another layer of paper over your greenstamps(s) to hide them.

JAMES E. MACKEY, K3FN
PO BOX 270569
WEST HARTFORD, CT 06127-0569

Jim has a presence on the Net at:
http://www.net1plus.com/users/ryoung/index.htm

Once you establish an account with him you can email your stamp orders (no minimum) and pay by check once you've gotten them. Very convenient. He also has the Euro Air Mail Envelopes but they are much more expensive than Bill's.

Hope this helps.

73,
Tony, WF1N

As great an example as your scathing rebutal. I think less of you for ripping the previous author apart than him for using the term "bum" in passing.

I wish everybody would take things a bit less seriously. Maybe the hobby would be better off in the long run.

Wesley,

I'd say, try the simple and obvious things to try to fix it first.
Have you tested all the tubes? It is hard to find tube testers
and places that sell tubes these days, so you might have to
call around a bit to TV repair shops and the like to find one
that has a tester they'll let you use.

You might be very lucky and
just need to replace a few tubes, which ought not be all that
expensive. Depends a lot on whether someone in the past
"re-capped" the receiver with new capacitors, in which case
you might just be in luck, up and running with very little
cost or effort.

Beyond this, keep in mind that there are seriously LETHAL voltages
inside that case. And not just when its plugged in. Even after being
unplugged, the voltages may drop to a safe level for quite some time.
Take it from me (once shocked with 360 volts due to worn test
probe insulation), it's not worth taking careless chances with.

Your "old timer" TV/Radio repairguy might be willing to quote you
a price for re-capping, fixing, and aligning the whole affair. If it were
me, I'd
be looking for the oldest guy in the place to ask, because he will be
the expert on tube repair, and may even have worked on an SX99 before!

Keep in mind that
you can buy a very respectable high-quality SW receiver new for under $200,
so you probably want to keep your expenses below that unless this
radio has special significance to you, or you have cats.

(Cats love tube radios.) :)

Actually, I'm of the belief the original asker had the right idea about cluster -- to use it as an adjunct, letting him know that 6 meters is open. I know I use it that way frequently. Not to find a specific station to work, but to get a general idea of what others are hearing & working. For a newcomer, it can be a way to get a very general idea of propagation relatively quickly.

You can't let that be your *only* source of info though. Especially when you're working 6 meters. Sometimes, you just have to turn on the rig and tune around. (and don't forget to explore the world between 45 and 50MHz. Especially 48.25+/-20KHz where European/African TV video carriers can occasionally be heard.)

Tired of all the complaining going on. Not getting dx news?? Why not try the hamband-dxer relector. While at our web page if you are looking for a ham address or qsl info check out one of many resources on our page. If you don't find it on our web page it is probably not on the net. Looking for a ham's email address. We have them too. Check out all this and more at www.qsl.net/swlham 73's Mike's Amateur Radio Page.

You know, I had a funny feeling about this one so I did scan the zip file with Norton 2001 AV with the latest updates--and it didn't find anything wrong. It might have been wiser--hindsight--to scan the whole computer after the thing was unzipped and installed before I double-clicked on the .exe file. Next time....

But, I uninstalled that puppy right away, ran a full virus scan, then took a peek in the registry to see if anything suspicious was left. It looks like the Windows uninstall got rid of it Ok....

3866. QUESTION: Can shortened radials be effective?

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-13 03:10:15 UTC
From: jason_hsu@my-deja.com
Message-ID: <916pak$l2k$1@nnrp1.deja.com>
Source record: 18702
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx

How small can a ground plane or radial system be and still be modestly effective in providing the "missing" half of a vertical monopole antenna? Has anyone here had experience with this? I am considering buying a Texas Bugcatcher or MFJ-1621, and I cannot bite the bullet until I can resolve this sticking point.

My questions:
1. How can a Texas Bugcatcher antenna be effective at 80m as a MOBILE antenna when 1/4 of a wavelength is 65 feet? Only semis are this LONG. Even the giant station wagons and land yachts of the early 1970s are barely 20 feet long (7.6% of 80m). NO vehicle is even close to being this wide.
2. How can a mobile antenna be effective if it is not mounted in the middle of the roof or trunk? Doesn't this mean that the antenna has less of a ground plane to work with?
3. Can I provide a ground plane with a few sheets of metal or wire screens? Has anyone tried this with a vertical antenna?
4. If inductive/capacitive loading, special coils, or helicity can allow vertical antennas to retain their efficiency at shorter heights (albeit at the expense of bandwidth), can these same techniques apply for radials as well?
5. How can people work 160m when even 1/4 of a wavelength is 130 feet? I know better than to think I can work 160m, but this would give me clues on how to work 10m-40m.
6. How can a tripod work as a radial system or ground plane for an Outbacker antenna? Isn't the tripod much too short?

Some signs of hope:
1. I read in the ARRL books _Vertical Antenna Classics_ (page 104-107) and _The ARRL Antenna Book_ that respectable performance can be achieved with radials as short as 1/16 of a wavelength. On the 40m band, this is barely 8 feet.
2. I read in _The ARRL Antenna Book_ (page 6-26) that some hams have reported good results when using helical radials. This would make HF operating possible for indoor antennas.

NOTE 1: My ability to operate HF from a crummy QTH (ground floor apartment with NO bushes or trees available to hide anything) is at stake.

NOTE 2: The future of ham radio is also at stake. If I can operate 10m, 12m, 15m, 17m, 20m, 30m, and 40m in the face of my bad QTH, I can easily recruit and even elmer new hams.

NOTE 3: No, I don't expect to win contests, bust pile-ups, or earn my
WAS with lightning speed.

> antenna when 1/4 of a wavelength is 65 feet?

The vehicle and the antenna become an antenna system. The antenna coil
makes the antenna appear longer than it really is. The vehicle is a
fat element. The antenna system is somewhat off-center fed.

> 2. How can a mobile antenna be effective if it is not mounted in the
> middle of the roof or trunk?

Consider a dipole with one leg parallel to the ground. The leg parallel
to the ground is the vehicle. On the higher bands considerable gain
can be had in one direction with a bumper mounted mobile antenna. A
normal vehicle is about 1/4WL on 17m. A rear bumper mounted 17m mobile
antenna exhibits some gain toward the front of the vehicle.

> 3. Can I provide a ground plane with a few sheets of metal or wire
> screens? Has anyone tried this with a vertical antenna?

Bury an old vehicle? Seriously, whatever ground plane you come up
with will be improved by at least one resonant counterpoise. When
camping, I sometimes attach a resonant counterpoise to my pickup.

> 4. If inductive/capacitive loading, special coils, or helicity can
> allow vertical antennas to retain their efficiency at shorter heights
> (albeit at the expense of bandwidth), can these same techniques apply
> for radials as well?

The answer is yes but loading does NOT retain efficiency. Shortened
antennas are simply less efficient than full size antennas.

> 5. How can people work 160m when even 1/4 of a wavelength is 130 feet?

The longer the wavelength the less the efficiency of a mobile antenna.
A 160m mobile antenna may be less than 1% efficient while a 10m mobile
antenna may be 75% efficient.

> 6. How can a tripod work as a radial system or ground plane for an
> Outbacker antenna? Isn't the tripod much too short?

Yes it is and it doesn't work worth a darn especially on the lower bands.

This is especially true of buried radials.

Your car body has a significant capacitance to ground, which becomes part of the antenna system. Trust me, it works great. Your problems if any, will be with the whip part, not the ground part. Just put up a well built, resonant, impedance matched whip and you'll get out amazingly well. Even lousy, lossy antennas work out hundreds and thousands of miles. Try it, you'll like it!

The relatively enormous capacity between a vehicle frame and body
couples the ground return of a mobile antenna to actual earth ground,
and there is where the antenna return current is collected. At lower HF
frequencies, the vehicle (even a large motor home) provides little of
the radial structure ("ground plane"). At 10 meters a large vehicle can
be effective as a ground plane by itself, although there is still the
large vehicle/earth capacitiance in place with even lower reactance than
at lower frequencies.

I feel that this frequently overlooked aspect of mobile antenna
operation answers a lot of questions.

Do you seriously think apartment dwellers can try this? Do you know
anyone who tried this at an apartment?

yes, if elevated. If buried, there is no need to do this. One trick I've been trying lately on 160 is to use radials that don't touch the earth but are supported off the ground a couple of feet. I have two full size 160 radials layed out in this manner in addition to my other grounding.Also a few shorter radials. Seems to do ok for the small amount I have out. I'm also tied into everything else grounded around here. Even a chain link fence on the side of the yard. I'm using two antennas on 160 now, a Z dipole, and an inverted L. I was on last night, and as is usual close in my dipole almost always wins. But if a far off guy comes in this can change fast. A guy in Wichita KS came on last night while I was talking to a guy about 80 miles east of here. Of course to him, the dipole better, as is straight up and back down, but the guy in KS gave my inv L about a 6-8 db advantage. He was far enough that the increased lower angles that you get from the L come into play. The dipole is horrible at low angles. So even though in theory the dipole is more efficient than my L, it doesn't always matter. It matters more what angle you need and what the antenna does at that certain angle. This is why many times a mobile can do real well on the low bands, even if low efficiency. What it does do is where you want it. Or at night anyway. This same factor is why a mobile is so lousy at high angle stuff in the early evenings. It's not radiating at the angle you want for that time of day.
> 5. How can people work 160m when even 1/4 of a wavelength is 130 feet?
> I know better than to think I can work 160m, but this would give me
> clues on how to work 10m-40m.

You would be surprised. I work quite a few 160 mobiles from time to time. I worked one the other night that was driving thru KY, TN etc. I think he was running about 300 watts if I remember right. He was doing quite well. Actually, better than some home stations with crummy antennas. Sure the efficiency is ultra low, but it will still work quite well. The angle of radiation from those antennas is just about what you want for 160m, so they work ok. MK

Yeah, ME. Pizza cake. I can't bury anything because the macadam driveway goes right to the brick wall outside my window. So I drilled 1/4 inch holes in the mortar between the bricks and ran a 100ft counterpoise six inches above the macadam via little plastic anchors and screws. I also wander around the parking lot with a very lethal 65 Lb. pull compound bow shooting wire into trees at will. Got a Larson 2m gain vertical bolted to an upper level balcony. There are two "tricks": (1) All conductors, hardware and cables are small and rendered flat black (2) Understanding that people, particularly apartment dwellers don't have a clue about wires or compound bows plus they could care less about what goes on outside. Which leads to the bottom line: Balls makes things happen, paranoia does not.

That's right. The vehicle itself doesn't "like" to radiate except as
it contributes a bit to height of the antenna.

It really isn't much like a bent dipole at all, since most of the
current flow down towards the earth.

Small counterpoises (ever cars and trucks) never really make an
efficient ground system (except where the vehicle is large compared to
the wavelength), but as was pointed out you can work amazing distances
with very poor efficiency.

If you have a small counterpoise, the system is ALWAYS more efficient
mounted up away from earth as far as possible. The closer to earth
with a small counterpoise, the more loss the system will have.

Larger systems are non-critical to height, They can be buried,
elevated, or whatever you like and efficiency will remain high.

Not so with electricall small counterpoises, they need to be up and
away from earth and other lossy media.

I didn't do it in an apartment but I did it in a college dorm.
I used #26 wire and it was virtually invisible a half inch
below the surface.

3877. Expanded Prefix List

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-13 18:52:59 UTC
From: AC6V <ac6v@ix.netcom.com>
Message-ID: <3A37C58A.F90ADB72@ix.netcom.com>
Source record: 18713

Just finished updating and expanding a massive Prefix List at URL:
http://www.ac6v.com/prefixes.html
This includes:
ITU Block Assignments, ITU Zones, CQ Zones
Details (where known) of call districts
like:
..... CO1 Pinar del Rio
..... CO2 La Habana City
..... CO3 La Habana Provincia
..... CO4 Isla de la Juventud
..... CO5 Matanzas
..... CO6 Cienfuegos, Sancti Spiritu, Villa Clara
..... CO7 Camaguey, Ciego de Avila
..... CO8 Granma, Guantanamo, Holguin, Santiago de
Cuba, Las Tunas
..... CO0 Club and Event Stations
Japanese Districts and Prefectures
And many other details gathered from DX Reflectors and numerous other
sources over 20 years.
I starting alphabet soup lists when I was the NCDXC News Letter Editor
in the early 80's.

Details such as club station calls, foreign operators, VHF license
calls, license class calls are given where known.
Puzzling prefixes (to some) like 9B, AT, PK, etc are covered.
My version of "primary" and "secondary" prefixes are given, e.g.,
Australia "primary VK" "secondary AX"
It is a big file (300K) so give it some time to load.

All comments, corrections, additions are welcome, however flames will
be extinguished.

Thanks to Paul, PY3DX for the latest addition.

Jason, when you live in serverely antenna-limited circumstances you
gotta think outside the box. You might find that a "portable" or
"temporary" antenna system
will work best for you-one that you take out and set up before you use
it, and take down for storage when your operating session is done. This
means coming up with something simple, easy to assemble and disassemble.
Ther are a lot of people in your circumstances and therefore there is
a lot of work that has already been done in this area. You don't need to
try to reinvent the wheel, and don't expect to be able to install an
optimal antenna system. Expect to use a compromise simply because that
will be what is demanded of the situation. Searching among the
literature will procduce a workable antenna that will do reasonably well
and give you much operating satisfaction.
Ths StLouis Vertical is a multiband antenna that has gained in
popularity among hams for limited antenna quarters as well as portable
use. It's easy and quick to set up and take down, and you can use short
wires laid temporarily on the ground for the counterpoise. There is no
requirement to use 1/4 length radials, at all, for very effective
operation if not most optimam efficiency.
Wben travelling or camping, for stationary use, I use a 60 ft length
of wire, tuned with an autotuner designed for that use, attached
temporarily to whatever support I can find, never more than 10 feet off
the ground, and the counterpoise I usually use is a 40 ft length of
copper magnet wire about 22 guage, just laid on the ground. It works
well enough on 40 meters and up that I haven't looked for any better
solution. And I have used it effectivly on 75 meters.
Don't be misled into thinking that you have to follow strict antenna
engineering principles just to be able to get an effective HF station on
the air. Agan, you've got to think outside the box and use what works
for you in your situation.
You will find that consumer device RFI will almost certainly be a
problem with any antenna located inside or very near a residence, if
you're running any power level above 20-30 wttrs or so depending on your
exact circumstances. And liviing in a multiunit residential apartment,
you'll have to tolerate the TV horizontal scan frequency harmonics that

appear every 15,750 across every one of the lower frequency bands. ANy antenna system near a residence gets that. I moved ll my antennas to a tower 150 feet from the house and I now have NO RFI and NO TV QRM.

Effective means that the thing does what it is intended to do -
it doesn't indicate how well it does that thing. So when you
ask "how can a ... be effective", you're asking, essentially,
how can you make contacts with a small antenna. You are
not asking about efficiency. Lets say, for the sake of argument,
that a 100% efficient antenna radiates 100% of the power
your transmitter provides - no losses. Let's further say that your
shortened antenna is so bad that it radiates only 1 percent of
the power the transmitter provides - 99 percent is lost.
Well, if your transmitter provides 100 watts, 1 watt is radiated.
QRP stations regularly have plenty of QSOs at less than a
watt. So that's how your antenna can be effective: in spite
of however crummy it is, it radiates *some* signal.

Now, in terms of electronics, how can your antenna be
effective. In order for it to do what it is intended to do,
it must be able to accept power from the transmitter
so that it can radiate it. To do that (accept power) it
must be a conductor (plastic and rubber do NOT make
good antennas!) All of the rest of it goes to the efficiency -
and that's the really interesting part. The other replies
have gone into that a bit where they mention capacitance,
for example. Essentially, your antenna is a tuned circuit.
Lets keep it simple: assume a 50 ohm transmitter and 50 ohm
coax. You want the maximum amount of power to transfer
from your transmitter to your antenna - that occurs when
impedances match. So - to get impedances to match you
design the antenna to have purely resistive 50 ohms impedance.
You do that by, among other things, introducing sufficient
capacitance to cancel out the inductance (or vice-versa)
at the design frequency. And that brings about discussions
of capacitance and inductance. Remember, this stuff goes
to the efficiency (how well it works) not the effectiveness
(whether it works at all) of the antenna. Any old hunk
of conductor will radiate if you feed it a signal. How well
it radiates is a function of its efficiency. I believe that
your question really implies efficiency.
By the way - all of the above applies in the reverse - to receiving
as well as to transmitting.

You'e gotten some good answers (as usual) from the
gurus, and there is a lot more they can tell you. With
antennas, it can be very important to closely define what
it is you are interested in - there are many interdependant

variables. I think their answers went to what you wanted
to know - they understood what your question implied.
Just be aware that when you discuss antennas it is quite
possible to get an answer that goes to precisely what
you asked rather than to what you really wanted to
know - or vice versa!

Absolutely. Over the years I've become absolutely convinced that there is a
very rapidly diminishing return on investement associated with big "fully
engineered" antennas. I'm constantly amazed at what can be accomplished with
a bit of wire. My days of big towers and beams are long behind me, another
s-unit just ain't worth the work and aggravation.

OK Now a question..
If my vertical, in this case a Hustler 6BTV, mounted on the side of the house, work if the radials are buried a short distance away from the antenna?

How would I connect them to the antenna!
Should I just forget about it?

What is Pizza Cake?

Sure they'll work. You might get a bit of a skewed pattern but so what?
Hams use all sorts of schemes that they find in their surroundings for
antenna systems, metal fences, small diameter wires hidden in the grass,
cracks between grass and sidwalk, you get the drift. Just run a wire
from the radial wire feed to the antenna and hook it to the coax shield
at the vertical feedpoint. Of course that wire will also be a part of
the radial system but it WILL work.

You'd be amazed at how many hams in past years have just driven a
ground rod at the spot where the vertical antenna was mounted, and
hooked to it for the counterpoise. In fact many vendors have asserted
that was all that was needed, and in fact it usually worked very well,
if you base that evaluation on contacts made on the air.
Your unusual radial system is certain to work better than a ground rod
alone.

3887. AR Cluster help?

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-14 19:09:16 UTC
From: w2upX@mindspring.com
Message-ID: <3a391a3a.990268@news.mindspring.com>
Source record: 18723

During part of the CQWW CW test I telnetted into a node using
ARCluster. I tried setting some filters to filter out SSB and 6m
spots, but it didn't work.
Can anyone give me the exact syntax to do this? Also, are the filters
kept on file if you log off, or do they need to be re-entered each
session?
Thanks,
Barry W2UP

I really want to do some listening, but I cannot afford the station type receivers.However some of the portable, digitals that Radio Shack and others have are within my reach $99 to $250. Would I be able to get very many of the overseas stations with these? What do you use that you would recommend? Anybody got anything decent for sale used?
Thanks a lot... wrfort@sprynet.com
I am studying for the Technician license and realize that I will probably have to upgrade later for something to go with a xmitter.

I probably have the details wrong, but -- it seems that a gang of 70-year-old WW II vets are sailing a restored WW II LST from somewhere in Europe to the States and I've picked up a rumor that they have an amateur station on board.

Anyone know anything about this?

Thanks.

There are lots of great FREEWARE logging programs for
Windows available. Why spend money??

Here is a brief list:

1. LUXLOG by LX1NO (32 bit) -- see
http://www.qsl.net/lx1no/llog_win.html

2. WINLOG32 by G0CUZ (32 bit) -- see http://www.winlog.co.uk/

3. SuperWinLog (16 bit) by G0CUZ - see http://www.winlog.co.uk/

4. XMLOG, see http://www.xmlog.com

5. LOGGER, see http://www.itis.net/golist
NOTE -- Logger does NOT have ADIF export capability!!

6. ACLOG by N3FJP -- http://members.aol.com/snkdavis/page1.html

7. DXLOG -- http://www.qsl.net/dxlog/

For a great QSL label program (that imports ADIF files), check out BV
Label -- see http://www.qsl.net/df3cb/

If you are really interested in GREAT CONTEST logging programs, try the
following FREEWARE programs:

1. N3FJP's Contest logging programs --
http://members.aol.com/snkdavis/page1.html

2. GENLOG -- (not really free but the shareware is FULLY functional) --
http://www.qsl.net/w3km/gen_log.htm

3. CTJ for Commonwealth and IOTA contests --
http://www.g4zvj.demon.co.uk/ctj.htm

More on postal rates for DXers: The cost of an international Reply Coupon (IRC) will increase from $1.05 to $1.75 on January 7. A one-ounce letter sent via air mail to anywhere in the world (except Canada and Mexico) will cost 80 cents. A two-ounce air mail letter will cost anywhere from $1.55 to $1.70, depending on where it's going. The complete rate schedule is available on the USPS Web site, http://www.usps.gov/news/2001rate.htm

(Thanks to the ARRL Letter)

Now a question. Since the current coupons are an "exchange for 1 unit of airmail postage", are the ones I already have still that - or do they get demoted to "$1.05 worth of airmail postage"?

I suspect the latter, however, I do not expect to find any "A stamps" (US lingo for a stamp to makeup the difference following a rate increase) to augment my current IRCs. I know... I COULD just send 3 of 'em.

thoughts?

If you redeem an IRC now, you get 60 cents - the price of airmail
postage. WHen rates go up 1/1/01, you will get 80 cents (the new
airmail rate) for any IRC redeemed. It doesn't matter when the IRC was
issued.

3914. WHY & HOW use of SPLIT Q?

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-16 17:20:37 UTC
From: ham_guy@webtv.net
Message-ID: <23599-3A3BA465-41@storefull-137.iap.bryant.webtv.net>
Source record: 18749

I'd like an answer to a very basic question here: (I understand that due to politics and regulations it isn't always possible for hams from other countries to establish a QSO on a common Q)

Is that the only reason for splitting the Q? It seems that it would use twice the bandwidth to do this and should be avoided unless there was no other way, for the reason listed above.

Secondly, HOW is this done? I've never been in an operator's shack when he was on the air and for the life of me, I can't imagine how you could monitor your transmitted signal if your were listening on some other Q.

How could you even set up such a QSO? If you transmitted on a different Q, how would you know if anyone answered? How would he know what Q to transmit back to you on?

I have been interested in ham radio since 1959 but can't pass the code test and this is one thing that has always baffled me, every time I see a radio ad that says it has RIT. I figure you DX guys must know all about this. Thanks, JJ

There was a statement that you will be able to get 80 cents worth of
postal goods and services, not 80 cents cash.

One of the old ones and one of the new ones will, in general, be worth
the same amount at redemption. The new rate makes green stamps more
attractive, as far as I can tell, and the dollar is strong right now,
which is even better.

Actually, mostly wheeled or tracked equipment.

>
> Are these the units commonly shown in movies about D-Day?
>

I think you're mostly refering to landing craft, not LST's, but they
are shown in many amphibious assult movies. They are ship sized, and
they all went wherever on their own bottoms. Apparently they roll ike
pigs, but aside from that are quite seaworthy. Keep in mind that 20
foot sailboats have transited all the worlds oceans, and it's only
fuel capacity that keeps power boats a little more restricted.

I agree. Even now, green stamps are a better deal in many countries
which require more than one IRC for return postage, using the loophole
of "minimum return rate," but not necessarily the rate for where it
needs to go.

Try the link below and you are telnetting into CLX.
type sh/filters and then set/filter + the numbers you like to filter out.
set/nofilter and number gives the spot back again.

With sh/filter you get you setting and they are kept till you changed
them.

By Q you presumably mean frequency. You can find descriptions of why and how to operate split at:
http://www.guam.net/pub/midxa/nl/nl_apr98.html (from the DX station's point of view), and
http://www.qsl.net/k3wwp/dx_ss_working.html (from the point of view of the stations in the pileup).
I found both of these links at http://www.ac6v.com, a great resource for all kinds of information on amateur radio. Thanks, Rod!

A great resource, Jim. And for Maidenhead grid locator codes, try
http://www.arrl.org/locate/files/gridloc.zip, which contains a BASIC program
to convert between grid locator and latitude/longitude.

I've read that this is Chuck, N4BQW, who will be on Bouvet as part of a scientific expedition for the next 4 months and will be operating quite a lot on all bands. Not all antennas are up yet. Operation will be principally SSB and initially on 20 and 15m.

So, relax, we've got lots of time to work him!

NEWS FLASH OF THE WEEK.....
3Y0C, BOUVET ISLAND (2000 brings one more rare entity!). A press release from Mac, WA4FFW, informs OPDX of the following: "Chuck, N4BQW, of Palmyra and Kingman Reef fame, will begin a 4 month operation from Bouvet Island. Operations will commence on Saturday, December 16th at 2000z on 14.195 MHz. Chuck has been a granted license with the callsign 3Y0C. This callsign was issued some years ago but was never activated according to officials, therefore, it was reissued to Chuck for this operation. Chuck arrived on Bouvet on December 11th aboard the 'MV Polarstern'. Landing was with the aid of a helicopter. Chuck is part of a scientific team consisting of 4 Norwegian Scientists and himself. He is the only Ham operator. He will be involved in conducting some experiments; however he will have plenty of time to operate. Joe, N4OL, the Operations Equipment Manager, states Chuck will be running an ICOM 756 Pro and an ICOM PW-1 solid state linear. He has vertical antennas for 160-40 meters and will use beams on 30-10 meters. They are not all in place at this time but should be up in a week to 10 days as weather and work permits. Pilot station, Gene, WJ4T, states that Chuck will have a generator for approximately 12 hours a day and will use large banks of batteries when the generator is not available. Gene reports that Chuck will have some other responsibilities on the Island but will have plenty of time to operate. Gene also reports that the temperature is 0 degrees C with winds at 50 MPH. He also reported there have already been winds in excess of 70 MPH since the team landed. Therefore antenna erection has been and will continue to be difficult. WA4FFW is the QSL manager for the operation. Mac asks that no cards be sent until an address is posted sometime in early January 2001. There

will be no computer logs. Logs will not be in hand until after Chuck's return to the U.S. sometime in April." Chuck has been quite active over the past weekend on 14195 and 21298 kHz. Bruce, WD4NGB, states for 3Y0C propagation, check the Web page: http://www.qsl.net/wd4ngb/3y0.htm

3B6, AGALEGA. Han, HB9BXE, (from a press release by HB9CRV) states: "The supplementary work caused to the postponement of our expedition has now been completed. All the expedition material except those items which have been returned to suppliers are stored safely at Basle. We can now concentrate our efforts again on the preparations for the May 2001 expedition." The 3B6RF crew for next year's DXpedition has a few changes. For business reasons their financial manager Joe, HB9AJW, has had to cancel his participation and Cedric Baechler, HB9HFN, was added. The crew now consists of: HB9BQI, HB9BQW, HB9BXE, HB9CRV, HB9HFN, HB9JAI, HB9JBI, 3B8CF, 9A4TU, CT1AGF, DL3KUD, DL6UAA, F6HMJ, G3KHZ and NK6F. The crew is still looking for a good CW operator. The scheduled operation is to take place on May 5th for 14 days. OPDX InterNet Subscribers will receive the latest press release as an additional bulletin. Watch their web site for updates at: http://www.agalega2000.ch

4S, SRI LANKA. Ananda, 4S7NB, located in Colombo was active over the weekend on 20 meters around 14180 kHz between 0100 and 0230z. Meanwhile, Nelson, 4S7NE, near Colombo, has been active on 30 meters (10108 kHz) between 2300 and 0030z.

4U, UNITED NATIONS HQ. 4U1UN made a surprise appearance on the air Friday and Saturday. Operator was Mohammed and was active on 3793 kHz after 0000z.

A4, OMAN. Sadiq, A41KJ, was heard this past weekend on 21241 kHz around 1145z. QSL via N5FTR.

A9, BAHRAIN. Gus, K4SXT, active as A92ZE, has been very active on 160 and 40 meters. Check around 1832 and 7003 between 0130 and 0400z. QSL via: Capt. Julius Gostel Jr., PSC 451, Box 1198, FPO AE 09834, USA.

ANTARCTICA RECORD? Nobert, OE1SNW/MM, is cruising with a sailboat around the Antarctica Continent which will take about 100 Days. He is trying to set a one man record for his class of boat. He is also active on Ham Radio on 14313 kHz (reportedly around 1600z). More details and information about his daily position can be found on the Web site: http://www.icelimit.at This Web page is very interesting with photos and details on Nobert and his yacht "Oase III". Also, SSTV pictures of his trip can be found on the Web page: http://www.icom.at

ET, ETHIOPIA. Claudio, ET3VSC, was active on 80, 40 and 12 meters this past week. Check around 7030 and 3788 kHz between 1500 and 1530z and 24967 kHz after 1300z.

HZ, SAUDI ARABIA. HZ1AB was heard this past week on 12 and 10 meters. Check 28460 kHz around 1215z and between 24960 and 24970 kHz from 1330 to 1430z. There was also a QSN from Europe stating that HZ1AB was on 3508 kHz at 1544z. QSL via K8PYD.

IOTA/LIGHTHOUSE OPERATION. Pete, MM5PSL, will be operating from the Sumburgh Head Lighthouse on the Shetland Islands (EU-012) during the "Amateur Radio Light House Society" (ARLHS) sponsored Christmas Lights operation from December 18th until January 2nd. The ARLHS number is SCO-232. The following information has been received from Pete: "The following are times broadly available and I will be on the air as much as possible but obviously can't operate all the time.
December 18th - 1800-1900z
December 19th - 2200z through to 0900z December 20th
December 20th - 2200z through to 0900z December 21st
December 22nd - 1000z until 1300z
December 23rd - 2200z through to 0900z December 24th
December 27th, 28th, and 29th - 1200z until 2200z
December 31st - 0900z until 2000z
January 1st - as and when I can??
Janaury 2nd - most of the day till close of play."
The 20 meters will be his primary band, and he will be on or near the usual lighthouse frequency, 14270 kHz. Pete's QSL Manager for the operation will be longtime IOTA and lighthouse chaser WA7OBH: Lee Graves, 4341 SE Satinleaf Place, Stuart, FL 34997 USA.

IOTA NEWS.....
OC-135. Steve, P29BI, will be active from Bougainville Island in his spare time for the next 2 months. Activity will be on 20 meters SSB only. QSL via VK4EJ.

PIRATE ALERT. A station signing 4W1CW on 12 meters at 1034z was active saying QSL via N7RO. This is SLIM. "The Daily DX" also reported that Dick, N7RO, knows nothing about this guy.

QSL INFO AND NEWS.....
CORRECTION. There is a correction to a Web page URL address in last week's bulletin. Nob's, JF2MBF, ZK1NDK (Penrhyn Atoll, N. Cook Island) log is now available on-line log at: http://www.jm1szy.com/zk1n/index.html (The "l" was left off on html.)

Doug, N6RT, reports that the log for A52XX is now available online at: http://dx.qsl.net/logs

Hans, DL1YFF, reports that QSL cards for the 7P8AA operation has arrived, and Fritz, DL7VRO, is now answering them. Direct cards will be answered directly, the rest via bureau. Any questions can be sent to Fritz via his E-mail address: dl7vro@qsl.net

The "OZ 50 MHz DX Bulletin" reports that the E4/JM1LJS Palestine QSLs have been accepted for DXCC. Hide, JM1LJS, reports that his 6m operation was also recognized by the DXCC.

Pepe, EA5KB, reports that he is the QSL Manager for the following stations: TG9AMD, TG9AAK, CO3JR, CO2FN and CM2FN.

Nigel, G3TXF, reports that he is now waiting for the J3G cards to come from the printers. There should be a mailing soon after Christmas.

Tom, K1KI, was the operator of J38DX, and he is also the QSL Manager. He reports that it might take a few weeks until he gets the cards printed for J38DX. Tom states, "If you don't mind waiting longer I will QSL 100% via the bureau as well." For direct requests, send to: Tom Frenaye, K1KI, P O Box 386, West Suffield CT 06093

Brian, KF2HC, reports that the operators from the FS/W2JJ operation would like to thank everyone who worked them between December 5-12th and during the 10m contest. They had a great time putting FS into your logs. It was especially rewarding when someone thanked them for "a new one". Brian states, "We didn't get the 160m antenna up until Sunday afternoon but we did manage to operate 160m a few hours Sunday and Monday evenings. The only 6m activity we heard was from South America and a few other Caribbean islands. Mike worked 37 grid squares on 6m during our stay. We made special efforts to work 12m and 17m and we hope we gave a lot of you a new one for those bands. Several hams reported the address we were giving for W2JJ (a club call) differed from what a certain call book CD showed. The correct address for W2JJ is: P.O. Box 244, Allamuchy, NJ 07820, USA. If you choose to QSL direct please keep in mind the US postal rates are going up in January 2001. Via the bureau is OK, too. On behalf of the entire FS/W2JJ team and our families Have a Healthy and Happy Holiday Season!"

Caser, PY2YP, reports that the PS0S logs on-line now show the status of your QSL card. Stop by to see if your QSL has reached the PS0S QSL Manager at: http://www.cwsp.org.br/srchps0s.html

QSL SM2T via SM2EZT. Torvald, SM2EZT, states that he uses SM2T in contests. The Swedish contest callsigns are "2x1". To see the offical Swedish contest callsigns, check the Web page at:
http://www.sk3bg.se/contest/speccall.htm
By the way, Torvald states that if you hear him as SM2EZT in a contest, then it is EazyTest (EZ T)....HiHi.

Doug, ZP6CW, informs OPDX that his wife, ZP6CU, is acting as his QSL Manager (Box 73, Caacupe, Paraguay). She is also the QSL Manager for Ross, CN2UN, and his operation from Western Sahara as S07UN. She now has the 1980's logs of the 9L1GG operation of about 10,000 contacts and will honor any requests for Greg's operation there. She will also act as the Manager for the current operation of ZP6GG.

S2, BANGLADESH. Junji, JA7KXD, will operate S21YT again from December 27th, 1800z to January 2nd, 1759z. Details on his activity were not mentioned. QSL via Junji Ogawa, 2-3-51, Kimachidori, Aoba-ku, Sendai-city 980-0801, JAPAN.

S2, BANGLADESH. Carl, SM6CPY, has delayed his trip here which was going to take place during December and January. The delay is due to the local flooding. He now hopes to be active as S21YD during February 12-19th.

S7, SEYCHELLES. David, OK1DTP, will active on CW/SSB with callsign S79OK now through December 26th. He will visit the islands of Mahe and Praslin, IOTA AF-024. He will use an IC-706 MKII (100w) and 40m delta loop. QSL

via OK1TD.

SPECIAL EVENT. Frank, N5VT, reports that he will be active as a special event station to celebrate the "Battle of New Orleans" from January 1-10th (2001). Activity will be on CW/SSB/RTTY and PSK31 with operations on 80/40/30/20/17/15/12/10/6 meters. A special award is available if you work him on 80-10 meters. QSL via N5VT w/SASE.

SY, MOUNT ATHOS. Monk Apollo, SV2ASP, continues to be active as SY2A until the end of the year. He has been keeping people happy on 20/12/10 meters. Watch around 14205, 24963 and 28456 kHz between 1330 and 1530z. QSL ONLY direct to SV2ASP.

T8, PALAU. Look for Hiro/JK1FNN and his XYL Mie/7L1MKM to be active from here as T88HA and T88MY from December 30th through January 3rd. Activity will be on 80-10 meters CW/SSB. QSLs via JK1FNN.

V31, BELIZE. "The 59(9) DX Report" reports that Gisela/DK9GG and Gerd/DJ4KW will be active as V31GW from January 9th through February 20th. Activity will be on all bands including 160 and 80 meters. Klaus, DJ4SO will join them on January 16th thru February 20th. QSL via DJ4KW.

VK0MM QRT. Alan, VK0MM, is permanently QRT from Macquarie Island as of 1330z December 16th. Alan states, " Thanks to everyone for all the QSOs and E-mails over the thirteen months... it's been great fun. All proceeds from the VK0MM QSL process will be donated to Camp Quality, an Australian charity that provides care for children with cancer and other terminal illnesses; please dig deep when you mail your QSLs. The QSL address will be announced in January on: http://www.geocities.com/vk0ld/qslinfoX.html

XV & XU, VIETNAM AND CAMBODIA (Change of plans!). Rodger, N4ZC, informs OPDX that Mauro, IN3QBR, reported to him the following changes from the OPDX.489 bulletin. Mauro states that there is no flight from Phnom Pen to Vientiane until December 24th. So, Mauro will be on the air now as XV7AAZ from December 20-23rd while waiting for the flight. Rodger adds that Mauro will be visiting him in February. He plans to take Mauro to the Carolina DX Association's meeting and the Orlando hamfest during that month. Rodger states that he will have all logs and cards for XW3QBR, XW3ZNR and XV7AAZ to hand out at the hamfest. Normal QSLing is via IN3ZNR, but those going to the Orlando hamfest can save postage and IRCs if they wish to get their cards there. Mauro will be at Rodger's "ARRL W4QSL Bureau" booth space all day Saturday, February 10th.

ZC4, UK SOV. BASE AREAS ON CYPRUS. Steve, ZC4BS (also G4KIV ZD8SB N5ZFR), reports that the ZC4 club station should be up and running as ZC4ESB (Eastern Sovereign Base). The station will be operated by Steve/ZC4BS, Des/ZC4DW and Graham/ZC4GK. They will be active for the next 3 years, and hopefully a little longer on all bands 160-6 meters and on all modes. Des and Steve are also keen contesters and will be participating in most contests.

ZK1, SOUTH COOK ISLANDS (Also 3D2). Look for Dan, N6PEQ, to be active a few days from Fiji signing 3D2CQ until December 20th before moving onto

South Cook. Once there he will signi ZK1PEQ between December 20th through January 6th. He plans to travel to Raratonga and Aitutaki using a FT-847, dipole and vertical on 80-10 meters (and possibly 6 meters). QSL via N6PEQ. For more details, check Dan's Web site at: http://www.dxer.com/n6peq

ZS6, SOUTH AFRICA. Rudi, ZS6DX, who has been active in the CQWW CW and the ARRL 10 Meter Contest as well as general DXing, reports that he will be more active over the next few weeks on 17 and 12 meters. QSL via: R. Venter, 11 Bushbuck Lane, Monument Park, Pretoria, 0181, South Africa.

3928. LZ0A...?????

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-18 00:36:13 UTC
From: Steve Hanson <ke1lg@qsilver.net>
Message-ID: <91jm7f$8a4$1@ruby.mint.net>
Source record: 18513

I am missing something here. I passed up a chance to work LZ0A because
I didn't need Bulgaria. However, there is a HUGE pile-up on 14.195-all
after LZ0A. Can someone explain what I missed???

Many thanks.
ke1lg Ke1lg@qsilver.net

It's a confusing callsign! The station is actually located on the South Shetland Islands, south of the southern tip of Chile. This counts for a separate DXCC entity; hence, the pileup.

Thanks Rick-tried to respond direct, but post was returned. I had
Buckmaster on the PC even as lz0a was calling CQ-their site made no mention
of the separate entity-wish I had known!

Many thanks
ke1lg

3931. New logging software project...

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-18 12:06:55 UTC
From: 9A5K <kreso@kreso.com>
Message-ID: <91kuqi$e55h$1@as121.tel.hr>
Source record: 18516

Hi everybody...

I am starting new logging software project here..
It would be written for Windows platform...No DOS, sorry..

But first of all, I want to get some informations from
ham community what you want to see in it....
Any ideas or suggestions are welcome...
Also looking for software testers and distributors...

Please answer directly to me on: logging@kreso.com
Thanks for any answer on this post.

I will answer on each mail..

73's de Chris - 9A5K, KD7JWH!

Thanks for the correction.

There is also YPLOG. It works great. But if you want aome of the advanced features like contesting you must register the program.

See YPLOG at http://www.nucleus.com/~field/
Or at www.qsl.net/ve6yp

Hi Derek

the only legal station in 5A is Abubaker 5A1A at the moment,
others are illegal.

Source record: 18524

I have a spare MFJ 1270C that I used only briefly for PacketCluster operation. Mint condition, with wall-wart and PC cable, and cable for rig connection. All you need is a 2 meter xcvr. $75

Floyd,
I had a lot of difficulty getting a card from Abubaker. I finally
succeeded with a direct card via registered mail with US$2 enclosed for
return postage. I received the card from him with a German postmark.
I truly believe that he's not receiving them unless they are sent
registered. It was the most expensive card I've ever sent! He even sent a
followup e-mail asking me if I had received it.

Regards,

Rich Eckman

I am looking for a circuit on the web, for a simple, cheap and easy to build aircraft band reciever. I am trying to learn to build my own radio gear and I thought this would be a good start for VHF stuff. I am looking for one that could be made to be portable.

David

Hi Rich:
I did the same as you, but followed up with an email to Abubaker. No
response to the email and still no card. But it was only sent 5/30/00.
Wish me luck!

Good ground, different power circuit for rig and computer, get an LCD monitor (had the first one, but when I did the last two it gave very satisfactory results).

first of all find the noise source
mainly it's the monitor (switch it off ....what happens with the noise)
disconnect all the cables of the computer only power left.

At best it is a crap shoot. If you didn't send it via registered mail, well kiss it goodbye. Try sending 2-3 green stamps with your card, registered, receipt requested. You might or might not get something. Frankly, I never did by this method, but others report good results. I have my one card via a third party card handler a few years ago which I display with pride. Though I have made other contacts on other bands, to me it just isn't worth the fight to get the cards. If this is your first for 5A, good luck and good DXing.

Depends on how you define interesting!
Amateur radio in fact all DXing started in the VLF region.
DX ala 20m type opertions is rare but VLF & LF are consistent day-in
day-out.
Most experimentation in these bands is QRP. < 1W and electrically small
antennae.
Go to the ANARC site (HTTP://www.anarc.org) and click on the LWCA page
for starters.

It just depends on what floats your boat.

I am mainly interested in utilities and stuff like numbers stations. I haven't got an amateur liscense yet, so I would be limited to dxing. Do aircraft or marine services work on these bands?

Also is there a simple design for a VLF and LF radio. I have seen a few, but they are preamps and other things, but no direct things saying this is how you build the radio.

Source record: 18451

Stefan

Being a new ham (licenced November 2000), I am currently facing the same problem: a sore throat from repeating always my cq+callsign, forced me to think of a voice keyer. Comes in handy with contests, too.

My personal opinion is that commercial solutions (i.e. buying a voice keyer "off the shelf"), is too expensive for what it is. On the other hand, software solutions will always require some minimal interfacing to your TRX (PTT, muting of you mike while the voicekeyer is on air...).

Nevertheless, a nice homebrew design (NOT mine) can be found here:
http://www.qsl.net/dg5dbz/cqpap_eng.html

After I dealt with some more urgent problems (remote antennaswitcher and more antennas under construction), I am planning on making a software voicekeyer myself.

Ingredients:
* simple Windows-program written in VisualBasic plays pre-recorder WAV-files on the soundcard of the PC, which is brought to the mic-input of the TRX (maybe 600 to 1k ohm audio transfo 1:1 to separate PC from TRX => no polution in audio)
* some relays to activate PTT and mute MIC
* buttons to select message (the WAV-files)

All this is glued together through the parallel port of the PC; this scans the buttons and controls the relays.

This can be build for less than 10US$ if you have some sort of junkbox or a cheap supplier. I haven't build one YET, but the plan is riping in my head.

So Stefan, pick up the glove and step into the arena: build one yourself!!! Homebrew rules!!!

****
All comments from readers are welcome too; maybe I can adapt the design before starting to build.
****

Seasons greetings, good luck and 73's de ON4CLN - Franki

Stefan

Being a new ham (licenced November 2000), I am currently facing the same problem: a sore throat from repeating always my cq+callsign, forced me to think of a voice keyer. Comes in handy with contests, too.

My personal opinion is that commercial solutions (i.e. buying a voice keyer "off the shelf"), is too expensive for what it is. On the other hand, software solutions will always require some minimal interfacing to your TRX (PTT, muting of you mike while the voicekeyer is on air...).

Nevertheless, a nice homebrew design (NOT mine) can be found here:
http://www.qsl.net/dg5dbz/cqpap_eng.html

After I dealt with some more urgent problems (remote antennaswitcher and more antennas under construction), I am planning on making a software voicekeyer myself.

Ingredients:
* simple Windows-program written in VisualBasic plays pre-recorder WAV-files on the soundcard of the PC, which is brought to the mic-input of the TRX (maybe 600 to 1k ohm audio transfo 1:1 to separate PC from TRX => no polution in audio)
* some relays to activate PTT and mute MIC
* buttons to select message (the WAV-files)

All this is glued together through the parallel port of the PC; this scans the buttons and controls the relays.

This can be build for less than 10US$ if you have some sort of junkbox or a cheap supplier. I haven't build one YET, but the plan is riping in my head.

So Stefan, pick up the glove and step into the arena: build one yourself!!! Homebrew rules!!!

****
All comments from readers are welcome too; maybe I can adapt the design before starting to build.
****

Seasons greetings, good luck and 73's de ON4CLN - Franki

Rob

I intended to make it freeware. It would be robbery to charge money for such a simple program; also if you choose to commercialise it, you have to give support and have responsebilities towards your customers.

My only problem is T.I.M.E. Like I said: first my antennaswitcher and antennas, because without antennas there's no need to call CQ! Anyway, I'd like to have it up 'n running for the UBA DX contest, last weekend of January 2001. I'll keep you guys up-to-date...

Damark Warning

On 12/24/00 I received my monthly credit card statement. I noticed an unauthorized charge for $109.99 from Damark, a nationally known catalog retailer. Because they sell radios, electronics and high tech things, I thought that a warning to my friends here would be appropriate. The problem, I haven't had any contact with this company in over THREE years. I called the telephone number 1-800-597-1001 and, after playing with the automatic response system, I finally got through to an operator. I asked what this charge was, as I didn't remember ordering anything from them. A customer representative named Paula advised that it was a membership charge. I immediately told her I didn't authorize it and didn't want it. She agreed to credit my card for $103.99. I advised her that my charge was $109.99. She said the $6.00 was for shipping and handling. Shipping and handling of what? She said she would have their Consumer Department send me the forms for the $6.00 portion of the refund. The representative then asked to confirm my name and mailing address. This company had my old business address, I retired nearly two years ago, and the company's name instead of mine. Obviously, contrary to their "we tape everything message", they couldn't have verified anything for me, as 1. I don't work for the institution they billed, 2. they billed me personally and 3. they didn't even know my name. The state's Attorney General has recently filed charges against AT&T for fraudulent billing in a similar manner, so am sure they won't hesitate to go after these people. I feel sorry for those people who don't check over they monthly statements. A quick check on the Internet led me to a web site put up by an irate "customer." Their site had the exact same story as mine from 2 years ago, so this practice has been going on for a while. So be wise to Damark and to your monthly bills, as other companies have employed these same misguided tactics. With the holiday upon us stay sharp and be a wise consumer

Pete

There are more dollars in circulation in Cuba than pesos. It's now ok to use them in the open. At one time, it was purely illegal.

I also had a bad experience with Damark. We ordered something and paid for it in full when the bill came, not using their high interest payment plans.

Well about 3 years later we received a "late payment" notice. I call them and this is what they told me:

That I had bought this under their payment plan. That they had been deducting the "monthy payments" from the amount I sent them. Now with 3 years of interest accured on the purchase I owed them $$ (I forget the number).

Of course, I simply told them that I would not be paying them another cent and they could take me to court if they wanted to. They quickly decided to drop the whole thing.

I will never deal with them again.

I hope you resolve your problem also.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W1DAD, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, WA4FFW, N4AA & QRZ DX, K5LBU, N5VT, K8YSE, N9AG, CE6TBN, CU3AN, DF2SS, DJ5AV & DX News Letter, DL3APO, G4FRE, IN3QBR, PA3EPG, PS7AB, VK4EJ and The ARRL Newsletter for the following DX information.

SPECIAL EDITOR'S NOTE: WOW! Where did this year go? Anyway, my family (wife/OPDX's chief proof-reader Linda, Teddy [TJ], Katie) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy Holiday and Season's Greetings". Also, we would like thank the many who have contributed information over the year (there are too many to list). REMEMBER, without them there would not be an OPDX Bulletin. I would also thank the many who sent holiday greetings. I tried to answer some and wished I could answer each one of them individually, but it would take a huge amount of time. You would not believe the amount of E-mail I receive..... 73 and Have a Great Holiday de Tedd KB8NW

JUST A REMINDER! This will be the last week for qualifing to achieve the "DXCC Millennium Award" certificate by working 100 different DXCC entities on the ARRL DXCC List. This award is available for ARRL members and non-ARRL members. NO QSLs are required for this award. Details and "DXCC Millennium Award Application" can be found on the ARRL Web page: http://www.arrl.org

3D2/ZK1 ACTIVITY POSTPONED. Last week we mentioned that Dan, N6PEQ, would be active between December 20th and January 6th from Fiji and the South Cook Islands. However, several sources report now that Dan has postponed his operation and hopes to make the trip in the spring or summer of 2001.

3Y0, BOUVET. Astronaut Chuck Brady, N4BQW, continues to be active daily during various times mainly on 20/15/10 meters. His suggested frequencies are: 3795, 7095, 14195 (Rx split 14200-14210), 21295 (Rx split 21300-21310) and 28495 kHz (Rx split 28500-28510). Also mentioned were 1.8 MHz

and 50 MHz which will become operational later and only by pre-arrangement with 3Y0C. His activity has been mainly SSB, but when asked about CW he replied that it will also be covered later. Currently, Chuck is running 700 watts into a G5RV antenna. He has Yagi beams, but these will be installed later. His pilot station is Dennis Wells, ZS1AU. QSL via WA4FFW. Also, watch the following Web page for updates: http://www.qsl.net/zr1dq

4U, UNITED NATIONS HQ. The station 4U1UN was once again active this past weekend. This time the operator was Fritz, DL4TT, and he was active 80/30/20 meters.

5X, UGANDA. Graham, 5X1GS, was active on 28370 kHz between 1030 and 1300z listening split. QSL via WB2YQH.

7Q, MALAWI. Kaz, 7Q7KZ, has been active on 21290 and 28450 kHz. Check after 1200z and again after 1800z. QSL via JA2LZF.

9M6, EASTERN MALAYSIA. Peter, PB4CC, is expected to be active from Sarawak as 9M8CC now through Janaury 6th. His activity is to be sporadic on 20, 15, 10 and 6 meters. QSL via PB4CC: Peter F. Borsboom, De Kroon 10, NL-3181MD Rozenburg-ZH, The Netherlands. For updates, check his Web site at: http://www.qsl.net/pb4cc

A5, BHUTAN. Glenn/W0GJ and his son Mark/N0MJ of the 2000 A52A DXpedition will once again be on the air. This time they will use their own personal callsign A52GJ and A52MJ. Activity will be between December 29th and the early part of February.

C5, THE GAMBIA. Reports state that Mike/DL2OE and Hans/DL7CM will be active February 20th through March 5th as C56/homecall. Activity will be on 160-6 meters CW, SSB and RTTY, using only 150 watts. QSL via their respective homecall.

DU, PHILIPPINES. "The 59(9) DX Report" reports that Sam, LA5FHA, will be active as DU1/LA5FHA until January 20th. Activity will be on all bands CW and SSB. QSL via LA5FHA.

DX EDITOR RETIRES. Michael, DJ5AV, of the "DX Newsletter" reports that he is finished being the editor of this DX bulletin after four years of work. He states that he would like to spend more time with his family, with travelling and with DXing. OPDX would like to wish Michael the best and thank him for his past input to the OPDX bulletin and DX community. There was no mention if anyone at DARC would pickup the editor's position.

FO & FO0/M, FRENCH POLYNESIA AND MARQUESAS. Look for Wulf/DL1AWI, Mat/ DL5XU, Peter/DL3APO and his wife Birgit/DG0OBN to operate from Rangiroa (OC-066) in the Tuamotu Archipelago group from January 27th through February 10th. Peter informs OPDX that he will celebrate his birthday there! After this activity, only Wulf and Mat will go to Nuku Hiva, Marquesas (OC-027), and be active from February 11-28th. They will be active on 160-10 meters CW, SSB and some RTTY, also probably SSTV. Peter states that in their baggage are 2 FT-890, 1-kW-PA, vertical, wire and TITANEX LP 5 antenna. The callsigns are unsure, but they hope to use

Wulf's, FO0AWI, and/or Mat's, FO0XUU, callsign from their 1999 operation or CEPT license FO(0)/homecall. Logs will be available after their activity at the following Web page: http://www.radioklub.de/cgcg
QSL the Rangiroa operation via the bureau or direct to DL3APO: Peter Kohde, Wurgwitzer Str. 36, 01187 Dresden, GERMANY. QSL the Marquesas operation via the bureau or direct to DL1AWI: Wolfgang Ziegler, Arno-Schlothauer-Str. 15, 99842 Ruhla, GERMANY

IOTA NEWS.....
OC-135. Steve, VK8AM/VK4EMS, is now operating from Bougainville Island as P29BI in his very limited spare time. He will be active on all bands (except 160m) CW/SSB until the end of January. He was spotted on 14010 and 7005 kHz after/around 0945z. QSL to VK4EJ: Bernie McIvor, 30 Brennan Parade, Strathpine QLD 4500, AUSTRALIA.

JD, MINAMI TORISHIMA. Katsumi, JD1BCK, has been keeping the folks happy on 15 meters SSB after 2330z. QSL via JM1TUK.

JY, JORDAN. Ali, JY4NE, has been active on 10 meters between 28400 and 28420 kHz between 1230 and 1530z. He then moves to 20 meters after 2300z. QSL via KB6NAN.

MILLENNIUM ACTIVITY. Look for "Millennium" station EI2000 to operate over the holidays. The station will be activated by the Emerald Isle Contest and DX Group (EI9I) on Christmas Day, December 25th, and New Year's Eve, December 31st. Operations will take place in the western part of Ireland on HF, CW, SSB and PSK31. This special callsign was assigned by Irish authorities to mark the Year 2000. QSL via the bureau.

MW2, WALES. David/WW2R, RJ/GW5NF and Tim/G4VXE will be active as MW2I on RTTY during the ARRL RTTY Contest, January 6-7th. All QSLs go to WW2R.

NEW OFFICERS. The SouthWest Ohio DX Association (SWDXA) is pleased to announce the officers for 2001:
President-for-life: Bob Eslaire, W9UI
Vice President: Rick Burdick, K8WWA
Secretary: Don DuBon, N6JRL
Treasurer: Steve Bolia. N8BJQ
They will be announcing the particulars for the 2001 Dayton DX Dinner soon.

OD, LEBANON. Puzant, OD5NH, in Beirut has been active on 75/17/12/10 meters during the past week. Check 10 and 12 meters on SSB between 1530 and 1730z. Check 18145 kHz after 1730z. He was heard on 3799 kHz around 0045z. QSL via: Puzant Azirian, P.O. Box 80903, Beirut, Lebanon. OD5NJ was also active. He was 28515 for about an hour between 1430 and 1530z.

P5, NORTH KOREA. The much anticipated operation which was going to take place next week (Janaury 7th) may not happen. "The Daily DX" reported the following this week: "The much-anticipated multi-national North Korean operation, which was announced in mid October, which was first scheduled for late October then early January 2001, has been scrapped. The North Korean Organization for Army support is now refusing the use of any

transmitting equipment during the Official Opening of the Educational center, which was scheduled to take place on January 7, 2001. Obviously this is a disappointment to the organizers of P5UK and the DX community."

QSL INFO AND NEWS.....
Once again your editor (KB8NW) must repeat that I am NOT or have ever been the QSL Manager for 5R8O. Same databases continue to have me listed as manager. Please correct. The QSL Manager for 5R8O is via 5R8FL, Box 5005, Tananarive, Madagascar.

Ben, PA3EPG, reports that he is now the new QSL Manager for 4K9C (Boris). Boris operates CW most of the time. Ben states that he has the logs from October 30, 2000 and later. If you needed 4K9C confirmed after that date please send the QSL card to him. He is also QSL Manager for 4K5CW. His address is: Ben van Leeuwen, Zwolseweg 57, 8181 AC Heerde, The Netherlands.

Gabriel, CU3AN, states that after January 1, 2001, he will accept ONLY direct QSLs. The reason given, "THE BUREAU IS VERY COSTLY" and the Azores do not have a bureau. The bureau for the Azores is via Portugal/Lisbon.

Abdollah Sadjadian, EP2FM, informs OPDX that he has received many reports via E-mails that many QSL cards over the last 3 years sent to him have failed to arrive. He states that he always sends out replies the same day he receives a card direct. So, if you have not received your QSL Abdollah wants to know via E-mail at: as@neda.net

Ronaldo, PS7AB, reports that the Brazilian amateur radio addresses search engine is available at: http://www.cwsp.org.br/callsrch.htm
The database is updated by the users and it intends to be as trustful as possible.

QSL information for TI9JJP is via TI2JJP: Jose Pastora, P.O Box 2048-2050, Costa Rica, America Central.

SPECIAL EVENT. Special event station K1D will be active now through January 6th to celebrate Kid's Day (January 6th) and Amateur Radio Awareness. Look activity on 28400, 21310, 14270 and 7230 kHz. The operators will be Peter/ W1DAD and Jeanne/K1MOM Schipelliti, 7 Dearborn Ridge Rd, Atkinson, NH 03811, USA.

SPECIAL EVENT (Update). Last week we mentioned that Frank, N5VT, would be active as a special event station to celebrate the "Battle of New Orleans" during January 1-10th (2001). He informs OPDX that the callsign to be used will be N5T. QSL via N5VT w/SASE. (Please refer to OPDX.490)

SU, EGYPT. Frosty, K5LBU (aka 9J2CF/9L1CF/3DA0CF/etc...), reports that he will be going to Cairo to visit with Andre, ZS6WPX, who is trying to get a SU9 callsign. If he does not get the SU callsign, he will operate from SU1ER as a guest operator. Andre will be here until July.

T8, PALAU. "QRZ DX" reports that Koji, JK7TKE, should be active this week as T88TU from Belau (OC-009) between December 27-31st. Activity will be on 80-6 meters. QSL to JK7TKE, via the JARL bureau or direct to: Koji Fukui,

1840-5, Izumi-cho, Tokorozawa-city, Saitama 359-1112, Japan.

V4, ST. KITTS AND NEVIS. Volkmar, DF2SS, will be active as V47SS now through January 6th. Activity will be on 160-10 meters, plus 6 meters. He was spotted this past weekend on 3505 kHz at 0215z, 7008 kHz after 0230z, 18075 kHz around 1930z, 14009 kHz at 0355z and 10106 kHz after 2315z and again after 0400z. He states that he will be looking for JA stations beginning 2130z on 14008 kHz. QSL via DL2MDZ, via DARC bureau or CBA (ok in the latest CB CD only): Rainer Kuehnberger, DL2MDZ, Hofer Str. 54, D-95233 Helmbrechts, Germnay.

VK9/C, COCOS KEELING ISLANDS. A few sources reports that Ed, AA4EH, is expected to spend a few days here as VK9CEH. Activity will last until December 30th, mostly on CW on 160-10 meters. Check the lower bands during his sunrise/sunset. QSL via AA4EH.

XV/3W, VIETNAM. There is plenty of activity from here. Shim, XV3AA, has been active on 15 meters SSB. Check around 21220 and 21270 kHz after 0000z. QSL via JA6UGH. Tom, 3W7CW, has been active on 40/30/20/15 meters CW between 1500 and 1630z. QSL via SP5JTF. Also, look for 3W6LI on 20 and 10 meters SSB. Check 14185 kHz around 2200z and 28448 kHz after 0900z. QSL via IK2DUW.

XW, LAOS. Mauro, IN3QBR, informs OPDX that by the time you read this he will have left Shianoukville (were he was active as XU7AAZ) and arrive in Vientiane, Laos. He states that he should be active on the air during the afternoon of December 27th as XW3QBR.

Lots of new prefix info at URL:
http://www.ac6v.com/prefixes.html
Includes many old/changed prefixes such as KG6T - Tinian Now KH0,
KX6 - Marshall Is Now V7,
VP2K Saint Kitts, Nevis now V4

In addition the page now includes links to several on-line maps
Three CQ Zone Maps
ITU Maps, Zones and Regions
Prefix maps for the world, Africa, Asia, Americas, Europe, Oceans,
Indian, Oceania, Antarctic
Grid Square maps of the world.

Also updated is districts of countries where known such as:
HCA-HDZ Ecuador
HC, HD Ecuador (ITU Zone 12 CQ Zone 10)
HC1 Carchi, Imbabura, Pichincha
HC2 Guyas, Los Rios
HC3 Loja, El Oro, Zamora Chinchipe
HC4 Esmeraldas, Manabi
HC5 Azuay, Canar, Morona Santiago
HC6 Bolivar, Chimborazo, Cotopaxi, Tungurahua
HC7 Napo, Pastaza, Sucumbios

Additions, corrections welcome, flames will be extinguished.

Happy Holidays all.

3985. Re: Damark

Newsgroup: rec.radio.amateur.dx
Date: 2000-12-25 03:04:59 UTC
From: Jim <aa5f@hiwaay.net>
Message-ID: <3A46B95B.36254AC1@hiwaay.net>
Source record: 18471

I had exactly the same problem with Damark a couple of years back. When I called them about it, the sales rep agreed to reverse the charge to my credit card, but did it for a lower amount. I called the credit card issuer, cancelled the charge, and had them issue a new card with a new number. Last I heard, the credit card issuer had assigned the case to a fraud investigator.

Damark is a company to avoid. Also, now I'm more careful about who gets my credit card number.

From: ZL1TM <achat@ihug.co.nz>
Message-ID: <3a480813$1@zfree.co.nz>
Source record: 18477

Hi there,

Worked with T30AC on 28 MHz at 23:54 UTC on the 25th of December 2000. He called me and was about 1.3 KHz down my freq. Gave his name as Ata and QTH as 1 degree North, 173 degrees East, South of Tarawa Island. Didn't answer the question about the QSL route. I haven't found him with any DX search engine. The beam seemed to be in the right direction. I wonder if he is a pirate or some local ham (definitely not a DX-pedition). And, if he is for real, what is his QSL info?

Cheers
Andrei

From AC6V's Calling frequency list:
80/75 METERS

3.500-3.525 CW DX & DXpedition Window
3.505 DXpeditions CW are frequently here
3580.15 PSK-31 (offset -115 for USB)
3.590 RTTY DX
3.640-3.650 SSB (some Europeans will transmit here and listen above
3800kHz)
3.690-3.700 SSB (some Europeans will transmit here and listen above
3.800)
3.71 QRP Novice/Tech CW Calling Freq
3.790-3.800 SSB DX & DXpedition Window
3.799 DXpeditions SSB are frequently here
DX may transmit below 3750 KHz and listen above 3800 KHz.
3.730~3.740 SSTV Operating Frequency -- IARU Region 1
3.845 SSTV Operating Frequency USA/Canada
3.885 AM Calling Frequency

>And noticed a Canadian district I don't recognize -- VY0 Nunavut
>(Northwest Territories?)

Rod:

Nunavut is Canada's newest Territory. It is composed of land that had formed the eastern part of the Northwest Territories (VE8).

On 1 April 1999, the Northwest Territories were divided, creating two new territories: Nunavut and a truncated Northwest Territories. Amateurs in Nunavut changed their call signs from VE8xx to VY&#65533;xx on that date. Amateurs in the remaining NWT kept their VE8 calls.

Most of Nunavut is in CQ Zone 2, as are all but three of Nunavut's 20-odd Amateurs. The westernmost part on Nunavut lies in Zone 1. Akimiski Island and other islands in James Bay are part of Nunavut, but are in Zone 4.

Now, all of the Northwest Territories are in Zone 1.

Here are two maps of Nunavut:

http://cti.ccm.nrcan.gc.ca/visualization/introduction/picture_map.html

http://parkscanada.pch.gc.ca/parks/Nunavut/common/map_ter_his_pks_e.html

Note that all the islands in Hudson, James and Ungava Bays are part of Nunavut, no matter how close they may be to the shorelines of Manitoba, Ontario or Quebec.

As for ITU Zones, Nunavut lies in Zones 2, 3, 4 and 75. (see http://www.arrl.org/contests/announcements/ituzones.gif)

Yipe! What happened there? I was going to post this, but then realised it
was already asked. I think I must have pressed the wrong keyboard shortcut.
Sorry.....

David

P.S. By the way, are the frequencies that I saw listed in this group on USB,
LSB or AM?

Source record: 18492

Most likely because the US Gov't, I think the Dept of Fish and Wildlife,
will not allow any access to the island anymore. Partially due to the
wildlife and partially due to (urban legend) the island being a major
transport location for SA drug runners and therefore a potential danger.

Anyway, at this writing, there have been over 18 attempts to have an
operation there in the past several years and all have been refused

In article <3sg26.7$sA2.1837@read2.inet.fi>, xxx@yyy.fi says...

Yep. The island has just been declared a UN wildlife natural resort (or
something like that). However, I have recently watched a documentarsy on
the island and there is a group of scientists who do have a permit to
land and stay on the island for research. If a ham radio operator
approached this group, chances of becoming part of the team might be
good and an operation on a limited scale may become reality very soon.

Just take a look at Bouvet right now; same thing.

Been a scanner scanner and a shortwave listener for years. Really
love pulling in the distant ones. Going get my license soon and I think
I'm ready to talk back. Can anyone recommend a good, inexpensive
(base,used,under $250) radio for dxing and shortwave? Can you get 1Mhz
tuning increment or a VFO for that price?
Going to post rec.radio.amateur.antenna for advice on antennas but
if anyone has any suggestions...
Thankx, Mark

Hi all,

If anyones after accessory plugs, bits and pieces for PRM80 series radios, pop me an email.
ezyt@optushome.com.au
Worked for a Large Simoco Distributor (ex distributors) as a senior radio tech. (cant stand another look @ a prm80 series apart from the 8041's. Excellent radios)

Have a stack of simoco mics, microphones, accessory plugs, few other things like remote brackets etc etc etc. Basically all brand new in plastic/boxes. Sorry no radios. Sold them all. Just stuff thats sitting in the garage doing nothing,, so if anyones interested in purchasing anything , just email and shouldnt be a problem posting stuff or just come pick up.

Regards,

Ezat

Noise can come from the power supply/computer and the monitor. Some monitors can be extremely noisy and one resolution and quite at another.

First, make sure everything, radios, computer, monitor, etc. are well grounded.

Turn off the monitor only and see if there is a change. If so, try changing resolutions.

Take a hunk of coax with a couple of inches of center conductor exposed and use it with your radio as a "sniffer" to see if you can find an especially noisy cable/power cord.

Put several ferrite chokes on any cable/power cord that appears to be noisy.

Jim Pennino

4017. ARRL Acceptance Of Internet QSL?

***Good question Rex. I know the DXCC Desk will not ACCEPT QSLs
ELECTRONICALLY. However, if you have a QSL card that was downloaded
from the DX station; contains all of the appropriate data including
verification and you mail it to the ARRL or have it checked by a local
QSL card checker, it may very well be acceptable. As I read the present
rules:
"photocopies and electronically transmitted confirmations (including,
but not limited to fax, telex and telegram) are not currently
acceptable for DXCC purposes. Staff may accept electronic confirmations
when procedures to do so are adopted".

As I understand it, you have an actual QSL card that was taken off
the internet from the DX station or his manager. The above rules
seems to apply to electronically SENDING the data to the DXCC Desk.

I would get a reading on this from the DXCC Desk: dxcc@arrl.org but
make it clear that you have the card, albeit taken off the Internet,
but DO NOT INTEND to electronically send it to them; that it would
be mailed or checked by a card checker.

Be interested in what they say.

I read this differently. It seems to say that they may be accepted when procedures are in place. They are not, at present. I understand that the league is working on such procedures that would ensure some sort of authentication of the electronic cards. I doubt that any current system, like eqsl.cc would, would ever be acceptable in its current form.

It's certainly worth checking with the dxcc desk on this, but I'd be surprised if anything has changed recently with respect to electronic cards, whether physically or electronically submitted to the ARRL or a field checker.

The issue is not sending them to the League electronically. Due to the ease of modifying the image/information content, electronic QSLs are not considered to be valid confirmations by HQ. They currently have a study that has been directed by the Board to evaluate the potential of a secure (i.e. unalterable) electronic QSL system. They do not expect to have that study completed until, I believe, the 2nd half of the new year.

With tody's technology for watermarking and other digital tamper revealing techniques, I have been personally encouraging the League to adopt some form of acceptable e-QSLs. I do not believe they have been getting much pressure to do this. So, if you're interested, let them and your director hear from you. Tony N2SS

There was a time, as I recall, when one could obtain DXCC credit from logs submitted by the DX stations for contests. (Maybe one still can, but I have not heard anything about it for a long time. (I guess that I should make it clear that although I have been ham since '52, I have never submitted anything toward DXCC. Therefor my opinion may be suspect by some.))

I seems to me that e-QSLs would have to use a similar method in order to satisfy everyone that control was maintained. i.e. the logs would have to be submitted by the DX station by some method that was deemed secure and verifiable and requests for credit would have to check out against those logs. This would likely mean standardized formats (Cabrillo?) and electronic data processing. I can't believe that pretty cards printed out on one's own printer will ever be seen as valid unless some really big, universal and secure breakthrough in authentication procedures occurs.

Hi Tony,
Happy holidays to you and the family... Some good points there and you highlight what could be accomplished under today's high tech environment.
Using the proper software and printer card, a QSL could be down-loaded from the QSL manager's or DX station's data base and I doubt if anyone could tell the difference from a standard stock card. Please recognize that Im only referring to "honest" downloads. However, there is no question that it would be, to a certain extent, abused, thereby making the entire process questionable.

Of course one could say the same thing about the standard QSL card stock, but that would take some doing, although, I believe at one time, many years ago, it was abused; long before computers became a household item.

The technology and computer security is out there to be used. It is just a matter of time before it will be implemented.

Have a happy New Year.

Why could not a pgp (or similar) signature be used to validate a qsl
card? It certainly works quite well to validate messages!!!!

Likely some or most is coming from the PC power supply. The AC line cord is radiating the RF just as an antenna. You need to to add an AC line filter to the power supply. Mount it or the chokes inside the supply. I used to see some that replace the AC line cord socket.

Hello all,,
Ive sold a fair bit already, but heres whats left..
The following gear has all been tested and working. Well the stuff that i could test. =)

1. 5 x Brand New Simoco Microphones (Black Colour) in boxes
2. 1 x Ok Condition Phillips microphone
3. 5 x Brand New microphone magnetic holders(still in plastic and with fuse and fuse holders)
4. 6 x Facilities Plugs with rubbers BRAND NEW (no screws, sorry). if you dont know what their for, external ptt, audio , data from back via db15.
5. 1 x Sigtone Ctcss Subtone Board (Working) . Good condition
6. Tait T500 CTCSS board (working)
7. 1 x Speaker bracket to suit new simoco speaker.
8. 2 x PRM8010 windows and labels (New)
9. 6 x Simoco Mic Covers(Some black covers, some grey.. Suit 8025 and Remote 8030)
10. 6 x Phillips lock screws(hard to find and they do the right job)
11. 6 x Kenwood TK370 battery holders. Used when battery is damaged, and has intermittent on off operation.
12. 10 x Kenwood Tk370 volume and channel knobs (Brand New)
13. 3 x Simoco/Phillips Power Cable sets. (Brand NEW never been used)
14. PRM8020 Display heads and shell. (4 digit only). Working or not. As is
15. Motorola Syntrx ORIGINAL SPEAKER. Very Hard to find. In excellent condition
16. Have 5 x Tait T196 30 watt VHF radios, all working. Come with all brackets microphone and power leads etc. Need to get rid of them cause theyve been sitting here for ages and never being used. Very cheap.. Just make me an offer on it. =)
17, 1 x Johnson 800mhz 25 watt mobile, with microphone. WORking in near new condition .. Comes with power lead.

If your after radio programming, i do them very cheap. can basically program all kenwood uhf and vhf, Phillips uhf vhf, Motorola, Tait and a lot of portables ..
or if you want a programming cable, I can cook one up for you. =)

Well thats about it.
If your interested, please email me back on what you are interested in and an offer. Will send only gear around australia. Im looking for an Antenna tuner if anyones interested in a swap. They can take the lot if its an ok

Tuner. Needed for a TS430s Kenwood.

Anyone know anything of this microphone?

I use it and it sounds great, funny thing is, it just has an insert and no amplification involved within the microphone. If anyone knows any info on this mic, would be appreciated.

Tnaks in advance

Anyone with a computer and printer can duplicate straightforward qsl cards easily. I'm not talking about photographic qsl's of course , but the ordinary type used by thousands of dx and other stations around the world. A simple posterboard card can be scanned, duplicated and altered, and the League wouldn't know the difference.

It's been happening for years.

I've even heard of blank DXCC certificates being on sale at hamfests in the States, although I've never seen one :(

It's time the League followed the example of JARL, who no longer require qsl cards as proof of contacts. A signed log is sufficient. Sure you will get folk cheating...but the only person they're cheating is themselves! What does that matter?

This is a **hobby** guys!

And anyway, there are **already** thousands of DXCC and other awards out there that were obtained by the methods detailed above. Anyone who believes that the present system is fully secure is an idiot.

Wake up ARRL - pull your head out the sand and look around at the real world - it'll scare you shitless!

Dave

Stories of fudged cards and certificates have always been with us. Personally I think it is a very small number. We had a local ham who was DXCC Honor Roll, yada, yada, yada. Everyone knew his QSLs were iffy. He lived in a first floor condo and had a wire antenna. He had to get other hams to hook up his equipment as he didn't have the time ... he was retired! He couldn't even copy his own call on CW. How he made it from Novice to Extra in one step has always been of source of discussion. Well, when the Extra Lid, passed away a number of years ago, his YL wanted to donate his QSLs to the club for posterity. The club said thanks and promptly voted not to accept them, in an inoffensive way. Interesting to note his wife received her Extra, kept her maiden name, and her own husband signed off on a bogus VE session, that was reported. Why the long response? Hams are a cross section of society. Sadly not everyone is an A1 op, Elmer, fair trader at flea markets, honest DXer and so on. It is always better to have higher standards, in my view, as those who do achieve the honors have the personal satisfaction of knowing they did it right.
73,
Pete.

Who wants electronic QSL cards???

I've been surfing on and up/downloading from the internet since way back in 1994 (it was still unix then, no grafic browser!), much longer then I am a ham (licenced for HF since October 18, 2000). Just to point out that I'm not anti-internet and that I am pretty familiar with the medium.

I am really looking forward to the point when most of my qsl-cards will be coming in. When I first saw the site of "e-QSL", I feared that I would not be able to read, feel, smell and hold the real paper cards, put them in a box and read 'm all over again when I feel like it. I think that this is the icing on the cake for making the contacts: reveiving a card from the other and of the world (or a little closer), confirming the contact.
Maybe some hams will say that it's cheaper: no printing costs, no stamps, no envelopes, not having to run to an office of the local bureau to collect cards. Well, there's nothing I can say, because this is true. But it is one very important aspect of the hobby (or even "craft") that will disappear...
So I fear the day I receive an email inviting me to download an electronic qsl-card...

Protagonists of the e-QSL: please mark my callsign - I'd rather have no qsl than an e-qsl!!!

All comments are welcome!

Its got a very base driven hump sound which i like. Is that how yours
sounds?

Its been a very good microphone and never missed a beat. Does Shure still
make microphones in this range? I know they make studio microphones.

Doesn't anyone ever get tired of hearing the same arguments ('everyone's
doing it'
and 'it's only a hobby') to justify lowering the standards of amateur radio.

I've heard lots of stories about counterfeit cards but every one I've looked
into has
been just a story (probably prompted by jealousy).

There are lots of awards that are easier to get (and easier to fake) than
DXCC.
But none of them has the prestige of DXCC.

***It is important on how an idea is presented. There is
nothing more enjoyable to me than receiving that long awaited rare
QSL card. Although I do not "stuff" them away in cardboard shoe boxes
I do protect the accredited and deleted cards in a book that is designed
to hold the cards. On occasions I browse through them and enjoy the
memories, as well as the cards.

There is no reason to discontinue this tradition, yet maintain an open
mind to electronic methods for "those who chose to go that route".

I do not believe there is a DXer out there who does not enjoy the recent
revolution of Internet On Line QSO lookups. Great idea! Carry it a step
or two further and couple it to the ARRL DXCC data banks, connect to
the site, enter your callsign and receive your credit, again for those
wishing to do so.

I realize that it is no easy task to develop the system and to ensure
it's integrity. It's coming though, you can bet your QSL card on that.

If you feel strongly about it's implementation, email the DXCC Desk and
your Section/Division representatives. I believe the Desk is working on
such a program but I do not know how much effort/funding is being put
into it. Numbers speak volumes.
73 and a very Happy New Year to all.

The shure 444-D, black mic is a good one and can be used when an impedence such as that for a yaesu 920,990,1000, 726 etc. can be called for. It is a very good mic. and I have used one in the past with good results.

The shure 444 which is a silver\gray mic., is not as good and picks up a lot of 60 cycle noise etc.

Yes I get tired of hearing that it cannot or should not be done. Does no person have pity on the expense of QSLing..
PGP or ANY similar digital signature is ABSOLUTE PROOF , of the origin of a message, at lest as close as is possible to get (Much more certain that the best DNA testing), and that is how you could do it, simple, cheap , effective, WHY NOT NOW?

I'm wondering if anyone can give some insight into this operation...I haven't experienced a "dxpedition" like this one before and I'm curious about it (please note "curious" NOT "critical"). I know Chuck is a NASA astronaut, an M.D., and is on Bouvet with a scientific expedition. Anyone know what they're doing there? Why would an astronaut go to one of the most remote islands of Antarctica (he must like isolation, ? having been on STS 78, one of the longest US space missions)? More to the point, why does he operate for only 10 minutes at a time, then disappear? Does he have generator restrictions? What seems to be his schedule, if there is any consistency to it? I'm in the Pacific NW, so I'm hearing him only around 0100 utc on 20 meters, which must be the wee hours of the a.m. his time. I'm eager to work him for honor roll, so any insights would be much appreciated. Best 73, de K7JY.

Gilbert,

Yes, you are right. PGP or PKI or similar digital signature can be proof that a message originated from a particular point. But unfortunately - from a security analyst's standpoint - that is not the issue. At issue is whether the person handing out digital QSL cards is who they claim to be. Tonight, you or I could easily log onto www.eQSL.ORg, identify ourselves as 3Y0ZZ <or any other rare DX>, create an eQSL account, and within 10 seconds distribute "absolute proof" that these QSLs came from 3Y0ZZ on eQSL.

Fast? yes. Cheap? very. Easy? too easy... in fact much easier than previous methods of cheating the system by having bogus QSL cards printed.

Frankly, I think the Internet is the way QSL exchange will be done in the future (just like on-line e-commerce, voting, utility meter reading, telephony, etc etc etc) but we need a little more security infrastructure before eQSL replaces the shoebox full of cards and the QSL buros. I, for one, will be happy when it gets here, but it ain't ready for prime time yet.

The tone of your questions seems a little short on first read. He is not on a dxpedition, and like another researcher on Macquarie, he seems to enjoy amateur radio and is willing to put the island on the air when the time permits. It is likely none of our business what he is doing there, but we might presume that it is government sanctioned, and it would be quite presumptuous to assume that activities on a remote southern island are not related to the mission of NASA. I haven't a clue why he is operating for short periods during his evenings, but I am quite happy that he is operating at all. Be happy that serendipity strikes from time to time, and that guys on Macquarie and Bouvet are willing to take the time and effort to give you a new entity.

You don't need encrypted anything. The DX station/dxpedition simply
submits an electronic log to the ARRL, then you get credit for a
click when they find you in the log.

They say the problem is that the 'pros' generate too much money
with QSL cards and will refuse to submit logs.

This can be solved by a digital key authenticator that is trusted, like the arrl, no problem at all and impossible to cheat.

There is no excuse for not doing it now. It world interrupt the back door funds to certain groups, but that is no reason not to do this NOW. It owuld change tration but htat is also no reaon not ot do it.

Gary, It is hardly my intention to be "short", and I specifically state my intention.... I am simply very curious about what appears to be a very unique kind of expedition, whether scientific, dx-oriented, or military in nature, and still wonder if anyone has any info about it. Like thousands of hams around the planet, I find this operation to be different from many others, and like these thousands of hams (including yourself), I too am extremely grateful that Chuck is there. Why cast aspersions about "the tone of my questions"?
You wrote: " It is
likely none of our business what he is doing there, but we might presume that it is government sanctioned..." This is the most interesting question of all. As an American taxpayer, I'm not sure if I agree with your comment about being none of our business, but I can assure you that there are a bunch of us that are indeed curious. In order to be short or critical, one first has to know what the business is, so to speak... and I'm as clueless as you profess to be. By the way, I'm a big fan of NASA and those that know me know that I'm a big supporter of the men and women that serve our country in the armed forces. If what they're doing on Bouvet is some sort of secret, so be it (this seems unlikely to me, however). If it isn't, I'd be interested in knowing more about it. Wouldn't you.....?
Best 73s and Happy New Year, de John T. Young, K7JY, Seattle.

Some possibilities which occur to me:

1. Studies relating to the earth's electromagnetic fields near the poles
2. Ozone related studies

I'm sure there's a bunch more, just can't think of any right now :)

>and your director hear from you. Tony N2SS

Well, you wouldn't precisely have to watermark 'em or use any complex
encryption technologies, which might scare people away from the electronic
QSL system. It'd be as simple as providing a secure and permanent means for
verification on your part. Say you contact me. I tell you where you can
get my card, and give you a verification ID. Then you file your
application for DXCC, stating the verification number. So then the
DXCC office contacts me and asks me to verify your card. If I say it's good,
no problems, if I don't say it's good, the card bounces.

The only real work would have to be regarding that last part. You'd have to
develop a system which would allow easy verification of the contacts.
Something which would pull the verification file off your e-mail client,
process it, check your log, confirm, and remail it back to HQ, with maybe a
PGP signature there in between. Shouldn't be too hard. In fact I think you
could probably persuade the major logbook manufacturers to include it as a
feature in future versions of their programs...

Of course, there's nothing like a nice printed QSL arriving in the mail
after 2 months of hopeful waiting :)

Photographic QSLs aren't any exception to the rule. You just need a higher resolution scanner/printer. Here there's a local Fuji processing store which offers duplicates of your pictures, as good as the originals, with no negative. In fact the copy is so good the government imposed a restriction on duplicating official certificates and documents a few years ago.

And if you don't want to make the trip downtown, you can simply get yourself a $200 HP scanner, set it to a high enough resolution, scan the card, process it and take it to your local digital print shop to get it printed... contact any country in the world for $210

Not that I've ever duplicated a card... I prefer mine authentic :)

Might be the supply, might not be. There's many components in there which
can emit RF on amateur bands, many newer versions of components have failed
to correct the problem even though it's been there for some time. I have a
PC in the shack which is only a couple of years old and it still causes
noticeable problems on 146 MHz.

And yes, moving the receiving equipment away from the source of the noise is
one of the primary recommendations of the FCC for handling RFI, and a good
place to start.

The only consistency I've found is when I come down to the shack, see
him called out on packet about 15 minutes ago, go to the freq and he's
gone already. Also, I see a lot of "back in one hour" and it never
happens.
Can't say I blame Chuck. Once the packet spot hits, all the idiots
show up and start calling even before they hear him. Maybe his best
rates happen when he shows up somewhere unannounced, then he QRTs when
it becomes unmanageable.
At least he won't tell us in 4 months that he only will issue eQSLs
:.)

I don't believe that it has anything to do with the ozone layer. I'm a NASA scientist who studies the ozone layer and I'm unaware of any current expedition in Bouvet for that purpose. It's also not really the right time of year to look at ozone depletion (which takes place around the Antarctic springtime in September-October). But, I'll check into it.

Judging from the www.qsl.net/zr1dq site, it appears that Chuck is involved with seal/penguin studies. I believe that he is there with several Norwegian scientists. He may simply be the resident medical doctor for the expedition. Given that they're on Bouvet for several months, it would make sense to have a doctor in case of medical problems. I imagine that we'll hear more about it in the near future.

IT IS TOO OUR BUSINESS WHAT HE"S DOING THERE!.It 's our tax money being spent.
K7JY has every right to ask who, what, where, and why.
NASA is a public agency, doing public business, and if the PEOPLE are going to
"sanction" its operations, we have to know what those operations are.
I personally like the Idea of 3Y0C and Dxpeditions, and if he likes working DX during
his off duty time more power and applause to him.
BUT if he is there for NASA business, K7JY has a legal right to ask: why?

Tradition, and the time needed to set up a SYSTEM for handling E-QSLs,remember
not everybody is on the internet, and those cards that DXers are most keen to
receive come from the exact same places where the internet connections are the
most scarce. (have you ever heard of an ISP on Clipperton,or Macquarie, or
BIOT?)
Besides, I just happen to like the little pieces of artwork that some cards
happen to be.

SB DX @ WW < KB8NW $OPDX.492
Ohio/Penn DX Bulletin No. 492

The Ohio/Penn DX PacketCluster
DX Bulletin No. 492
BID: $OPDX.492
January 1, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2KW, W3UR & The Daily DX, WB3LHD, K4PI, K4ZLE, KN4UG, N4AA & QRZ DX, W4WSZ, WB4PVT, N5FG, N7NU, K8YSE, F5NOD, F6AJA & Les Nouvelles, I1JQJ/IK1ADH & 425 DX News, JI3DST, OE8CIQ, PY2KQ, PY3CQ and RW3GU for the following DX information.

SPECIAL EDITOR'S NOTE: My family (wife/OPDX's chief proof-reader Linda, Tedd [TJ], Katie) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy New Year". The year 2000 was a great year for DXers/Contesters. It brought two new DXCC entities, East Timor and Chesterfield Island. The year 2000 has also brought DXers activity from Bhutan (A5). For years this entity has been the number one most wanted country. It has also brought us Bouvet (3Y), Clipperton Island (FO0) and Tromelin Island (FR/T), just to name a few. WOW, what a year! Let's hope that the year 2001 will be just as kind to DXers as 2000 was. Many would like to see a major operations to North Korea (P5) and Scarborough Reef (BS7). After working one or both of these entities many DXers would probably receive the ultimate "ARRL DXCC #1 Award". Also, let's hope the new year brings the DXers/Contesters another exciting year and great band conditions. As always, I would like thank the many who have contributed information over the year (there are too many to list). REMEMBER, without them there would not be an OPDX Bulletin.

3B8, MAURITIUS. There has been a lot of activity from this one over the last few months. Abid/3B8FG, Jacky/3B8CF, Rashid/3B8FQ and Pat/3B8GF have been quite active on 20 meters, generally after 0200z. Pat usually can be found on SSB while the others are on CW. There has been some 10 meters CW/SSB QSNs by 3B8CF and 3B8FG after 1200z.

3Y0, BOUVET. Astronaut Chuck Brady, N4BQW, continues to be active in between the bad weather he has been receiving. This past week he has been active on a few other bands besides 20/15/10 meters. There were spots on 12 meters (24945 kHz between 1400-1900z), 40 meters (7096 kHz between 0045 and 0130z) and 80 meters (3790 kHz between 0100 and 0200z).

QSL via WA4FFW. Also, watch the following Web pages for updates:
http://www.qsl.net/zr1dq
http://www.qsl.net/wd4ngb/3y0.htm

4D68, PHILIPPINES. This special prefix is being used by some DU operators to celebrate the 68th anniversary of the Philippine Amateur Radio Association. Aki, 4D68HBC, was heard this past week. QSL via JA1HBC.

4S, SRI LANKA. Ananada, 4S7NB, likes to frequent 20 meters (between 14180 and 14205 kHz) after 0100z.

5R, MADAGASCAR. Albert, 5R8O, continues to please the many on 20 meters CW around 14015 kHz (+/- 3 kHz) after 0200z. QSL via 5R8FL. For the SSB ops, Andre, 5R8FL, likes between 14185 and 14200 kHz after 0230z. He sometimes can be found on 10 meters, this past week on 28507 kHz at 1145z. QSL via CBA. Ake, 5R8FU, was also active on 10 meters CW/SSB. He was around 28029 kHz (0930-1000z) and 28442 kHz (1230-1400z). QSL via SM5DJZ.

5U, NIGER. Dan, 5U7DG, was heard on 3796 kHz this past weekend around 0100z and again at 1600z. QSL via K4SE.

8Q, MALDIVES. The "425 DX News" reports that Gil, IZ1DLV, will be active from Dhiggiri Island (AS-013) from January 2-9th. He will operate on 10, 12, 15, 17 and 20 meters SSB. There was no callsign mentioned. QSL direct ONLY to IZ1DLV: Gil, P. O. Box 7039, 16148 Genova - GE, Italy.

9H, MALTA. ALbert, 9H1AL, has been active on the WARC bands. He seems to like 12 meters lately. Check around 24900 or 24957 kHz between 1530z and 1630z. Also, check 18070 kHz around 1730z and 10103 kHz beginning around 2300z. He was also on 40 meters (7004 kHz) around 0030z.

9N, NEPAL. Lawrence, 9N7RB, in Katmandu, has been active on 20 meters CW/SSB between 1230-1300 and around 0200z. Check around 14010 and 14190 kHz.

9V, SINGAPORE. James, 9V1YC, has been keeping folks happy on 40 meters CW on 7011 kHz beginning around 2200z. He later moves to 15 or 20 meters around 2300z. Check 14025 and 21021 kHz.

A5, BHUTAN. "QRZ DX" reports that another operation from here will take place by Dimitri, RA9CO, as A52CO, scheduled for March 15-21st. He has his visa and tickets. QSL via UA9DD. ADDED NOTE: Remember to look for Glenn, W0GJ, and his son Mark, N0MJ, to be active this week as A52GJ and A52MJ.

ANTARCTICA. The "Russian Robinson Club" is proud to announce that the "International Complex Expedition" to the South Pole will take place from now through January 15th, with possible activities from D4/, CE8/R3RRC (Punta Arenas), R3RRC/ant (Patriot Hills Base - WABA MN-01) and from an air balloon above the South Pole as R3RRC/am. Operators will be RW3GW, UA3GVV and UA0XB. QSLs are via RW3GW. Also, for two QSOs made on two different bands or with two different callsigns during the Expedition, it is possible to receive a "Special Award" in honor of the 180th

anniversary of the discovery of the Antarctica by the famous Russian Explorers and Icemen Bellinghausen and Lazarev. The fee of the Award is 12 IRCs for the HAMs outside of Russia. (USD are not acceptable) The Award Manager is: Valery I. Sushkov, RW3GW, P.O. Box 3, Lipetsk - 398000, Russia.
The "Russian Robinson Club" also plans to activate the Chilean island "Riesco" in the Magallanes and Antarctica Chilean Province Group from January 15-20th, with the possible callsign XQ8RI. Operators will be RW3GW, UA3GVV and UA0XB. QSL via UA9OBA. For more details on both operations check the Web page: http://rrc.sc.ru

BA, CHINA. David, BA4DW, has been very active lately on 80 and 40 meters CW. Check 7000-7025 kHz starting around 1000z and around 3500-3515 kHz between 1230 and 1430z. QSL via: David Y.J. Zhou, P.O. Box 040-088, Shanghai, 200040, China.

C6, BAHAMAS. Lee, N7NU, will be in Treasure Cay on Abaco Island from January 18-26th, as N7NU/C6A and/or C6AJX. Activity will be on 80-10 meters and MAYBE 160 meters upon request. He will concentrate on CW and will try some PSK31. There is one catch to his activity, Lee states, "The hamming is (gasp!) secondary to vacation with my girl friend :-) ". QSL via N7NU.

CORRECTION TO OPDX.491. Under "T8, PALAU", we reported that Koji, JK7TKE, would be active this past week as T88TU from Belau. This operation took place earlier back in the fall.

D2, ANGOLA. Gabriel, D2EB, was active on 10/15 meters CW this past week on 21025 kHz between 2100-0000z and 28030 kHz 0900-1300z. QSL via I3LLH.

DIFO WEB PAGE UPDATED. Gil, F5NOD, CW operator for the FR/F6KDF/Tromelin Island 2000 expedition, reports that the "French Overseas Island Award" (DIFO) Web site has been update and now has some QSL pictures available on the site. Check it out at: http://f5nod.waika9.com/difo.html

DXCC NEWS.....
"QRZ DX" reports that Bob, W4VQ, has filed a petition to the DXCC and DXAC asking them to consider the removal of Macao (XX9) from the DXCC List in accordance with DXCC Rule 5. This comes as a result of Portugal turning Macao over to China, December 20, 1999.

The DXCC Desk is reporting that it takes about 8 weeks for processing QSL cards now.

DXPEDITION UNIVERSITY (Learn the Art of DXing in Jamaica!). Kenny/K2KW and Tom/N6BT informed the DX community that after 10 years of planning and 2 years of writing materials, DX University is now a reality. You have a chance to go to Jamaica and "Learn the art and 'How To' of DXpedition Planning and Running Pileups!" DXpedition University ("DXU") is the first of its kind to provide a training ground for energetic radio amateurs wanting to learn the foundational methods and tactics of DXpeditioning. A group of 6-10 hams will go to a proven site in Jamaica (6Y). Participants become part of a team, just like the World Record

6Y2A Team. Learning begins before the trip with planning procedures and continues through the Jamaica stay. With expert hands-on training, team members will be shown the essential skills needed to feel confident about venturing out on their own DX-oriented vacations and in their ability to run and control pile-ups. There is not only personal instruction, but also hard copy manuals covering all aspects are also included. Besides setting up a complete multiple transmitter station and running DX pile-ups during the week, the team will participate in the A.R.R.L. SSB contest, with additional pointers provided during real-time. This is a learning environment, and all questions will be answered and fully explained. The Jamaican accommodations are radio-oriented (not a luxury hotel) and include full time staff, transportation (private driver), plus side trips during the week. To learn more about DXU and how you can join the team in Jamaica, visit the DXU site at: http://pages.prodigy.net/k2kw/dxu/

EP, IRAN. Mohsen, EP3SMH, was active over the holiday weekend on 15 meters SSB on 21286 kHz starting around 1300z. EP2MKO was heard on 10 meters CW the past week between 1230 and 1400z. He was also heard on 18070 kHz after 1400z.

FG, GUADELOUPE. Jacques, F6HMJ, will be active as FG/F6HMJ from here from January 10-24th. His modes and bands of activity were not mention.

FR5, REUNION ISLAND. Pat, FR5FD, was heard active this past week on the WARC bands. On some bands begging for a contact. Check 30 meters starting around 0130z and as late as 0330z. Check 17 meters around 18075 kHz around 0030z. Check 12 meters 24893 kHz between 1200 and 1500z.

HR, HONDURAS. Jay, K4ZLE (MU0BKA), will be activae as HR3/K4ZLE from January 12-15th. Activity will be on all HF bands, preference will be given to CW and the WARC bands. He will have PSK31 with him. QSL via K4ZLE.

IOTA NEWS.....
AS-047. Takeshi "TAKE", JI3DST, will be active from Daitou Island (Daitoujima Shimajira-gun Okinawa-ken) now through 0200z January 7th. He will sign as JI3DST/6 on 40/17/15/10/6 meters SSB. QSL via JI3DST: Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN.

NA-213. Floyd, N5FG, reports to OPDX that the "Magnolia DX Association" has confirmed/planned a trip to Dauphin Island, Alaska, (New IOTA) for late February 2001. There will be at least two station active with many ops...etc.. The special callsign W4D will be used. Activity will be on the usual IOTA frequencies 80-10 meters and on all modes including PSK31 and RTTY. Operation will last 3 days and 2 nights (start on a Friday afternoon and last until Sunday night - local times). QSL via W5UE or via the W5 QSL Bureau.

OE75, AUSTRIA. Chris, OE8CIQ, reports that from January 1st to December 31st (2001) all amateur radio stations in Austria are allowed to use the

special prefix OE75 to celebrate the 75 anniversary of the OEVSV (this is the Austrian amateur radio club). He (Chris) will be on air as often as possible using the callsign OE75CIQ. There will be several awards that will be issued by the OEVSV. You can find more information on Chris's homepage at: http://www.edu.uni-klu.ac.at/~cirrasch

QSL INFO AND NEWS.....
Mike, K4PI, informs OPDX that Nasir, AP2NK, has asked him to relay the following: "those sending QSLs should not use his P.O. Box that is listed in the Callbook, but to use his street address shown in Buckmaster and QRZ. The P.O. Box is not very secure..."

Gil, F5NOD, member of the FR/F6KDF/Tromelin Island 2000 expedition, informs the DX community that they continue to work on the FR/F6KDF/T QSLs. They have received the QSLs from the printer one month ago. They have more than 10,000 QSL cards ready to be mailed, but they will mail all of the QSLs at the same time. The first QSL will be sent out around the 15th of January 15th.

Laurent, KM5M, is the QSL Manager for FO5RA. He states that the QSL cards aren't printed yet but will begin working on them in a few days.

Bob, W4WSZ, reports that he will not be handling cards for P43DO after January 1st, 2001. Please QSL direct P43DO.

Ben, PY2KQ (PP500A), informs OPDX that all QSLs for the PP500A operation are now being send to all operators via the Bureau and the direct QSLs are being returned direct.

QSL ROUTE FOR VK0MM. Just a reminder to watch for Alan's QSL route on the following Web site: http://www.geocities.com/vk0ld/QSLVK0MM.html

Buckmaster HamCall Notification Service: Registered HamCall users can take advantage of HamCall Notification Service. If you look up a call on Buckmaster's callsign server at http://buck.com/call
and it is not found in their database, the HamCall Notification Service will ask you if you wish to be notified when the callsign is found. All you must do is enter your HamCall User Name and Password and your request will be stored and automatically checked every day. When they add the callsign to their database, you will receive a courtesy E-mail announcing the callsign has been added. It also provides you with a link to the HamCall callsign lookup site. Each time you request a notification you will be shown a list of other requests you have made that are currently outstanding. http://www.buck.com/haminfo.html

SPECIAL EVENT. The XI Panamerican Jamboree will gather 8,000 Scouts from all America, for a joyful start to the new millennium, with 6 days of fascinating activities in spectacular natural settings like the Iguau Falls and the ecological Park in Paraguay, as well as the lake and the power station of Itaipu. The XI Panamerican Jamboree will happen on January 7-12th. A special station will be active for the event. Look for station PS5J to be active on all modes and bands. QSL via PY5UEB. Also, check out

the Web page at: http://www.jamboree.org.br/

T2, TUVALU. Albert, HB9BCK, is active as T20CK until January 8th. He has been very active 20/12/10 meters CW/SSB. Most of his activity seems to start around 2030z and lasts until 0500z. Frequencies to watch for are (or around): 14005, 14260, 24895, 24970, 28005 and 28495 kHz. QSL via the bureau or CBA.

VP5, TURKS AND CAICOS ISLANDS. Don, KN4UG, will be operating from here during January 19-30th, 2001. He will operate in the 160 Meters Contest and the NA QSO Contest on the weekends. During the week he will be active mostly on 28460 kHz as KN4UG/VP5. QSL to his home callsign in N.C.

WEB SITE CHANGE. Ron, WB3LHD, WPADXA Webmaster, informs OPDX that the "Western PA DX Association" Web site has moved to the following URL: http://home.adelphia.net/~rcberry/wpadxa/
Please update your URL's and bookmarks. They are sorry to all for the inconvenience.

XW. LAOS. Mauro/IN3QBR and Fabry/IN3ZNR are very active now from here until about January 8th as XW3QBR and XW3ZNR. Most of the activity has been on 20 meters CW/SSB with some activity on 15 meters.

YK, SYRIA. Excerpts from a press release by Bernie, W3UR, editor of "The Daily DX" report that the Cinco Nueve Contest Group (CNCG) and the Willamette Valley DX Club (WVDXC) are sponsoring a DXpedition to Syria. "DX Syria 2001" is a non-profit organization formed for the promotion and organization of this expedition. The Syrian government and local Syrian hams invited an American team of 8 operators for a February 2001 DXpedition at the Syrian Telecommunication Establishment (STE) site in Damascus. The group hopes to be on the air February 3rd. The group will be active for 9 days. The STE operating site is the same one used by the 1994 YK0A expedition. The group has been assigned YK9A and plans to be active on 6 through 160 meters on CW, SSB and RTTY. Team members will include: Ron/WJ7R, Dick/N7RO, Bob/W4DR, Rosalie/N4CFL (YL), Carl/K9LA, Vicky/AE9YL (YL), Jim/W4PRO and team leader Al/K7AR. QSL cards will be handled by K9LA: Carl Luetzelschwab, 1227 Pion Road, Fort Wayne, IN 46845, USA. The DX Syria 2001 Web site can be found at: http://www.qsl.net/k7ar
The Web site will include pre-trip news, setup news, propagation conditions, updated daily online logs and suggested operating frequencies. (OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.)

ZB, GILBRALTAR. Jay, K4ZLE (MU0BKA), will be active as ZB2/K4ZLE from January 12-15th. Activity will be on all HF bands, with a preference to CW and the WARC bands. He will have PSK31 with him. QSL via K4ZLE.

I agree!!!! Having ARRL as a CA (Certification Authority) and other
trusted groups as CA to issue certs is the only way to go. It doesn't
require a internet connection or anything else to have proof positive
that it came from the person that claim they sent it.

Happy DXing
-darryl WA1GON
